

Hi, I'm Lily!
I want to listen to music
and watch cartoons, but
my computer is full of
confusing files.
Can you help me?

Lily's Media Adventure

Exploring Audio, Video, and Media Players

Two Types of Fun

Some files are just
for **Listening**.
We call this **Audio**.

Some files are for
Watching and **listening**.
We call this **Video**.

First, we need to sort Lily's files. Does she need her ears or her eyes?

Audio Files: Look for the Note!

Audio files
hold music,
voices, and
sounds.

- **MP3**
- **WAV**

Pro Tip:

Lily's Tip: If you see a music note on the file, it's a song!

Video Files: Look for the Film Strip!

Video files hold cartoons, movies, and camera recordings.

- **MP4**
- **AVI**
- **MOV**

Pro Tip

Lily's Tip: If you see a film strip, it's a movie!

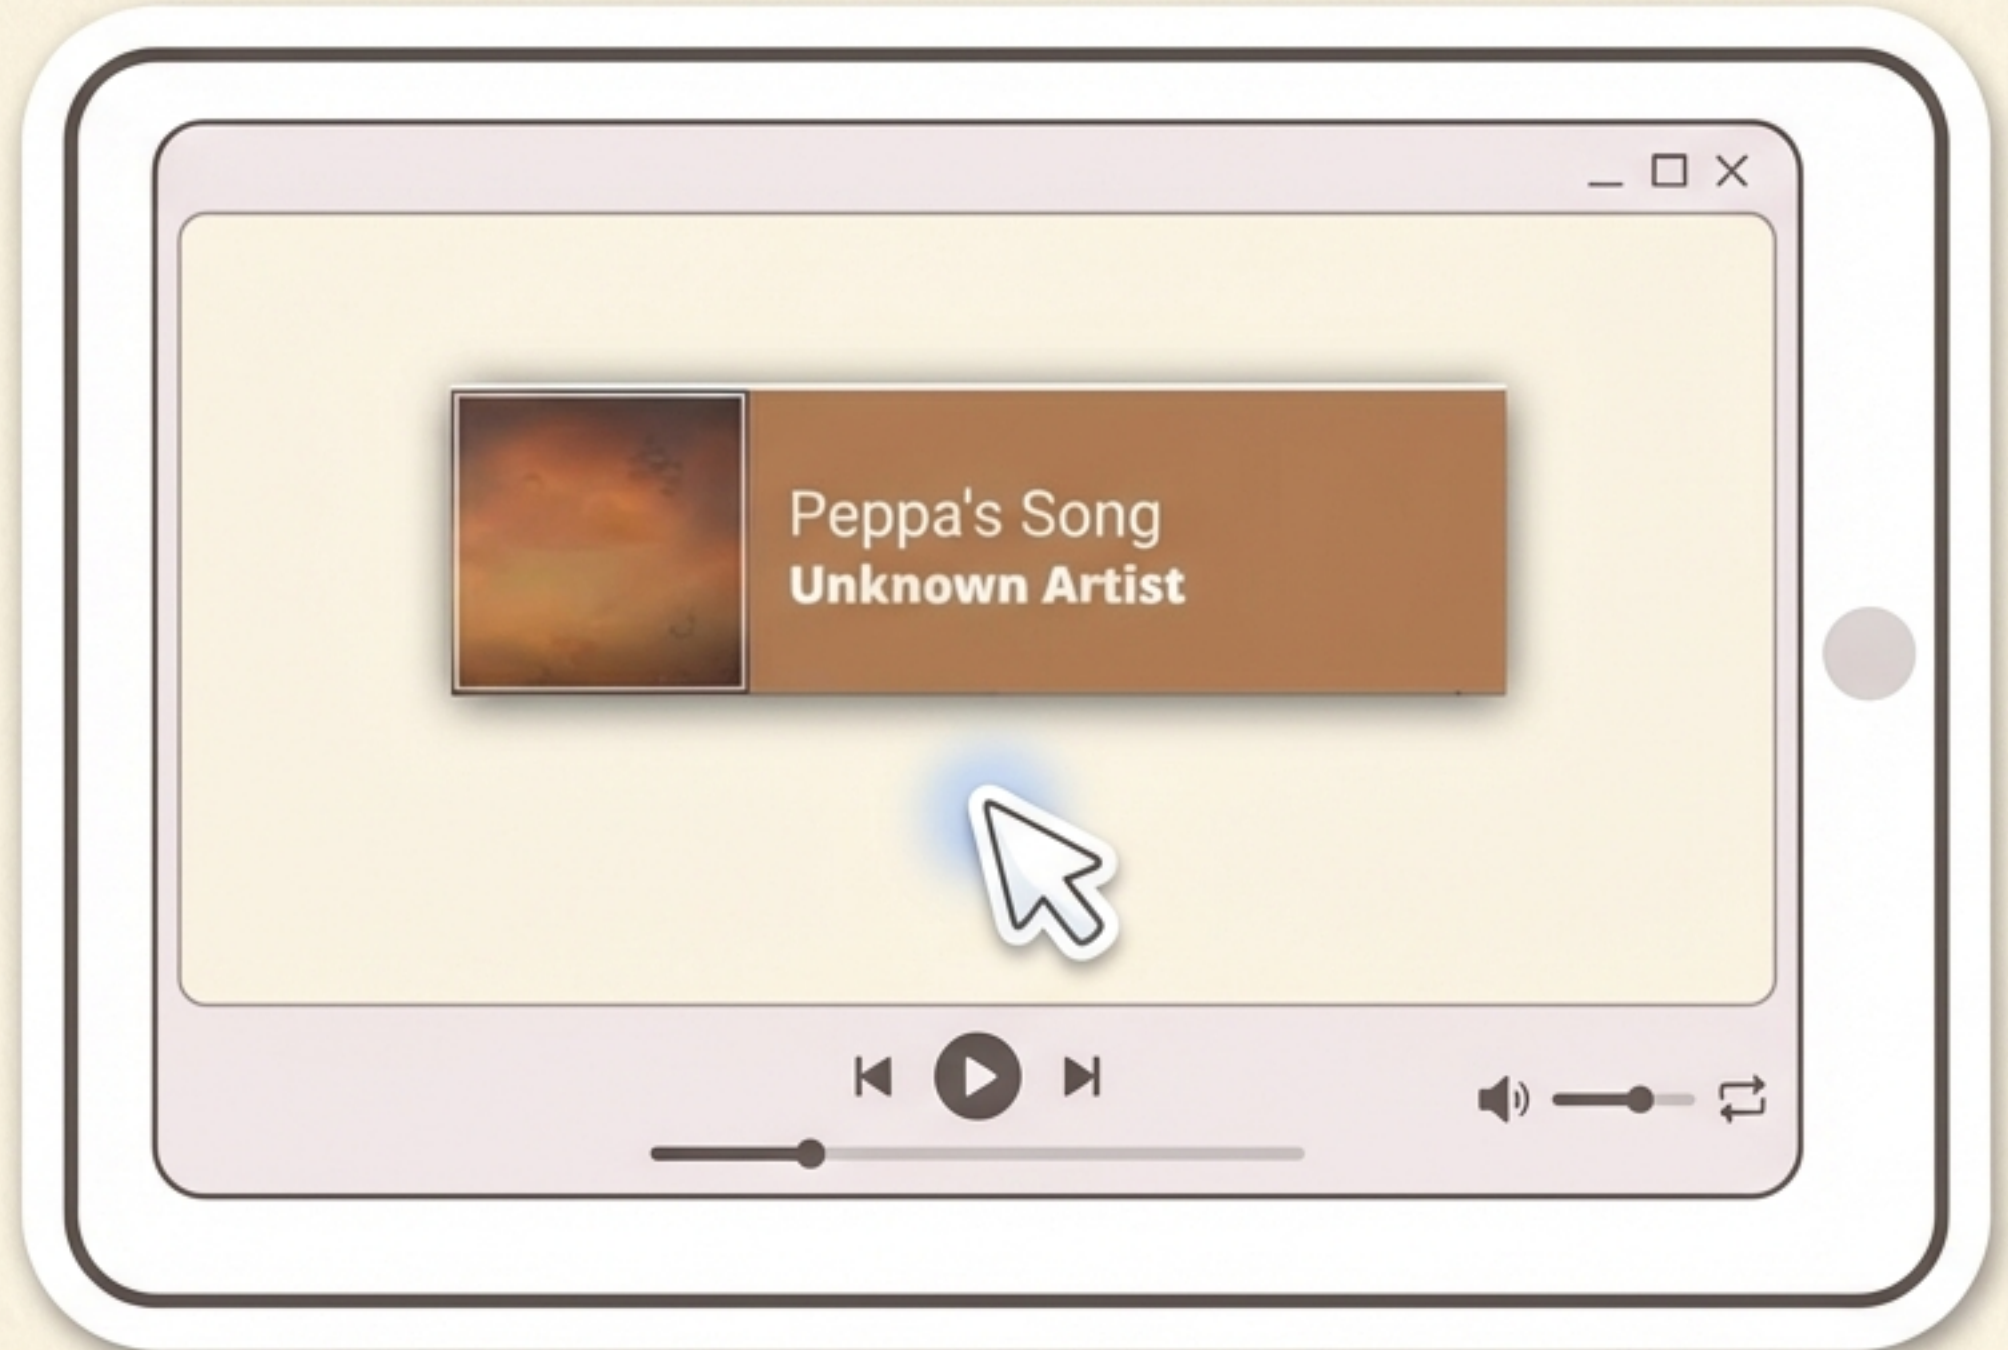

The Media Player

To play our files, we need a special tool called a **Media Player**. It is like a TV inside the computer.

Pro Tip

Lily's Tip: If you see a music note or film strip, open it with the Media Player!

Start the Music!

Press this button to start the song or movie.

La la la!

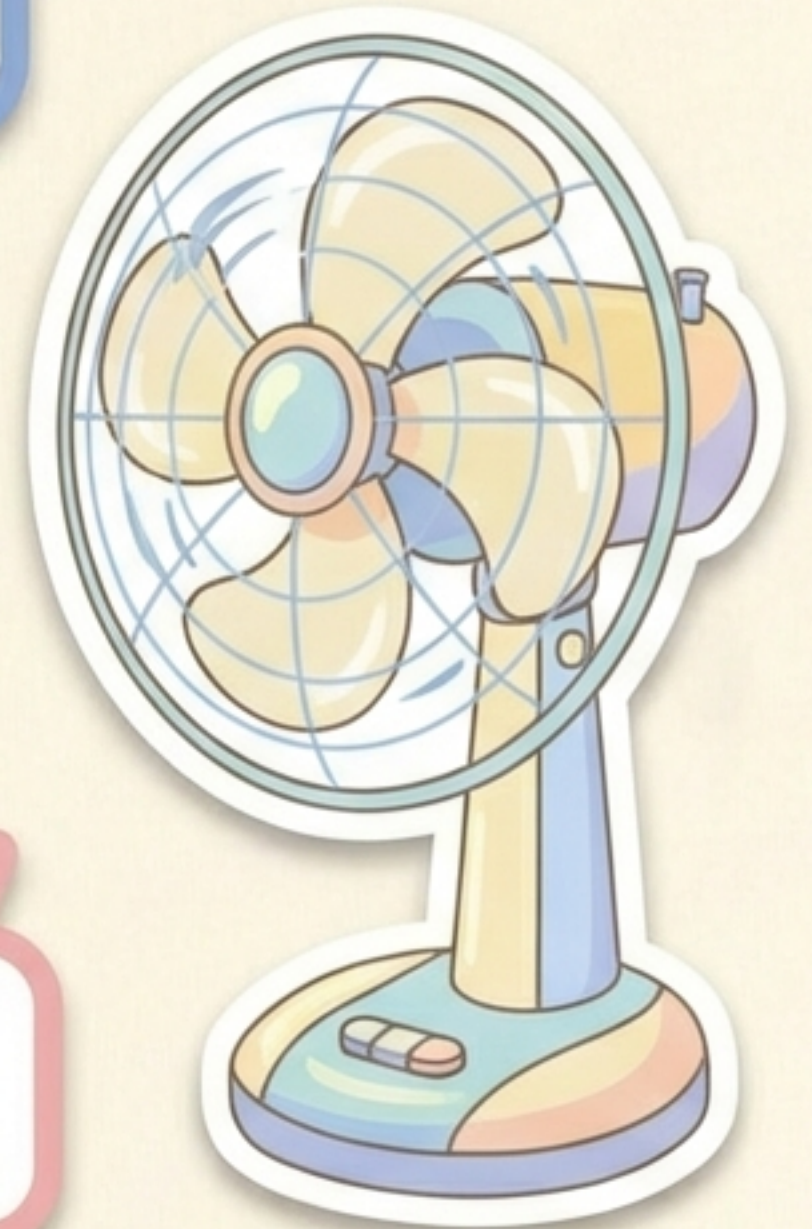

Wait! Pause the Song.

Lily, I forgot to switch off the fan!
I will go switch it off now.

Problem: If we stop the song completely, we lose our spot.

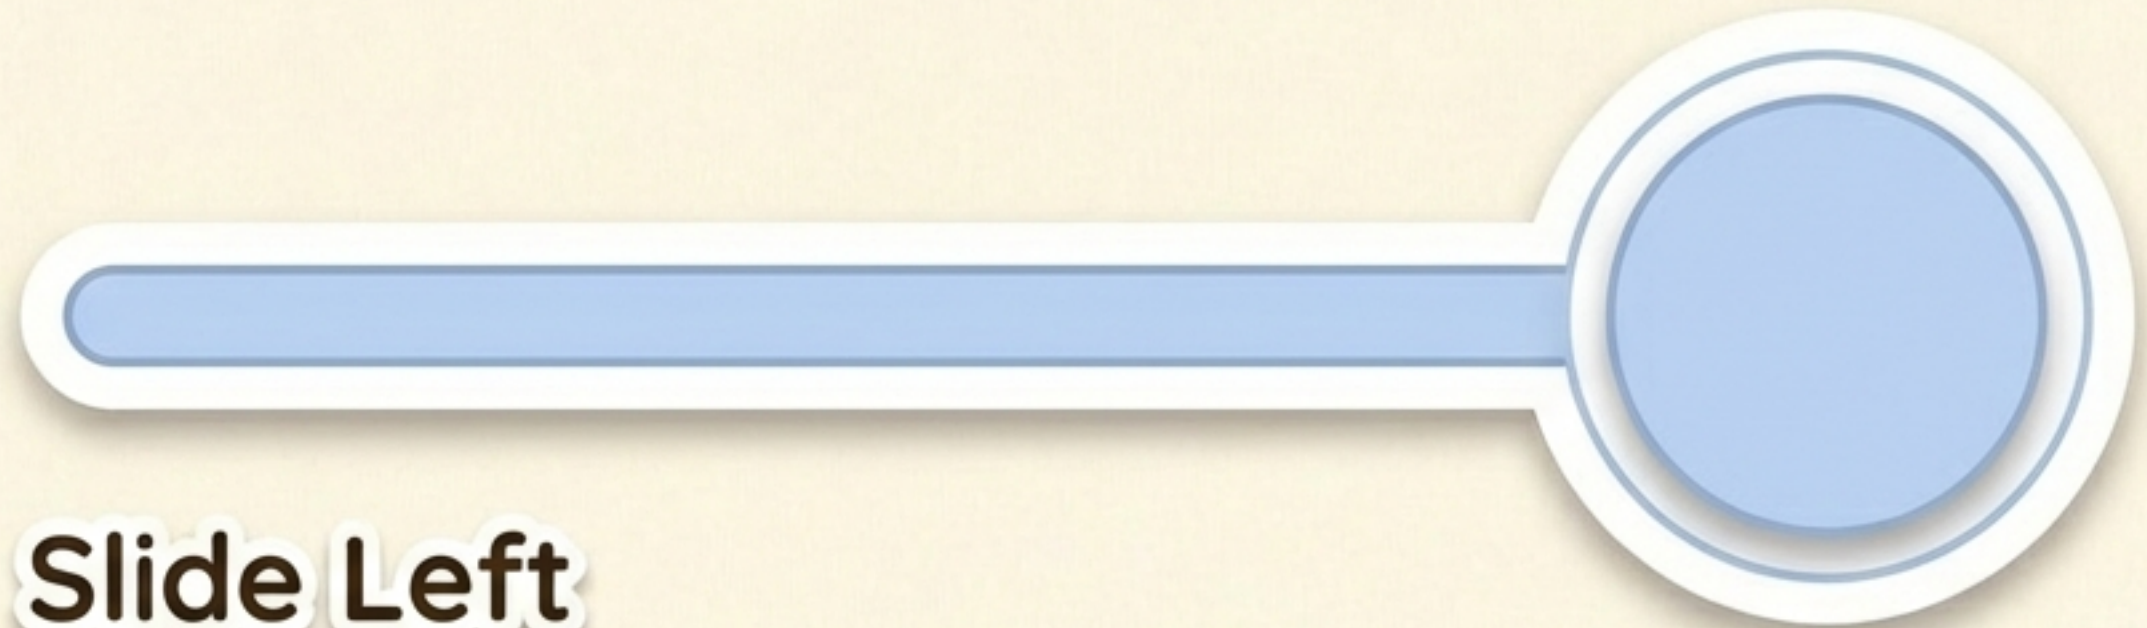

Solution: Press Pause. It freezes the music until you come back.

Okay! I will pause the video till then.

Loud or Soft?

This is the Volume control.

**Slide Left
for Quiet**

Slide Right for LOUDER

The music is too loud for Mom!
Which way should Lily slide the circle?

Changing the Song

Previous:
Go back to
the start.

Next:
Skip to a
new song.

Jumping in Time

Sometimes we just want to skip a little bit.

Jump
BACK
10 seconds

Jump
FORWARD
30 seconds

Lily missed a funny joke in the cartoon!
She presses the 10 button to see it again.

Mix it or Loop it?

Shuffle:

Plays songs in a mixed-up surprise order!

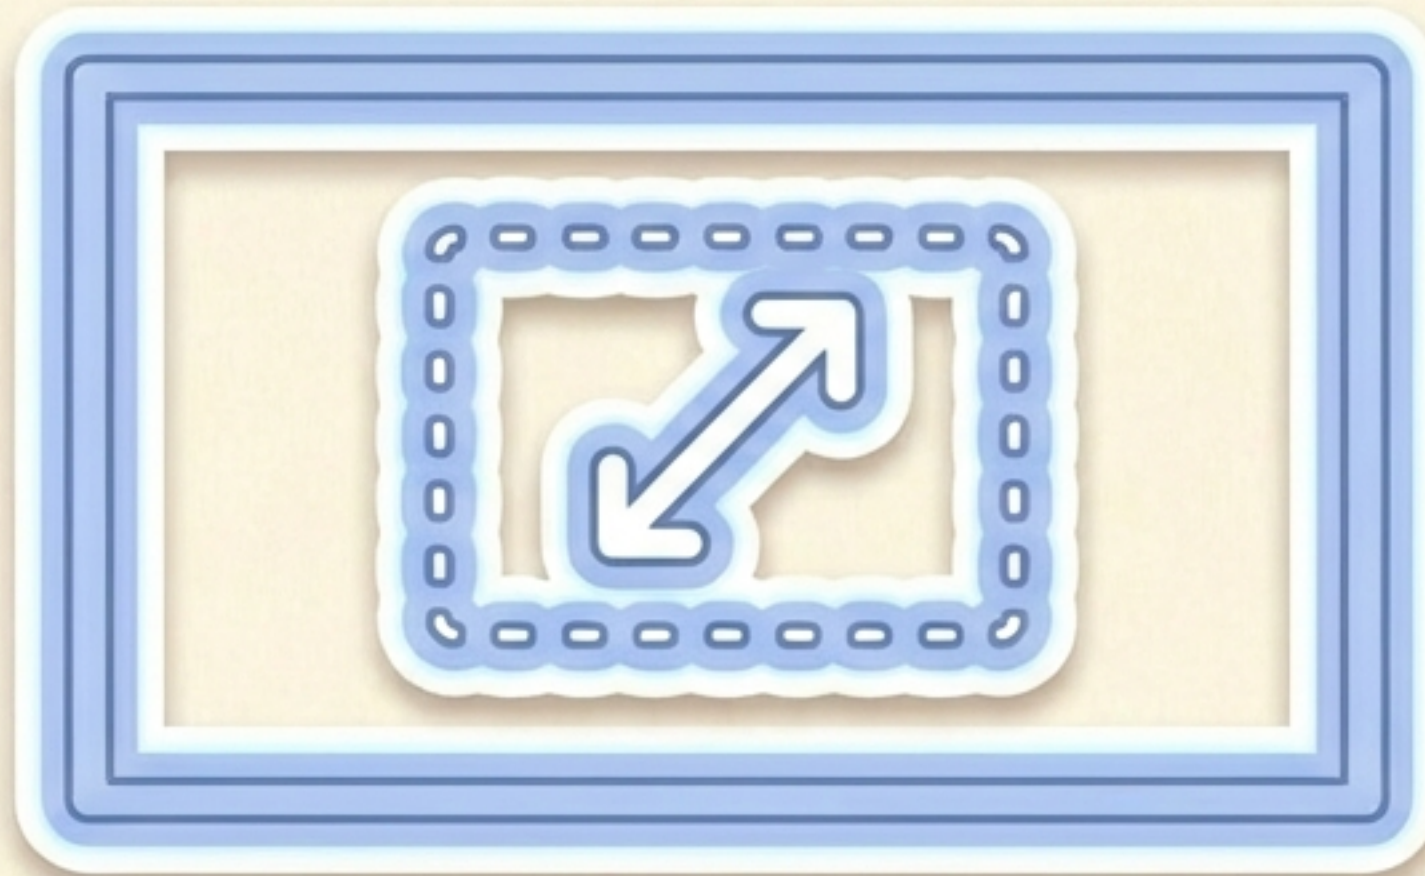

Repeat:

Plays the same song over and over again.

Make it Big!

Watching a movie in a tiny box isn't fun.
Use Full Screen Mode.

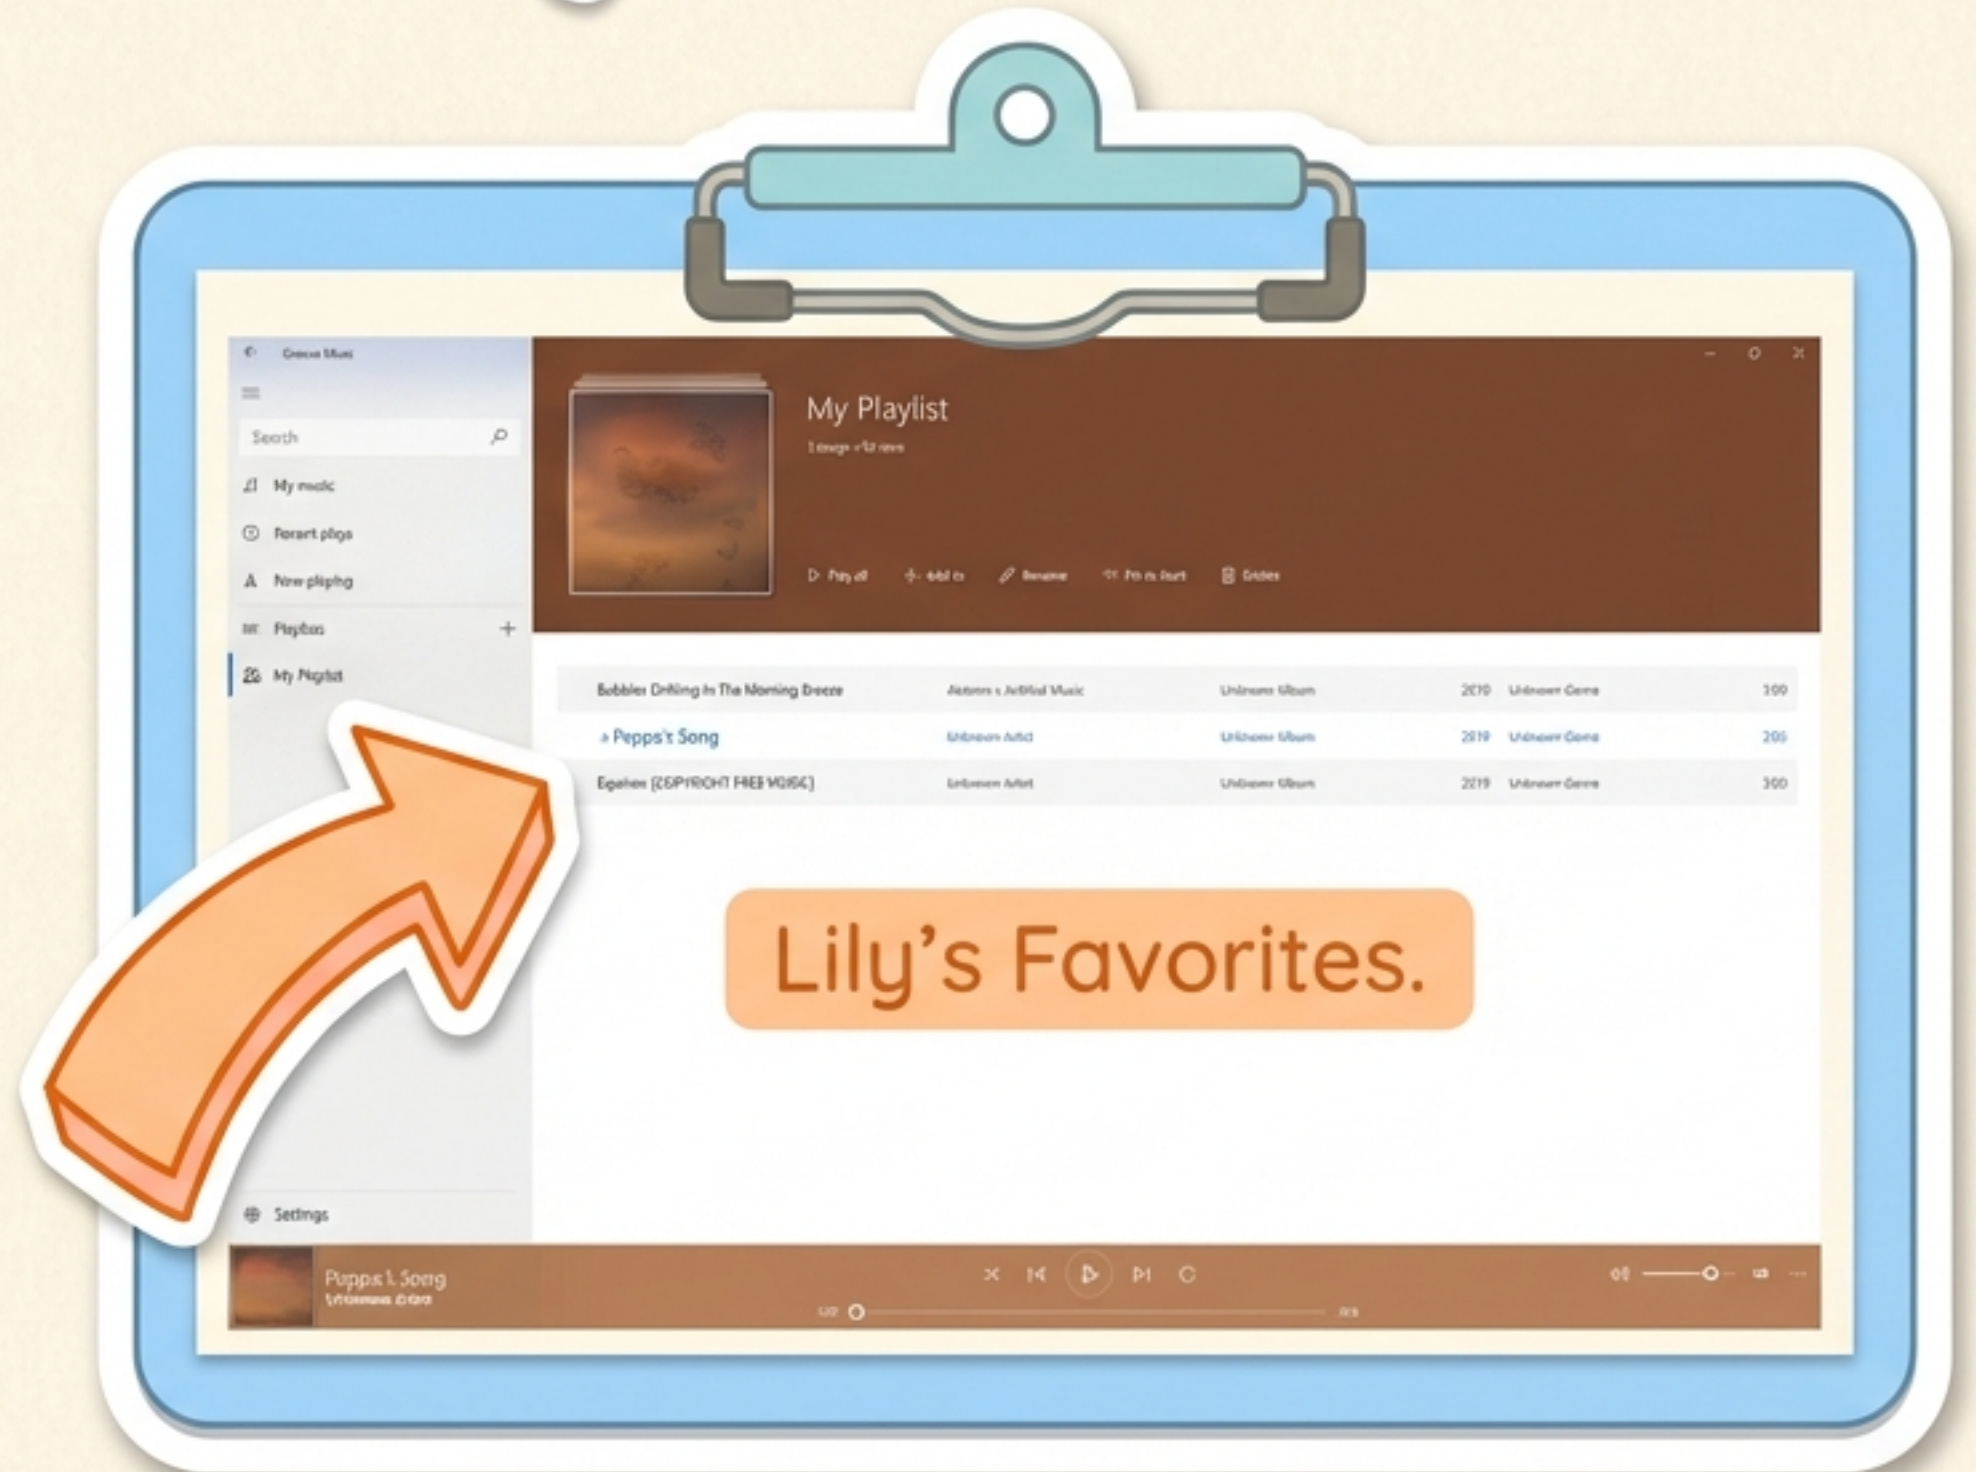

Click the arrows to make the video
fill the whole computer screen.

Lily's Playlist

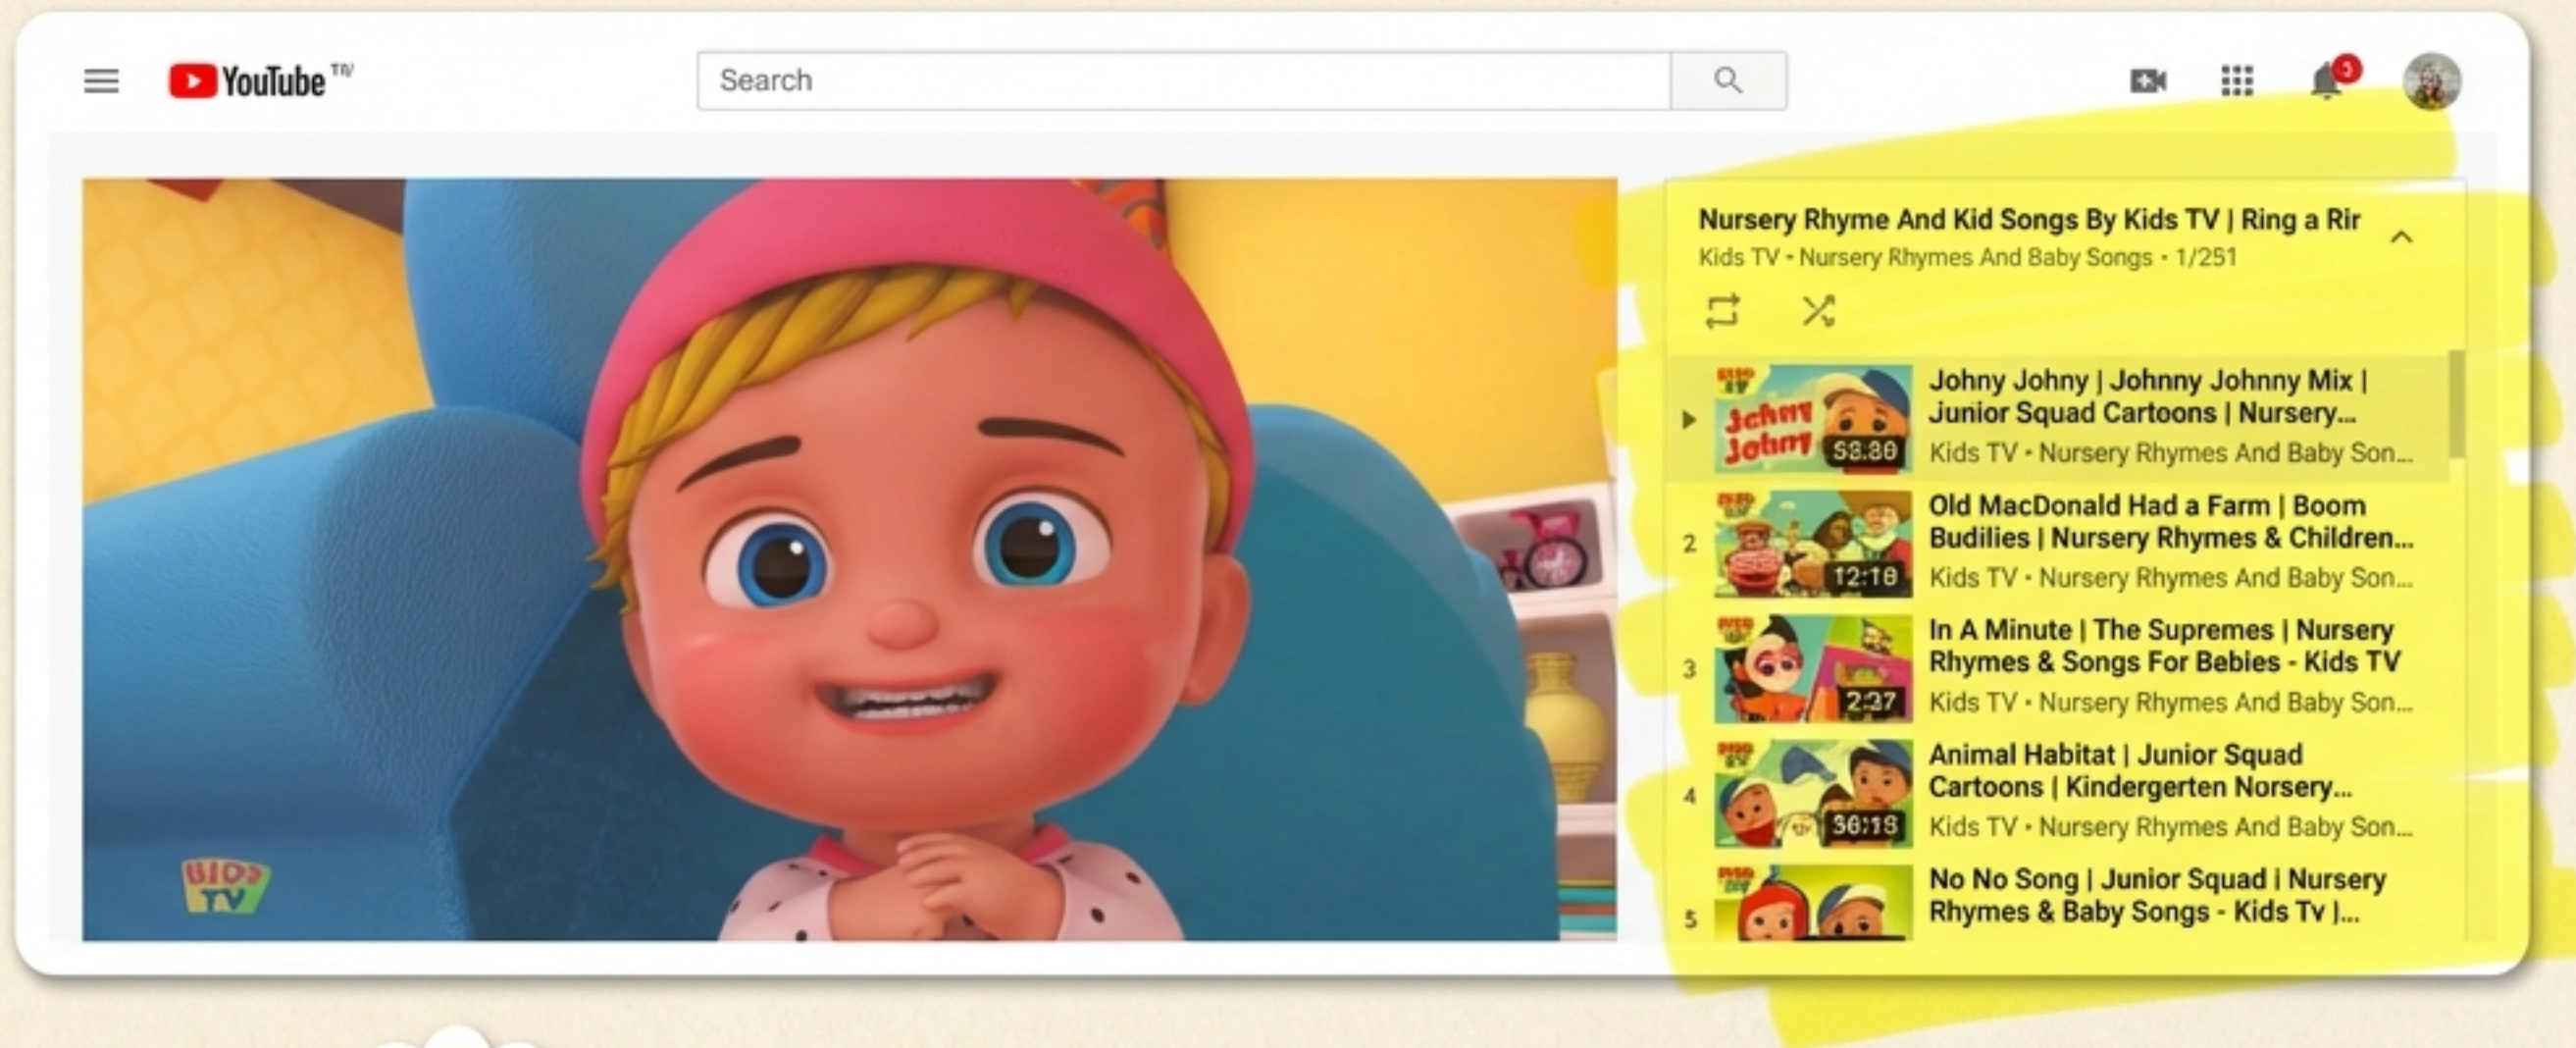

A Playlist is a list of your favorite audio or video files.

Benefit: You don't have to search for songs. The computer plays them one after another.

Video Playlists

These are my favourite videos.
Look at the right side. See the list? That is the playlist queue.

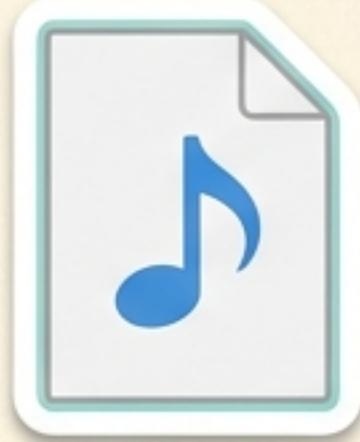

You have created a nice playlist, Lily!

You are a Media Expert!

1. Video File

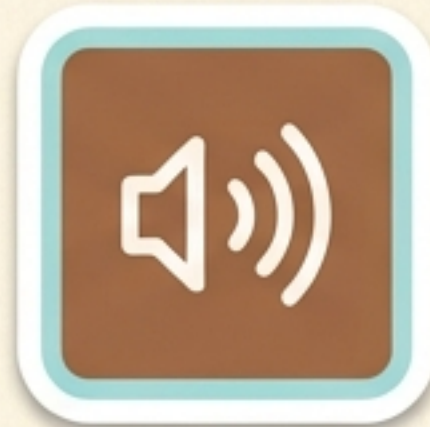

2. Audio File

3. Play Button

4. Pause Button

5. Volume Icon

6. Shuffle Icon

You helped Lily learn her files and controls. Now you are ready to play, pause, and listen on your own computer. Great job!
