

Files and Folders

08

What are these yellow colored icons? I see them everywhere.

These are called as folders. Folders are used to store different types of files.

What are different types of files?

We can use computers for many tasks. We need to keep all of our work safe and organised. This makes it easy to find and reopen. To organise our work, we use **Files** and **Folders**.

Files

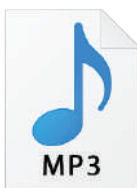

A file saves information on a computer. It can be of any type. There are different types of files:

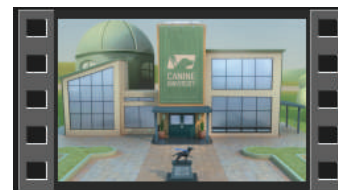

Document

Image

Music

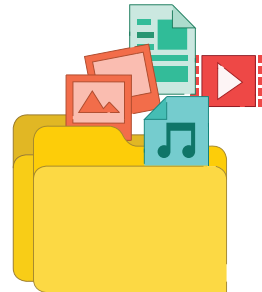

Video

We will see more about file types in future.

Folders

Files are like our notebooks and books. We keep our notebooks and books in our school bags. Just like that, we keep many files together in folders.

A folder saves many files together on a computer. It can save different types of files. A folder is like a storage box for files.

Exercise

State true or false

- 1 Files are of different types. _____
- 2 A folder can save different types of files. _____

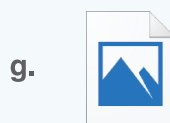

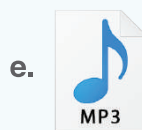

Match the pairs

- 3 a. Document

b. Image

c. Video

d. Music

8. Files and Folders

Let us learn more about folders.

The icons for folders look like this:

Empty Folder

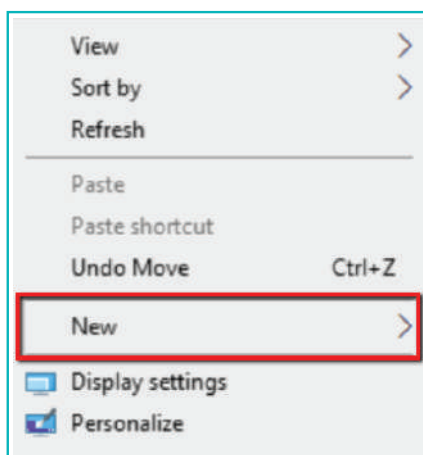

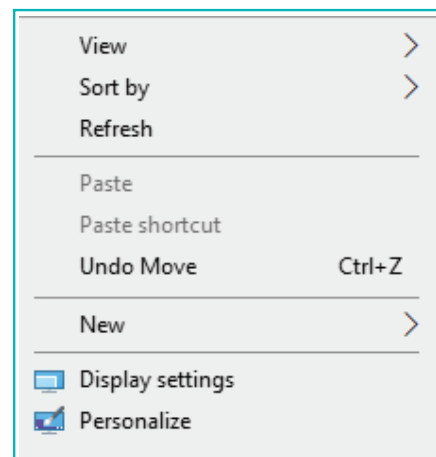

Folder with files

How to create a folder :

Steps

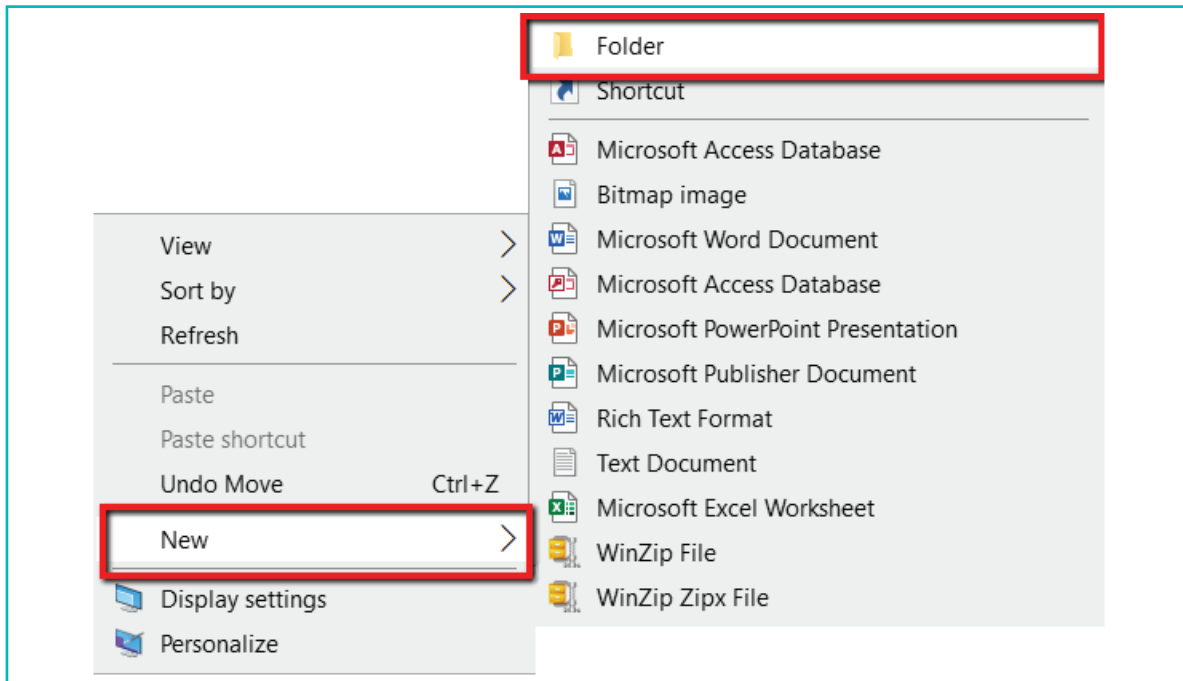

- 1 Right click on desktop. You will see a box like this.

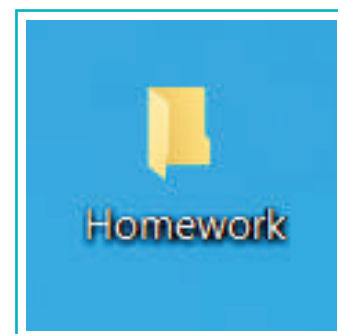

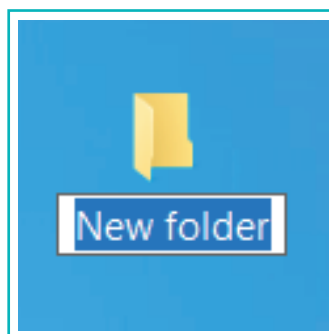

- 2 Click on "New"

Steps

- 3 Click on “Folder”

- 4 Write the name of the folder

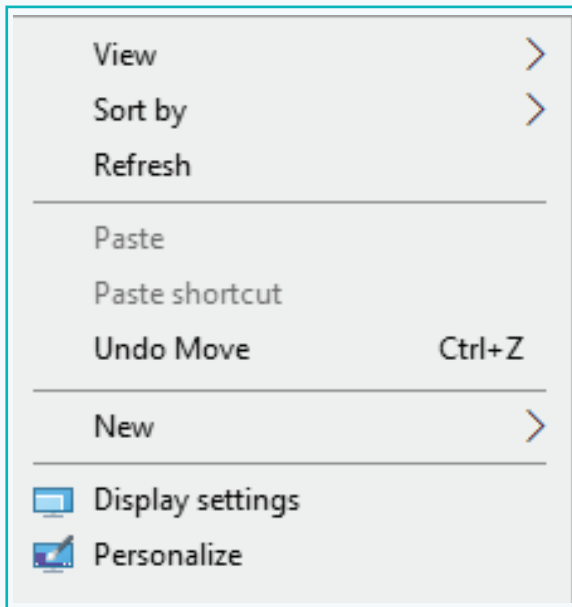

Bytes

You can give any name to the folder. It is better to give a name that tells us what files are inside. Example, 'My Photos' is a suitable name for a folder that has pictures.

Exercise

- 4 Circle around the option that is used to create a new folder.

- 5 Tick mark ☒ on the empty folder.

a. ☐

b. ☐

Oh! So, I can make different folders to keep my files.

Yes, of course. This will also help you to find them easily.

Tech Flash

- 1. File** : A file is any type of information that is stored on a computer.
- 2. Folder** : A folder can store and organise files of different types.
