

My Plant Photo Gallery

Watching Nature Grow!

Do you have plants at home?

Have you seen how they grow?

1. First, we plant seeds.

2. Then, small stems and leaves appear.

3. Finally, it grows into a big, strong plant!

Meet Our Class Plant!

We will water this sapling carefully.

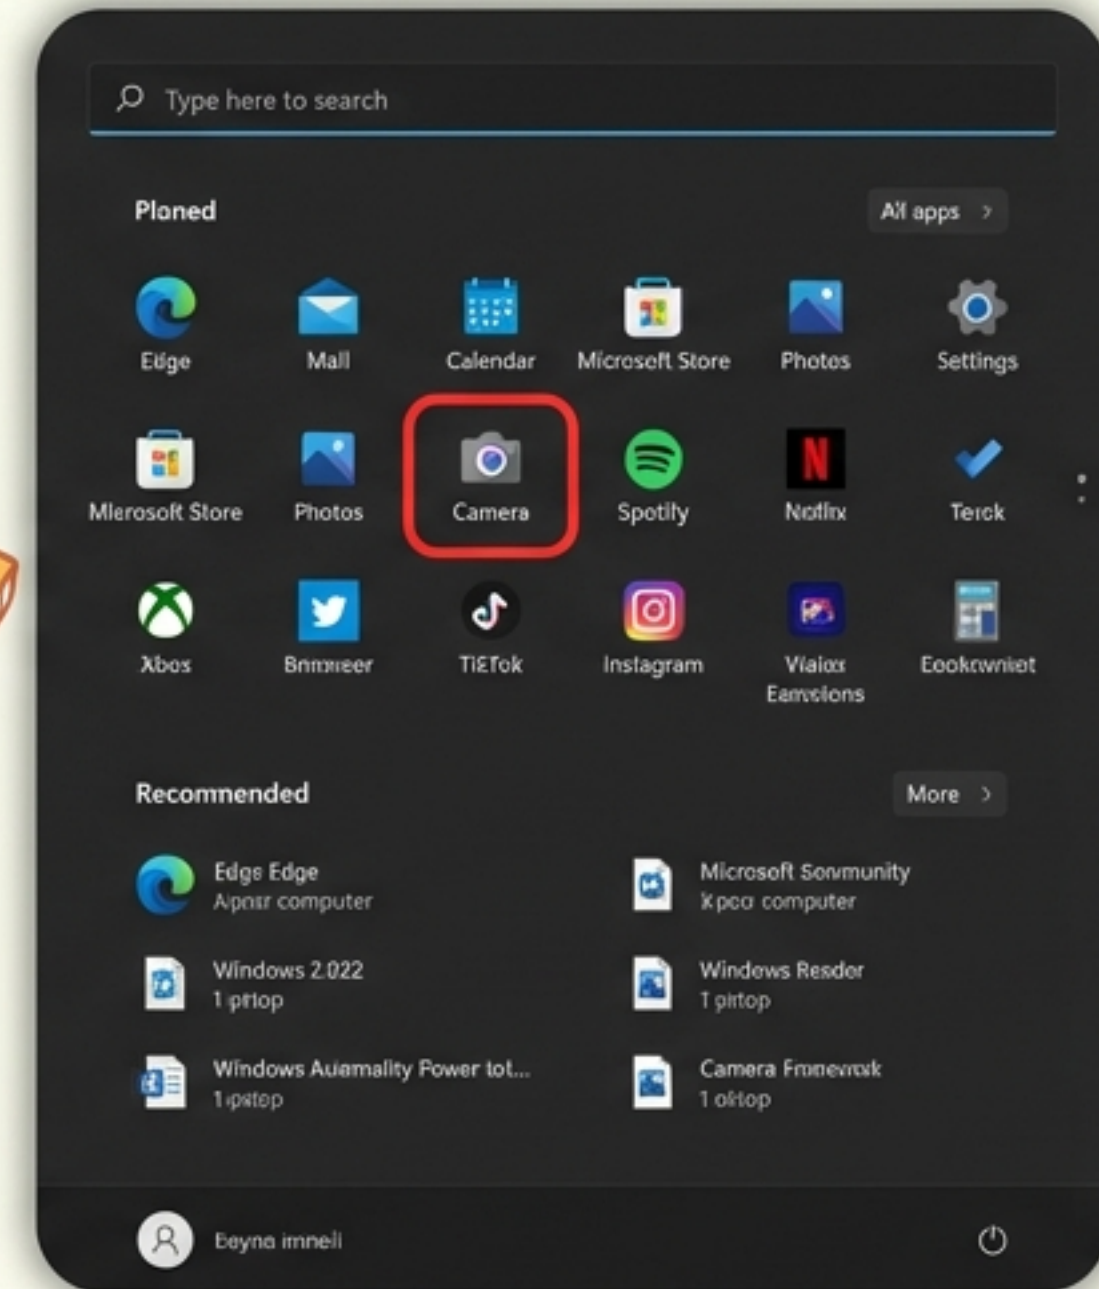

Our Mission: We will take a picture of it every week to watch it change.

Let's use the computer to help us see the difference!

Step 1: Open the Camera App

1. Go to the Start Menu on your computer.
2. Type "Camera" in the search bar.
3. Click the camera icon to open it.

Step 2: Snap the Photo!

- Point the camera at the plant.
- Make sure the plant is in the middle.
- Click the Camera Button. Click!

Look! It is getting bigger!

Week 1 (Small)

Week 2 (Growing)

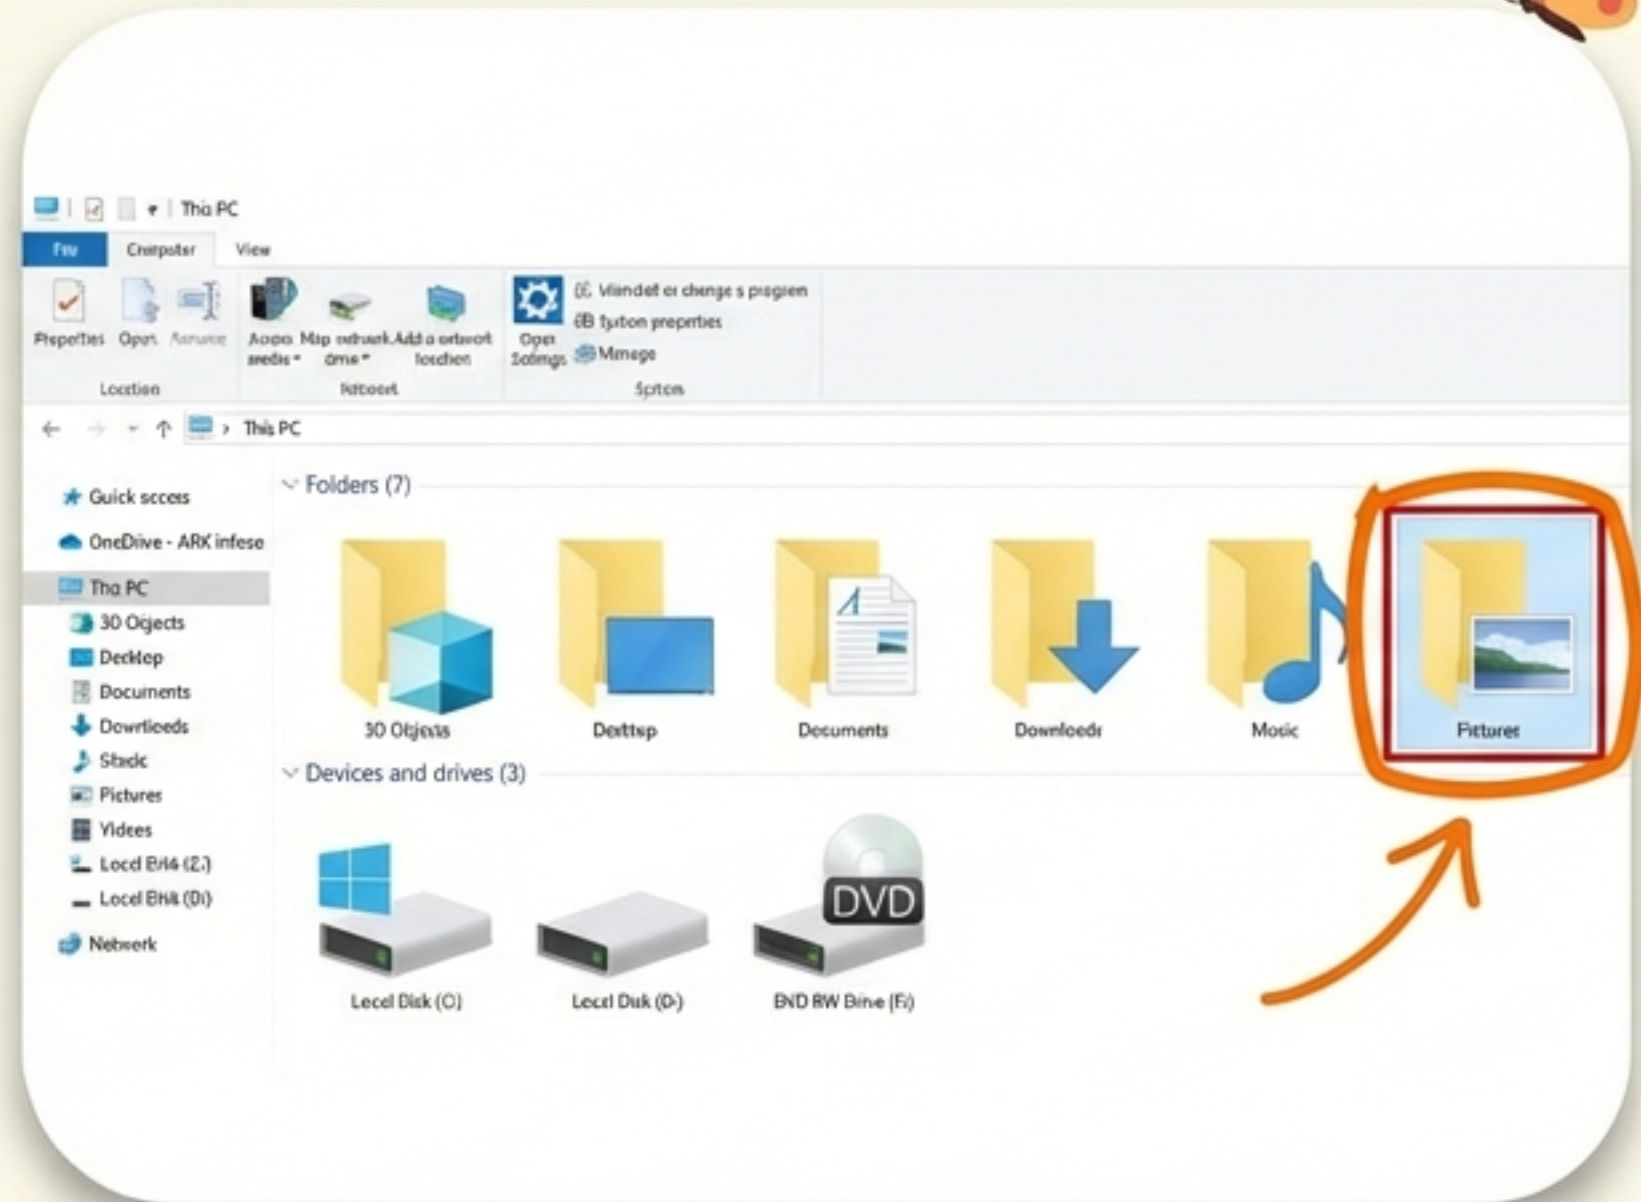

Week 3 (Big leaves!)

When we take photos every week, we can see exactly how much it has grown.

Step 3: Let's Find Our Photos

Where did the photos go?
We need to find them to
keep them safe.

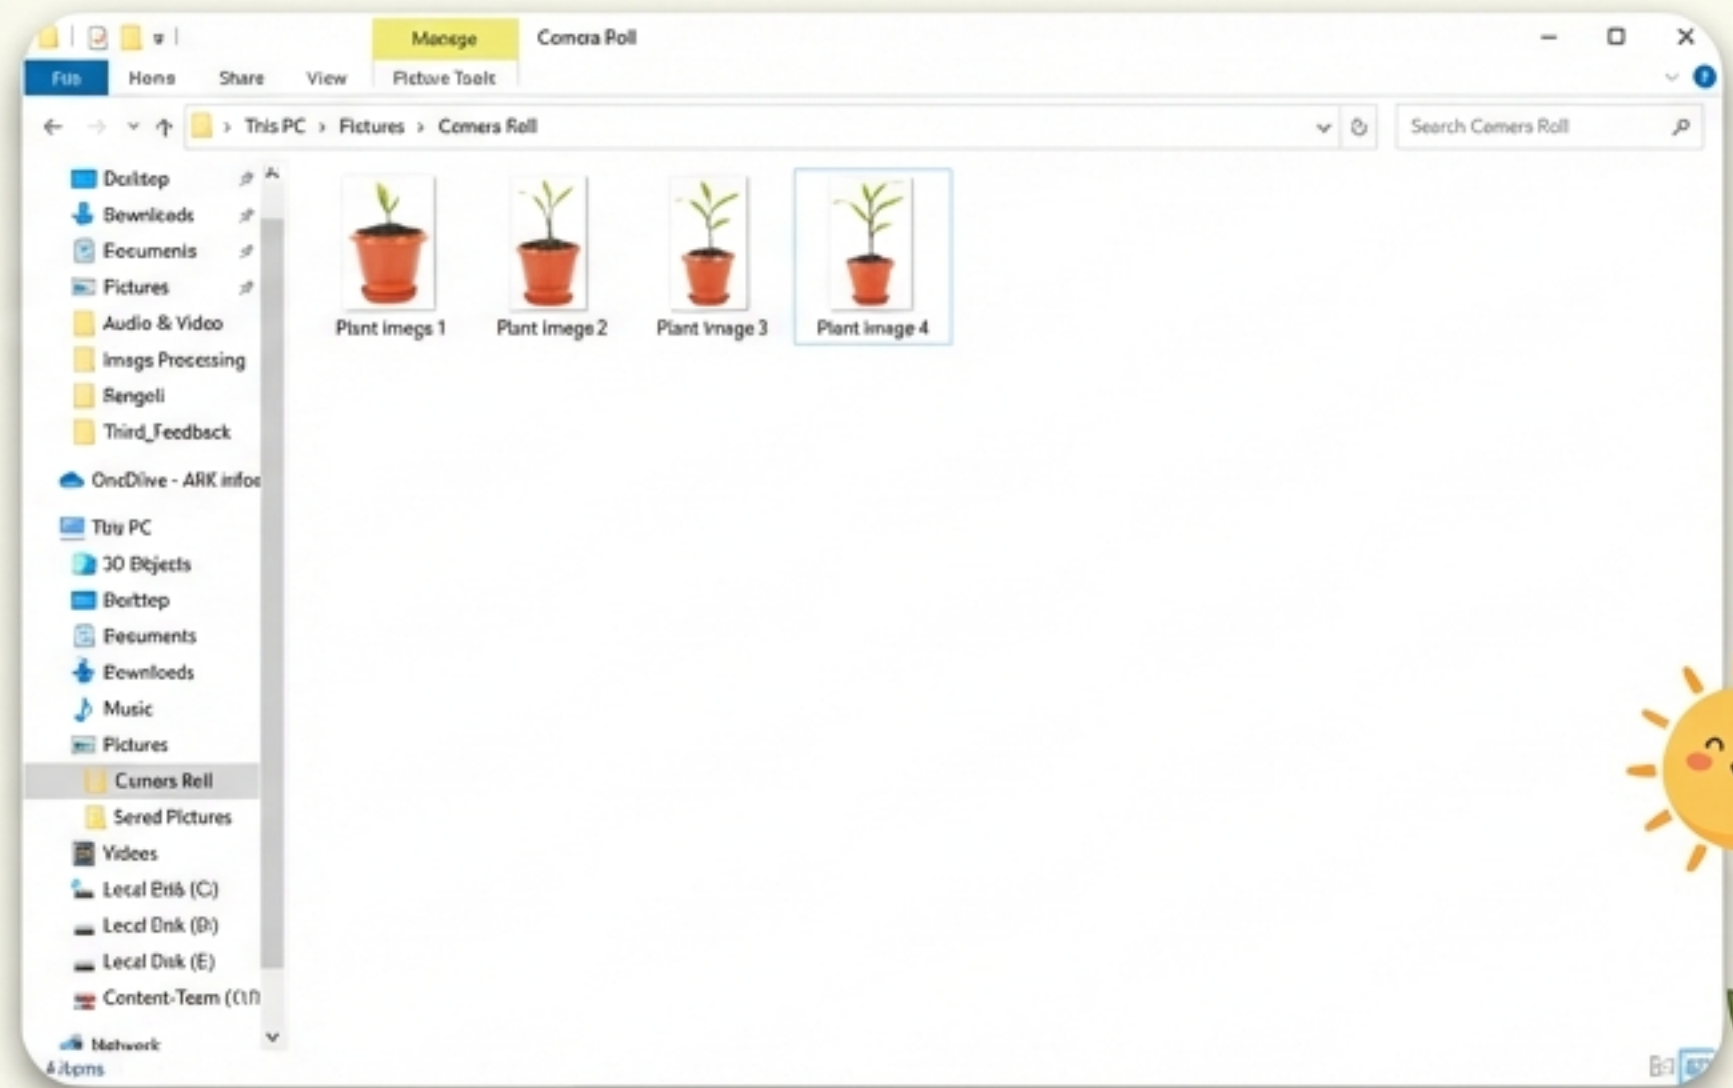

- Open the "This PC" window.
- Look for the yellow folder named Pictures.
- Double-click to open it.

Inside the “Camera Roll”

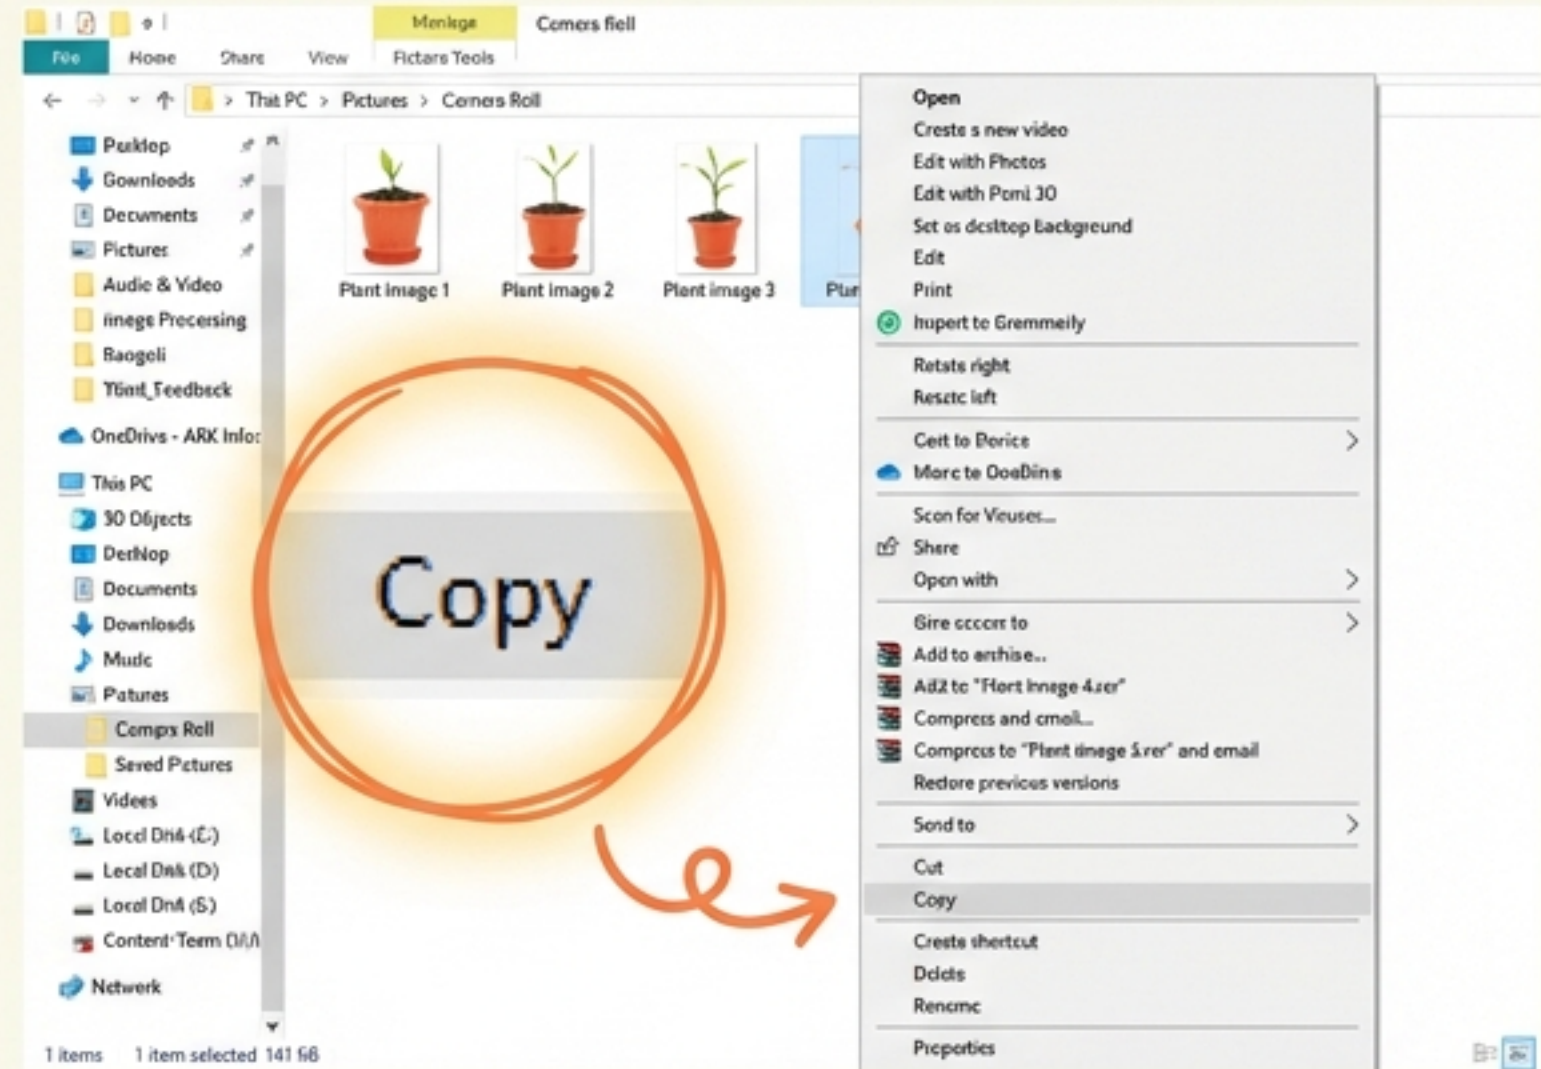

You will see a folder called Camera Roll. Open it up!

Look! There are our plant pictures: Plant Image 1, 2, 3, and 4.

Step 4: Copy the Photos

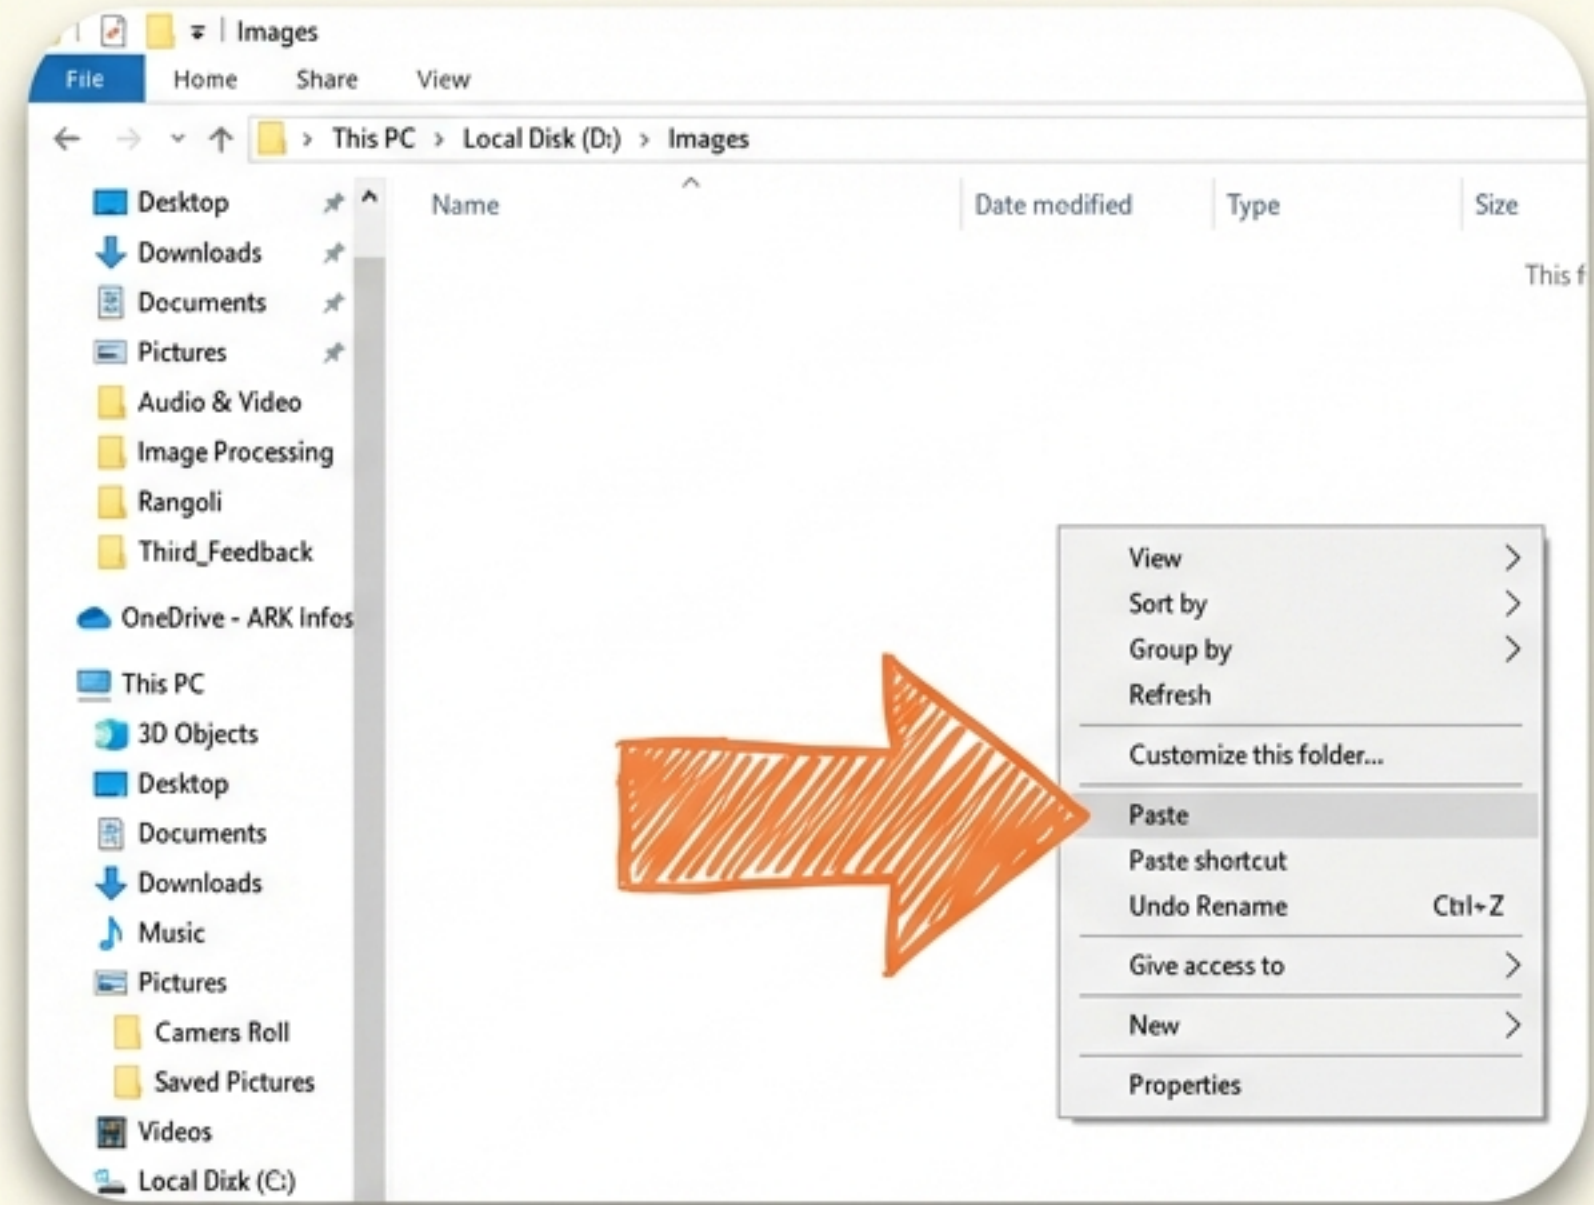

1. Click on the picture you want to save.
2. Right-click on the mouse.
3. A menu will pop up. Click on **Copy**.

Tip: This takes a magic copy of the photo so we can move it to a new home!

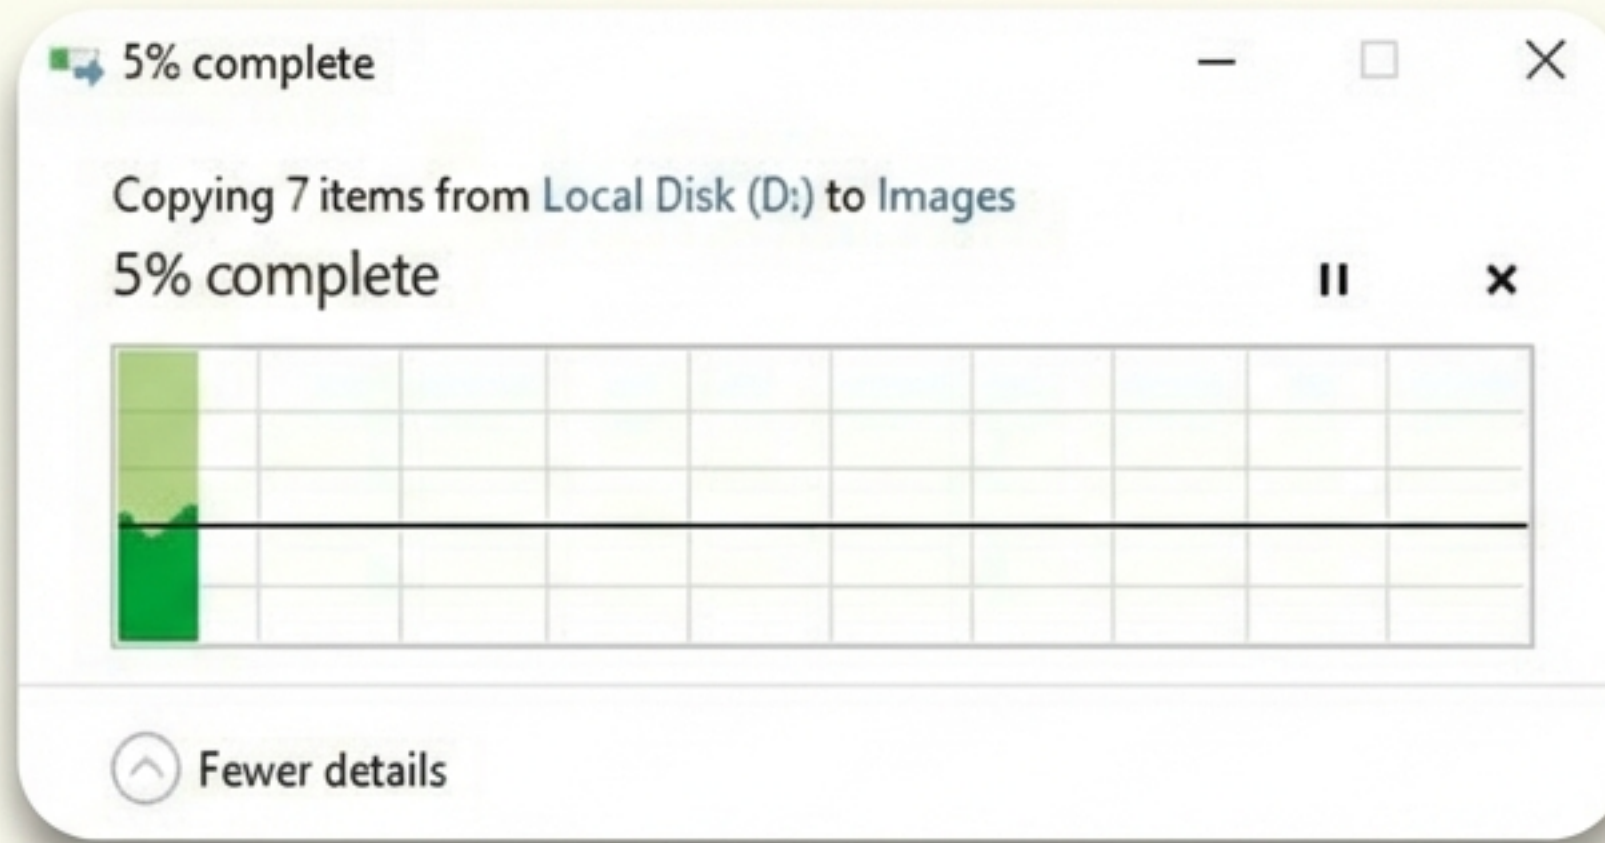

Step 5: Paste into Your Folder

1. Go to your own folder (or make a new one called 'My Plant').
2. Right-click on the white space.
3. Click on Paste in the menu.

Tip: Now your photo has a new home!

Wait for it...

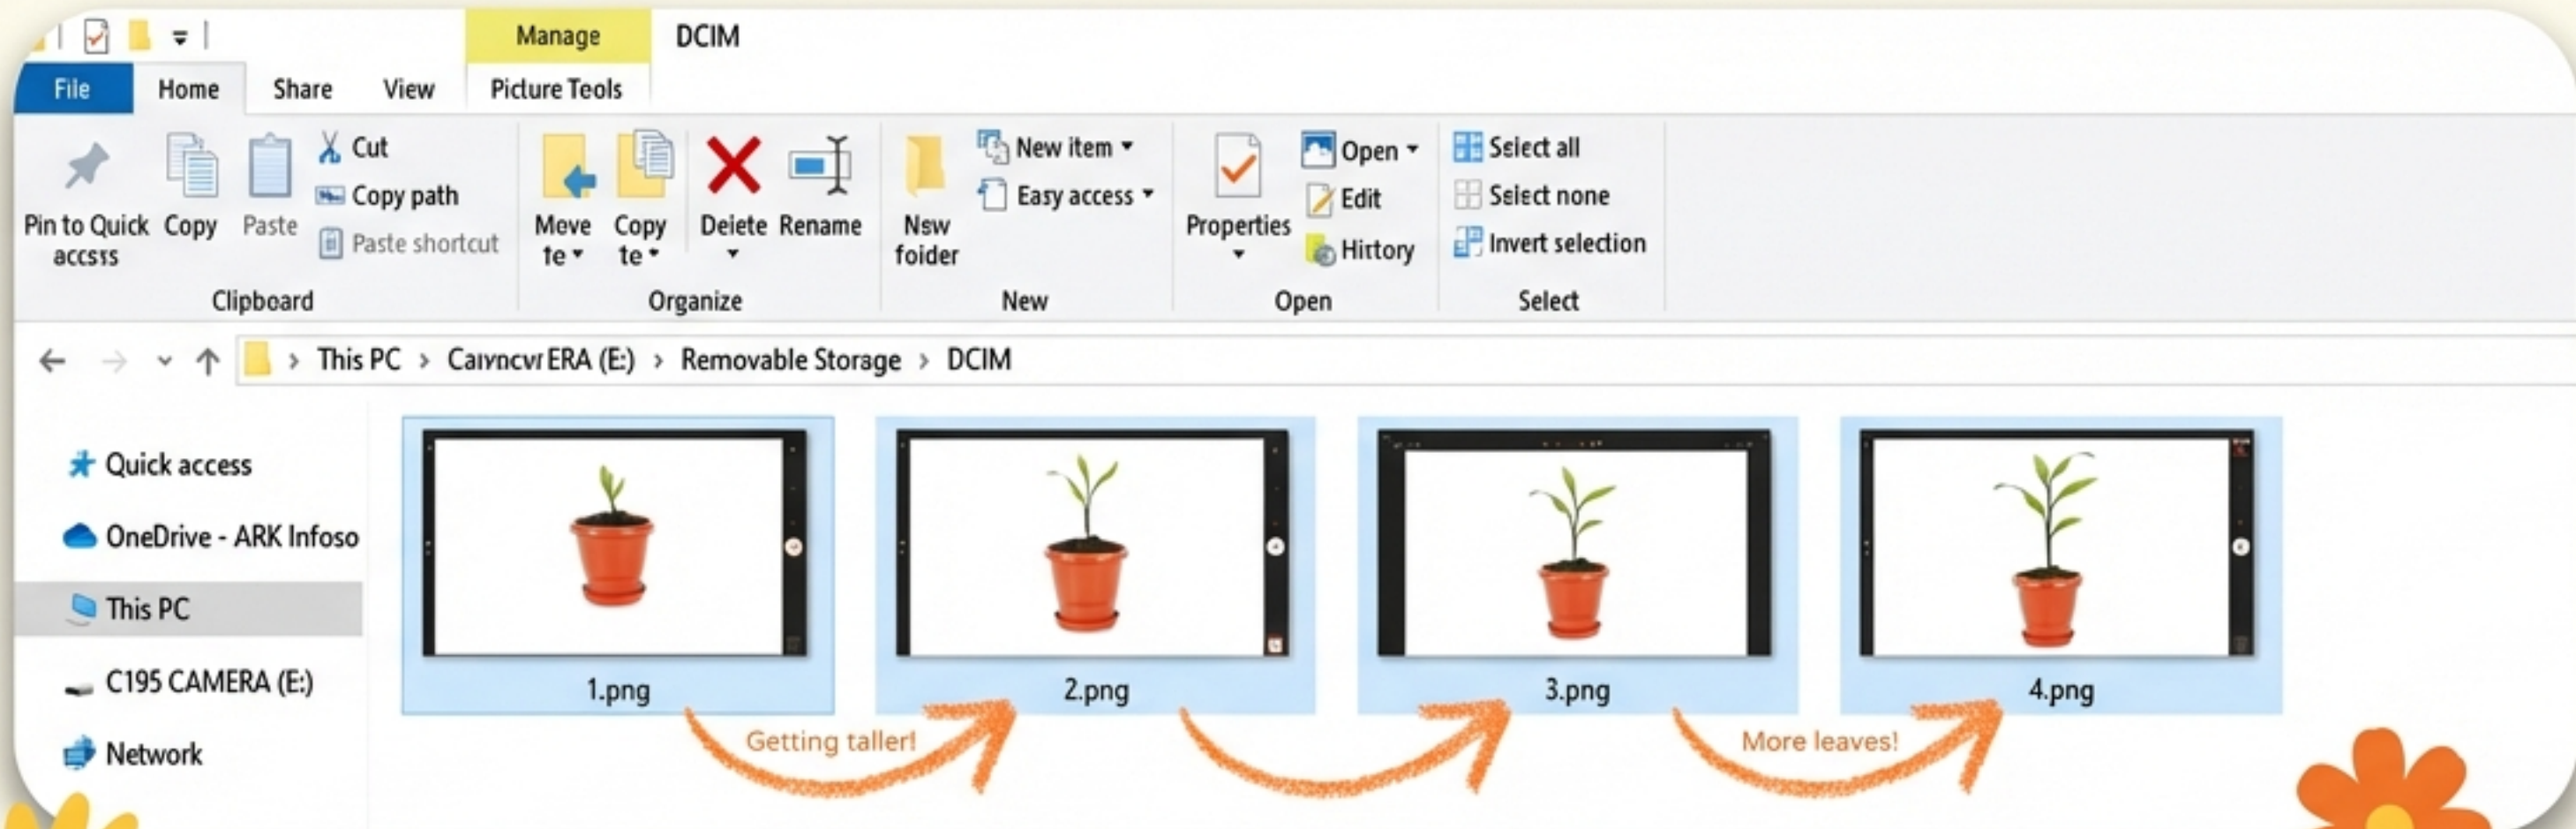

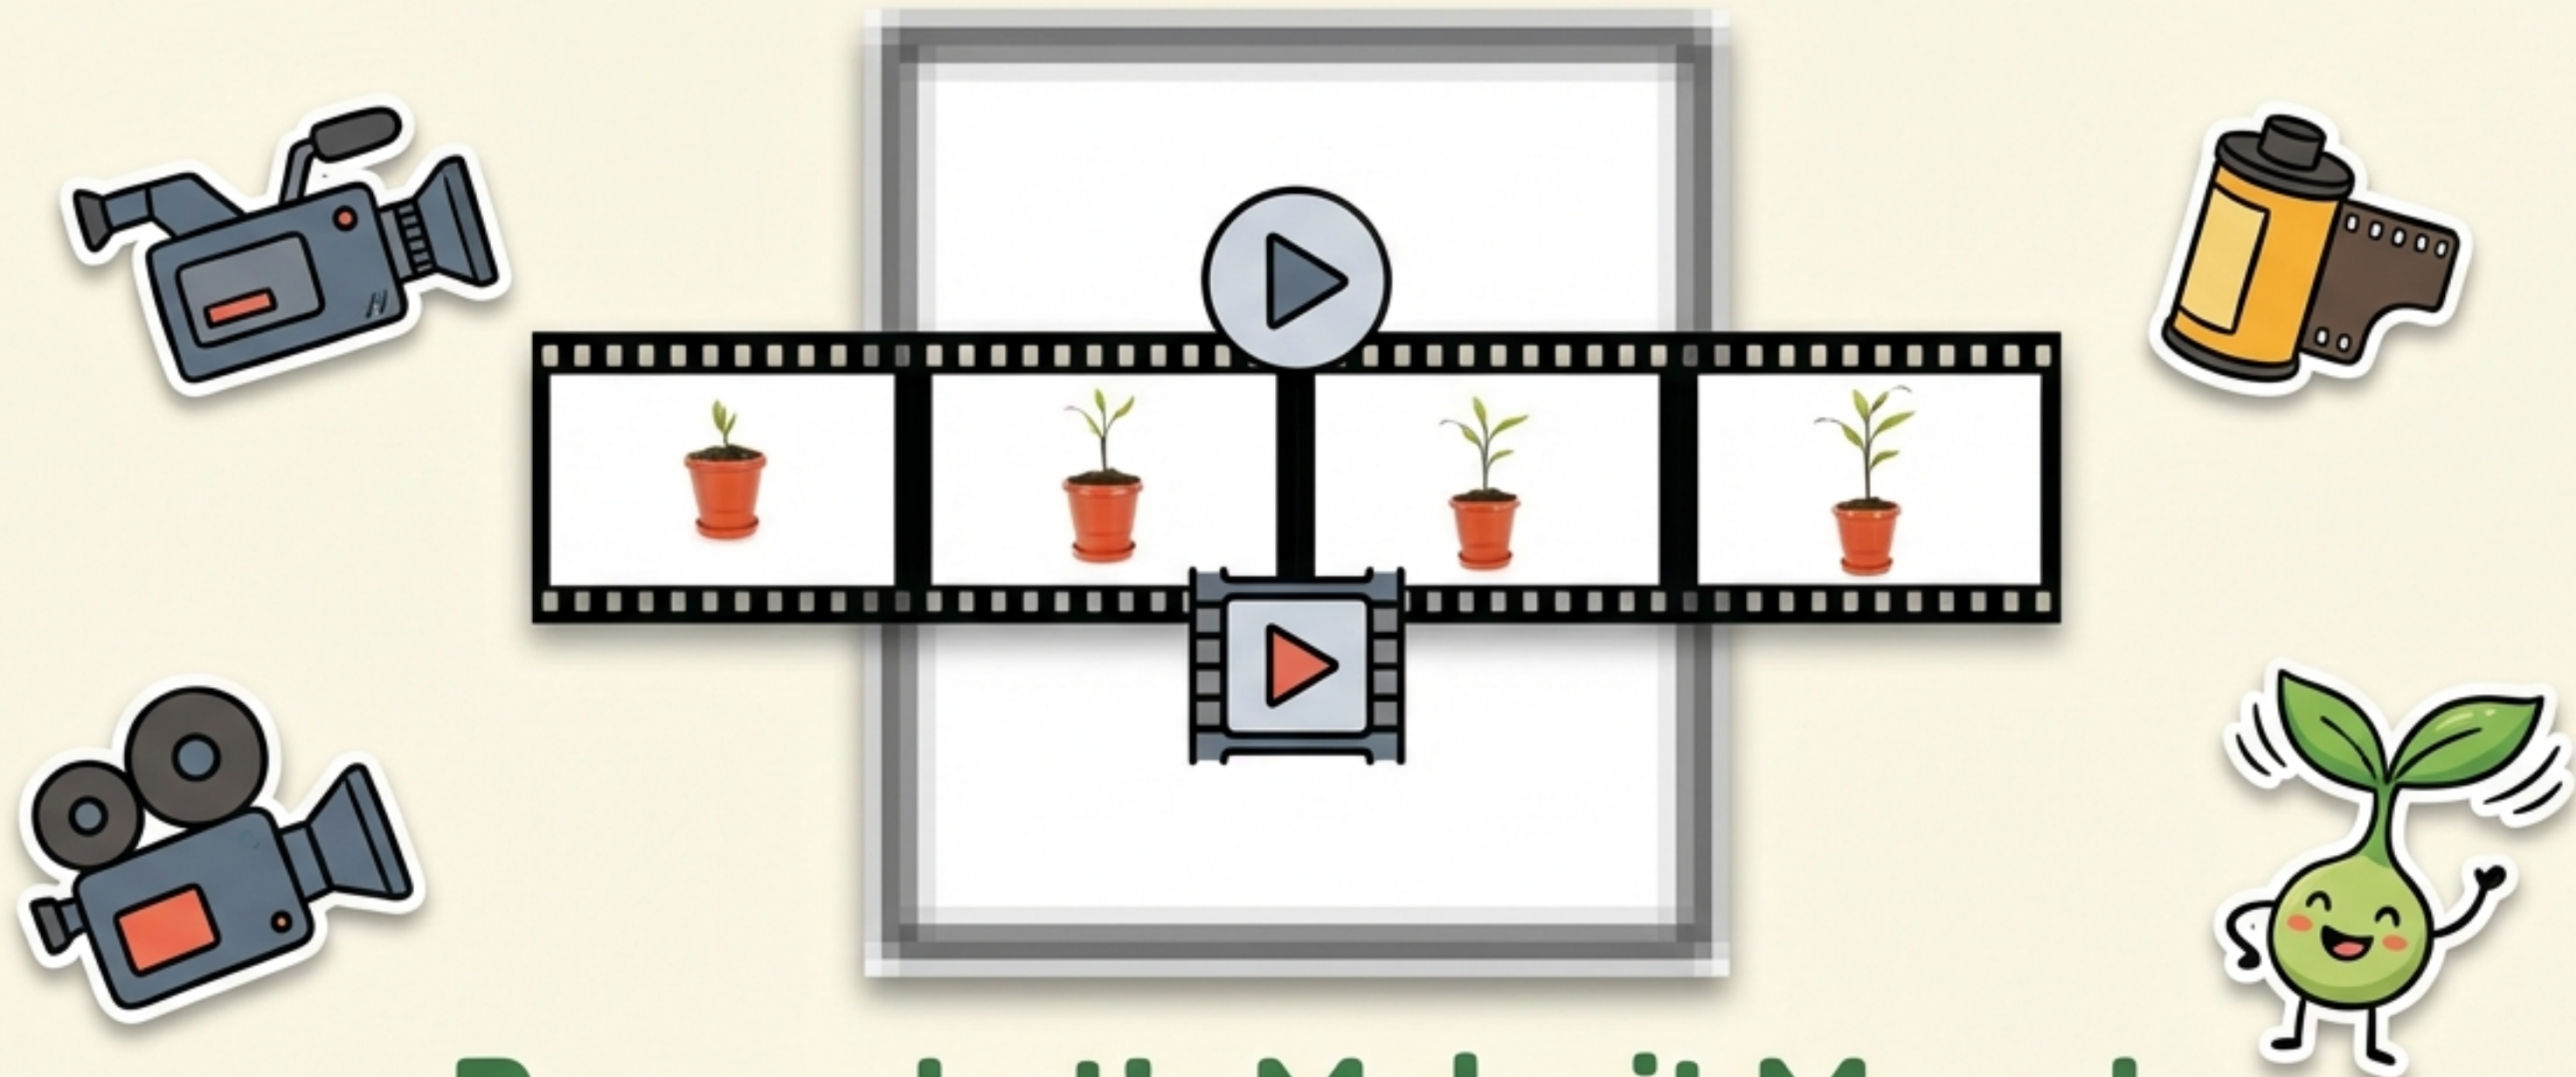

The computer is moving your pictures! Watch the green bar fill up. When it disappears, your photos are ready.

Great Job! You made a Photo Gallery.

Now you have a collection of your plant growing.

You can see the plant getting taller and growing more leaves in every picture!

Bonus: Let's Make it Move!

You can put all your images together to make a video.
If you play the photos fast, it looks like an animation of the plant growing up!

What did we learn today?

Open
Camera

Take
Photo

Find
