

You can bookmark a website on the browser to save some time. Here, let me show you how.

Mom, I have to type the Kiddle website name again and again, everytime I have to search for information. Is there an easy way to do this?

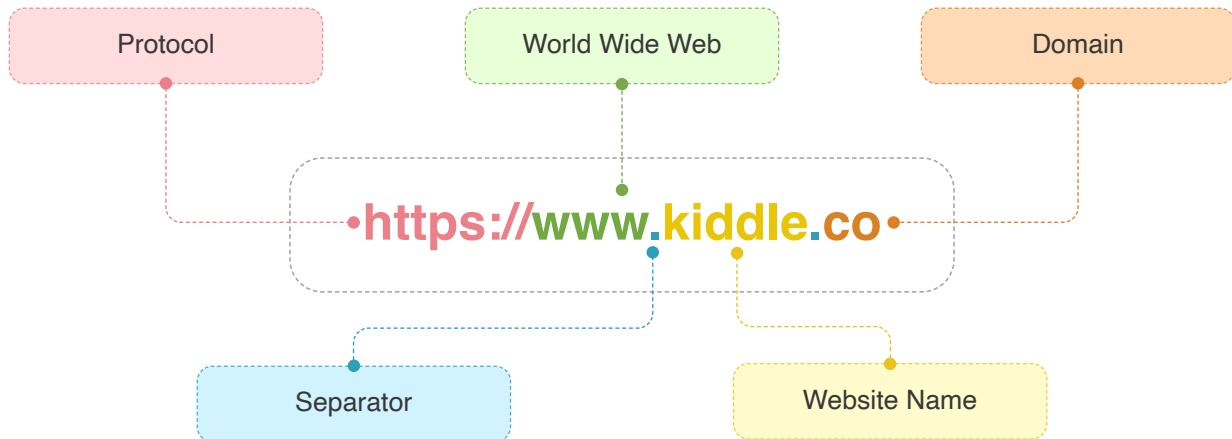

Recall:

Kiddle is a website that helps to search for information. It is made specifically for students. kiddle's website address is: www.kiddle.co

A website address is also called a Link or URL (Uniform Resource Locator).

Link

A typical website link has four main parts:

- **Protocol:** Set of rules to transfer information on the internet.
- **World Wide Web:** The interconnected network of computers across the world identified by URLs
- **Website Name:** The website name is always unique in a given domain.
- **Domain:** A collection of web addresses.
- **Separator:** The . (dot) after each section is called a separator.

To open a website, just a link is not sufficient. We need a software to help reach the website. This software is called a Browser.

To use a browser, we require three things:

- A computing device like a PC, laptop, or smartphone
- A browser
- An active internet connection

Browser

A browser is a software that is used to access the internet. There are many different browsers, but Edge is the default browser for Microsoft Windows 10 users.

This  is the icon for the Edge browser. Some other web browsers are:

Name of the Browser	Icon
Google Chrome	
Mozilla Firefox	
Safari	

All of these browsers are used on PCs, laptops, tablets, and smartphones.

Exercise

Fill in the blanks

- 1 The default browser for Microsoft Windows 10 is _____.
- 2 A few examples of other browsers are _____, _____ and _____.

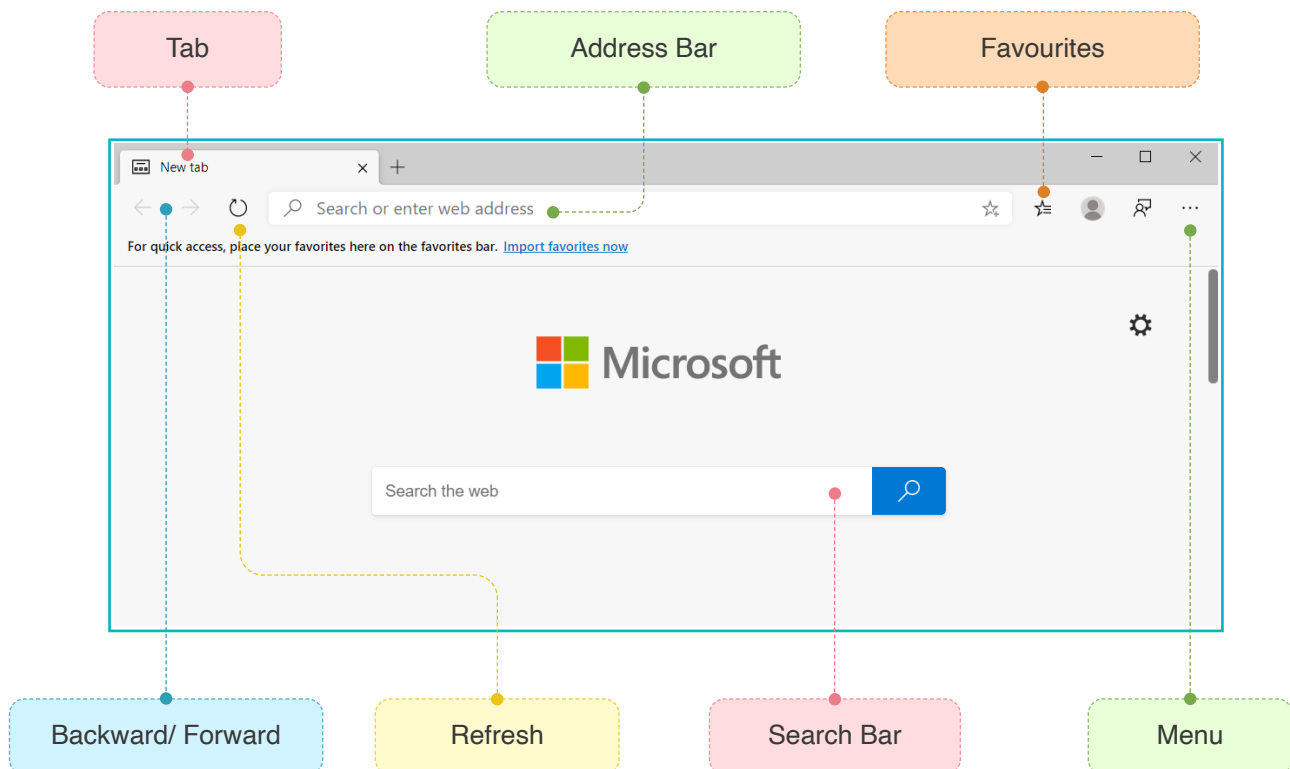

Exercise

 Tick mark ☒ the correct answer

- 3 Which of the following is not part of a website address?
- a. https:// ☐ b. .com ☐ c. Downloads ☐ d. www ☐
- 4 What is the dot after each section in the website address called?
- a. Separator ☐ b. Domain ☐ c. Address ☐ d. Link ☐

Parts of a browser

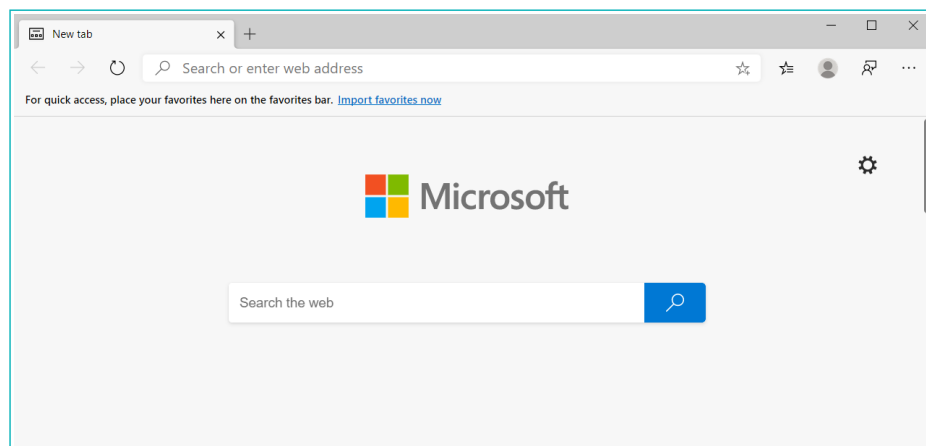

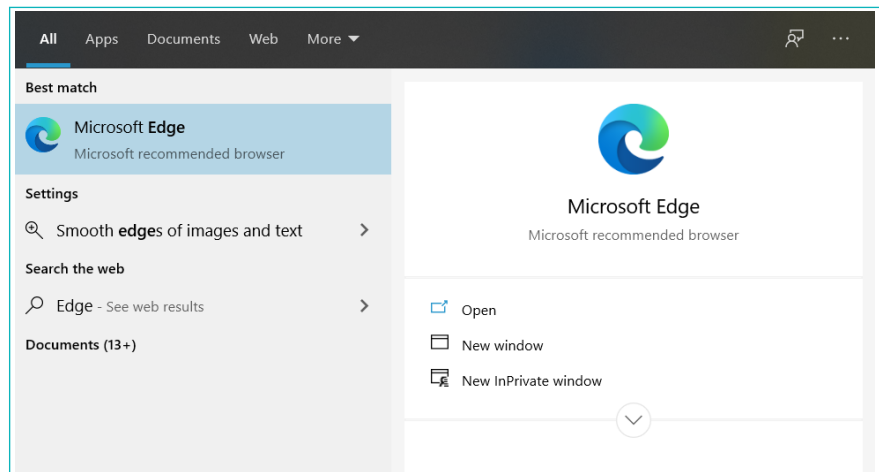

A browser has is made up of different parts. Each part has a specific use.

For example: Kavya is working on her school project, “Wild Animals”. She needs to collect information from the internet. She will use the following steps to find and gather information:

1 Open Edge, the web browser

2 Type Microsoft Edge in the taskbar search box.

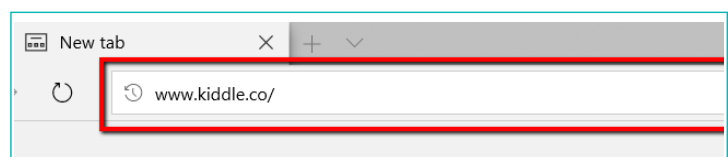

3 Press the Enter key. This will open the browser.

4 Address Bar: To type the web address.

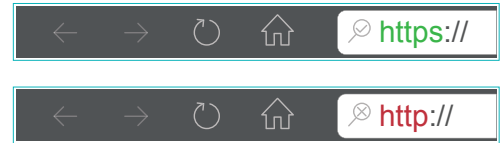

The address bar is where we type the website address.

For example: Kavya wants to use Kiddle to find information. She will type the website address for Kiddle, www.kiddle.co/, in the address bar and press Enter.

Healthy Practices:

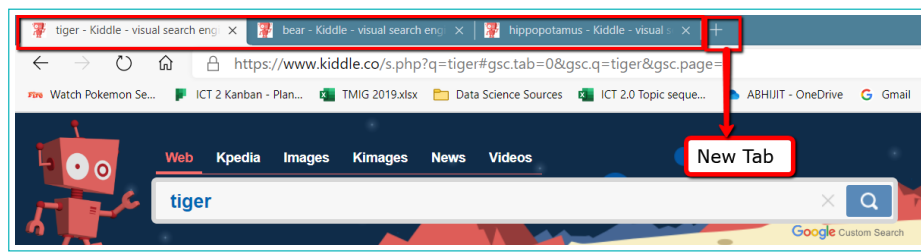

- Do not click on any instant messages from unknown users.
- Check if the website address is safe. If the address turns red, then it is unsafe. In this case, do not open the website.

- Tab: To open a new page

Tab opens a new page in the same browser window. “+” is the symbol for tab.

For example: Kavya has searched “Tiger” on one page and wants to search “Bear” on another page. She will click on the + button to open a new tab.

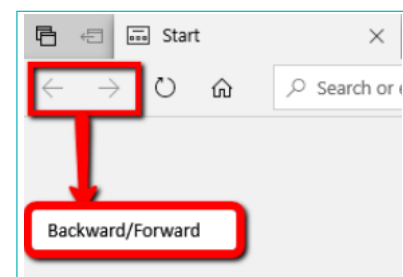

- Search Bar: To search for information

The subject about which we need information is typed in the search box.

- Forward and Backward: To go back and forth between pages

To go to already visited pages quickly we can use forward and backward buttons.

- Menu: To choose between different actions

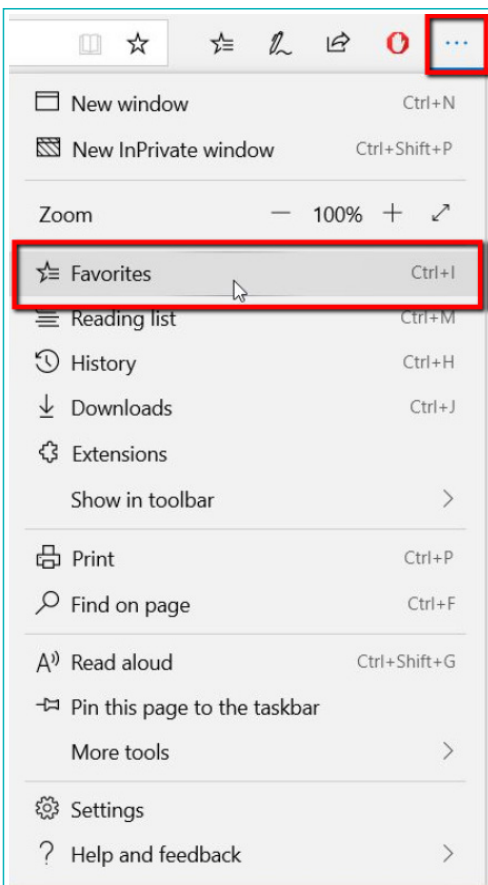

The browse menu shows us options for different tasks.  We can bookmark pages, view downloads, change the screen size, etc. through the menu. In this lesson, we will focus on bookmarks and downloads.

Bookmark

Bookmark: To save and easily visit our favourite pages

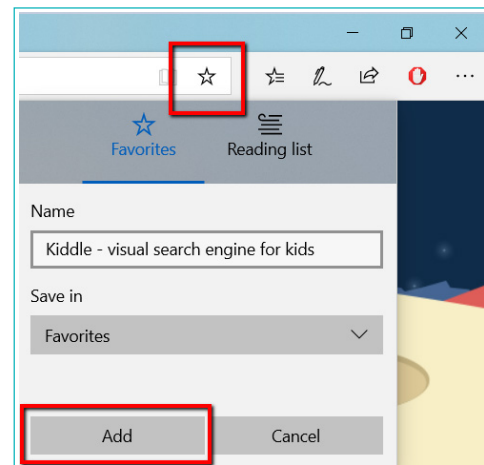

When we need to visit a particular website repeatedly, we can save a shortcut for it. This shortcut is called a bookmark or favourite. After we bookmark a website, it opens in one click.

For example: Kavya needs to repeatedly visit the Kiddie website for her project. So, she bookmarks it. Now, she does not have to type the complete address again.

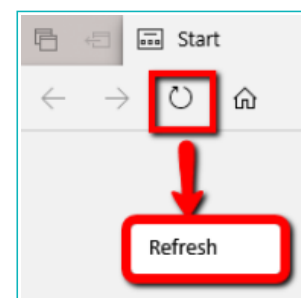

Bookmark a page in the Edge browser:

- In the Edge browser, click on the star button at the end of address bar.
- Name the bookmark in the Name box
- Click on Add

Refresh: To reload the page.

Sometimes, due to bad internet connectivity or other problems, a webpage does not load properly. The refresh button reloads the information on the page.

Bytes

The menu icon varies for each browser. It can be three horizontal dots, three vertical dots, three horizontal lines, etc. But it is always located in the top-right corner of the browser.

Activity

Open the web browser and bookmark the Kiddle website. (www.kiddle.co)

Downloads: To view downloaded files

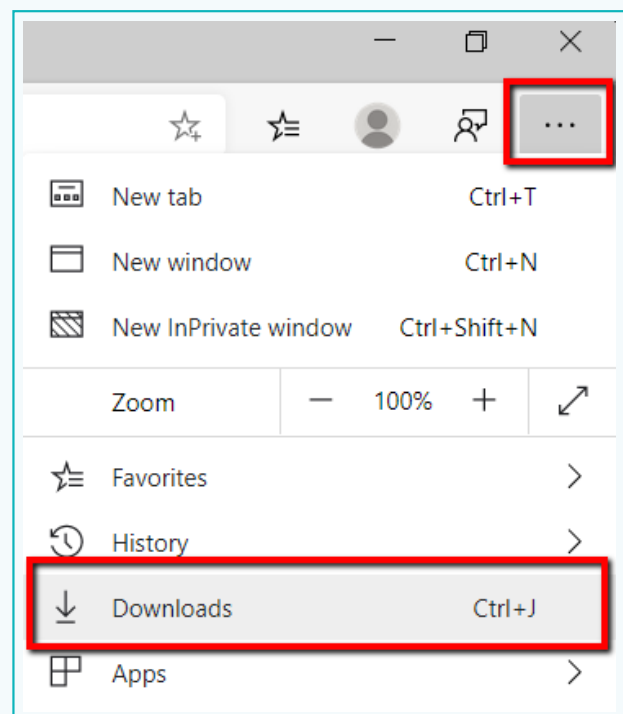

The downloads option shows us the items downloaded to our computer. We can also locate the address of the downloaded item.

For example: Kavya has downloaded many images of wild animals, but she does not remember where she saved them. To find them, she will follow these steps in the Edge browser:

1 Click on the menu (three dots) in the top corner of the browser.

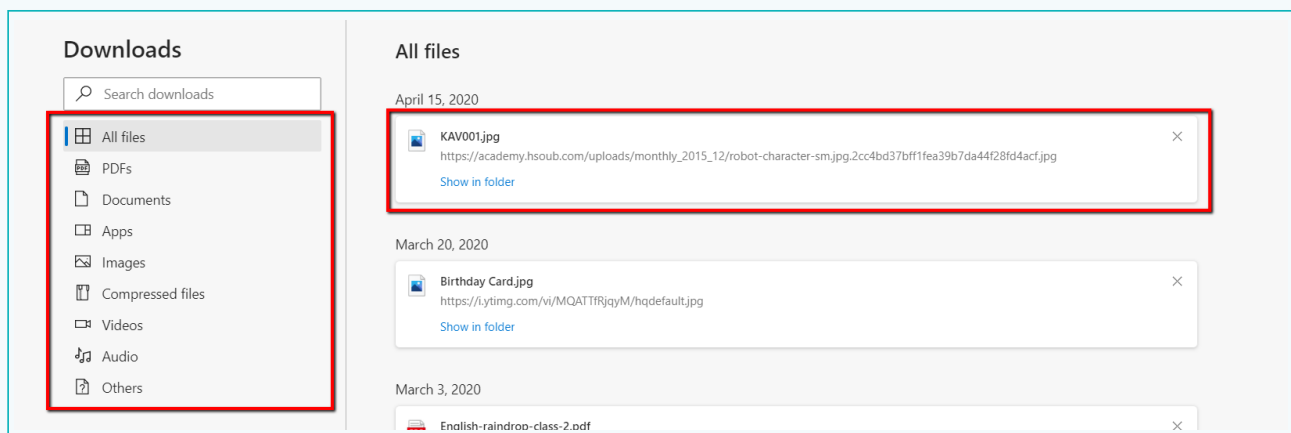

2 Click on **Downloads**.

3 A new page will open with details of previously saved files.

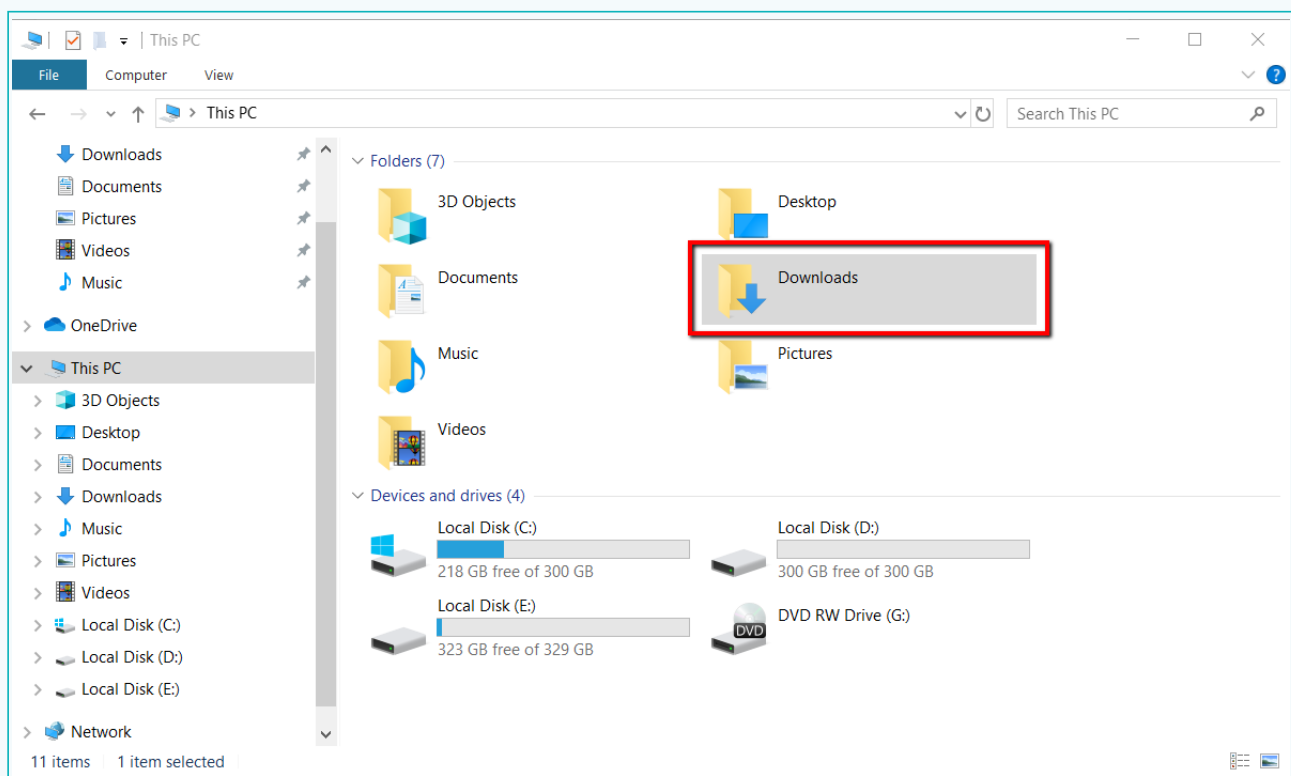

Activity

- Click on **Show in folder**.

- The files can also be opened from the Downloads folder on the computer.

Healthy Practices:

- Do not give out personal information, like your home address, to any website. If the website asks for any personal details, call an adult to check.
- Do not click on any advertisements you see on a webpage.

By now, you have understood the different parts of a browser and their functions. You know how to bookmark your favourite website and download images. You can also locate downloaded images on the computer. But always beware of unsafe websites and advertisements.

Exercise

 **State whether True or False**

- 5** Favourite is a bookmark in the Edge browser.

 _____

- 7** The “+” sign in the tab section opens a new website.

 _____

- 8** The downloads option shows the items downloaded to our computer.

 _____

Exercise

Answer in one line

9 What is a browser?

Yes, but you must be careful while using the internet.

These features are so useful. Now, I will be able to easily complete my project!

Yes Mom, I will be.

Tech Flash

Browser	: A browser is the software used to connect to the internet.
