

LIGHTS, CAMERA, ACTION!

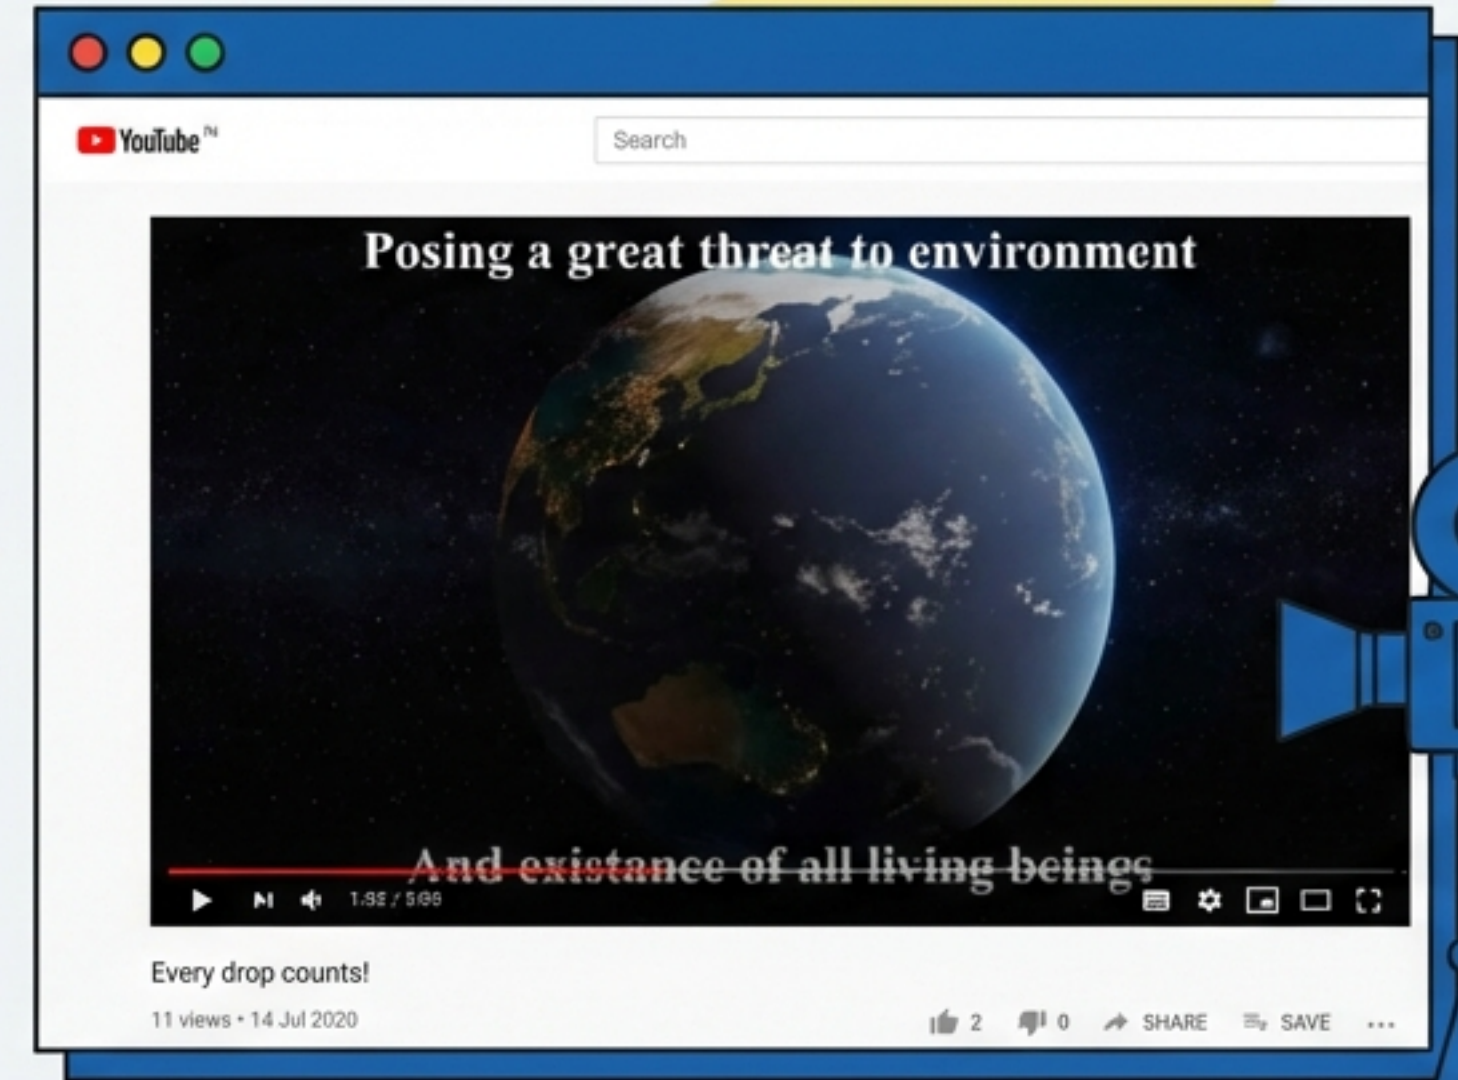

Become a Director with OpenShot Video Editor

WHAT IS MOVIE MAKING?

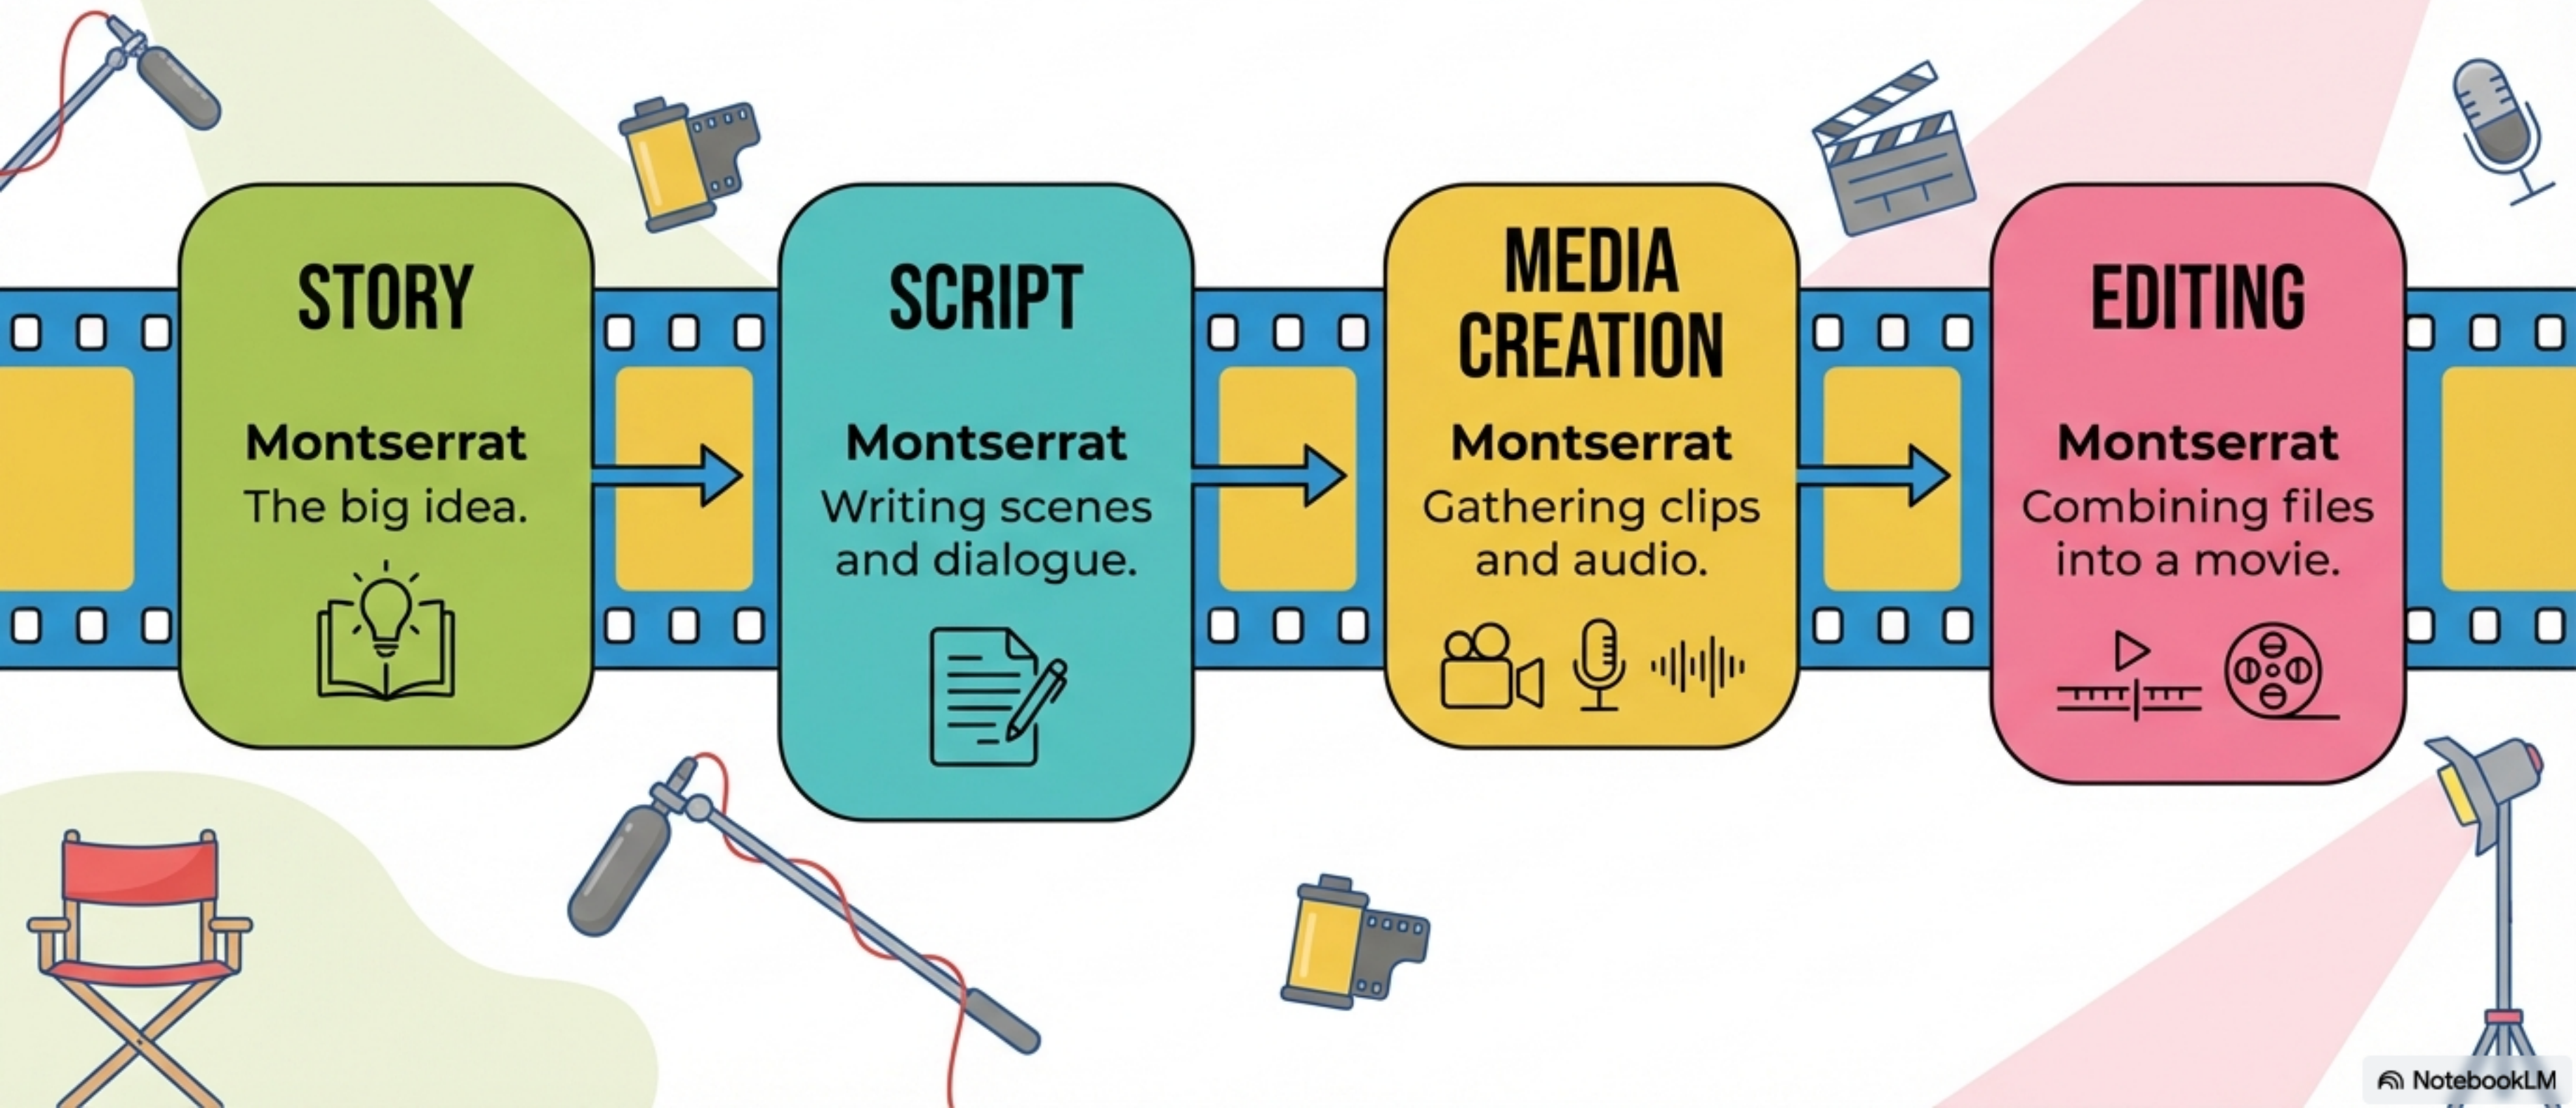

Movie making is the process of visual storytelling. It uses audio and video to spread awareness, tell stories, and share ideas.

Our Project: A short film about **Water Conservation.**

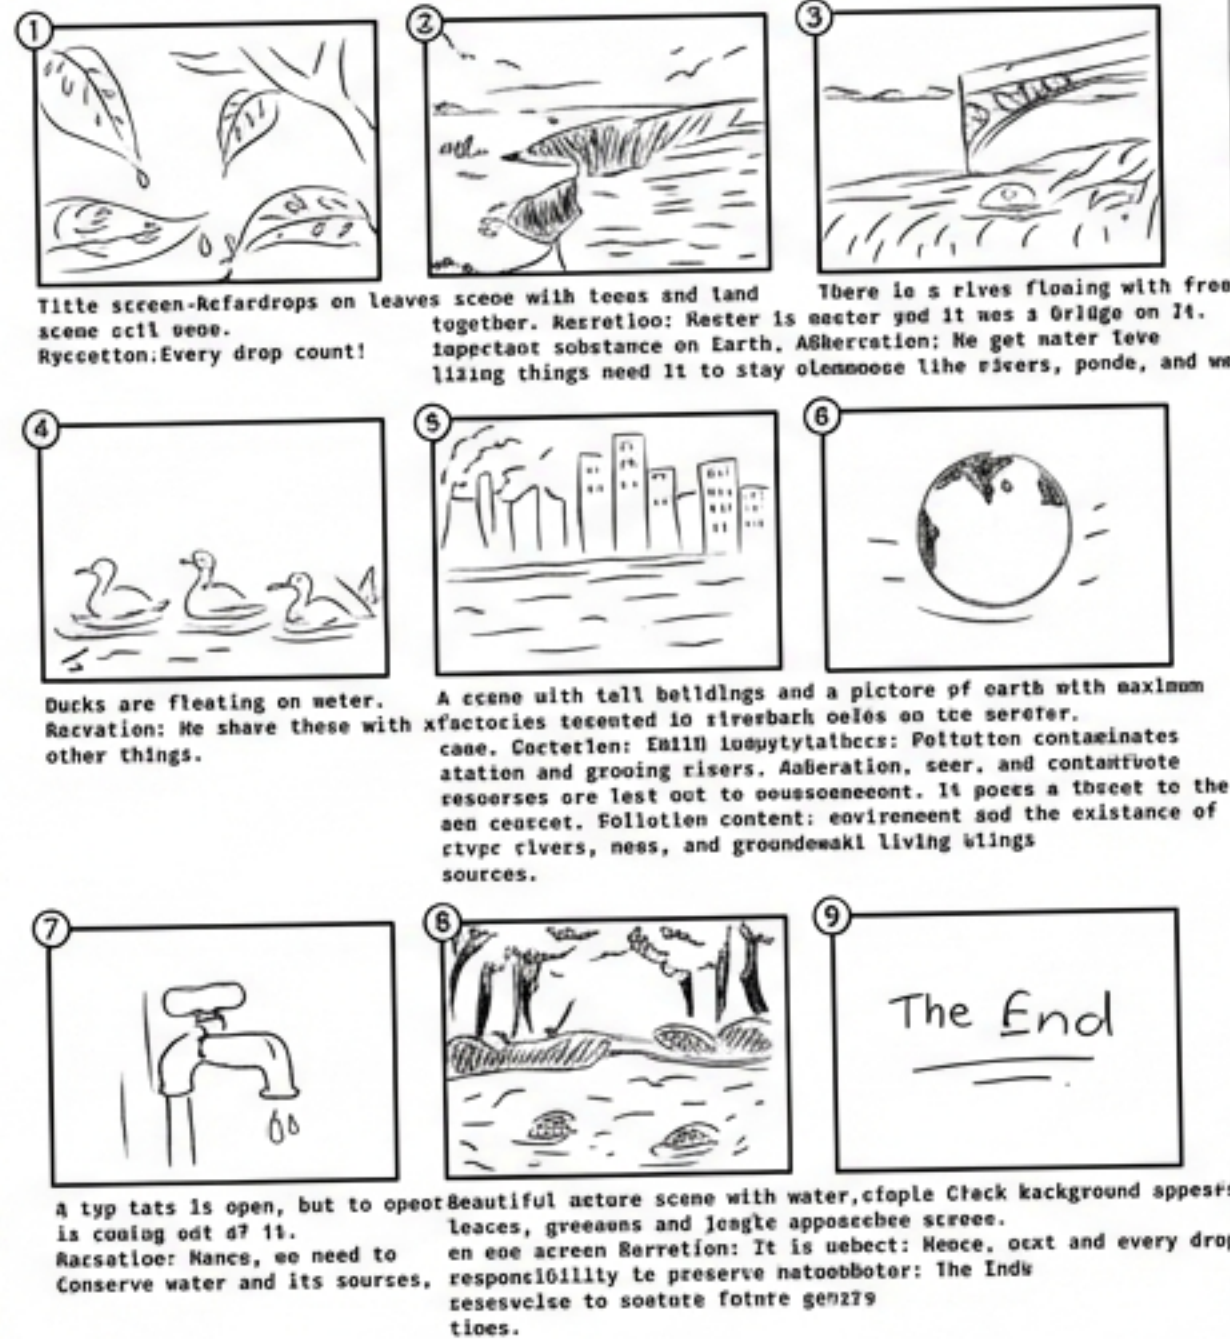

THE 4 STEPS TO A BLOCKBUSTER

THE BLUEPRINT: YOUR STORYBOARD

What is a Storyboard?

A sequence of drawings that helps visualize the movie before filming begins.

The Script:

Water is an important substance...

Pollution contaminates rivers...

It is our responsibility to preserve it.

MEET YOUR STUDIO: THE DASHBOARD

1. Toolbar:

Save, Undo, Export.

2. Project Library:

Your files (Video, Audio, Images).

3. Video Preview:

Watch your movie.

4. Timeline:

Build your sequence here.

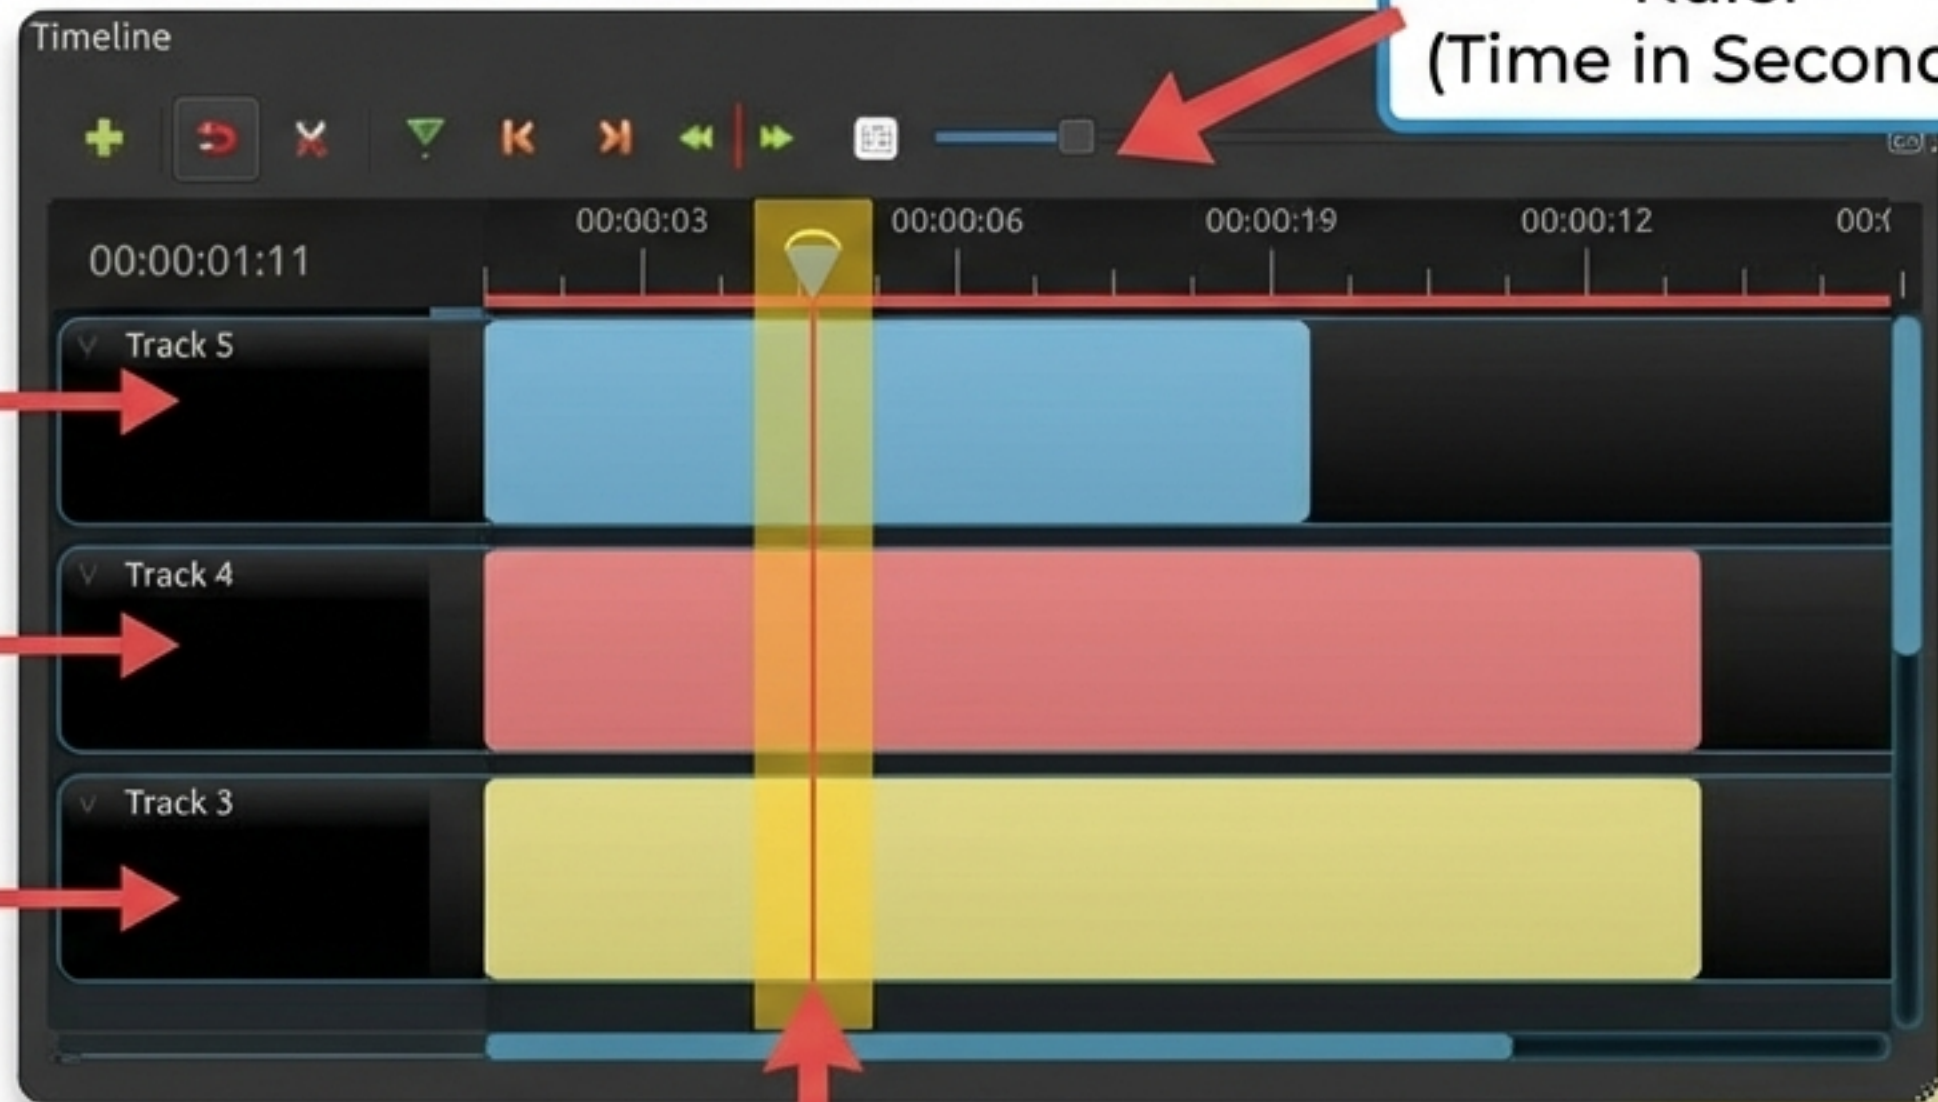

MASTERING THE TIMELINE

TRACKS (Layers)

Titles & Text
(Top Layer)

Video Clips
(Middle Layer)

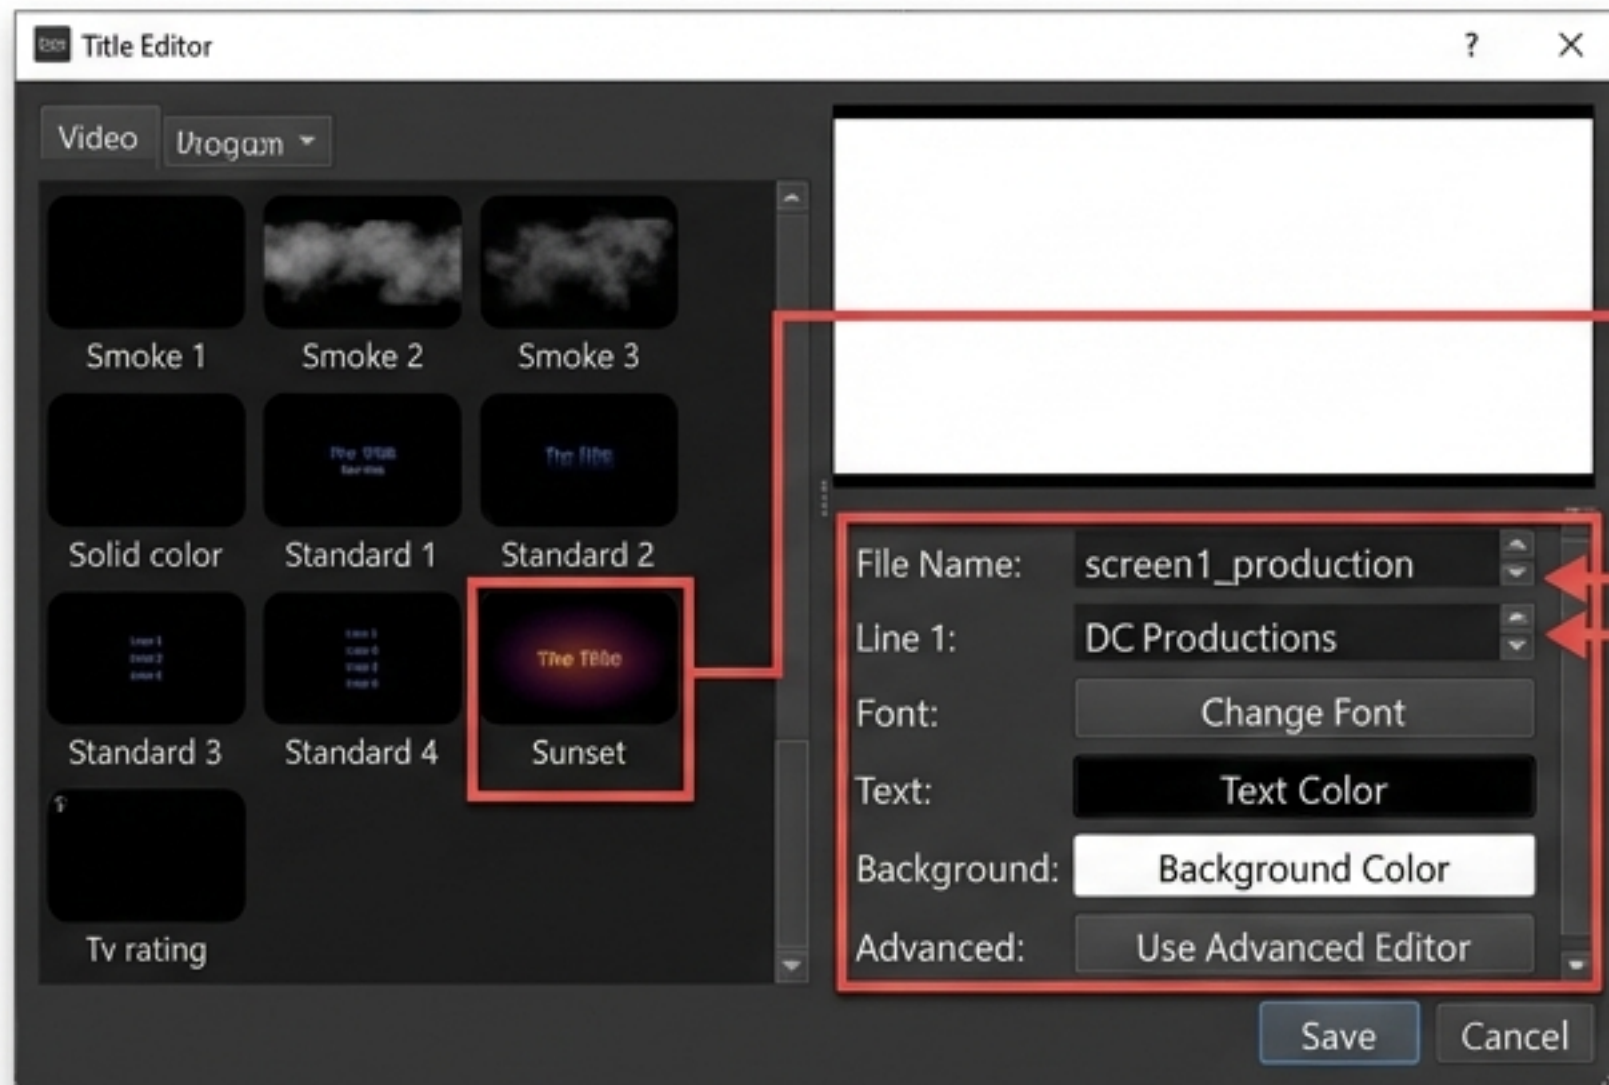

Audio & Sound
(Bottom Layer)

Ruler
(Time in Seconds)

Play Head
(Current Frame)

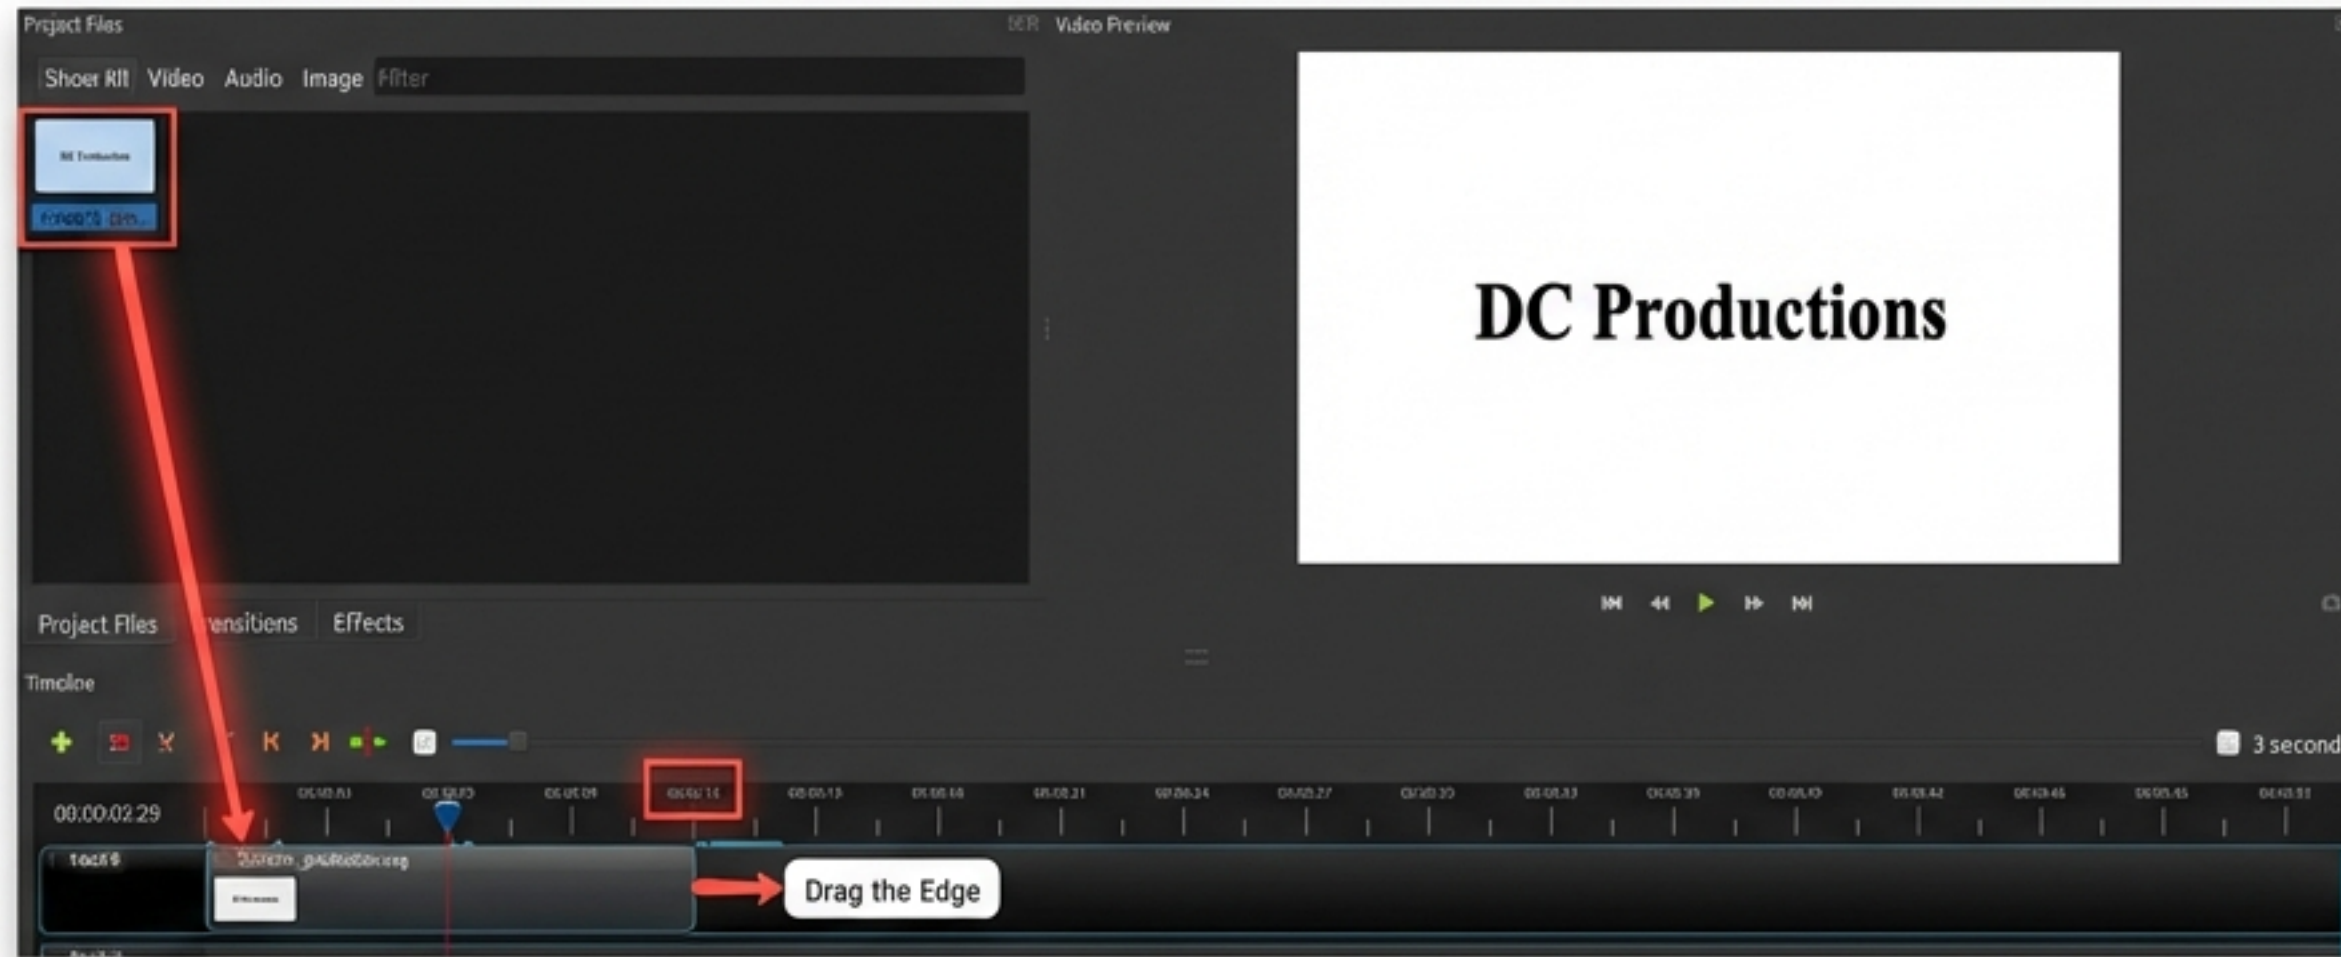

STEP 1: THE PRODUCTION TITLE

1. Click Title in the menu (Ctrl+T).
2. Select a template (Example: Sunset).
3. File Name: screen1_production
4. Line 1 Text: DC Productions

 **Safety Tip:**  **Pro Tip:** Don't use real company names like Disney or Pixar—they are copyrighted!

STEP 2: DRAG, DROP, & SNAP

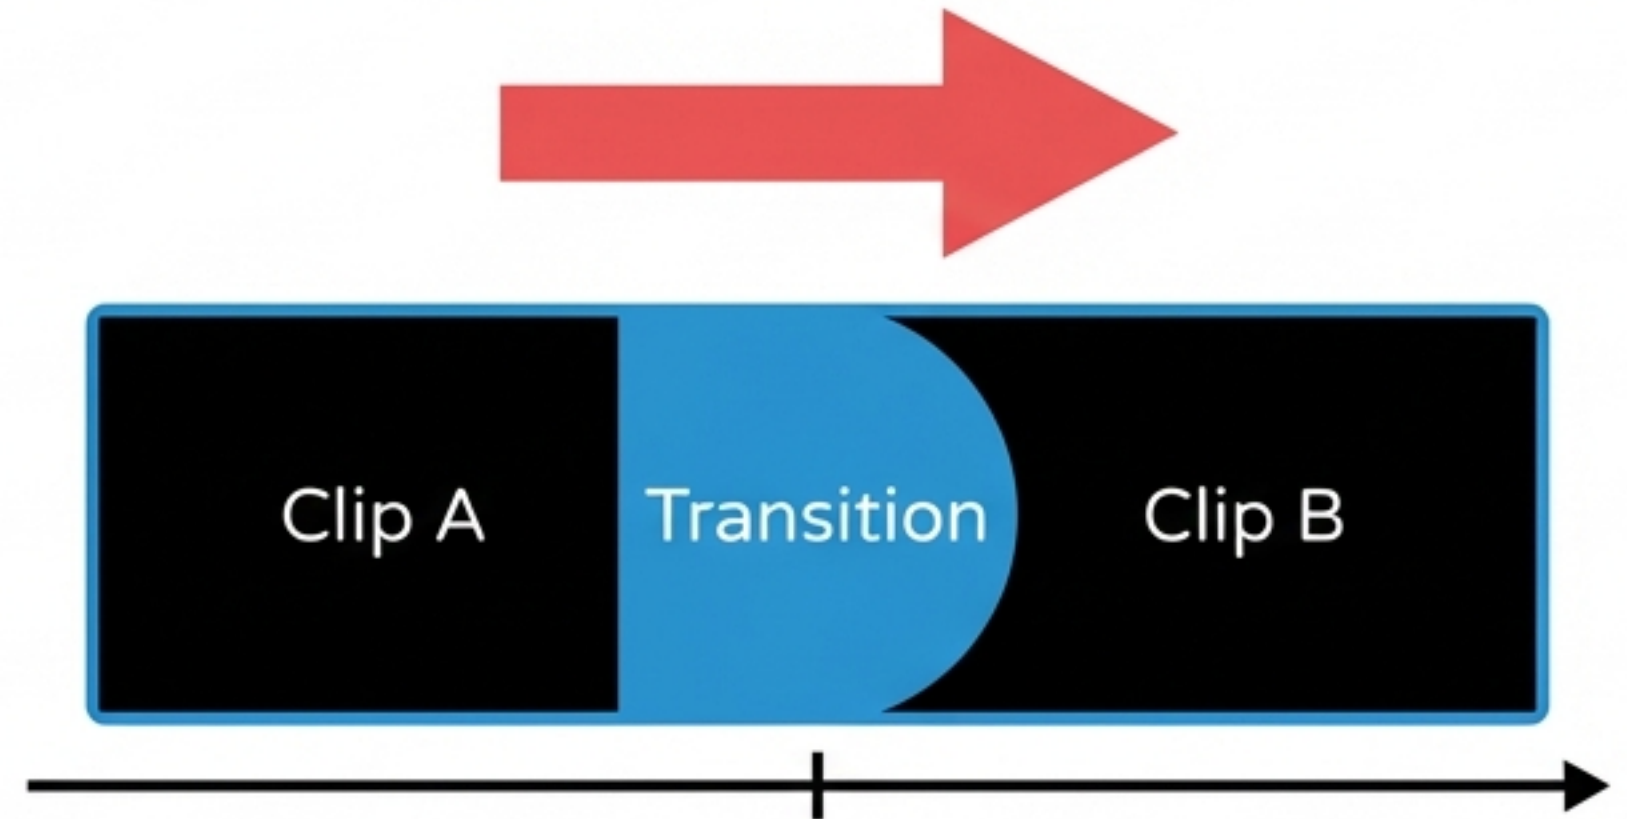

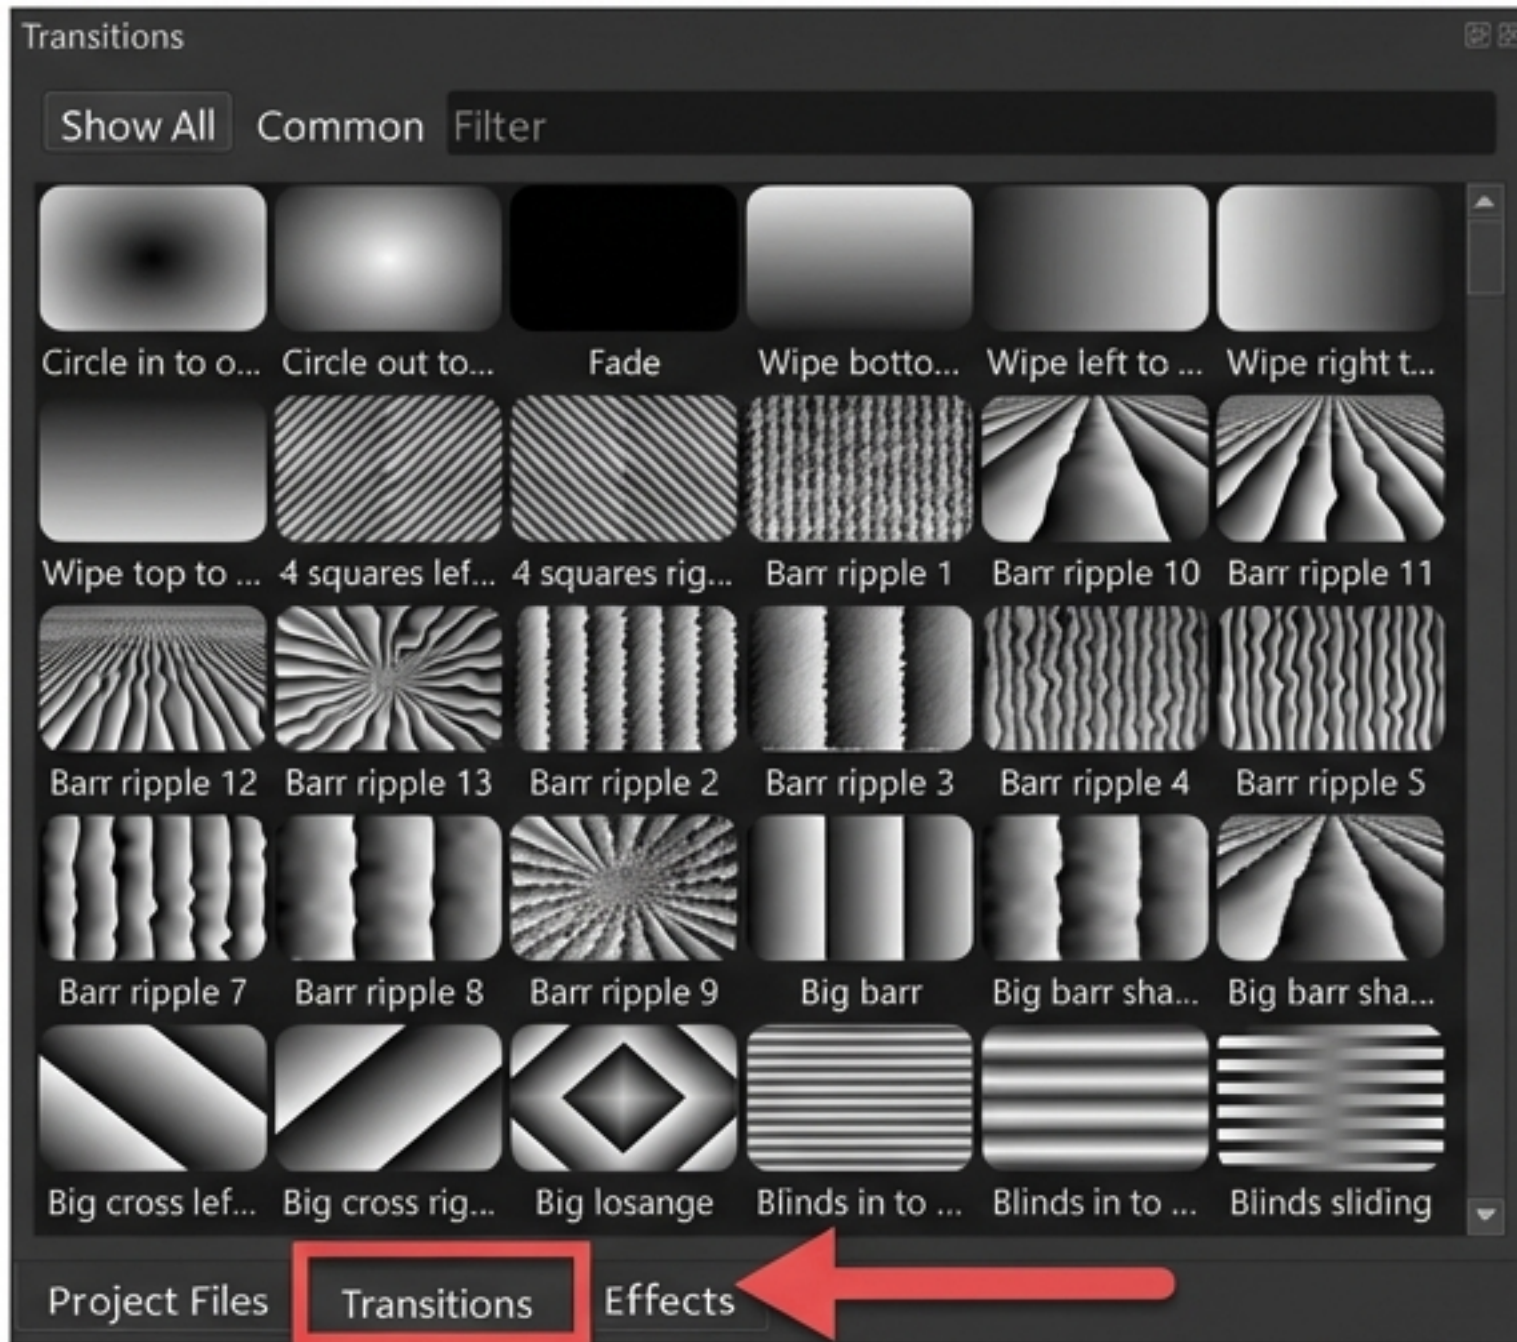

1. Drag your title clip to Track 5.
2. Drag the edge of the clip to extend it to 12 seconds.

SNAPPING TOOL

Like a magnet! Helps clips line up perfectly with no gaps.

STEP 3: SMOOTH MOVES (TRANSITIONS)

When two clips overlap, a blue shape appears. This creates an automatic Fade In / Fade Out effect.

Goal: Avoid abrupt cuts. Make scenes flow like a real movie.

STEP 4: THE “SLICE” TOOL

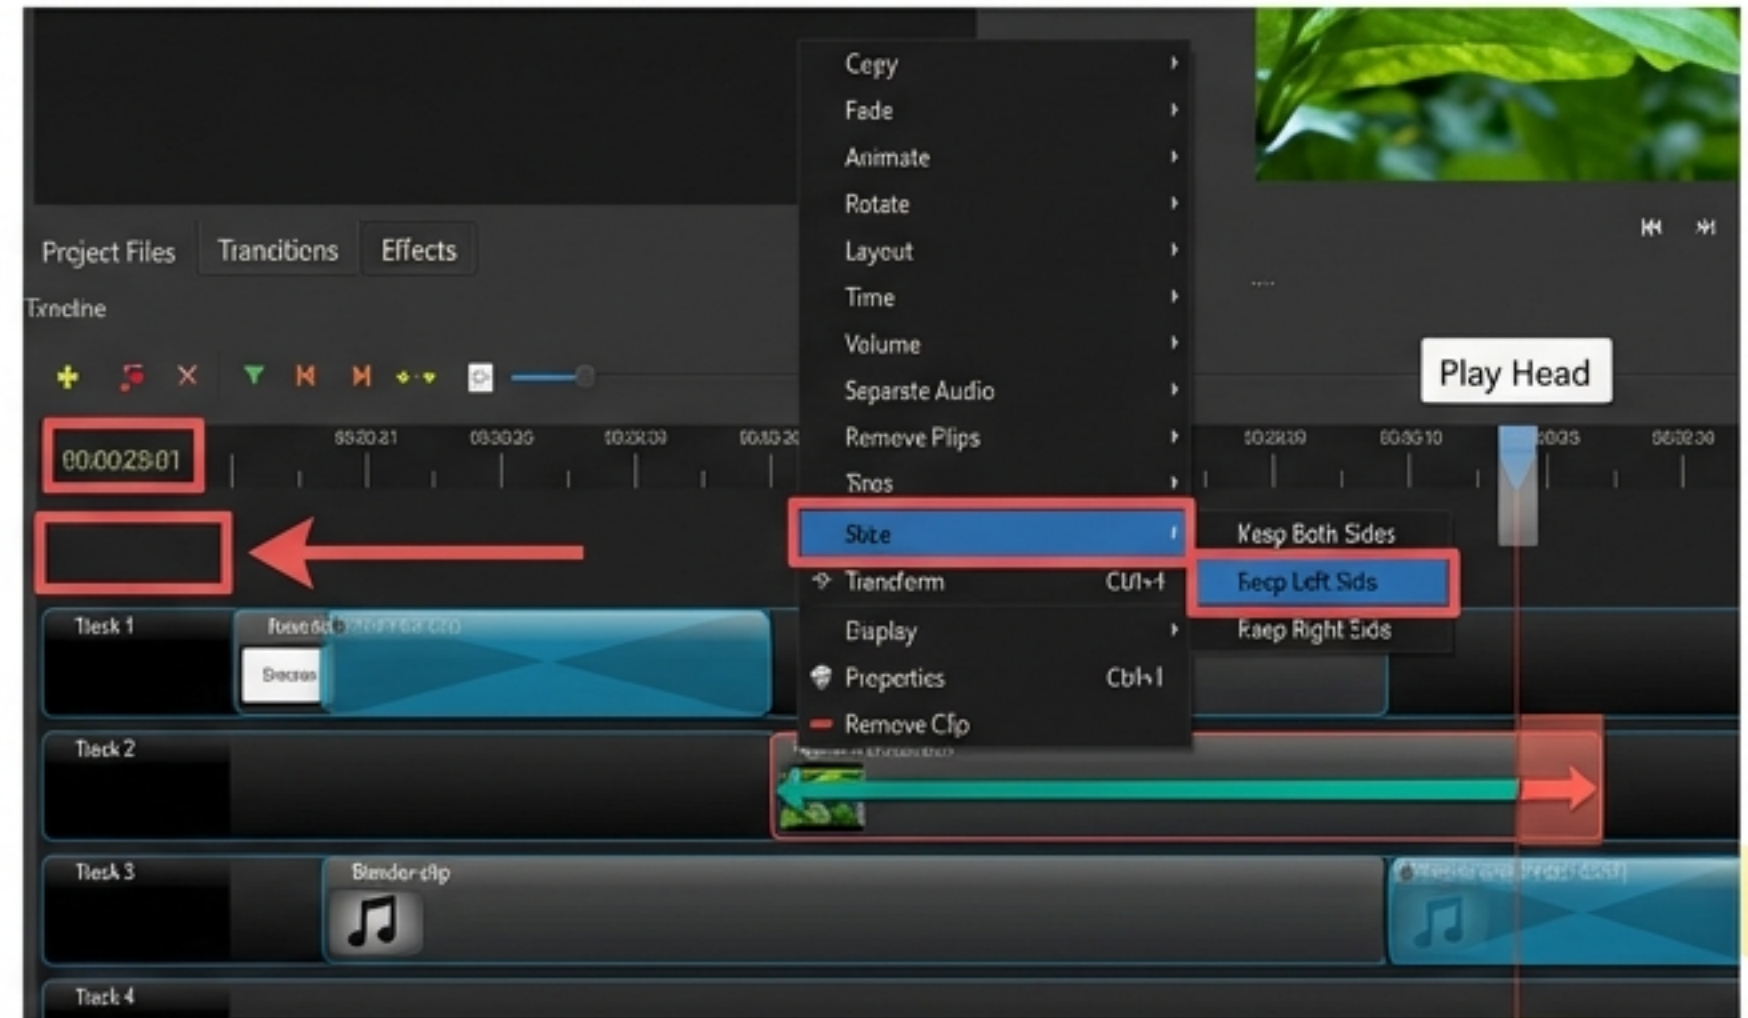

PROBLEM: The video clip is too long!

SOLUTION: SLICE IT.

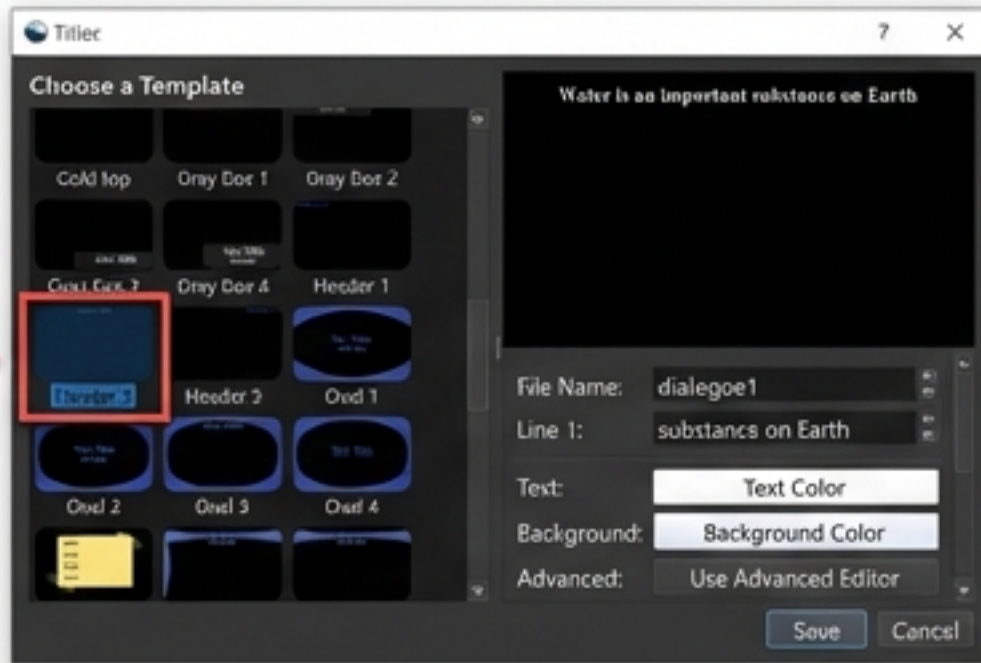

1. Place the **Play Head** where you want to cut.
2. **Right-click** the clip and select **Slice**. →
3. Choose **"Keep Left Side"** to remove the end.

Goal: Cut your clips to the perfect length.

STEP 5: DIALOGUE & SUBTITLES

Tell the story with text overlays.

- **Template:** Header 2 (Transparent Background)
- **Text:** "Water is an important substance on Earth."
- **Location:** Track 5 (The Top Layer)

T Track 5 (Text Sticker)

On Top

Track 4 (Video Clip)

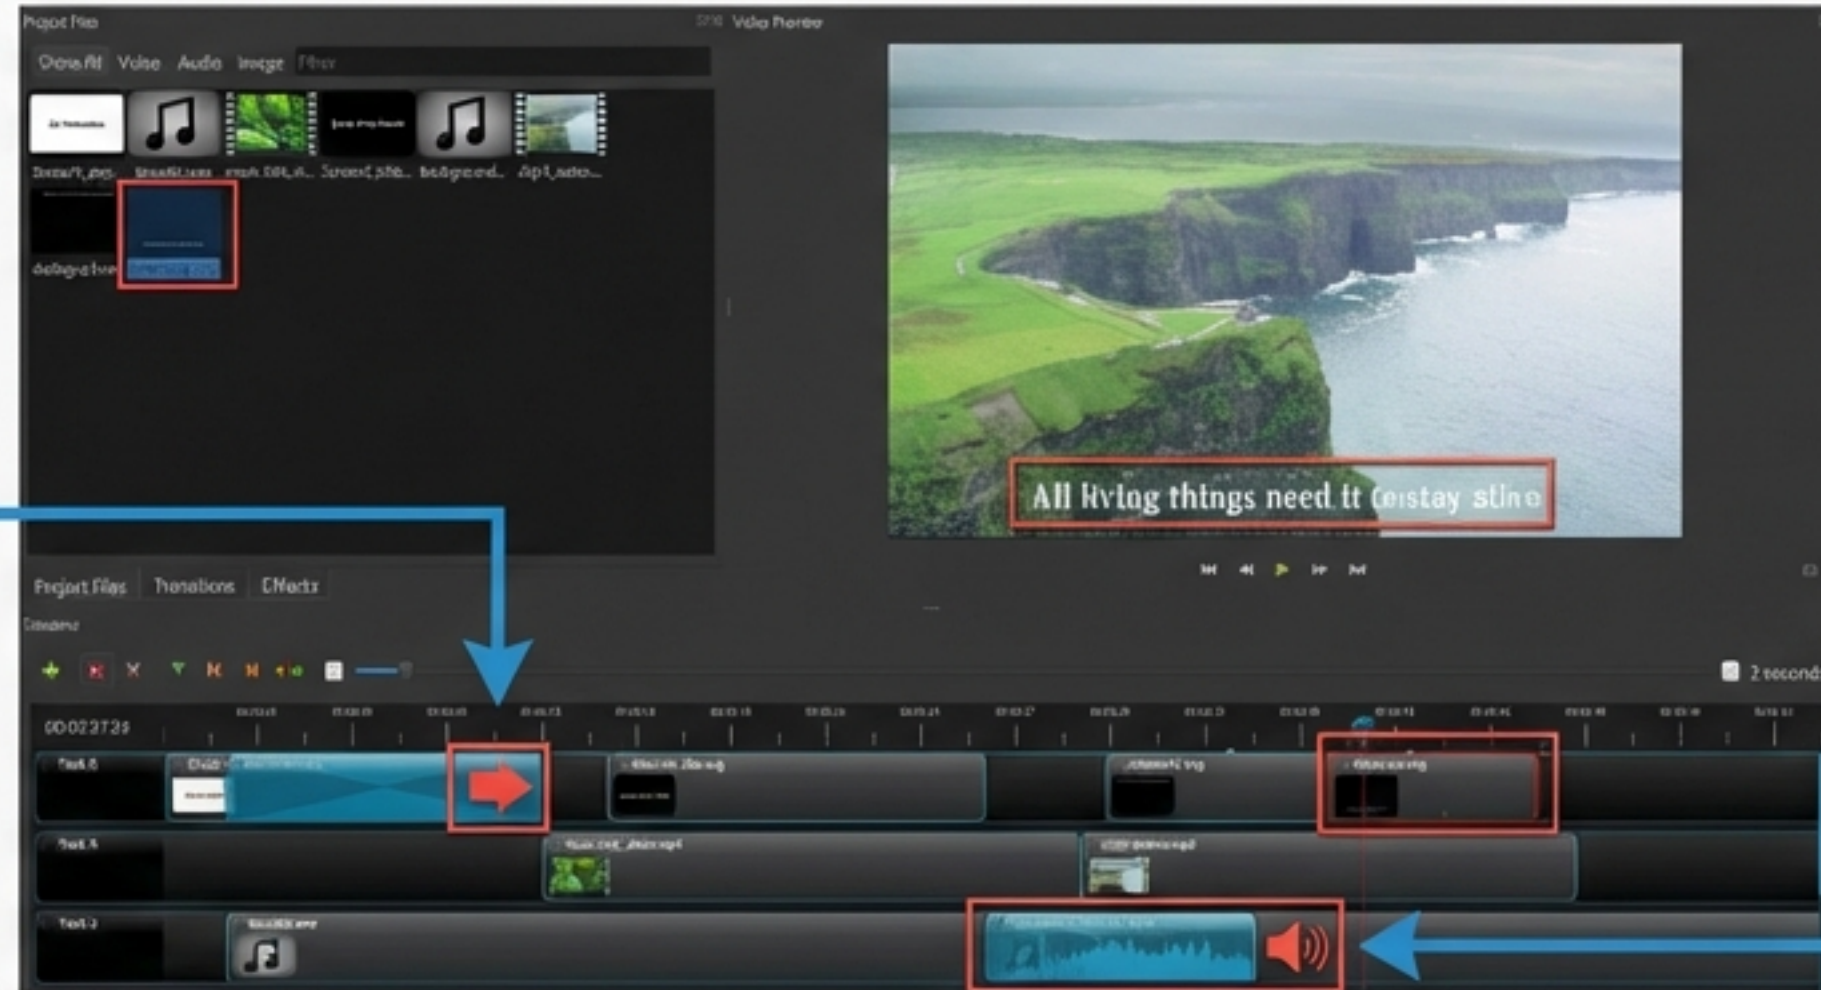

Goal: Make your video clear and engaging with dialogue and subtitles.

STEP 6: ANIMATION & AUDIO

Make it Move (Animation)

- Right-click the title clip.
- Animate > Entire Clip > Zoom.
- Effect: Text grows from 50% to 100%.

Make it Sound (Audio)

- Add 'Thunder' or music files to Track 3.
- Use the bottom layer for sound effects.

Goal: Bring your video to life with movement and sound.

THE END CREDITS

Curators Team

Ankita
Saurabh

Ananya
Soniya

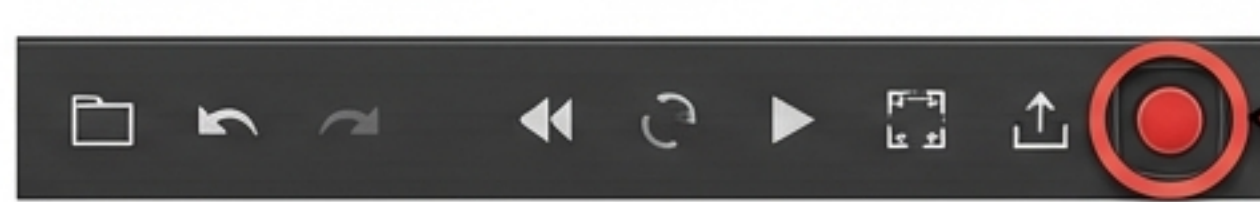

Every professional movie gives credit to the team!

Use the **Animate** feature to make the text **SCROLL** from the bottom to the top, just like in the cinema.

Goal: Give your video a professional finish with scrolling end credits.

IT'S A WRAP! (EXPORTING)

 1. Click the Red Button.

 2. **File Name:**
"Every Drop Counts"

 3. **Folder Path:**
Choose where to save.

 4. **Profile:**
All Formats.

Ready to share with the world!

Goal: Successfully export your final video project for sharing.

TECH FLASH: DIRECTOR'S VOCABULARY

- ✓ **PROJECT LIBRARY:** Where your raw clips and audio live.
- ✓ **TIMELINE:** Where you build the story in sequence.
- ✓ **TRACKS:** The layers. Higher numbers sit on top.
- ✓ **SLICE:** The tool to cut or split a clip.
- ✓ **TRANSITION:** A smooth fade between two scenes.
- ✓ **SNAPPING:** The magnet that lines up clips perfectly.

Ready to **direct** your first movie?

Goal: Master the key vocabulary of a video director.
