

Right Click

03

Sister, I have got these pictures from Mom, but their names are not proper. It is confusing me!

Ryan, you can use 'rename' to give them proper names. Let me show you how.

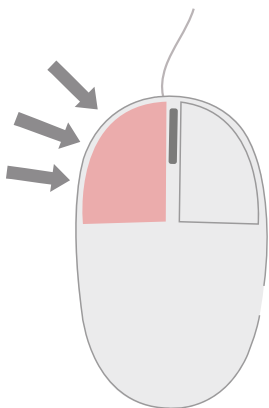

Recall:

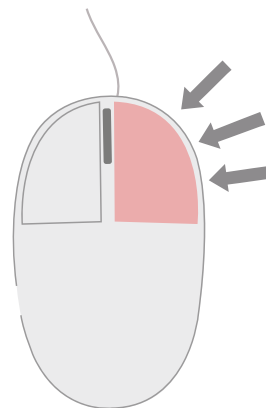

A **mouse** is used to control the pointer on the screen. There are two buttons and a scroll wheel on the mouse.

3. Right Click

The mouse can perform two main actions: **Left Click** and **Right Click**.

- **Left Click:** We use the left click of the mouse for many common computer tasks. We can select and move objects when we press and hold the left click button.

- **Right Click:** We use the right click of the mouse to provide a menu of actions. When we right click on a file or a folder, it will open a menu with several options.

Exercise

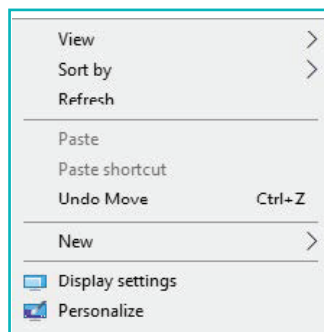

Fill in the blanks.

- 1 There are 2 buttons on a mouse: the _____ and _____.
- 2 The wheel on the mouse is called as the _____.

Example:

When we **Right click** on the **Desktop**, a menu opens with these options:

A Command is an instruction given to a computer.

CUT

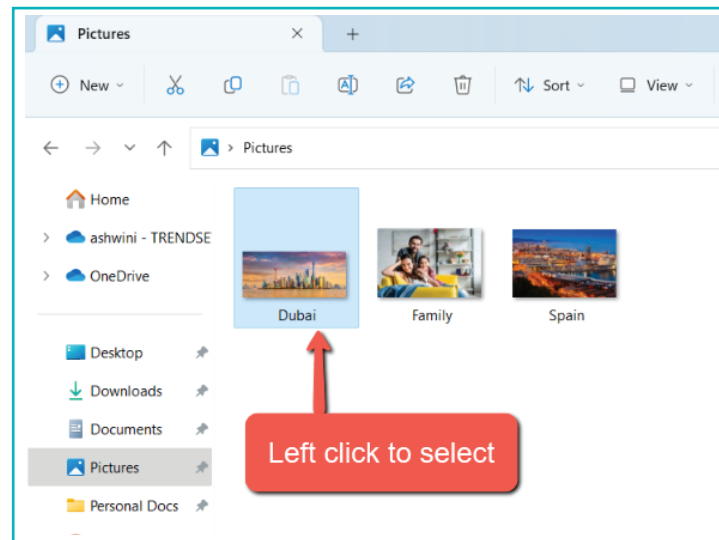

PASTE

RENAME

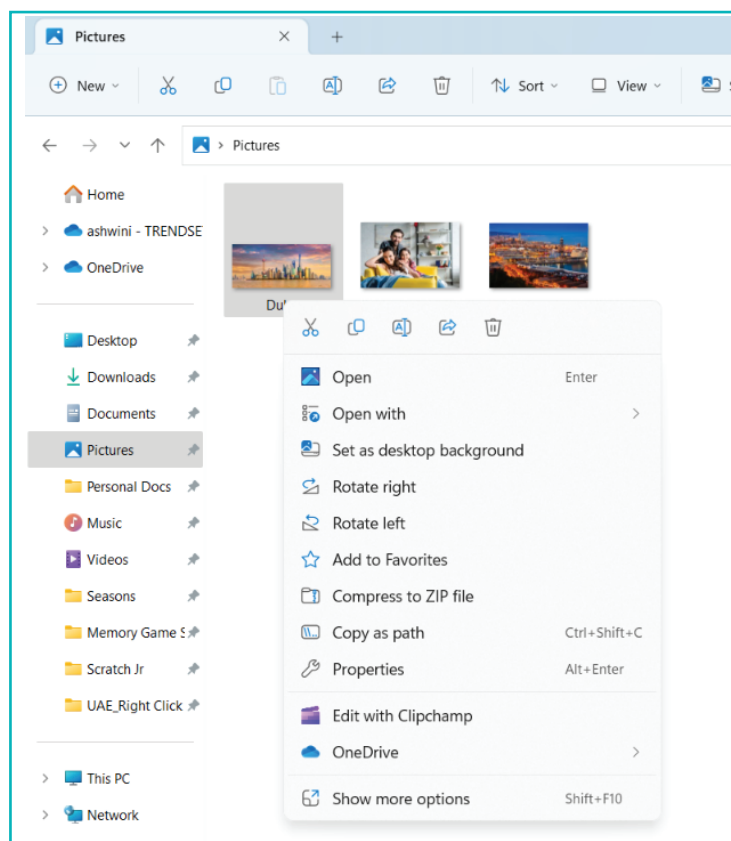

Right Click

Here is how to Copy something on the computer:

- 1 **Select** the file or folder that needs to be copied.

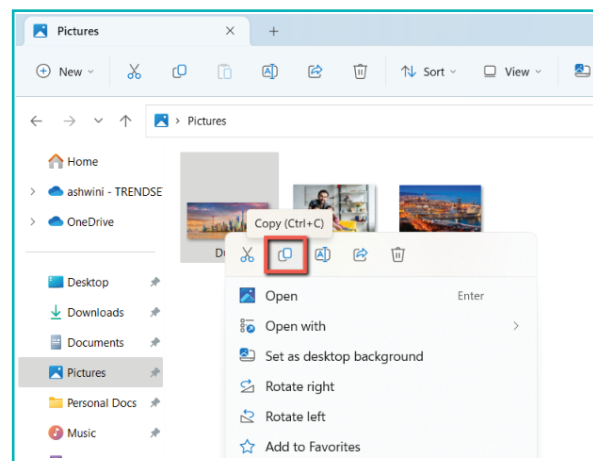

- 2 **Right Click** on the selected icon.

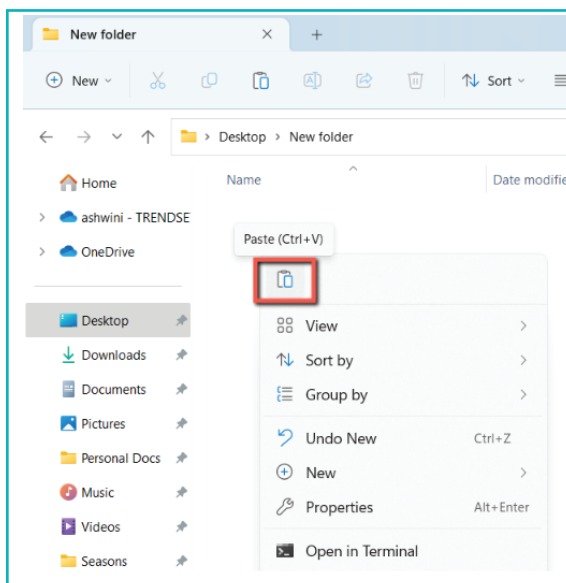

3. Right Click

3 Select the **Copy** option

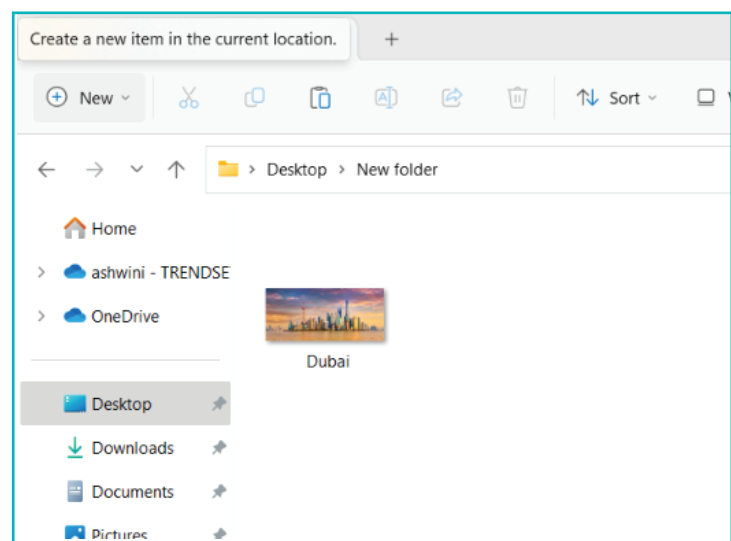

4 Go to the folder where you want to move it.

5 Right Click on empty space and click **Paste**.

We have successfully copied the image to a new folder called 'Dubai'.

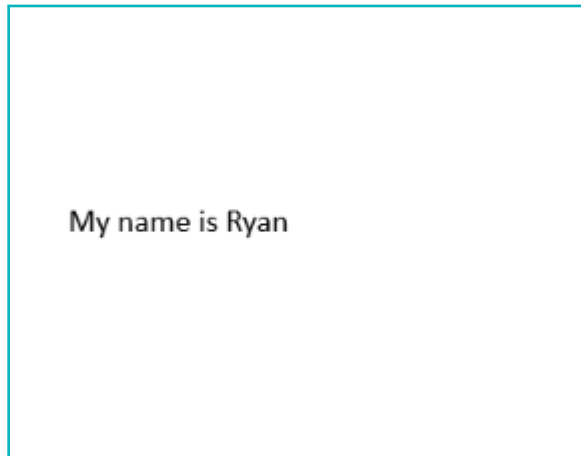

3. Right Click

Cut and Paste

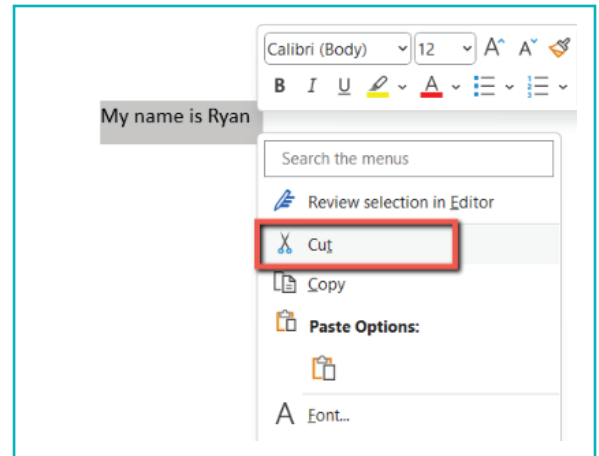

Have you ever cut out a piece of paper and pasted it on different page? We can do this on a computer too! We can move a file or folder using **CUT** and **PASTE**.

- When you use Cut command on some text, file, or folder, it gets removed from its original location.

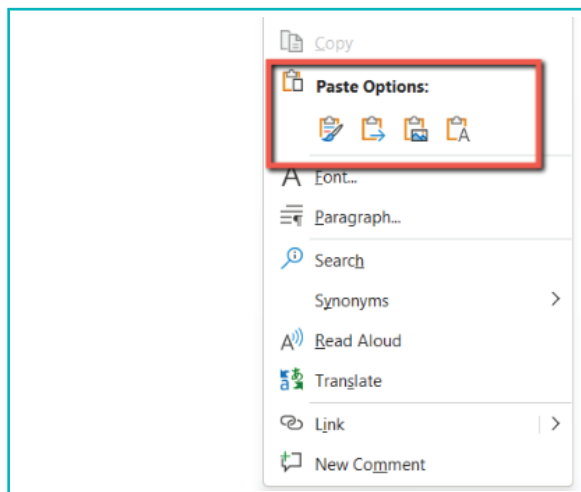

a.

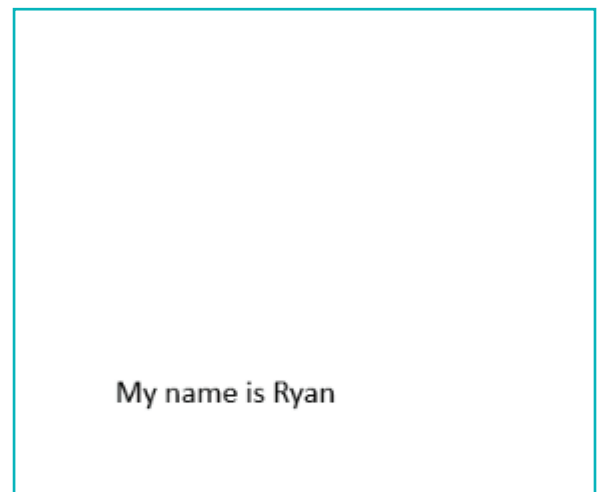

b.

c.

d.

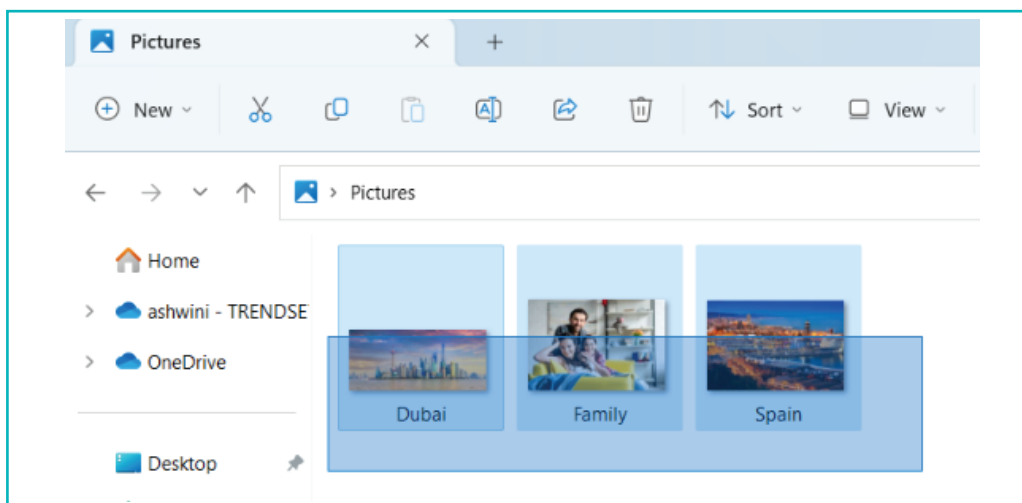

3. Right Click

- 1 Select a folder or file to be **Cut**.

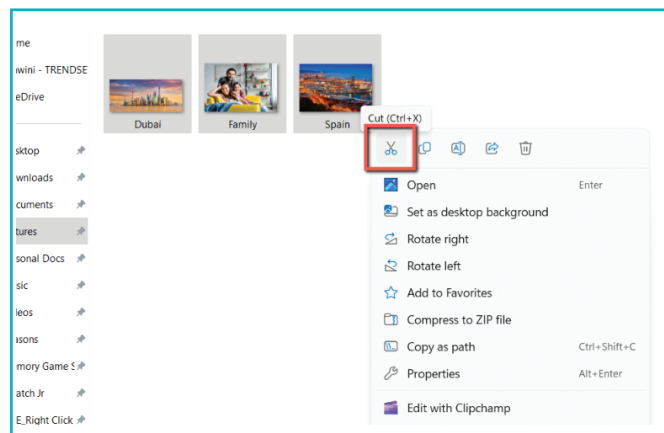

To select multiple files:

- Left Click at one end of the open space outside the items to be selected.
- Hold and drag across the side of the items.
- A blue coloured box will appear. All the items inside the blue coloured box are now selected.
- Release the left click button.

- 2 **Right Click** on the images you want to move.

- 3 Select the option **Cut**

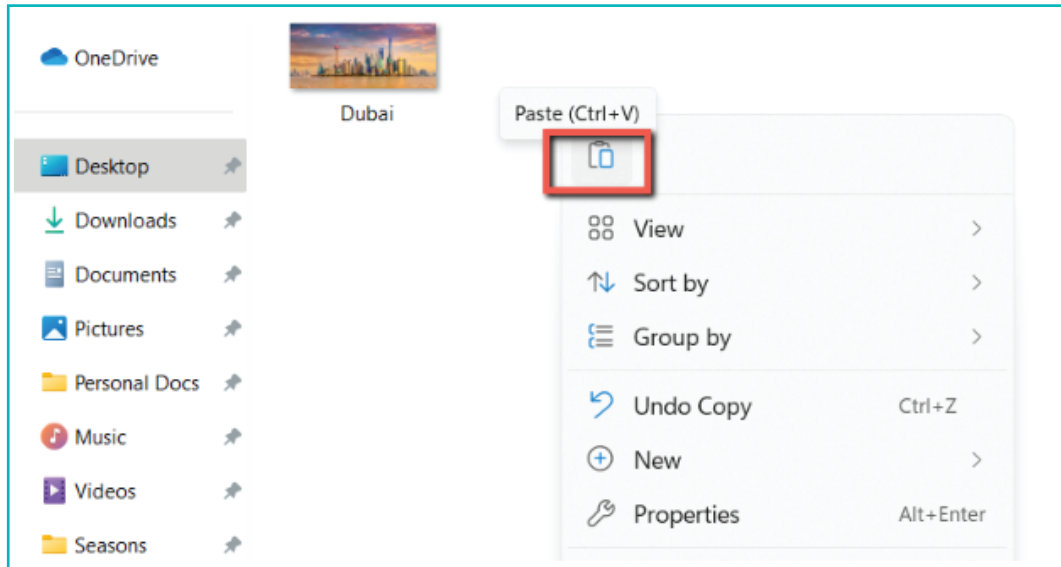

- 4 Open the folder in which you want to **paste** the images.

Bytes

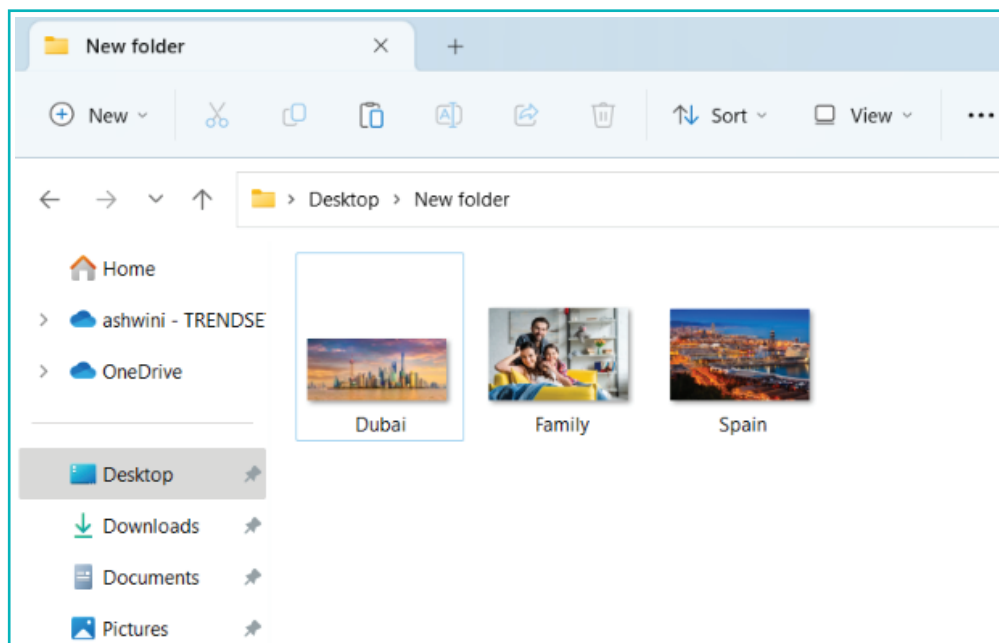

Paste command will paste the information that is copied or cut by the user. Paste command cannot be used by itself. It will not be active in the right click menu if nothing has been copied or cut.

3. Right Click

- 5 Right Click on the empty space and select option **Paste**.

- The images that you had selected are now moved to the new folder. The images are **Cut** and removed from the previous “**pictures**” folder.

- Cut command is also always used with Paste command. Paste command is used after cut to complete move operation of the selection.

Activity

- 1 Create a folder named **Animals**. Add 2 notepad files in that folder.
- 2 Create a new folder called **Zoo**. Copy and Paste the files from **Animals** into **Zoo**.
- 3 Create a new folder called **Notepad files**. Cut and Paste the files from **Zoo** into **Notepad files**.

Exercise

Fill in the blanks.

- 3 We use _____ and _____ command to move files.
- 4 We use _____ and _____ command to create duplicate files.
- 5 To open the options menu, we use _____ click.

True or False

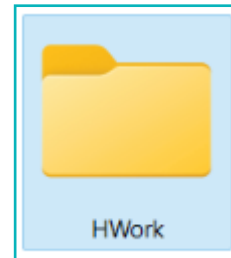

- 6 We cannot use the paste command without copy or cut.
▲ _____
- 7 We can use the cut command to duplicate text, files and folders.
▲ _____

3. Right Click

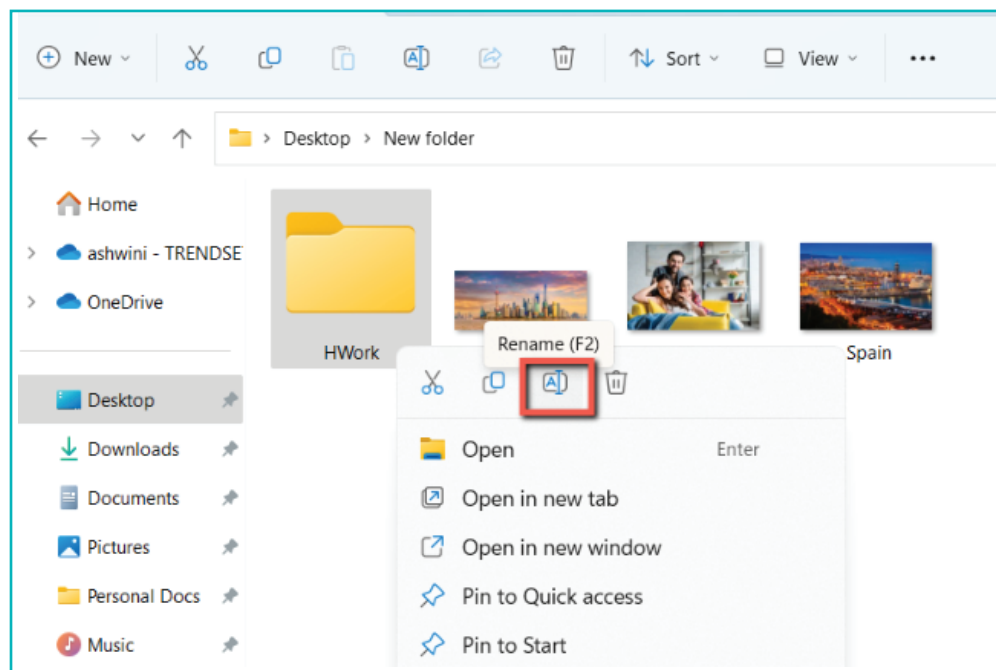

Rename

Sometimes, we want to change the name of a file or folder. To do this, we use the **RENAME** option. Here is how we can rename a folder:

- 1 Select the file and **Right Click** on it.

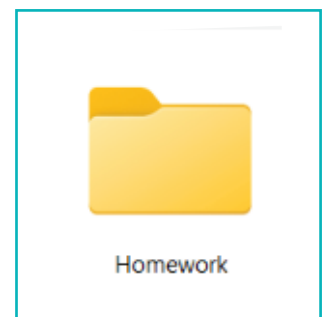

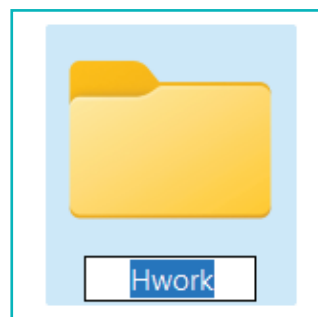

- 2 Select the option **Rename**.

- 3 We can type a new name in the box now. Enter the **new name** for the file or folder.

- 4 Press the **enter key** to save the new name

3. Right Click

Delete

This command is used to delete files and folders that we don't want in the computer anymore.

Example:

we can delete our grade 1 projects to make space for our new projects.

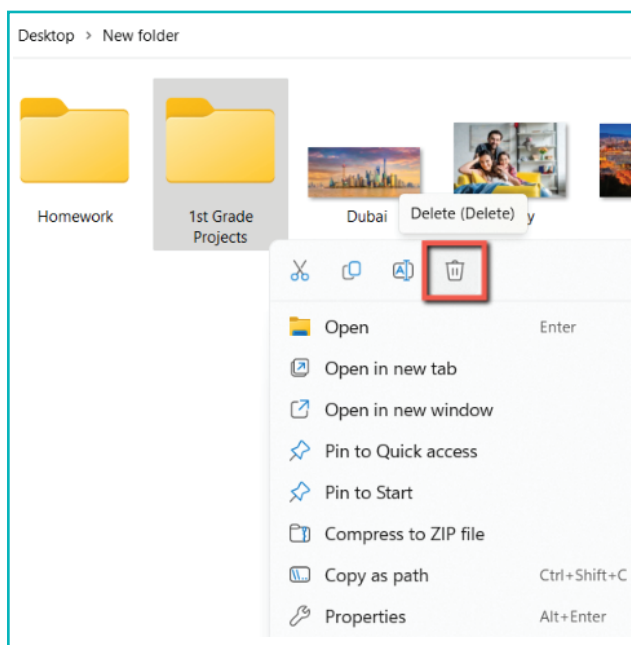

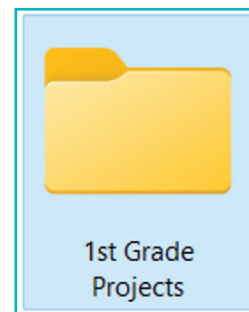

Recall:

Deleted files are sent to the Recycle Bin.

Send a file to the Recycle Bin:

- 1 Select the file or **folder to delete**.

- 2 **Right Click** on the file or folder.

- 2 Select **Delete**

You have sent the file to the **recycle bin**!

Exercise

Match the Following:

- 8**
- | | |
|-----------|--|
| a. Cut | f. Remove files from the computer |
| b. Copy | g. Command that cannot be used alone |
| c. Paste | h. Move files from one folder to another |
| d. Rename | i. Create duplicate files and folders |
| e. Delete | j. Change the file name |

I have renamed the pictures as 'My Dog', 'My House', 'My Family'. Is this okay?

Yes Ryan, now it is easy for you to identify them.
