

Parts of Computers

02

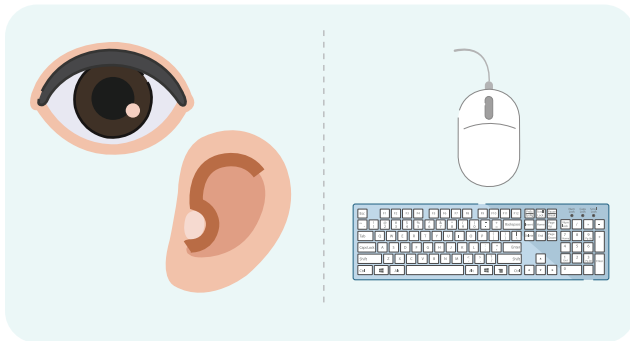

Why does a computer have so many parts? What do they all do?

All of them are needed to make a computer work. Let's see what they do.

A computer has two types of devices: a. Input devices b. Output devices

a. Input devices

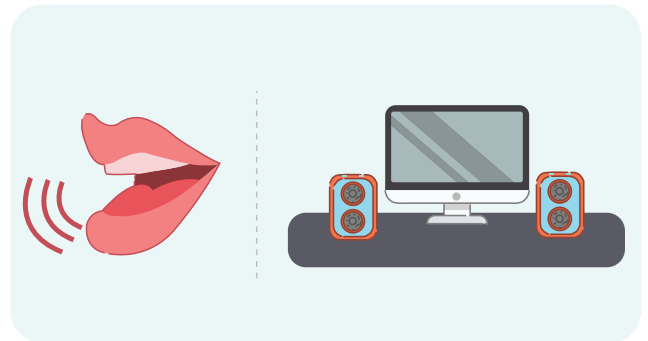

Input devices are used to send the information to the computer. They receive information from outside. This information is of different types. Just like our eyes can see things and our ears can listen.

Input devices: Keyboard, Mouse

b. Output devices

Output devices are used to show information to us. Just like we use our mouth to talk and share our thoughts

Output devices: Monitor, Speakers

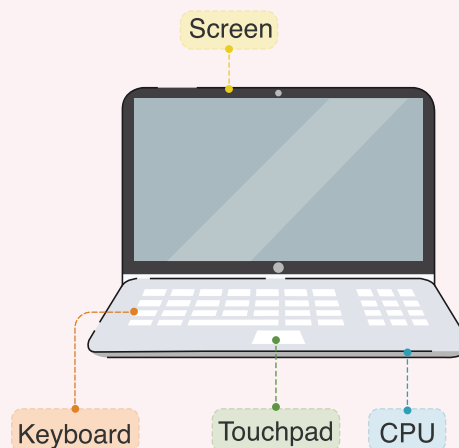

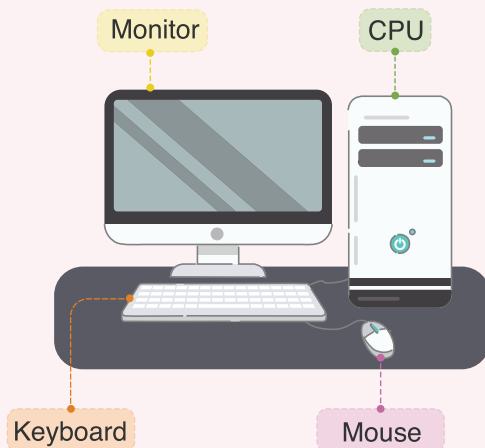

2. Parts of Computers

CPU

Central Processing Unit (CPU) is an important part of a computer. CPU is the brain of the computer. Our brain thinks and makes other body parts work. Just like that, the CPU works. **It uses input devices to receive information and output devices to present information to us.**

Let us see the parts of computer in detail:

1. Monitor:

A Monitor is used to view information. It is a screen like a TV. With a monitor, we can view what we type or click on. It is an output device because it shows information.

2. Keyboard:

A Keyboard is used to type information. It has many buttons with numbers, alphabets and special characters. These are called keys. A Keyboard can also be used to give instructions to the computer. A keyboard is used to enter information. So, it is an input device.

3. Mouse:

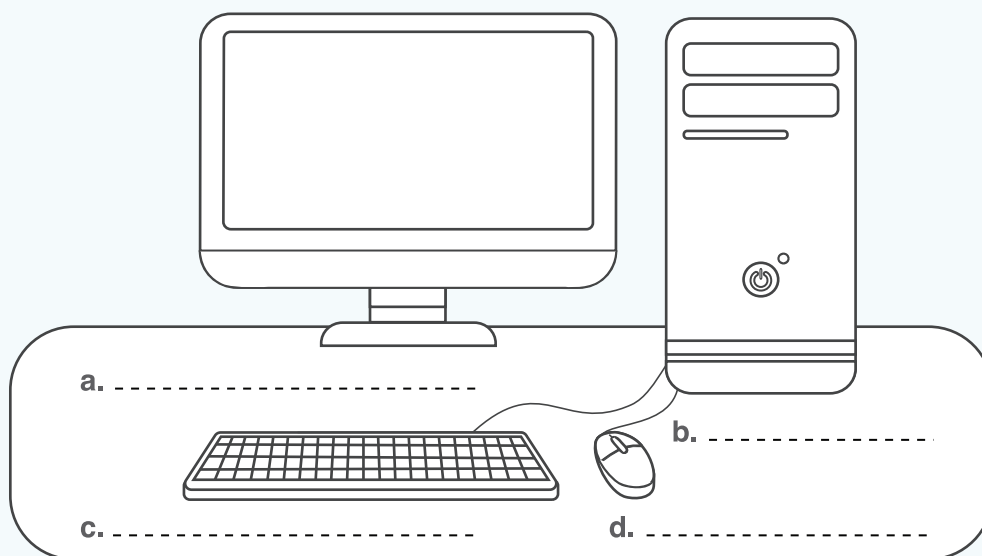

A mouse is used to point at objects on the screen. We use the buttons on it to select and click. A mouse sends instructions to the computer. It is an input device.

4. Touchpad:

Touchpad is a part of laptop. It works like a mouse.

Exercise

- 1 Colour the parts of computer and write their names next to it.

Fill in the blanks.

- 2 The _____ is a TV like device that shows us what we do on the computer.
- 3 There are two types of devices in computer, _____ and _____

Computers need so many parts to work properly. May I use this Laptop?

Yes, why don't we draw something? But do you know the proper way to switch on a computer?

2. Parts of Computers

Healthy Practices:

We must follow some rules while using a computer

1. Always switch ON the computer only when an adult is nearby.

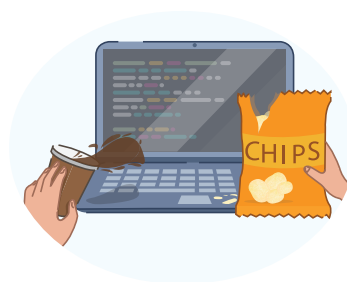

2. Never switch on or use the computer with wet hands. If it gets wet, it can get spoilt.

3. Always clean the computer with a dry cloth.

4. Do not eat food near the computer. Don't leave any food or drink on the computer table.

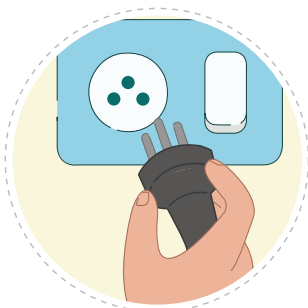

Let us see how to switch on a Desktop and a Laptop computer.

For a Desktop computer:

To switch on the CPU

- a. Devices are connected to the CPU with wires. All the wires must be connected properly.
- b. Switch on the main power plug connection

Do this only under elder's supervision

- c. On the CPU, we can see a button with a **power sign** on it. This looks like a 1 with a 0 around it. Press the power button once gently. This will turn on the computer.

2. Parts of Computers

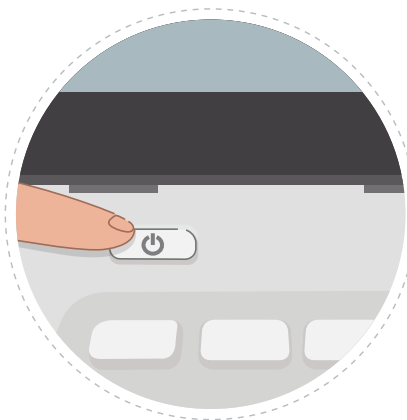

To switch on the Monitor

Press the power button on the monitor.
The screen will light up when the monitor is on.

For Laptop Computer

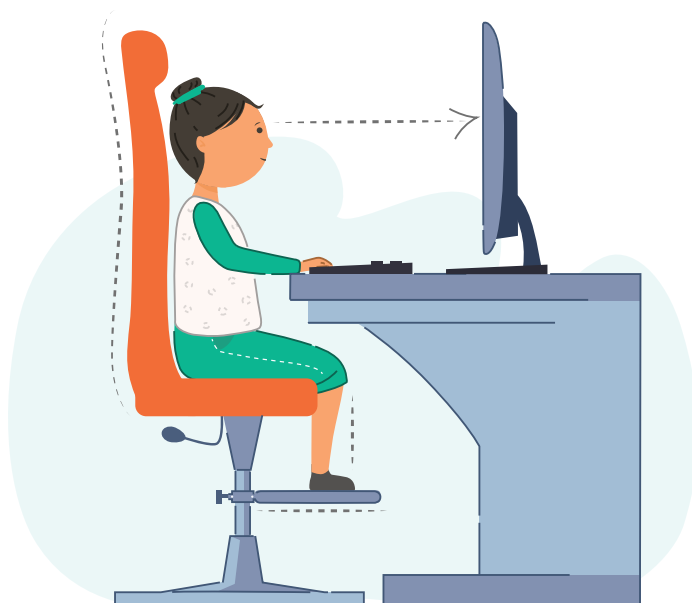

- a. Press the power button of laptop. This will switch it on. Laptops do not have a separate button for the monitor.
- b. If the laptop does not start, ask an adult to check.

Healthy Practices:

While using a computer, we need to sit properly. Otherwise, our bodies may start paining.
Look at the illustrations below:

1. Keep back and neck straight
2. Use a chair that supports your lower back
3. Keep your feet on the ground or on the footrest
4. Keep one arm distance between the screen and your eyes

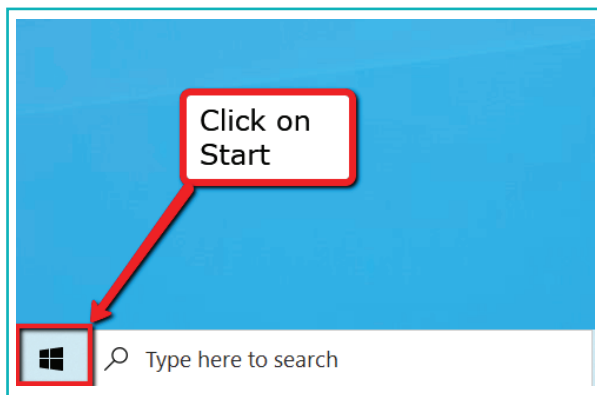

2. Parts of Computers

Let us see how a Desktop and Laptop computer switches off.

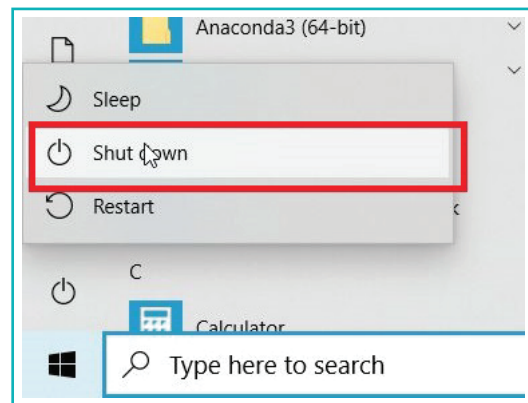

Steps

Once we are done using the computer, we must switch it off. To switch off the computer, use following steps:

1 Left click on the windows icon

2 Left click on "Shut down"

3 Then we will see a shutdown screen. The computer is now switch off. Switch off the main power supply.

Exercise

Choose the correct option.

4 To start a computer, we press _____

- a.  b.  c. 

Bytes

Close everything before switching off the computer.

Exercise

5 Tick mark ☒ on the image which shows correct sitting position.

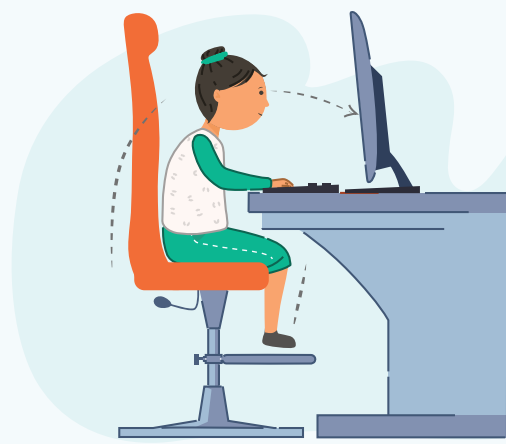

a. ☐

b. ☐

c. ☐

d. ☐

2. Parts of Computers

I have learnt many new things.
Thank you for teaching me, Papa.

You're welcome, Sara. Next time
we will learn some more!
