

An illustration on the left side of the slide shows several colorful blocks and picture frames. In the foreground, there are yellow blocks. Behind them, a blue block features a large black musical note. Further back, there are orange frames containing simple landscape drawings of mountains. The background is a soft, light blue gradient.

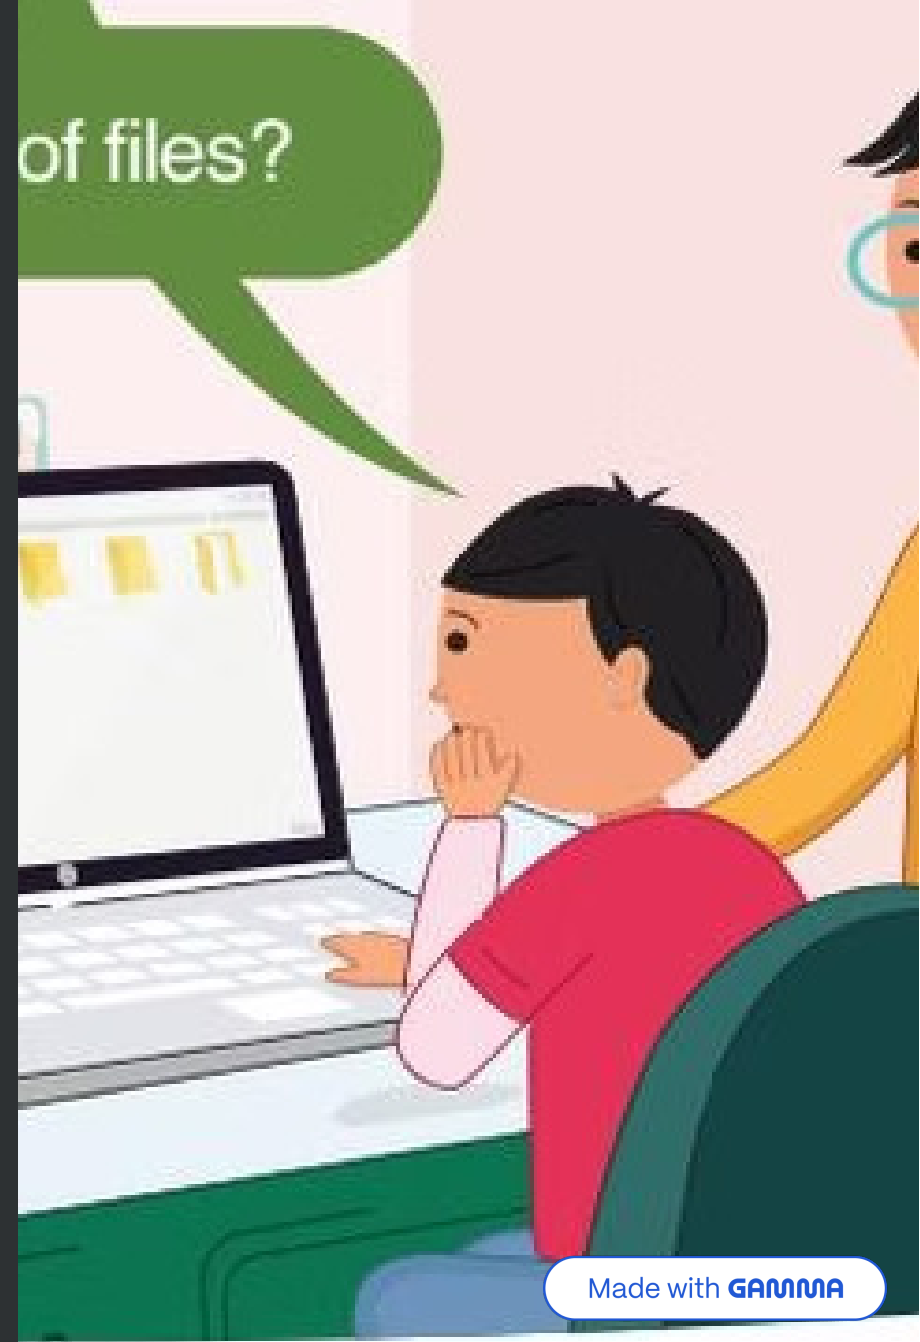

CHAPTER 08

Files and Folders

Computers help us do many things! We need to keep our work **safe** and **organised** so we can find it easily. That's where **Files** and **Folders** come in! 🎒💻

What is a File?

A **file** saves information on a computer. It can be of **any type**. Every picture you draw, every song you hear, every story you write — they are all files!

Types of Files 📁

There are **four main types** of files you will find on a computer:

Document 📄

Text and writing files

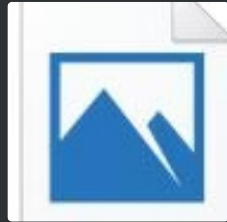

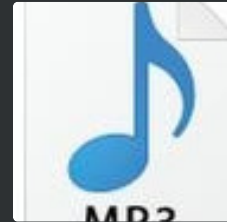

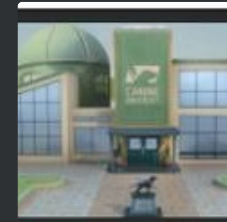

Image 🖼️

Photos and pictures

Music 🎵

Songs and sounds

Video 🎬

Movies and clips

What is a Folder? 📁

Files are like our **notebooks and books**. We keep books in a school bag 🎒 — just like that, we keep many files together in a **folder**! A folder is like a **storage box** for files on a computer.

Empty vs. Full Folder 🙄

Folder with Files

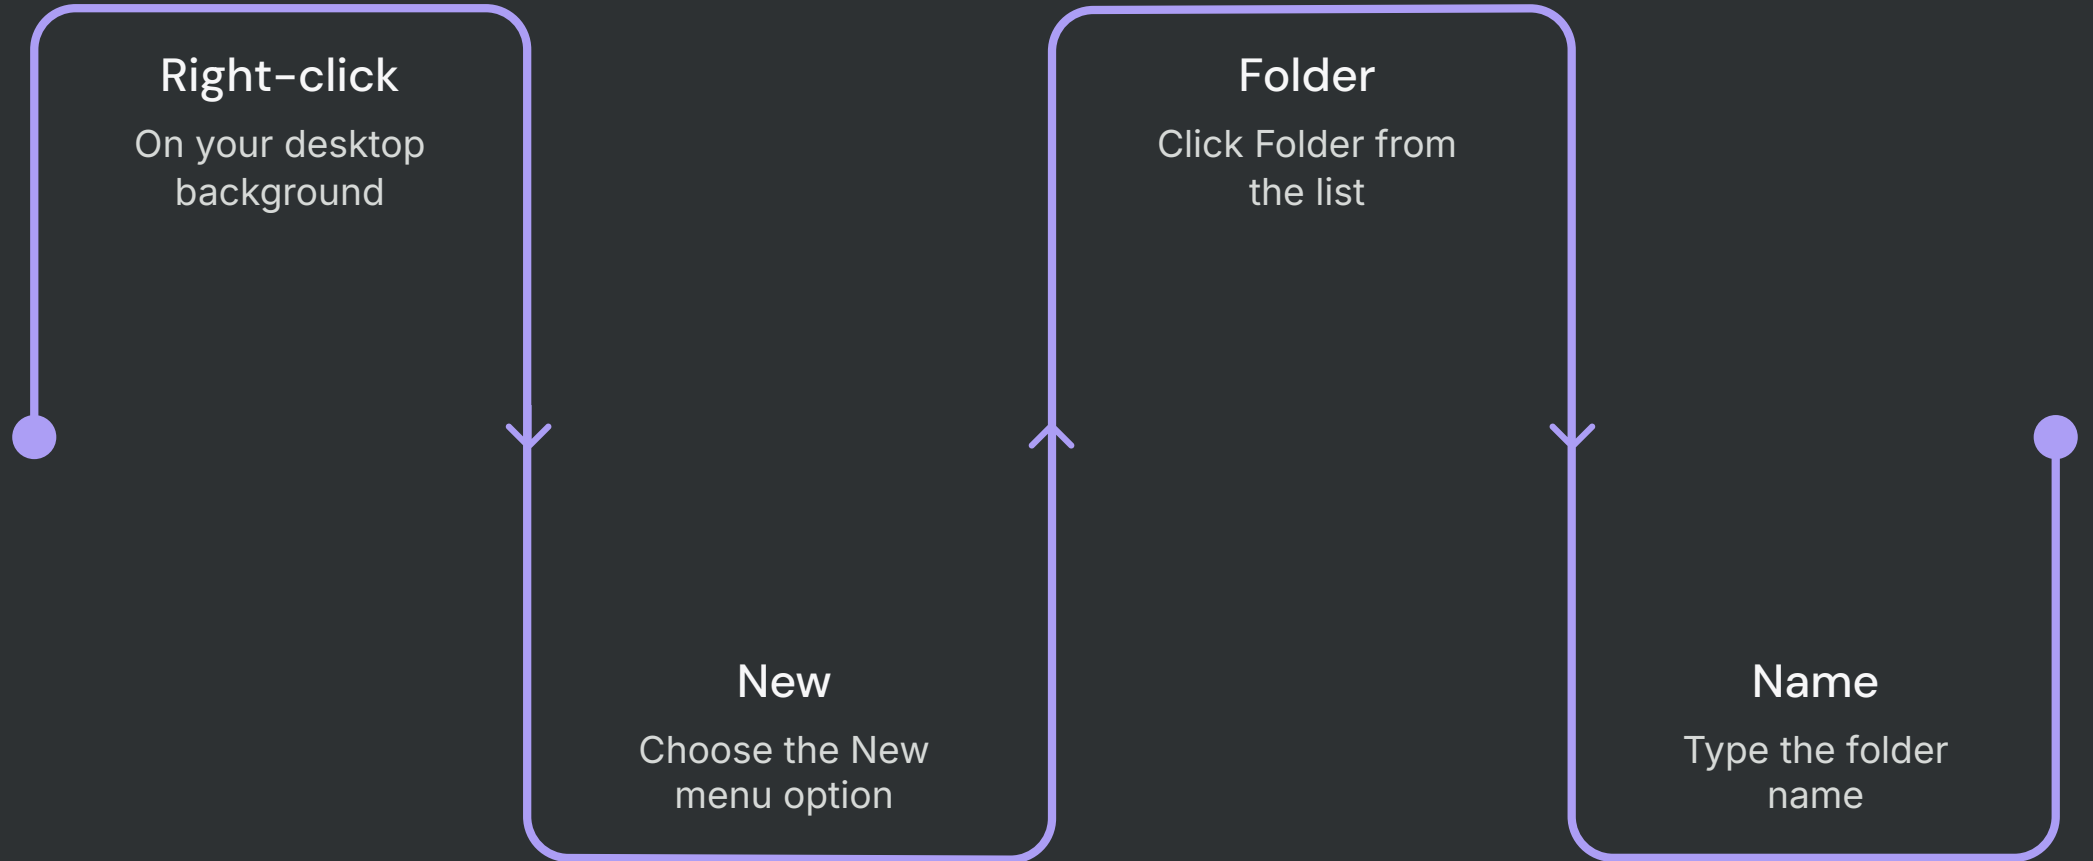

Has files stored inside!

Empty Folder

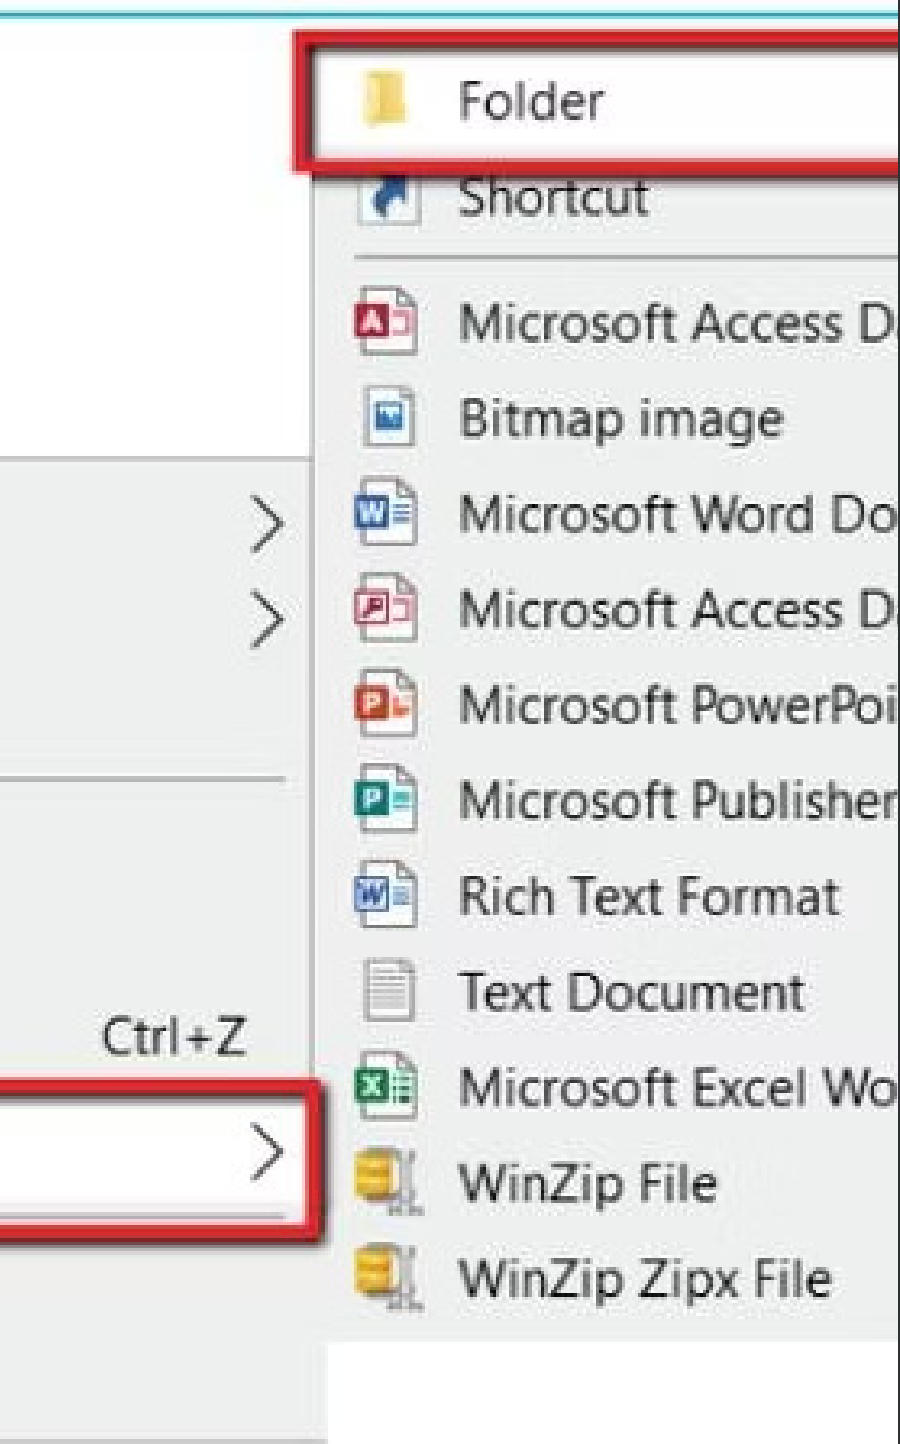

No files inside yet!

How to Create a Folder

Follow these simple steps on your computer to make a brand new folder anytime you need one!

Step by Step

01

Right-click on the Desktop

A menu box will appear on screen.

02

Click "New"

Look for the **New** option in the menu.

03

Click "Folder"

A new folder will appear on the desktop.

04

Type a Name

Give your folder a helpful name, like **"My Photos"**!

 **Tip:** Give your folder a name that tells you what's inside.

Example: "**My Photos**" for a folder with pictures. This helps you find files easily!

Let's Remember! ✨

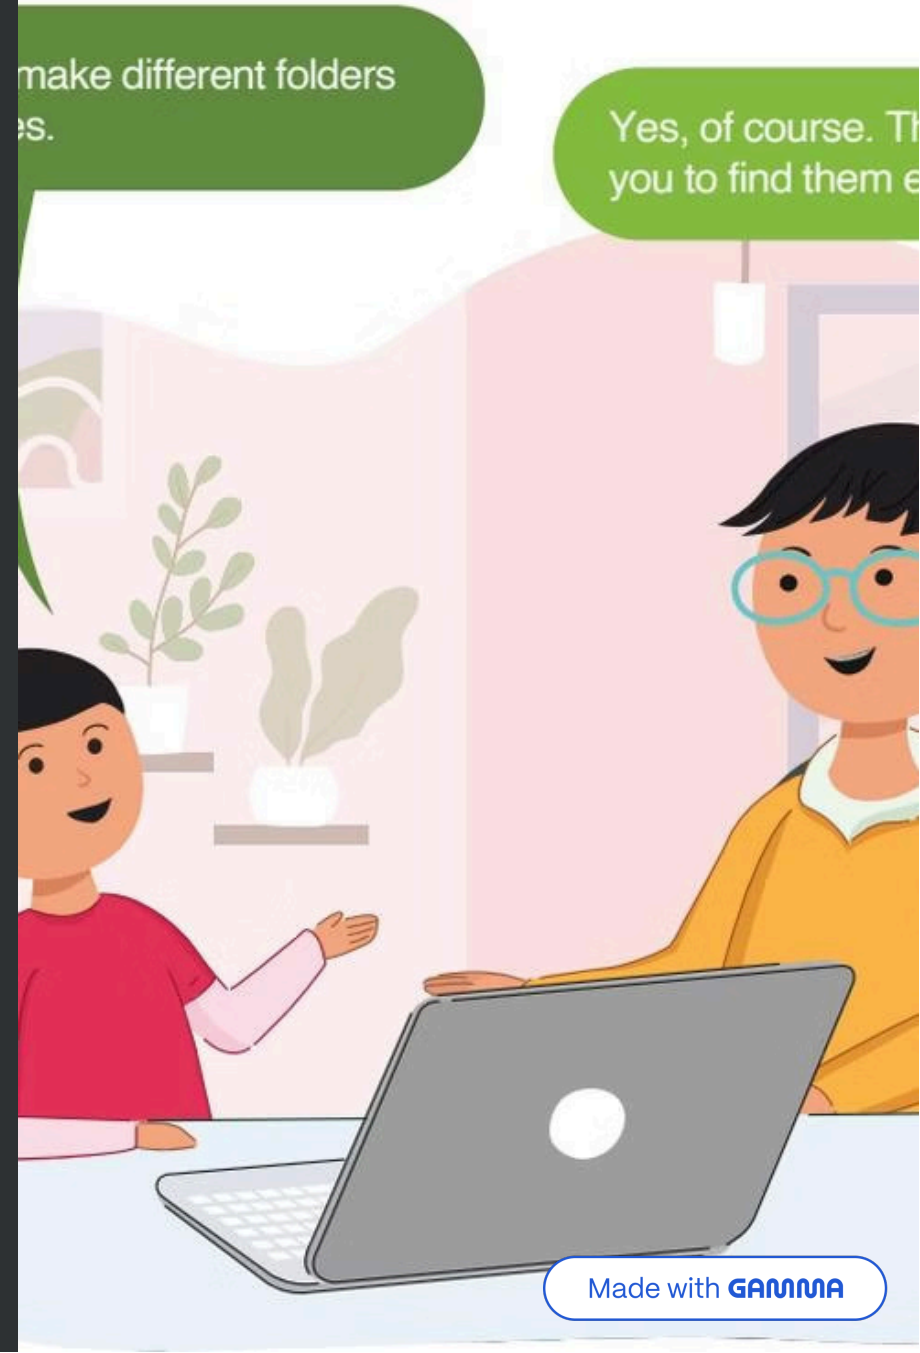

File

Any type of information stored on a computer.

Folder

Stores and organises files of different types.

Exercise Time!

1

True or False

- Files are of different types.

- A folder can save different types of files. _____

2

Match the Pairs

Match each file type — **Document, Image, Video, Music** — to its correct icon! 

3

Circle the Answer

Which menu option do you click to create a new folder? Find "**New**" in the context menu!
