

Let's Be Movie Directors!

A mission to help Lily and Snoopy make a movie

The Problem with Snoopy's Video

Lily made a video of her dog, Snoopy, playing with a ball. But look! Towards the end, Snoopy runs behind a bush and disappears. We need to edit (remove) that part. Also, the video is too quiet. It needs music!

This looks cute, but I want to remove the part where he hides!

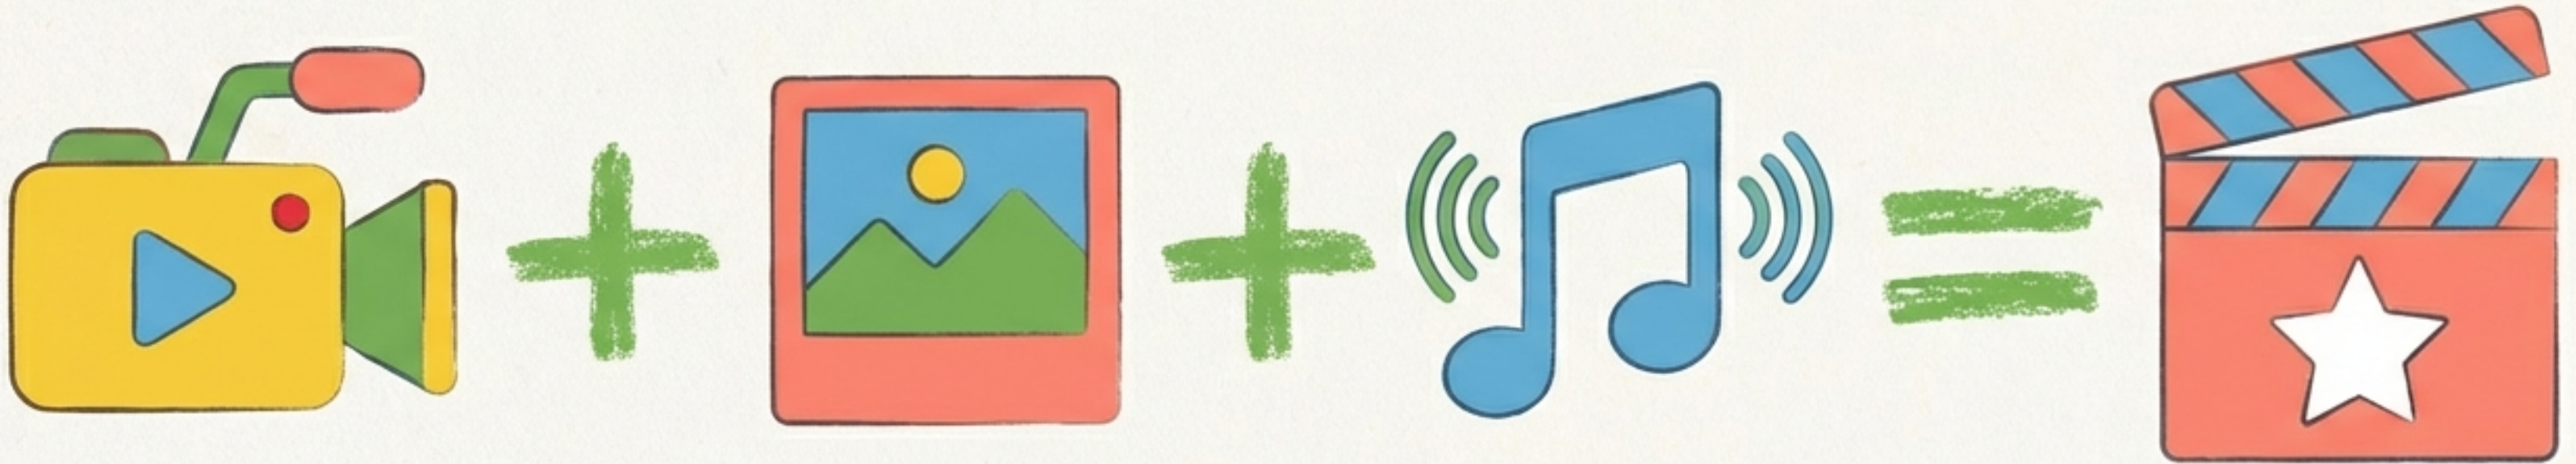

What is Multimedia?

We are going to mix different things together!

Media = A type of communication.

Multi = More than one.

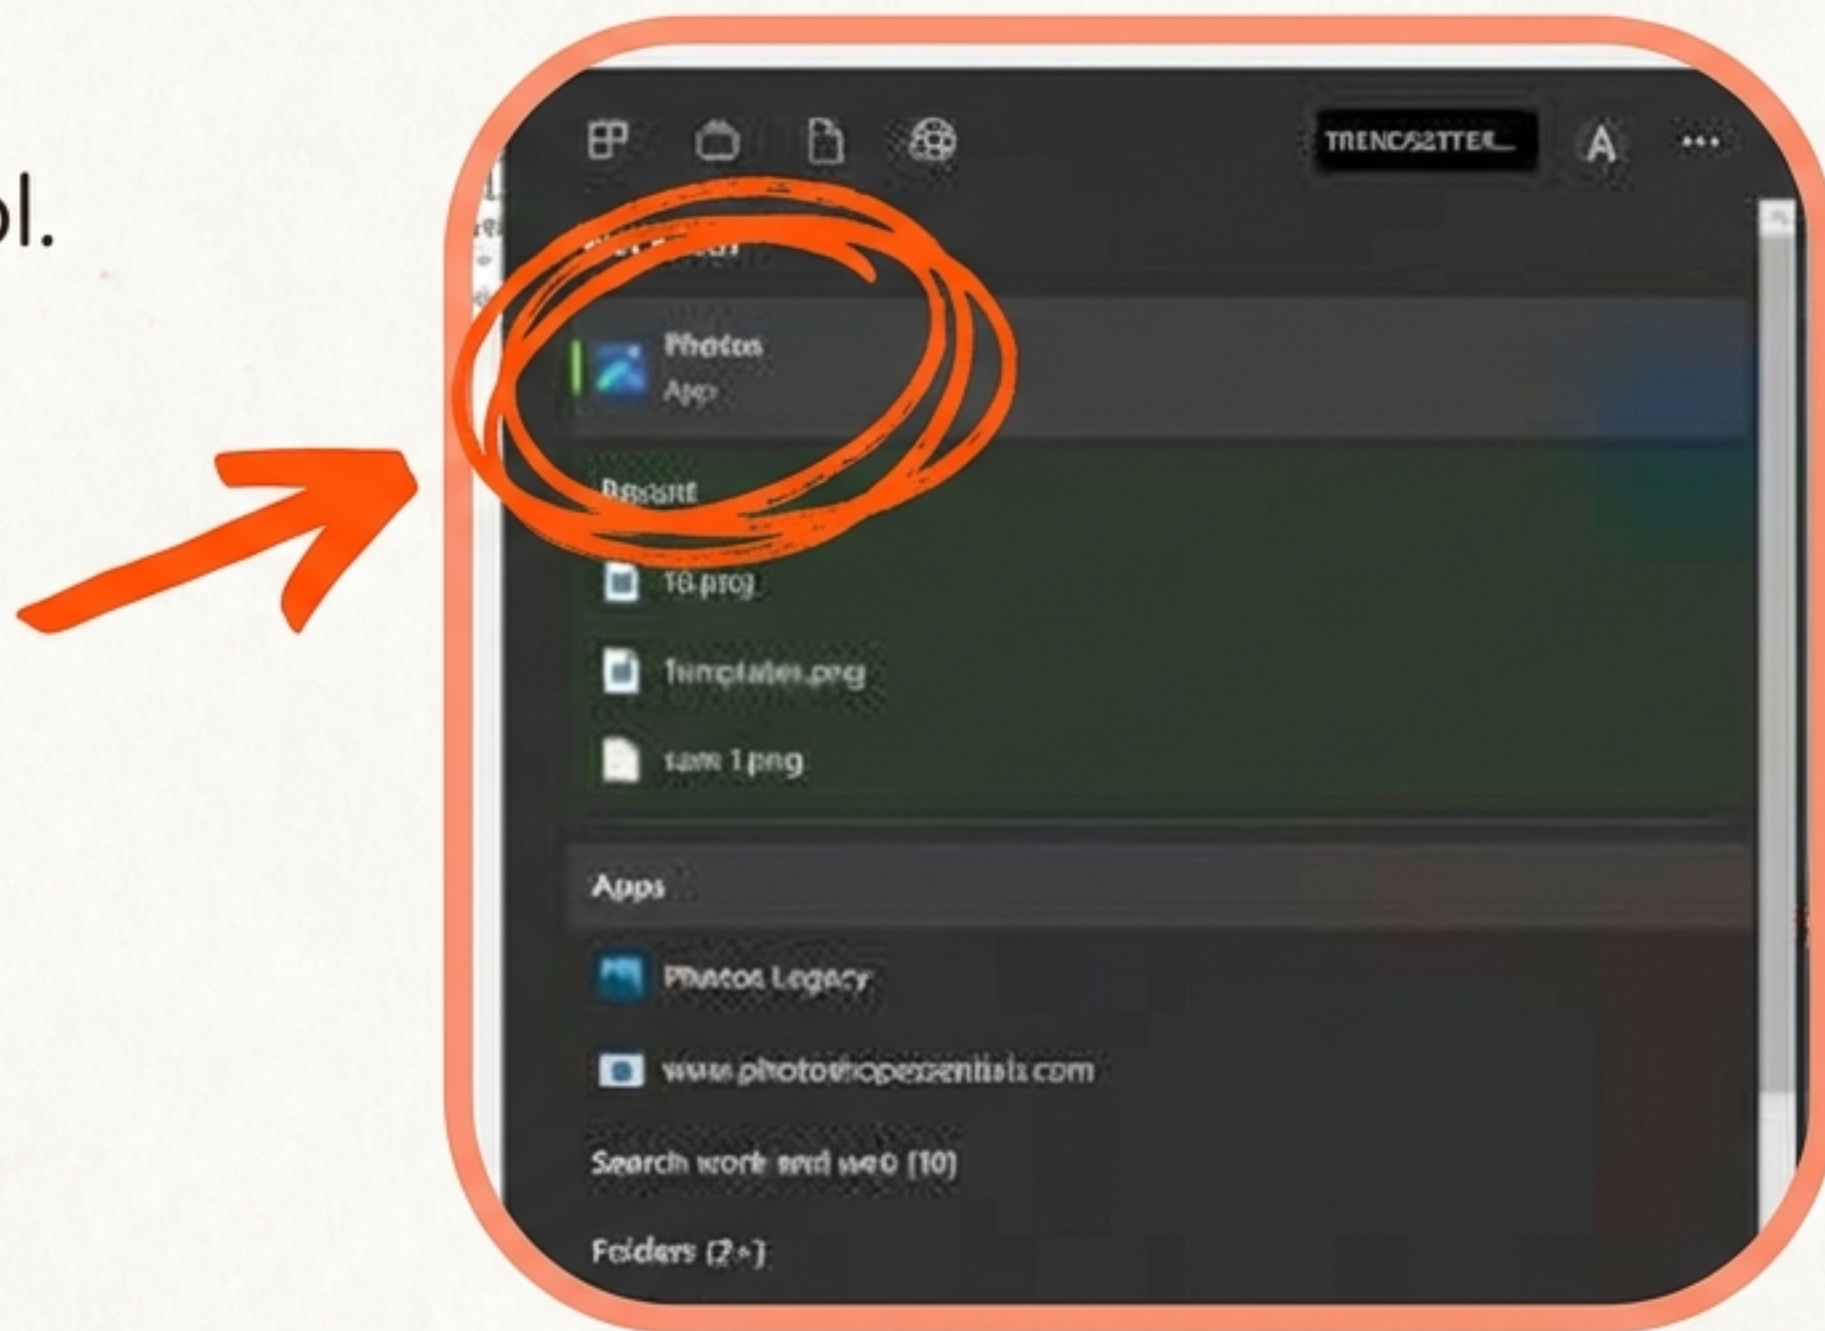

Multimedia = Mixing Video, Pictures, and Sound to tell a story.

Step 1: Find the App

First, we need to open the tool.

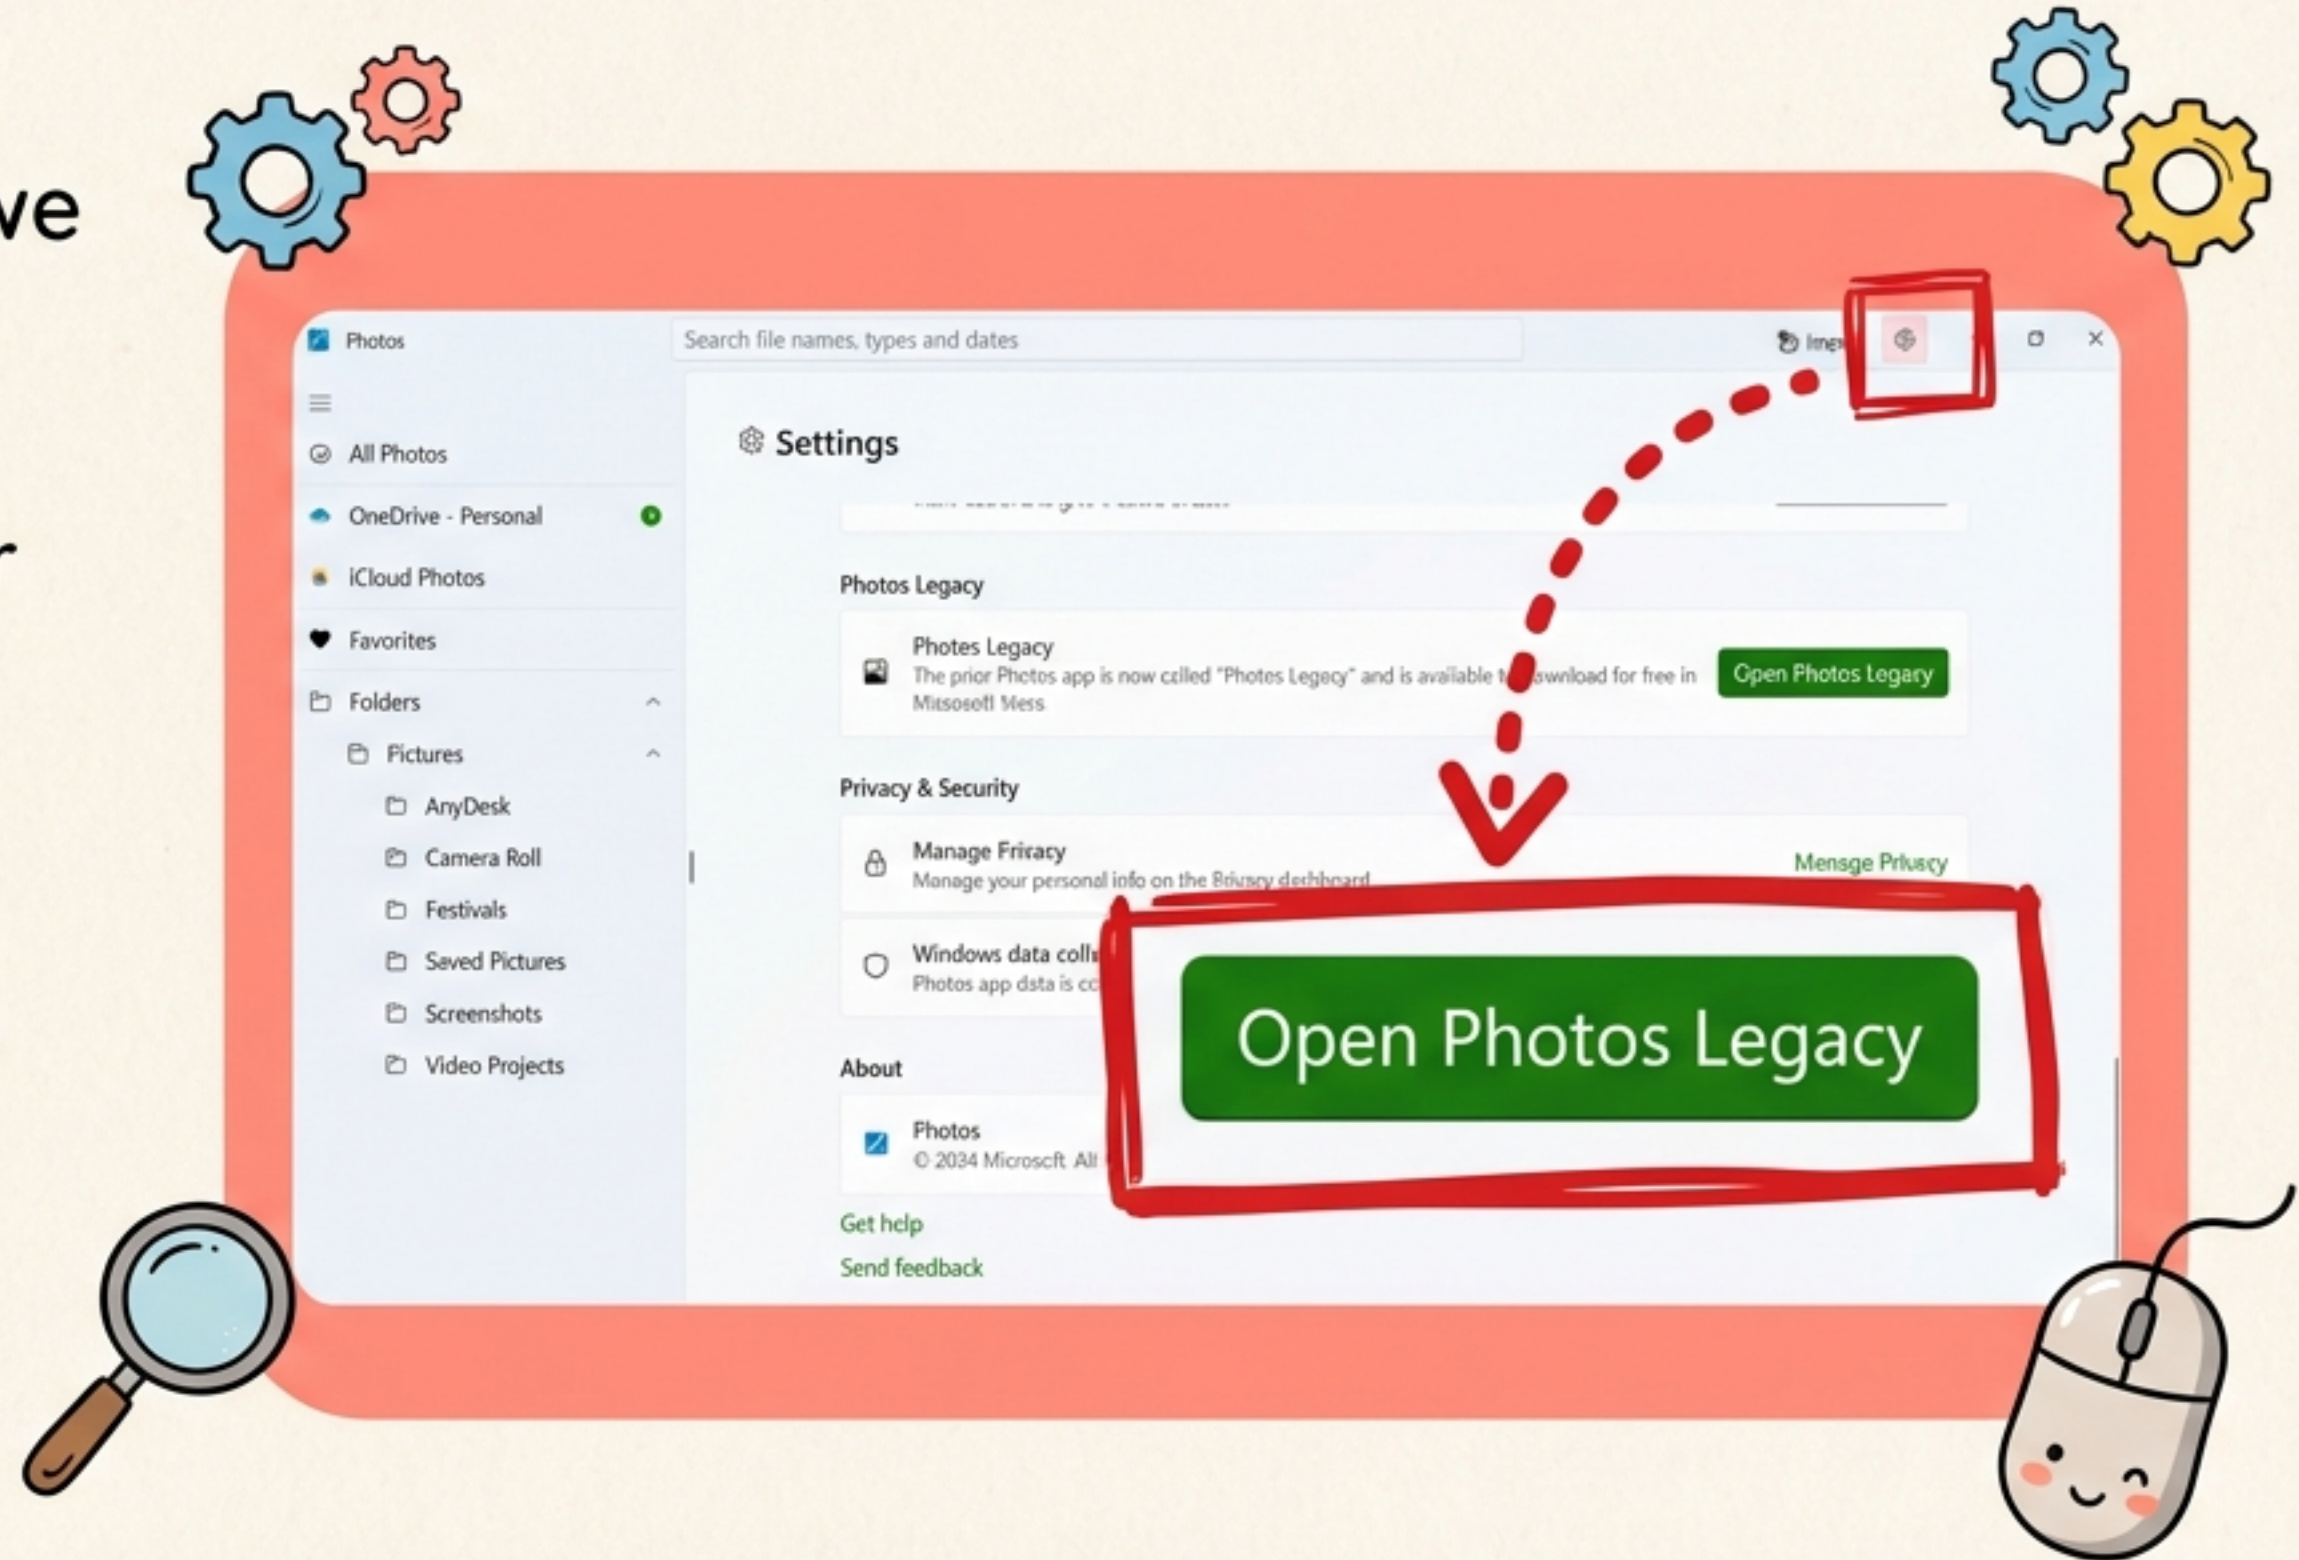

1. Go to the search bar on your computer.
2. Type 'Photos'.
2. Type 'Photos'.
3. Click to open the Photos App.

Step 2: The Secret Switch

To find the Video Editor, we need to look in Settings.

1. Click the **Settings** gear icon.
2. Scroll down to find 'Photos Legacy'.
3. Click the button: **Open Photos Legacy**.

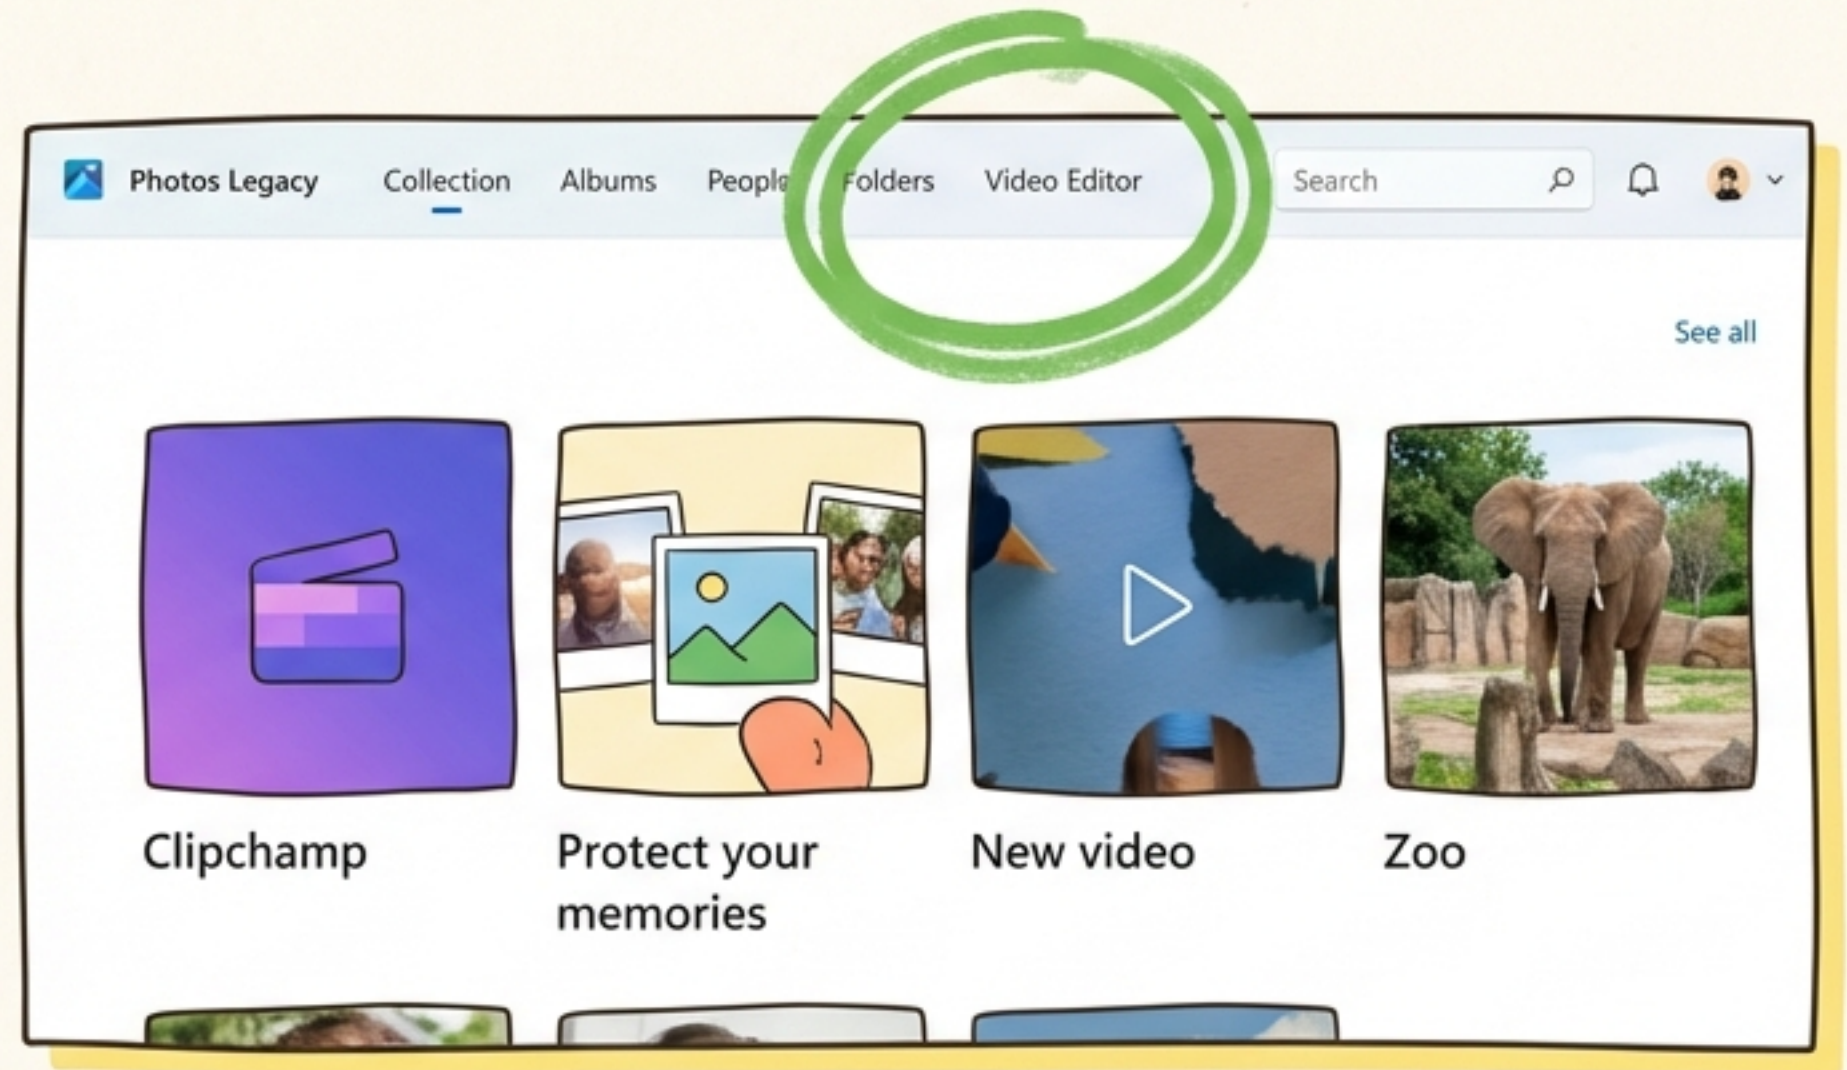

Step 3: Enter the Movie Studio

Welcome to Photos Legacy!

Look at the top menu.

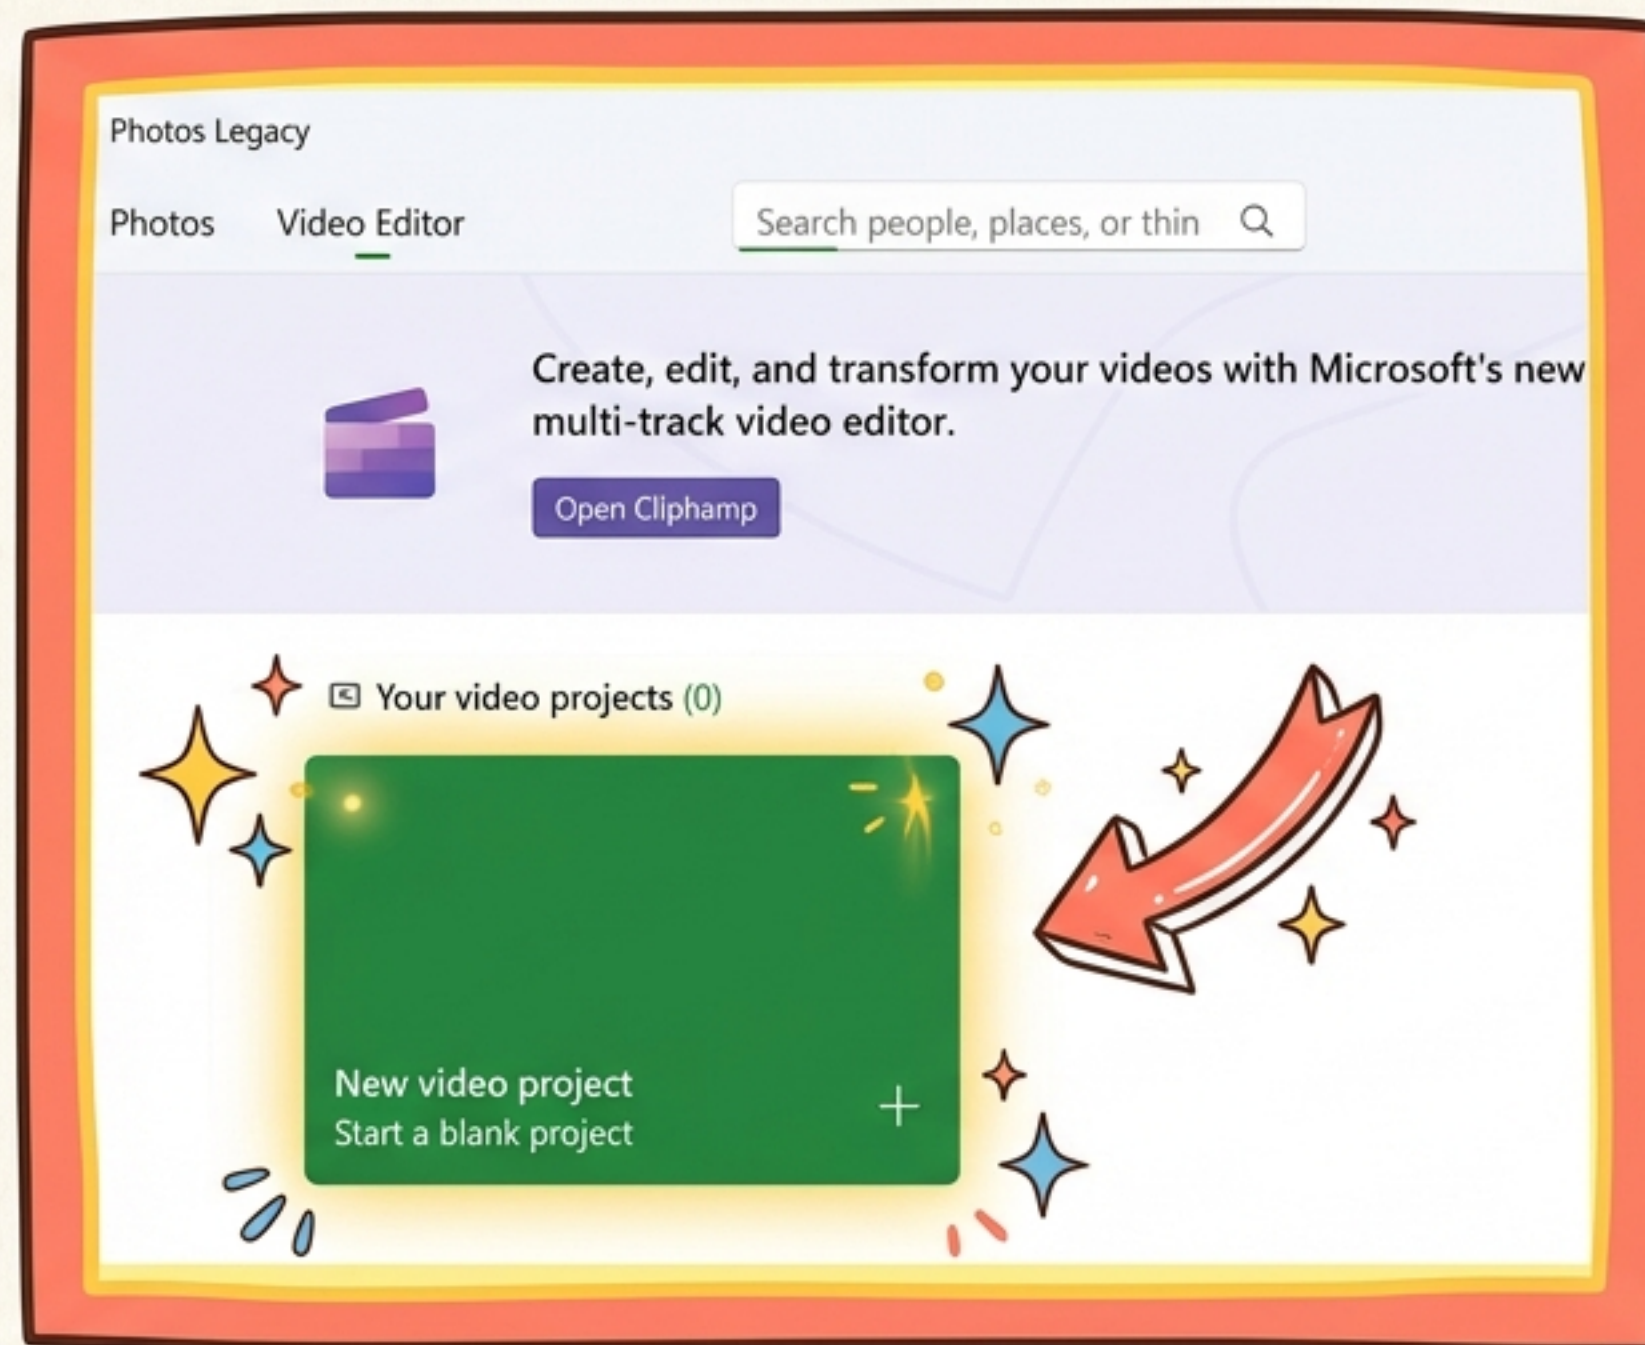

Click on Video Editor.

Step 4: Start a New Movie

We are ready to begin!

Click the big green button:
New video project.

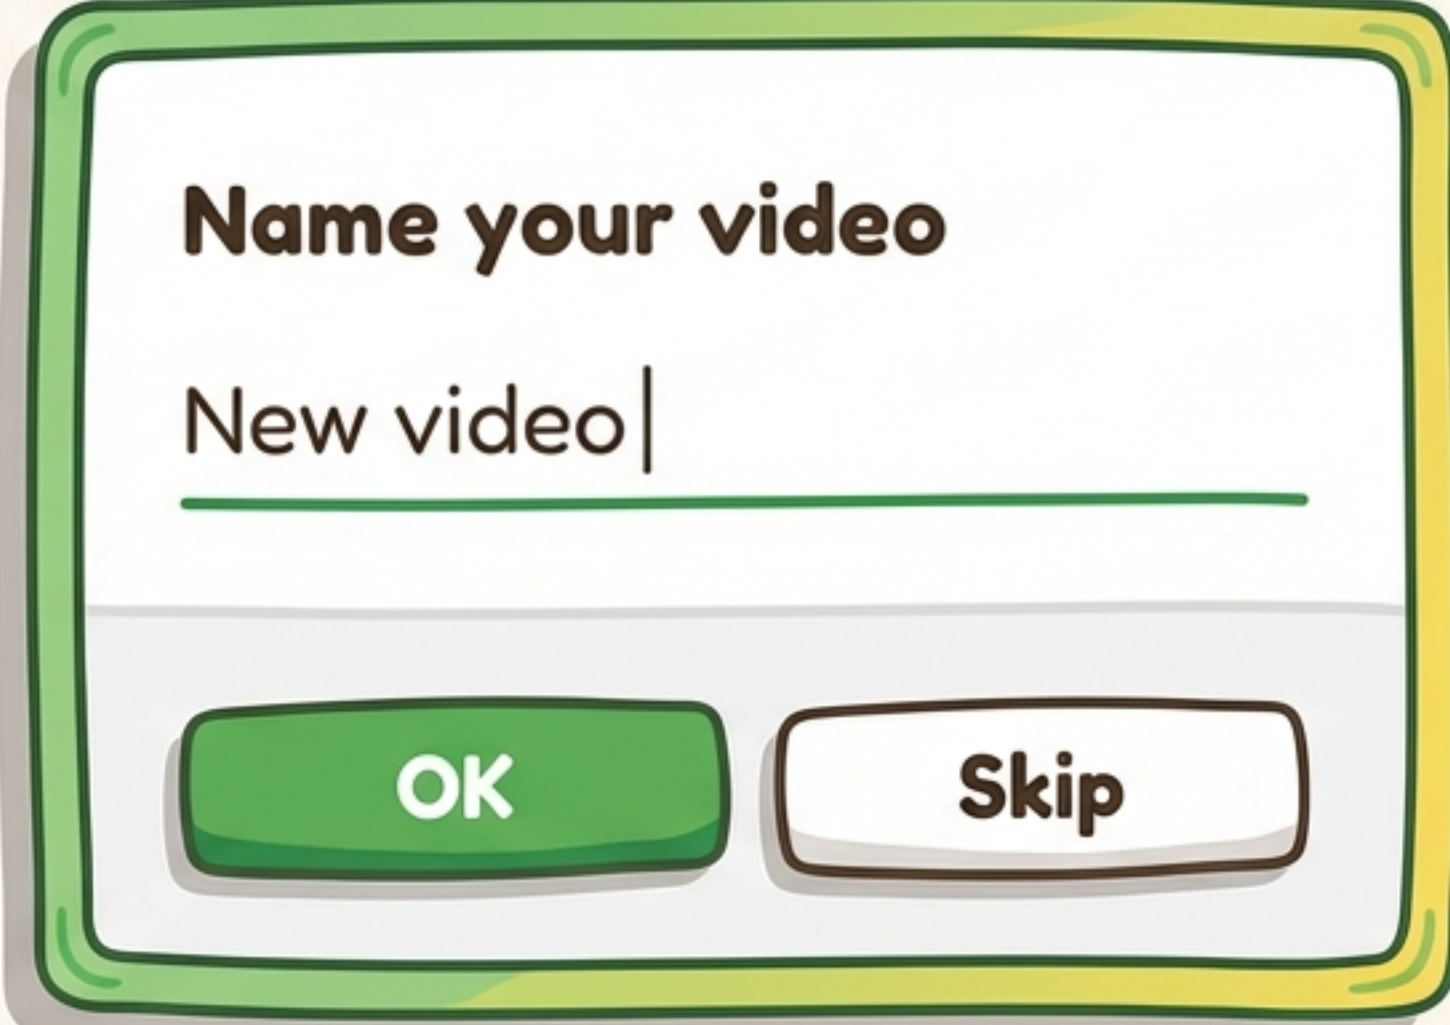

Step 5: Name Your Masterpiece

- The computer asks: “What is this video called?”

Type a name like “Snoopy Playing”.

Click OK.

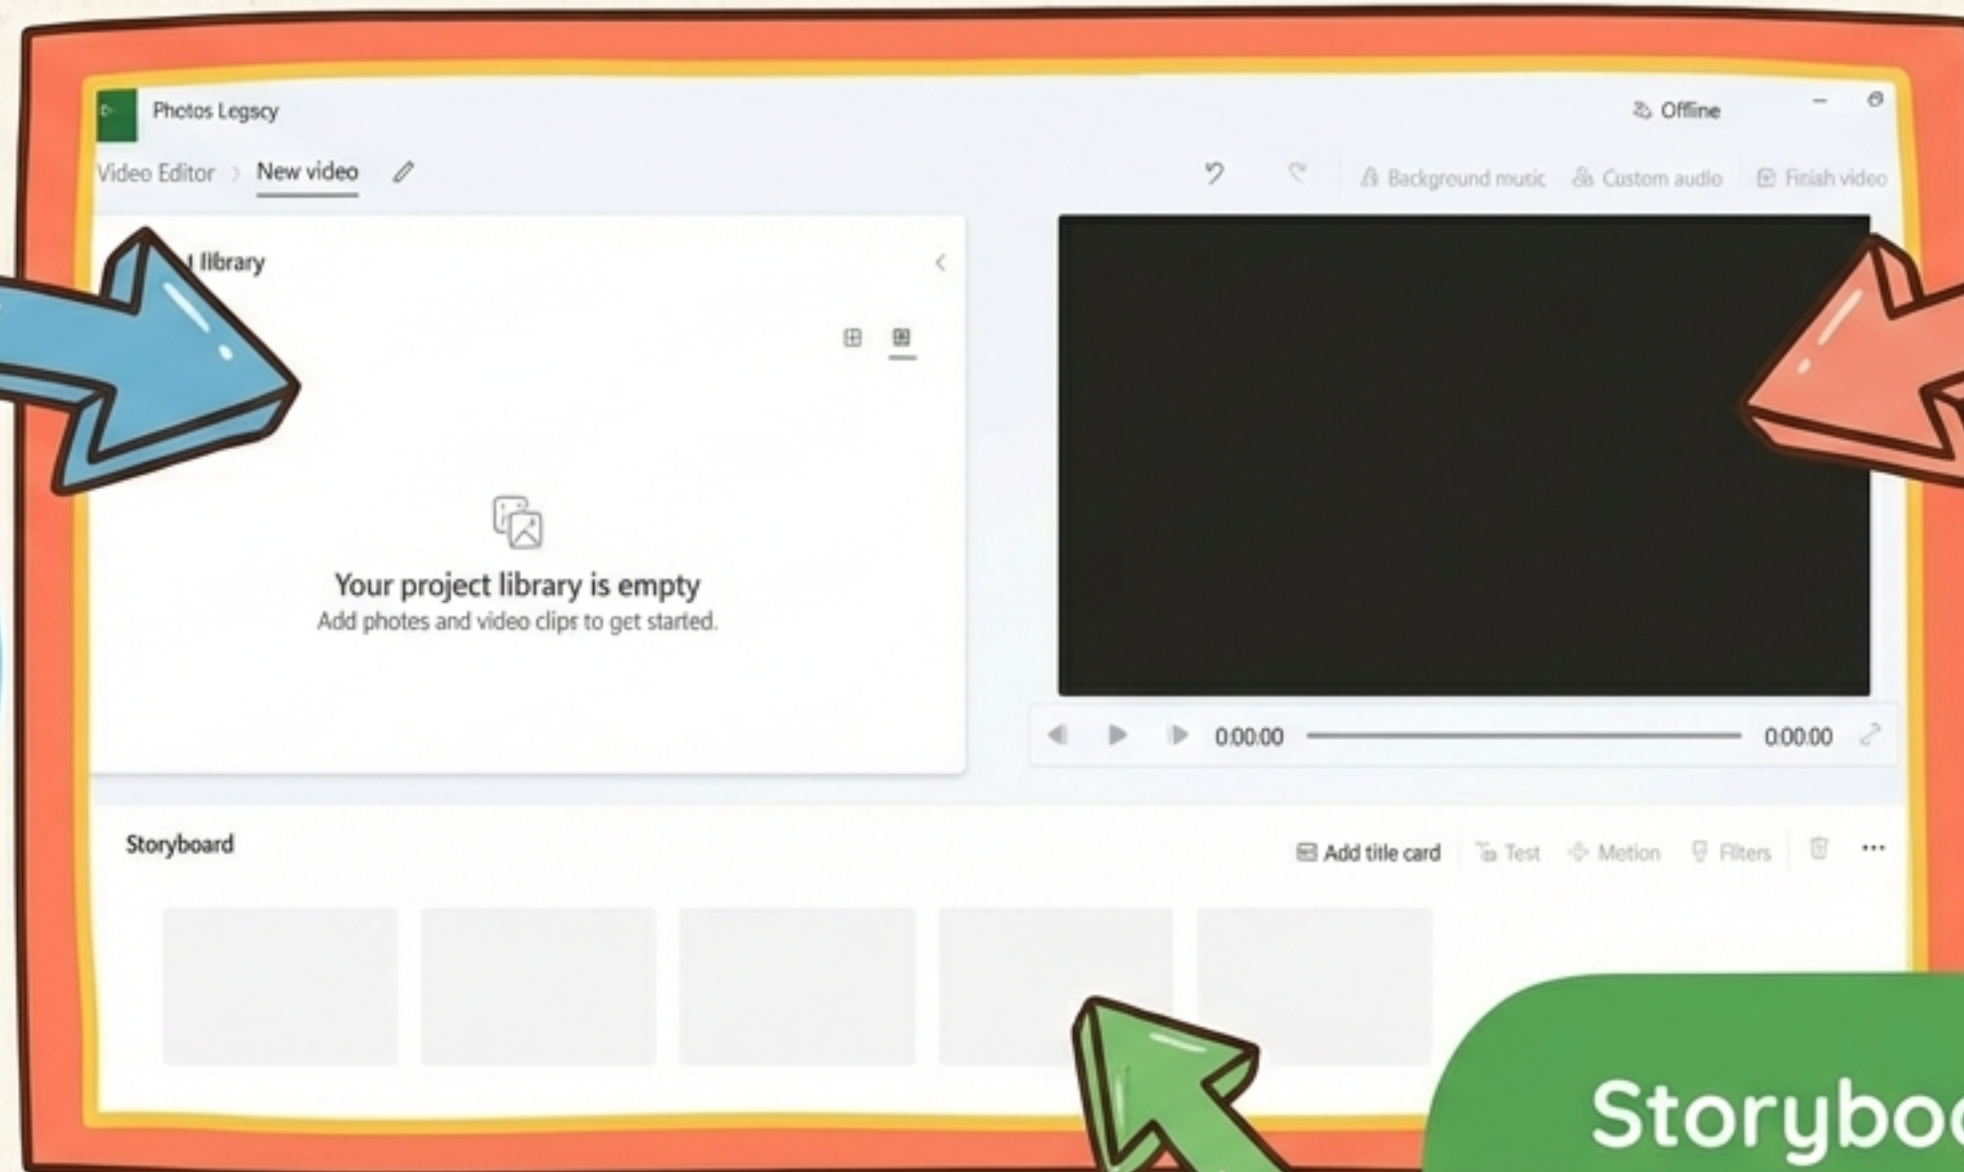

Name your video

New video|

OK **Skip**

Tour the Studio

**Project
Library**
(Clips go here)

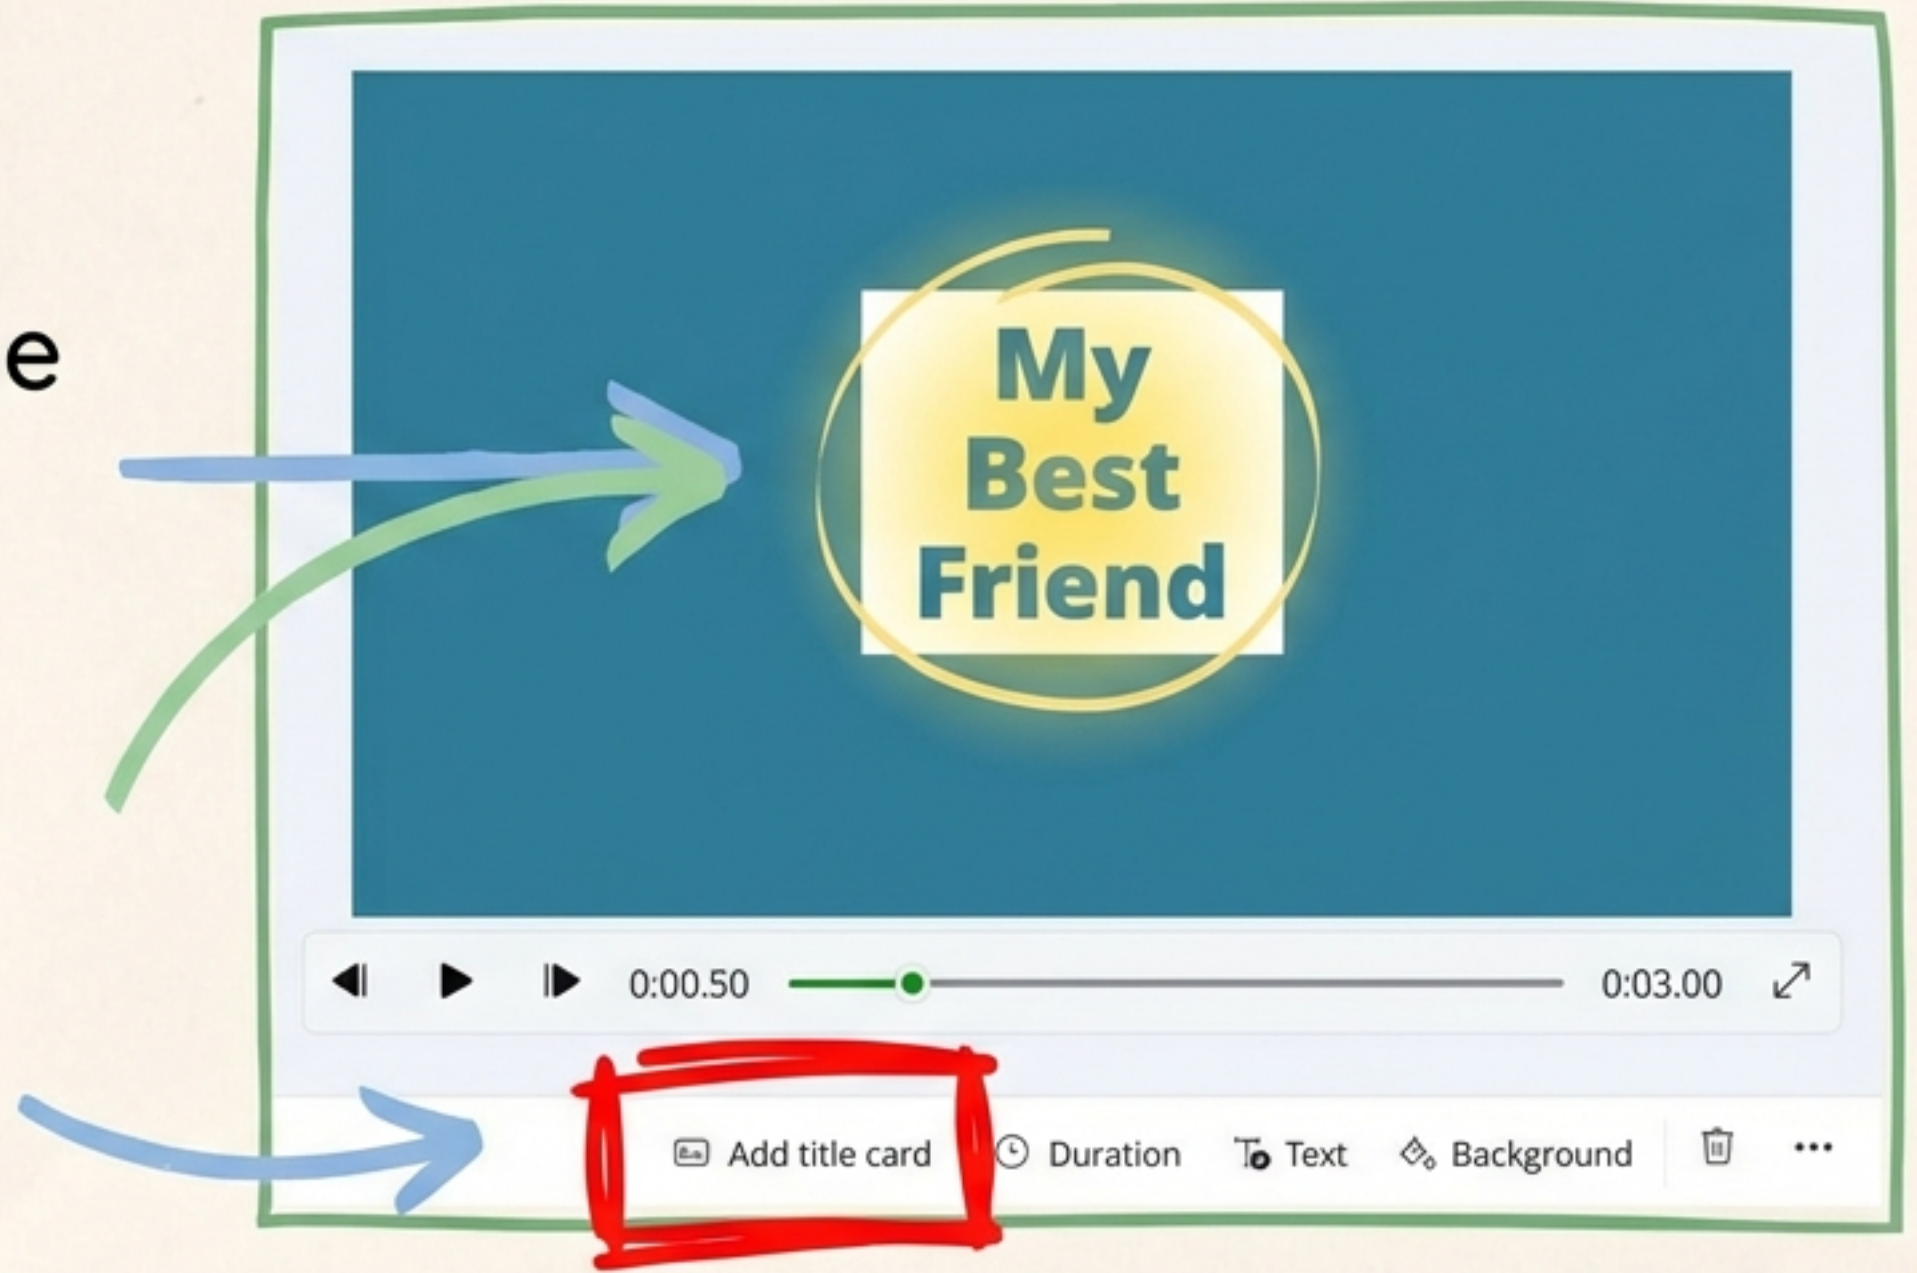

**Preview
Window**
(Watch here)

Storyboard
(Build story here)

Step 6: Add a Title Card

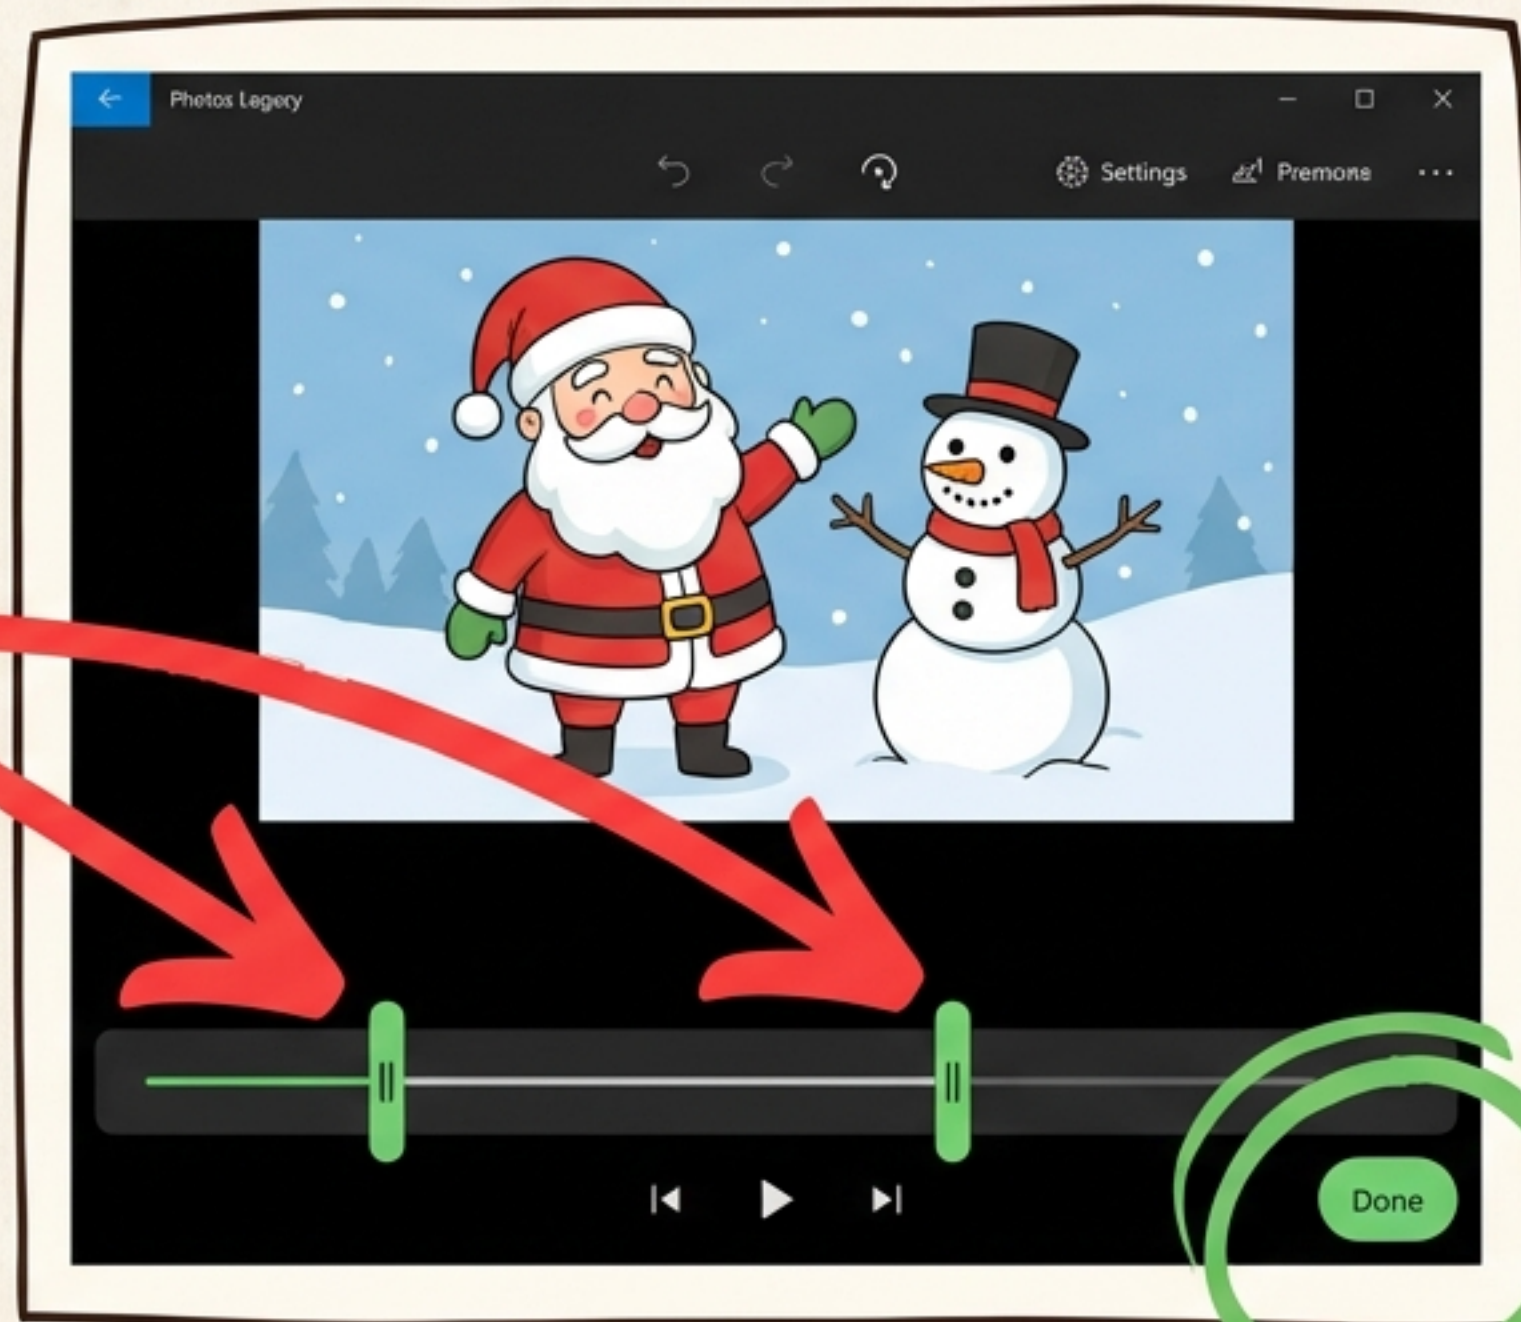

- Let's introduce our story.
- Click Add title card on the Storyboard.
- Click Text to change the words.
- Type: "My Best Friend".

Step 7: Trim (Cut the Boring Parts)

Remember, Snoopy hid behind a bush at the end!
We need to Trim the video.

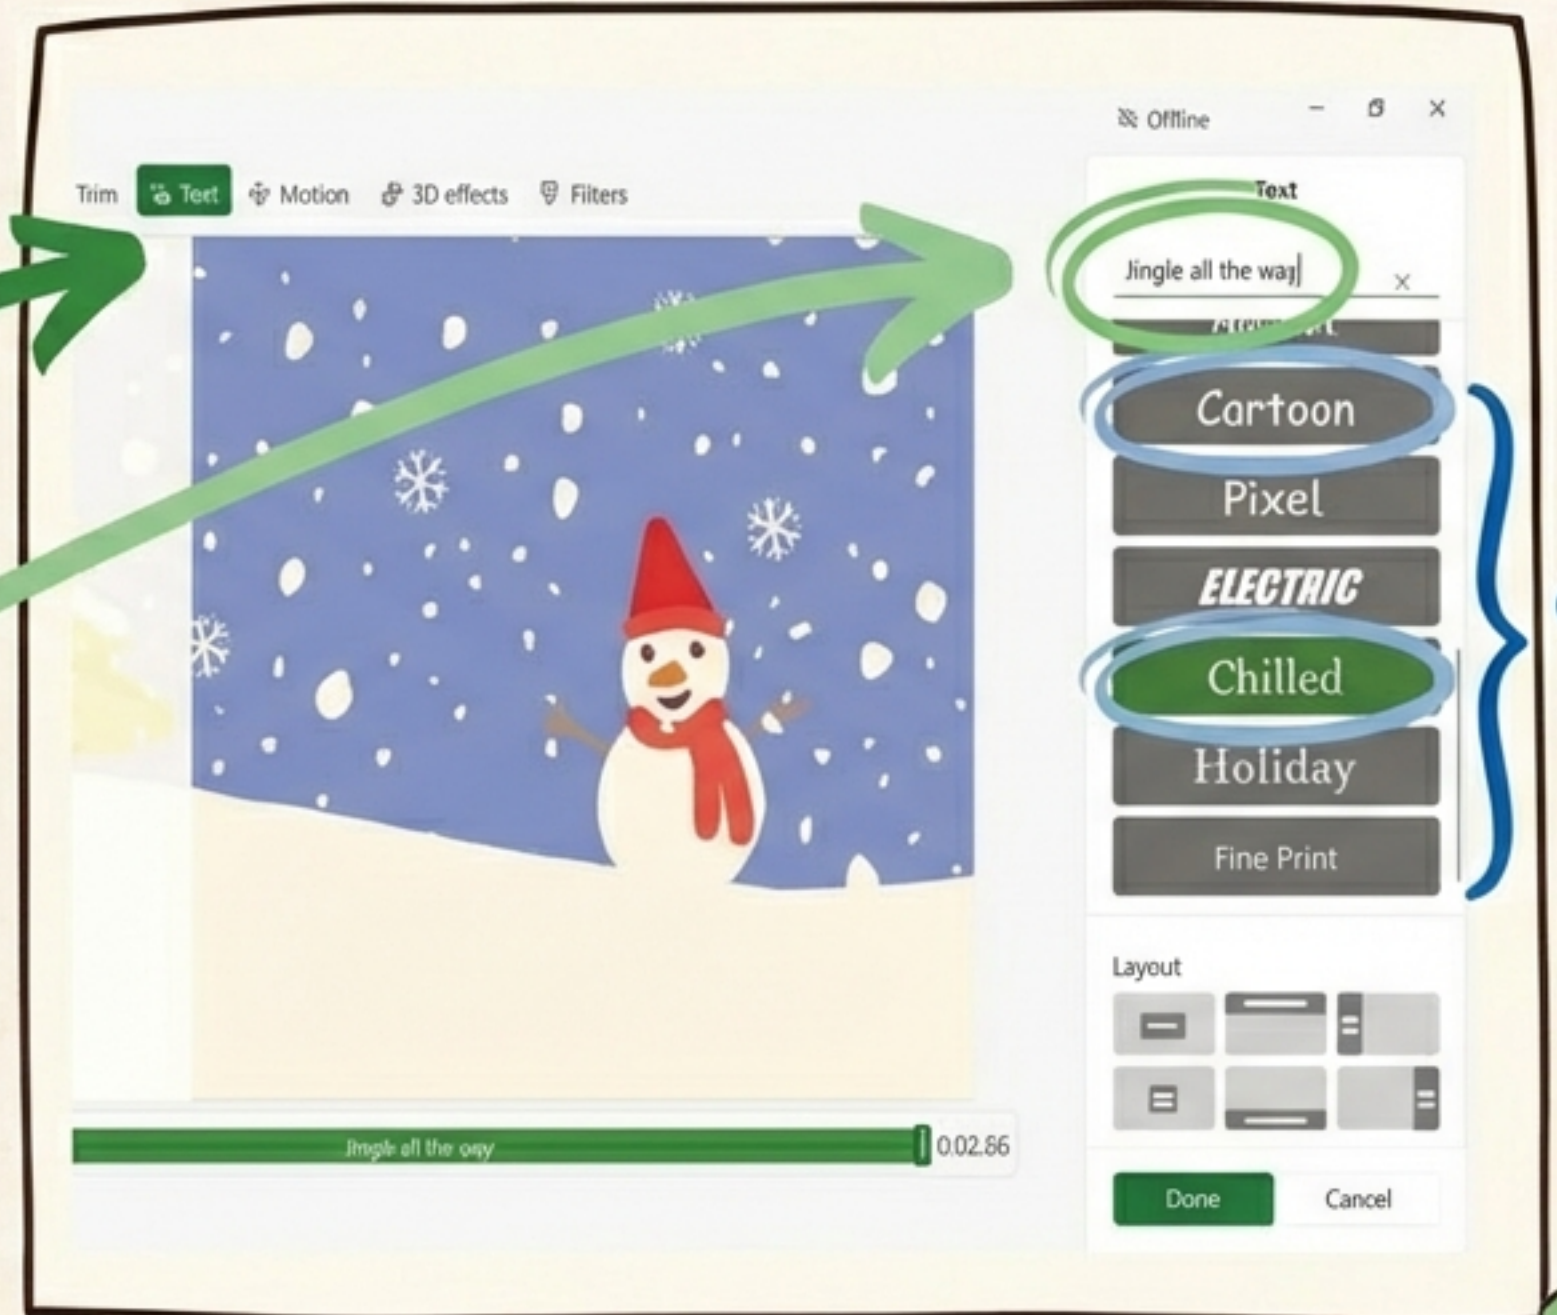

1. Click the Trim button.
2. Move the sliders to keep only the best parts.
3. Click Done.

Step 8: Add Fun Words

Let's add captions to the video.

1. Click the **Text** button.
2. Type your message: 'Jingle all the way'.
3. Style it! Choose a fun style like '**Cartoon**' or '**Chilled**'.

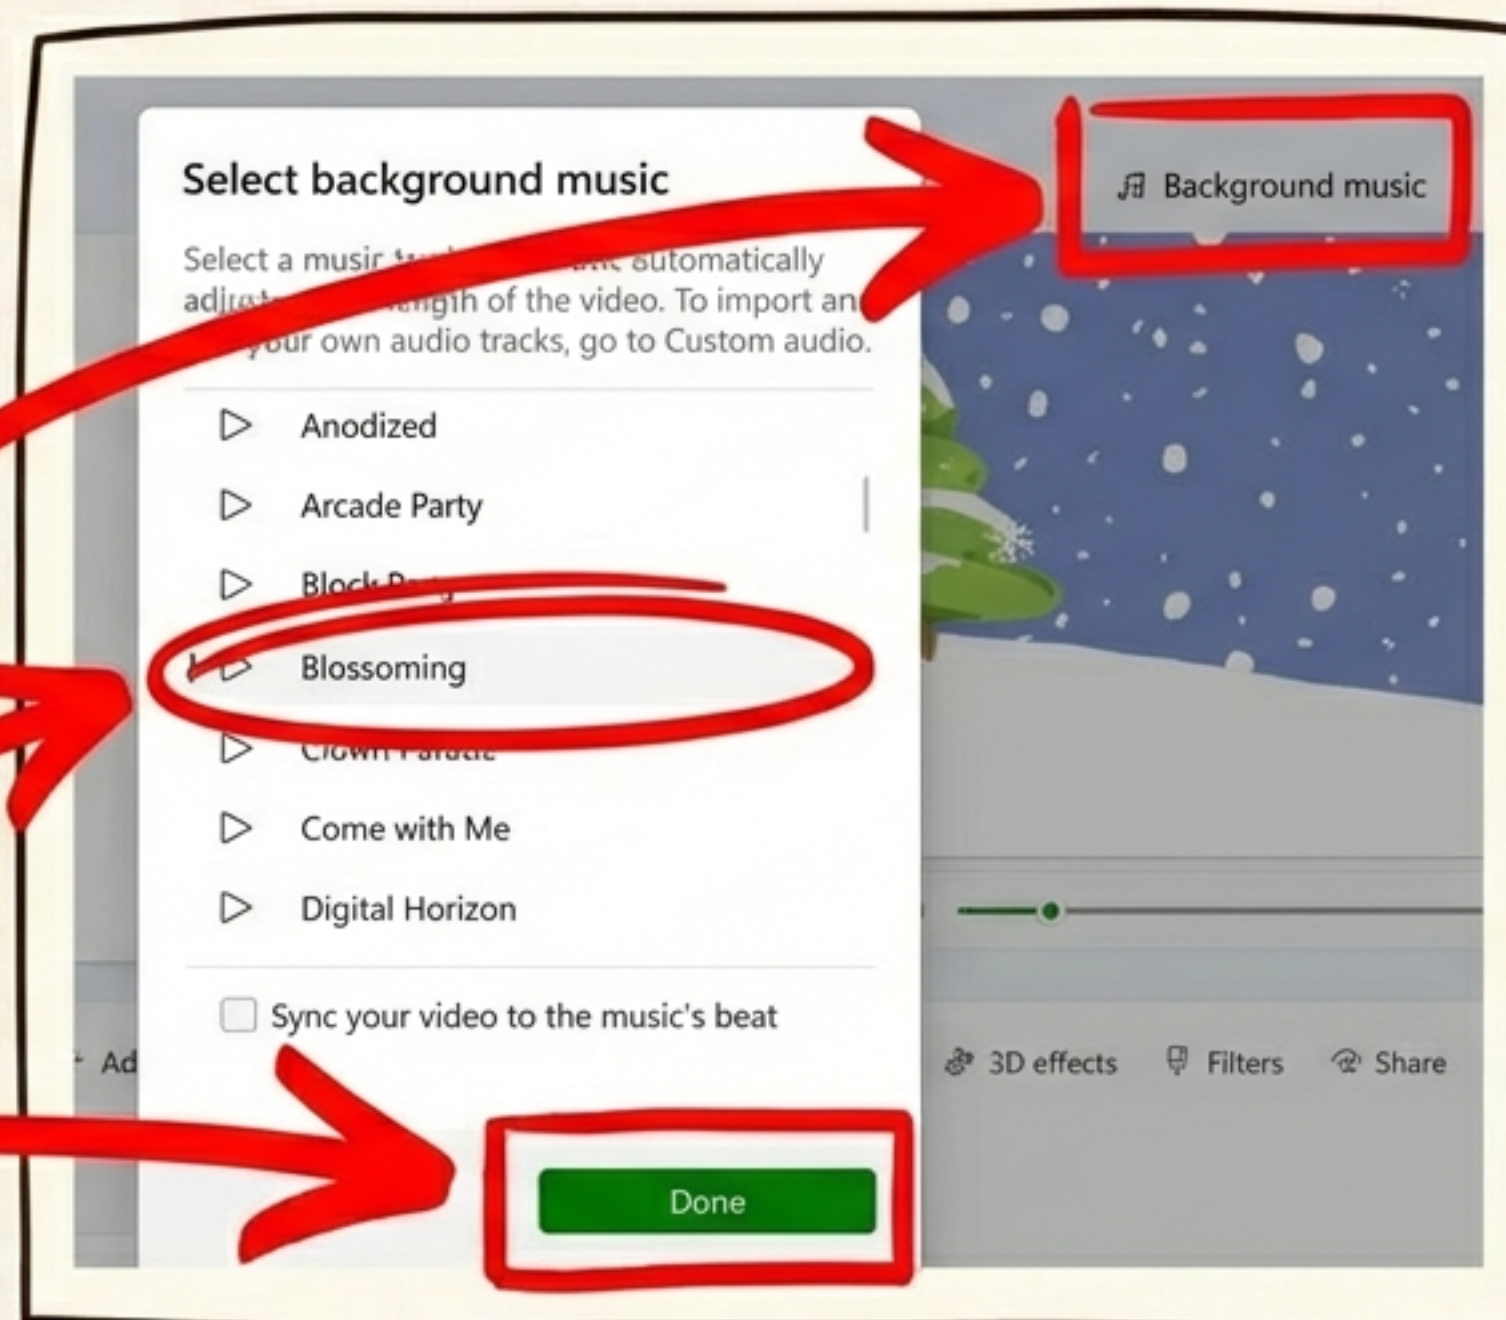

Choose
a
Style!

Step 9: Add the Beat

The video is too quiet. Let's add music!

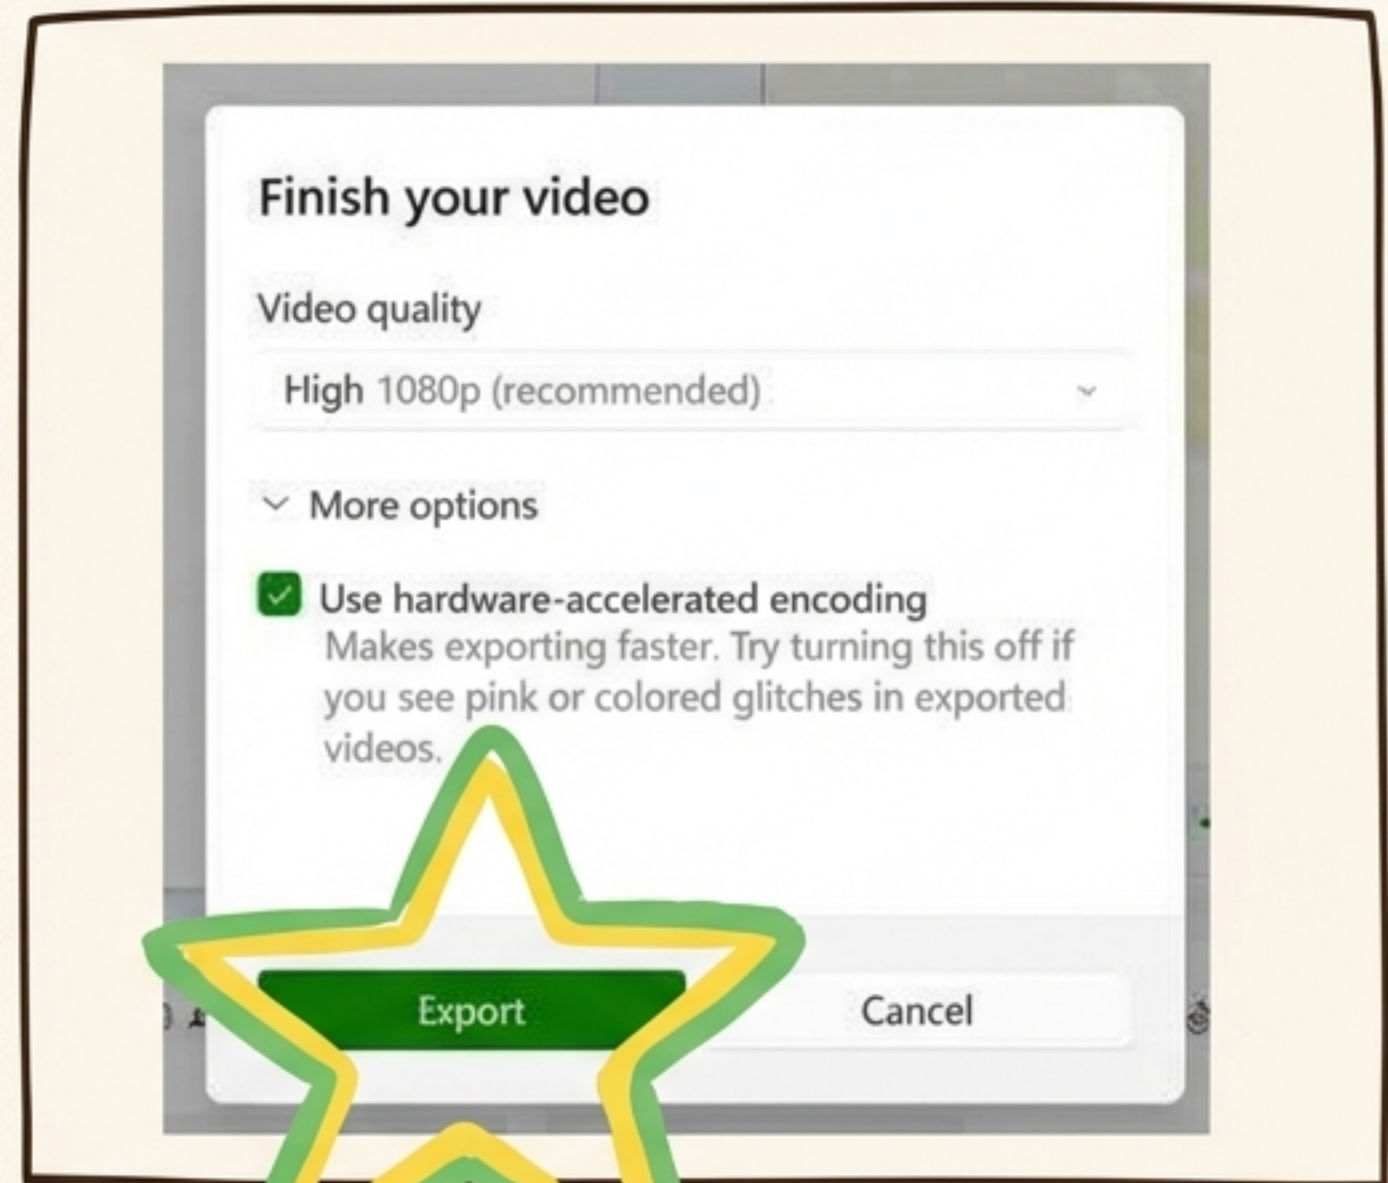

1. Click **Background music** at the top.
2. Pick a song from the list (like 'Blossoming').
3. Click Done.

Step 10: Finish and Save

Our movie is ready!

1. Click **Finish video**.
2. Choose **High 1080p** (recommended) so it looks great.
3. Click **Export** to save it to your computer.

Showtime!

Now my video looks complete with music and title!
“Thank you for helping me,” says Lily.

“Mission Accomplished! We are ready to show the movie to our friends.”
