

Introduction to Digital Art

05

I need more paper for drawing because my paper got damaged as I erased my drawing many times.

How?

Do you know, you can use computer for drawing?

Let me show you.

A Digital Painting is a painting that is created on a digital device. This could be a mobile phone, tablet or a computer.

Advantages of Digital Painting:

- We can use any colours. There is no limit on the colours on a computer.
- We can change the colour of the painting as many times as we want to.
- We can share the digital painting with many people at the same time.
- We can make many copies of a digital painting.

Digital Painting is created using different software. A **software** is a collection of instructions that tell the computer how to do a task.

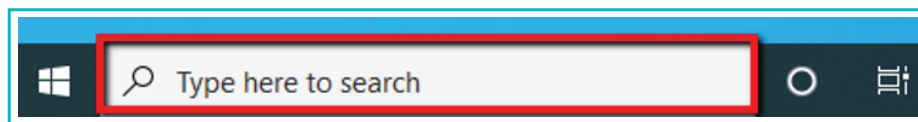

Introduction to MS Paint:

MS Paint is a computer software which we use to draw and paint on a computer.

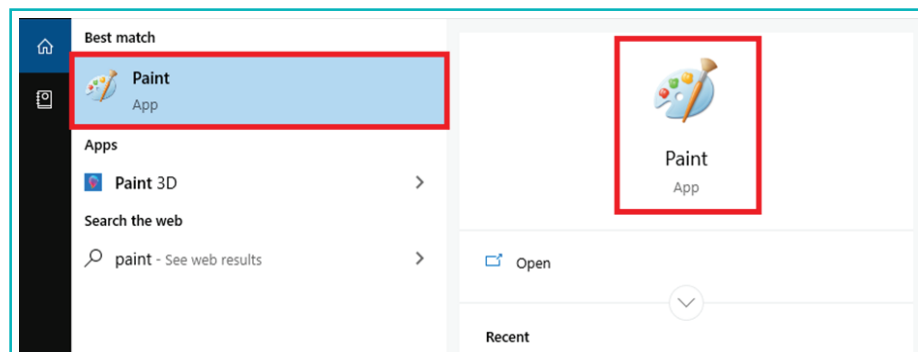

How do we open the MS Paint?

1. Click on the search window (**Type here to search**) and type 'Paint'.

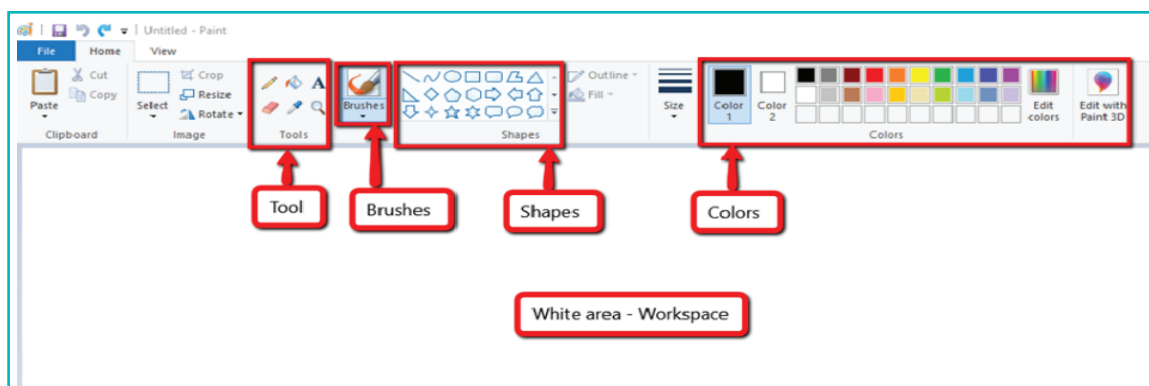

Type here to search

2. Click on **Paint**.

Paint in windows

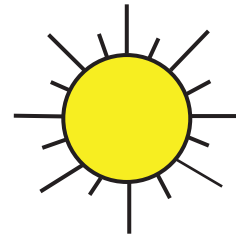

3. MS Paint will open in a new window.

Default Paint screen with all the tools

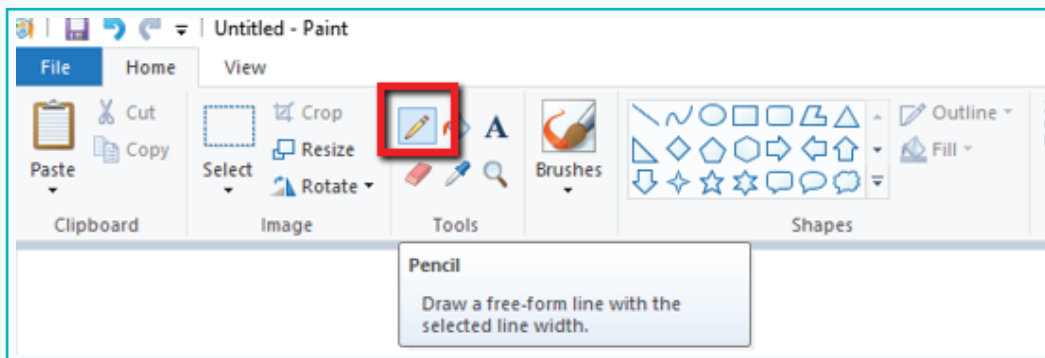

Activity

Draw a shining sun in MS Paint.

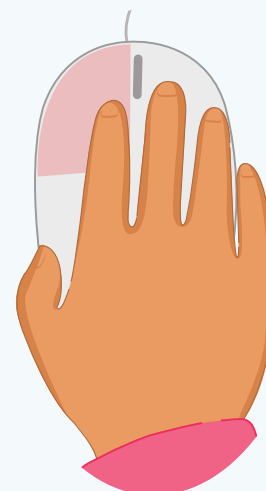

Shining sun

Bytes

Hardware is part of computer, that we can physically touch and feel.

5. Introduction to Digital Art

There is one more device used to draw on the computer. Let's see it.

Introduction to Pen + Tablet

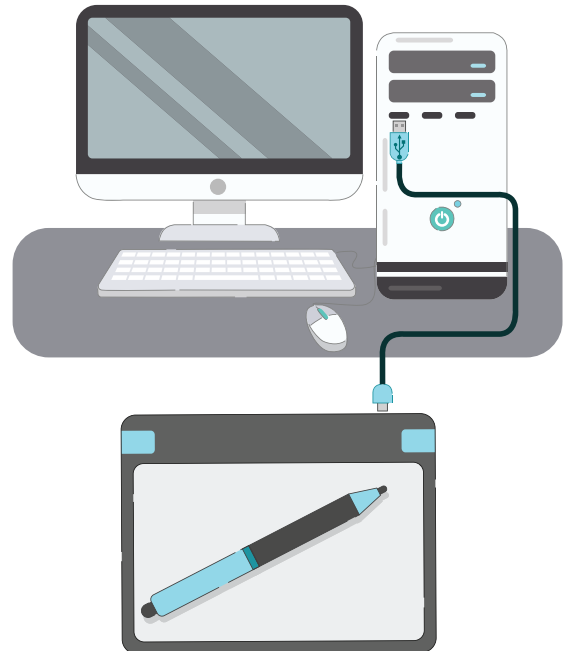

The pen and tablet are hardware devices. Whatever we draw on a tablet with the pen will be displayed on the computer screen.

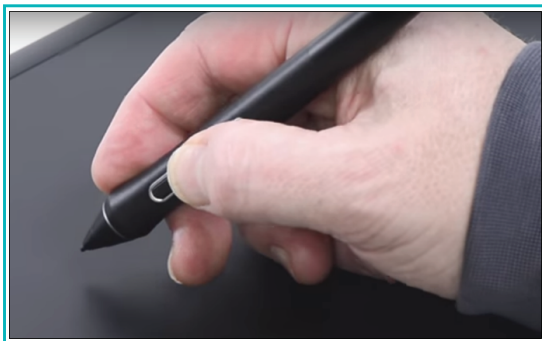

Pen tablet

How to use a Pen-Tablet?

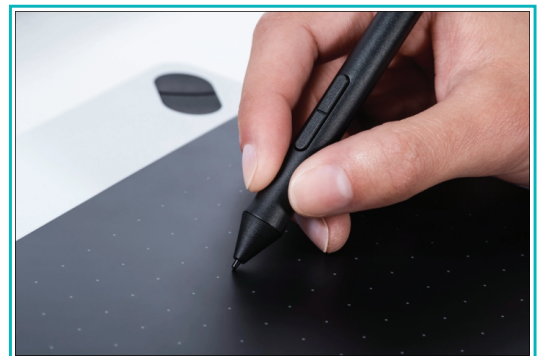

a. Connect the tablet to computer with a USB cable

b. To move the location of the cursor, do not touch the tip of pen to tablet.

c. Touch the tip to the tablet to draw or write something (like notebook and pen).

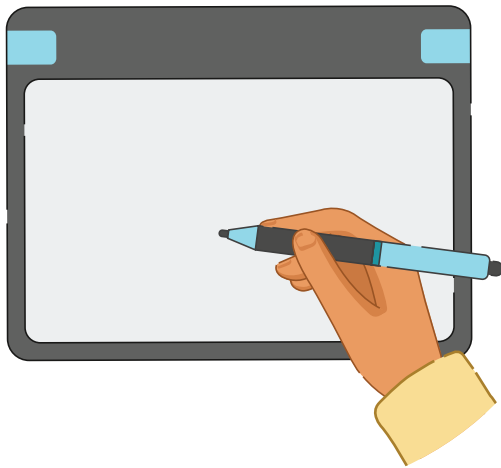

Bytes

USB (Universal Serial Bus) is a type of computer port that is used to connect a device to the computer.

Healthy Practices :

- Keep the pen-tablet close to your body. It should feel comfortable to use.
- Keep your arm in line with your shoulders.
- Your back should stay straight when at the computer.
- Always keep the pen-tablet and USB cable inside a box whenever it is not in use.
- Look at the computer while using a pen-tablet to see to what you are doing.

Exercise
