

Email: An email is an electronic mail sent and received using internet in devices like computers, mobiles, laptops.

- Email is similar to written letters, and is a quick way to keep in touch with other people.
- Emails usually reach the receiver in a few seconds.
- To send and receive emails, we need an email address. An email address is also known as an email ID.

Email ID: An email ID is a unique address to which email messages are delivered. Every user has a different email ID.

- The postman knows where to deliver a letter based on the address we write on the envelope.
- Similarly, an email ID is the address emails are delivered at.

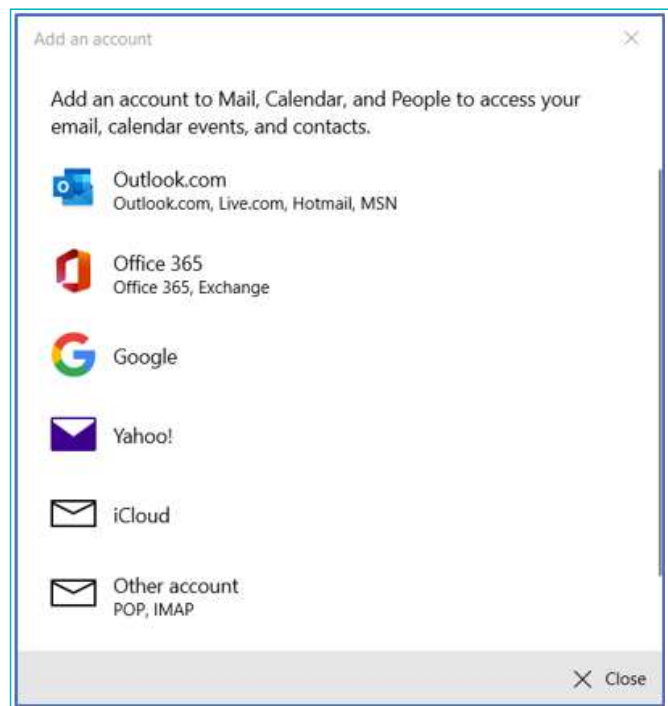

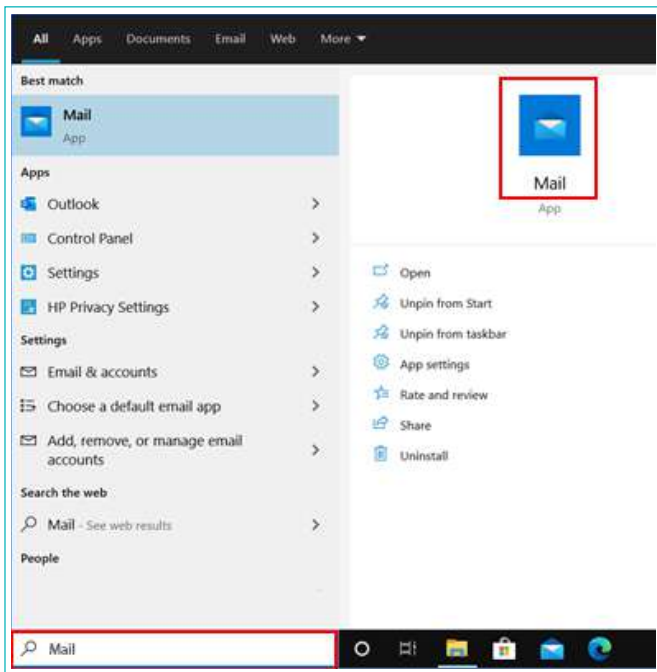

A typical email ID look like this: name@domain

Where:

Name	Generally the name of the user. For example: riyakumar, aditya_jain, tulsi_yadav2013
@	Pronounced as [at the rate] , this is the separator between the name and domain.
Domain	The service provider of the email service. For example: gmail.com, hotmail.com, outlook.com

To open an email:
Type “**Mail**” in the search bar.
Click on **Mail**.

The following window will appear:

Email service provider:

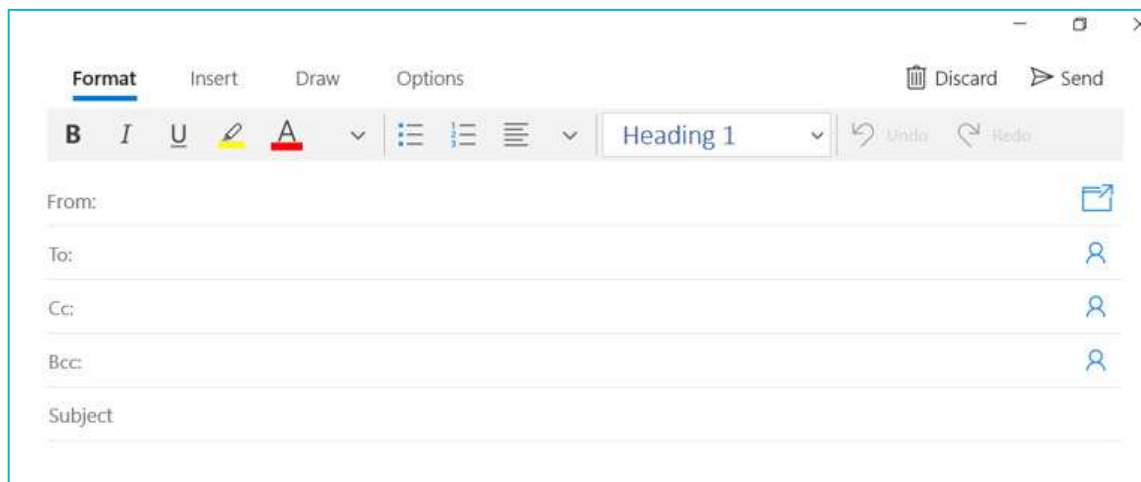

- Some websites provide an email service to send and receive emails.
- The website that provides the service is called the email service provider.

Exercise

Fill in the blanks

- 1 _____ is an electronic mail sent and received using internet in devices like computers, mobiles, laptops.
- 2 The email ID consists of the _____ and domain.
- 3 _____ is the service provider of the email service.

Structure of an email service

The screenshot shows an email composition window with a menu bar at the top containing 'Format', 'Insert', 'Draw', and 'Options'. Below the menu bar is a toolbar with various icons for text formatting (bold, italic, underline, color, background color), list creation, and heading selection. The main area of the window is divided into sections for 'From:', 'To:', 'Cc:', 'Bcc:', and 'Subject', each with a corresponding icon on the right. The 'From:' field is currently empty, while the others contain placeholder text.

In an email, we have the following parts:

From: The sender of the email.

To: The receiver of the email. This is where we type the email ID of the person we want to write to.

Cc (Carbon copy): The people to whom we want to send a copy of the email. Typically, people who are Cc'ed are not meant to respond to the email. It isn't necessary to fill this section in every email.

Subject: The space for us to explain the purpose of the email. It needs to be short.

Body of the email: Where we write our message. We usually start with a greeting and end with a polite closing remark.

Exercise

Answer in one line

4 What is an email?

5 What is an email ID?

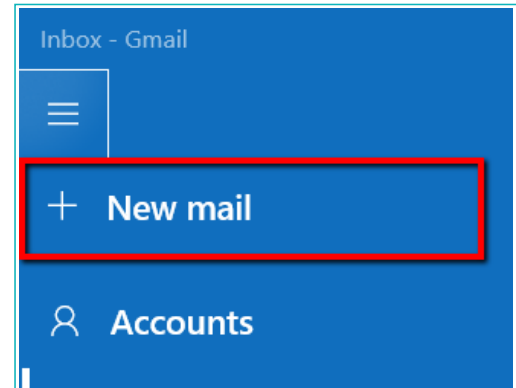

My class teacher has asked me to inform her when I submit the essay.

Sure, we will send her a copy as well.

Create an email

- To create a new email, click on “**New Mail**”.
- Type the email ID you want to send the email to in “**To**”.
- Type the email ID to whom you want to send a copy in to “**CC**”.
- Type the purpose of the email in “**Subject**”.
- Type the message in the “**Body**”.

Submission for Annual Essay Writing Competition

Dear Sir/Ma'am,

Below are the required details of the participant for the Annual Essay Writing Competition:

Name: Kavya Sethi
Class: 3-B
Class teacher: Aarti Agarwal
Topic: Should plastic be banned?
Parent contact no.: 6992001101
Please find the attached essay document named - KAVYA2020.docx

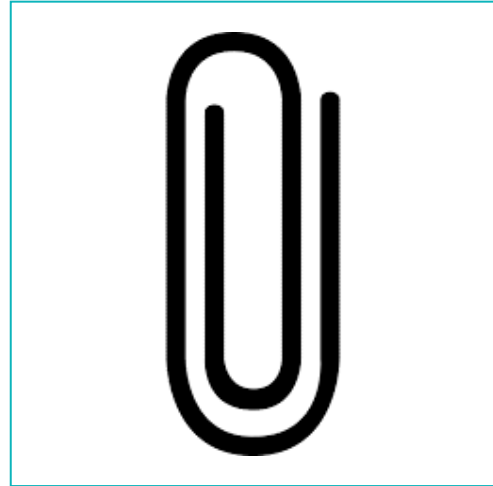

Thank you!
Sincerely,
Reema Sethi
(Mother of Kavya Sethi)

To submit the entry for the Annual Essay Writing Competition, Kavya and her mother need to attach her essay.

Add an attachment to an email

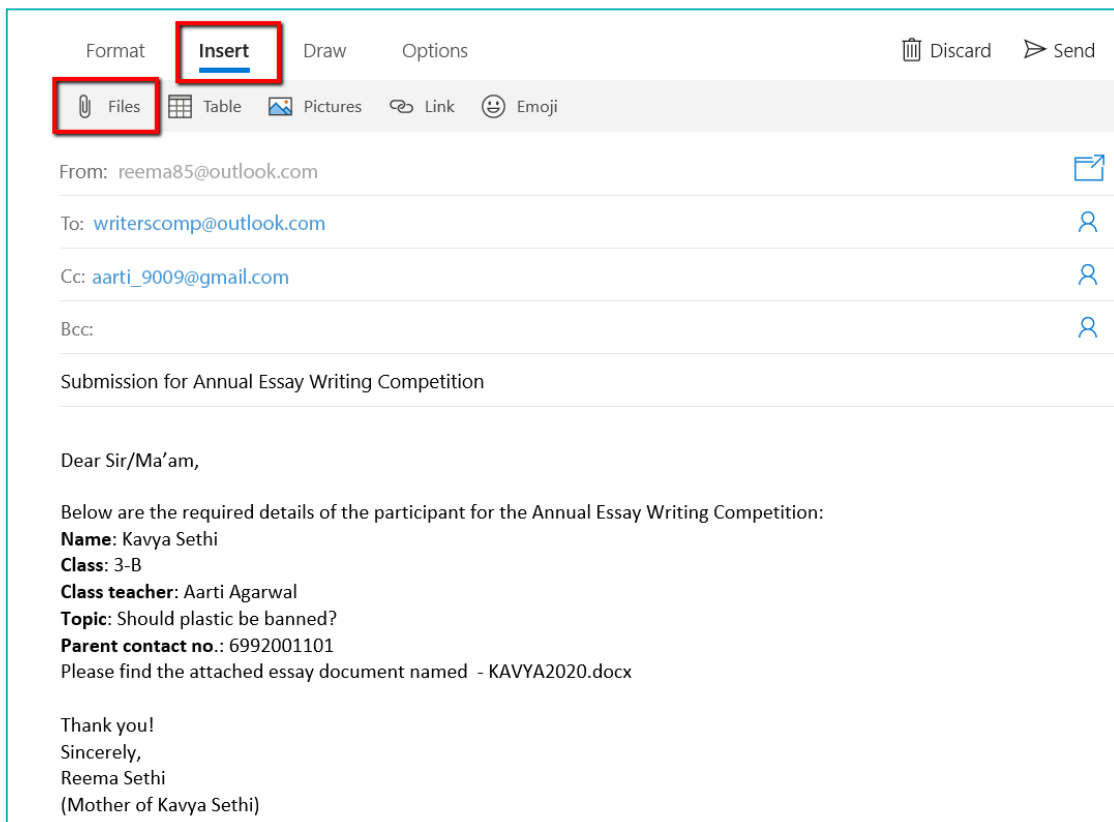

Attachment:

An attachment is a file that we send along with the email to the receiver. An attachment can be of any file type, like pictures, documents, videos, etc.

To add an attachment:

- Click on “**Insert**”
- To attach a document, click on “**Files**”

The screenshot shows an email composition interface. At the top, there are tabs: 'Format', 'Insert' (highlighted with a red box), 'Draw', and 'Options'. Below these tabs is a toolbar with icons for 'Files' (highlighted with a red box), 'Table', 'Pictures', 'Link', and 'Emoji'. To the right of the toolbar are 'Discard' and 'Send' buttons. The email body contains the following text:

From: reema85@outlook.com

To: writerscomp@outlook.com

Cc: aarti_9009@gmail.com

- Select the files you want to attach.
- Click on “OK”. An attachment will appear below the subject.
- To send the email, click on “Send”.

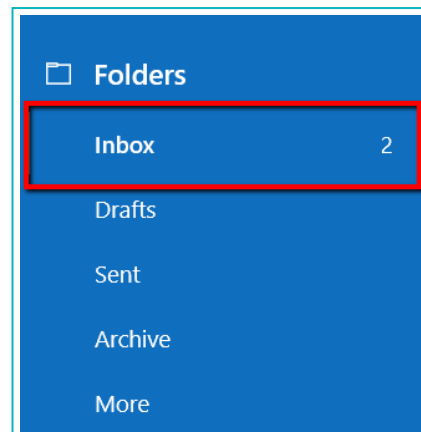

Kavya and her mother have sent an email to the essay competition organising team, with a copy to her class teacher.

The organising team has received the email, and will send a reply to Kavya.

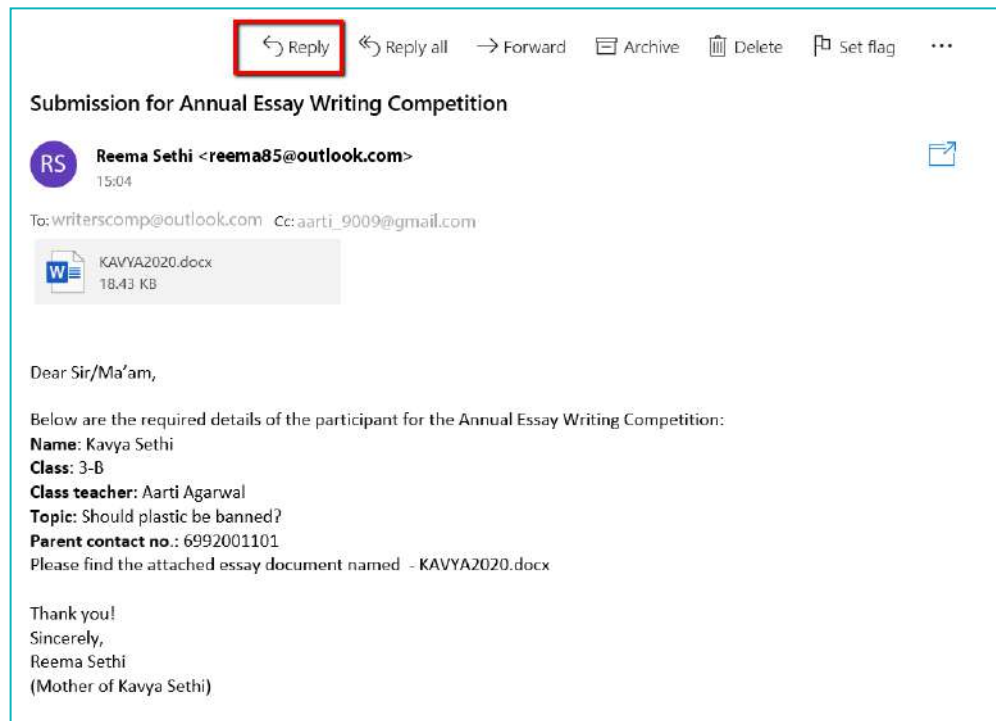

Reply to an email

- When we receive an email, it will be visible in our **Inbox**.

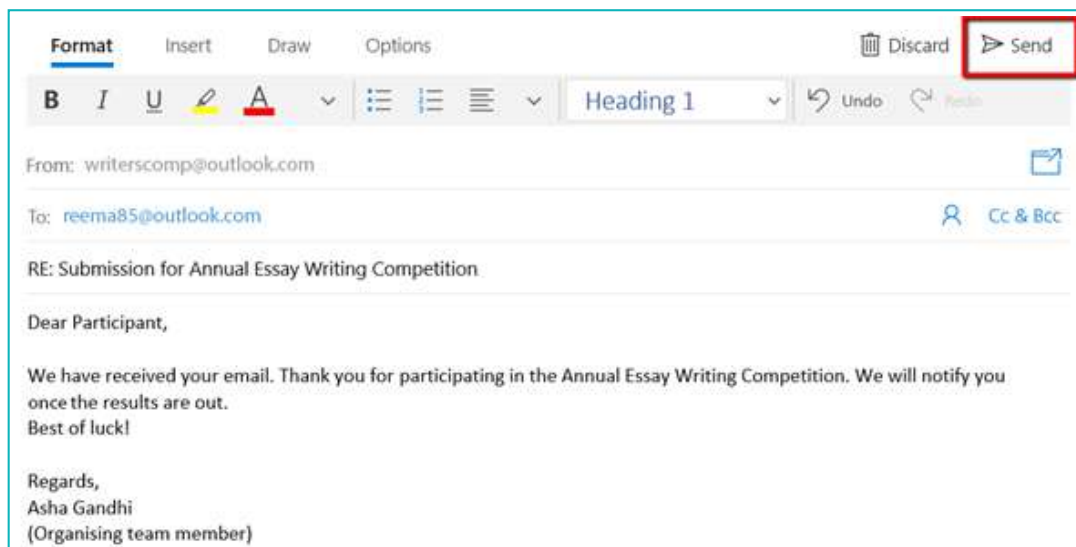

Inbox is the main folder where incoming mails are stored.

- To reply to an email, open it and click on the “Reply” button.

- A new section will open where you can type your message and send it back to the original sender.

Like emails, another way to communicate through the internet is **Instant Messaging**.

Instant Messaging

A type of service available on the internet that allows us to exchange messages with someone who is using the same service at the same time. This is a very quick method of communication.

For example: WhatsApp, Facebook Messenger.

Difference between email and instant messaging:

Email	Instant Messaging (IM)
An email can be sent from any email service to another email service. For example: If you are using Outlook, you can send an email to any other email service like Gmail or Yahoo.	IM can only be sent to people using the same application. For example: If you are using WhatsApp to send a text, the other person should have WhatsApp installed on their device.
The sender and receiver need not be online at the same time.	The sender and receiver are online at the same time to chat back and forth with text, images, gifs, audio notes or videos.
You cannot use emails to engage in audio and video chats.	IMs allow you to engage in audio and video chats.

Email is an effective and essential means of communication. It is a quick way to keep in touch with other people. We can write messages and change the colour of text, change the font, and underline it. When we send an email, we can attach files like pictures, documents, videos and other items on our computer.

Exercise

Fill in the blanks

- 6 The address of the sender and receiver is their _____
- 7 In _____ the sender and receiver have to use the same service.

Match the pairs

- | | |
|------------|---|
| 8 a. To | f. The message of the email |
| b. From | g. The sender of the email |
| c. Cc | h. The purpose of email |
| d. Subject | i. The receiver of the email |
| e. Body | j. The list of people who get a copy of email |

Answer in one line

- 9 Which types of attachments can be attached to an email?

Tech Flash
