

Cloud Computing

Access Your World From Anywhere

Do you watch
YouTube videos?

Do you play
games online?

Do you learn on
online platforms?

**If you said YES,
you are already
using the Cloud!**

**Most things we do online today
rely on Cloud Computing.**

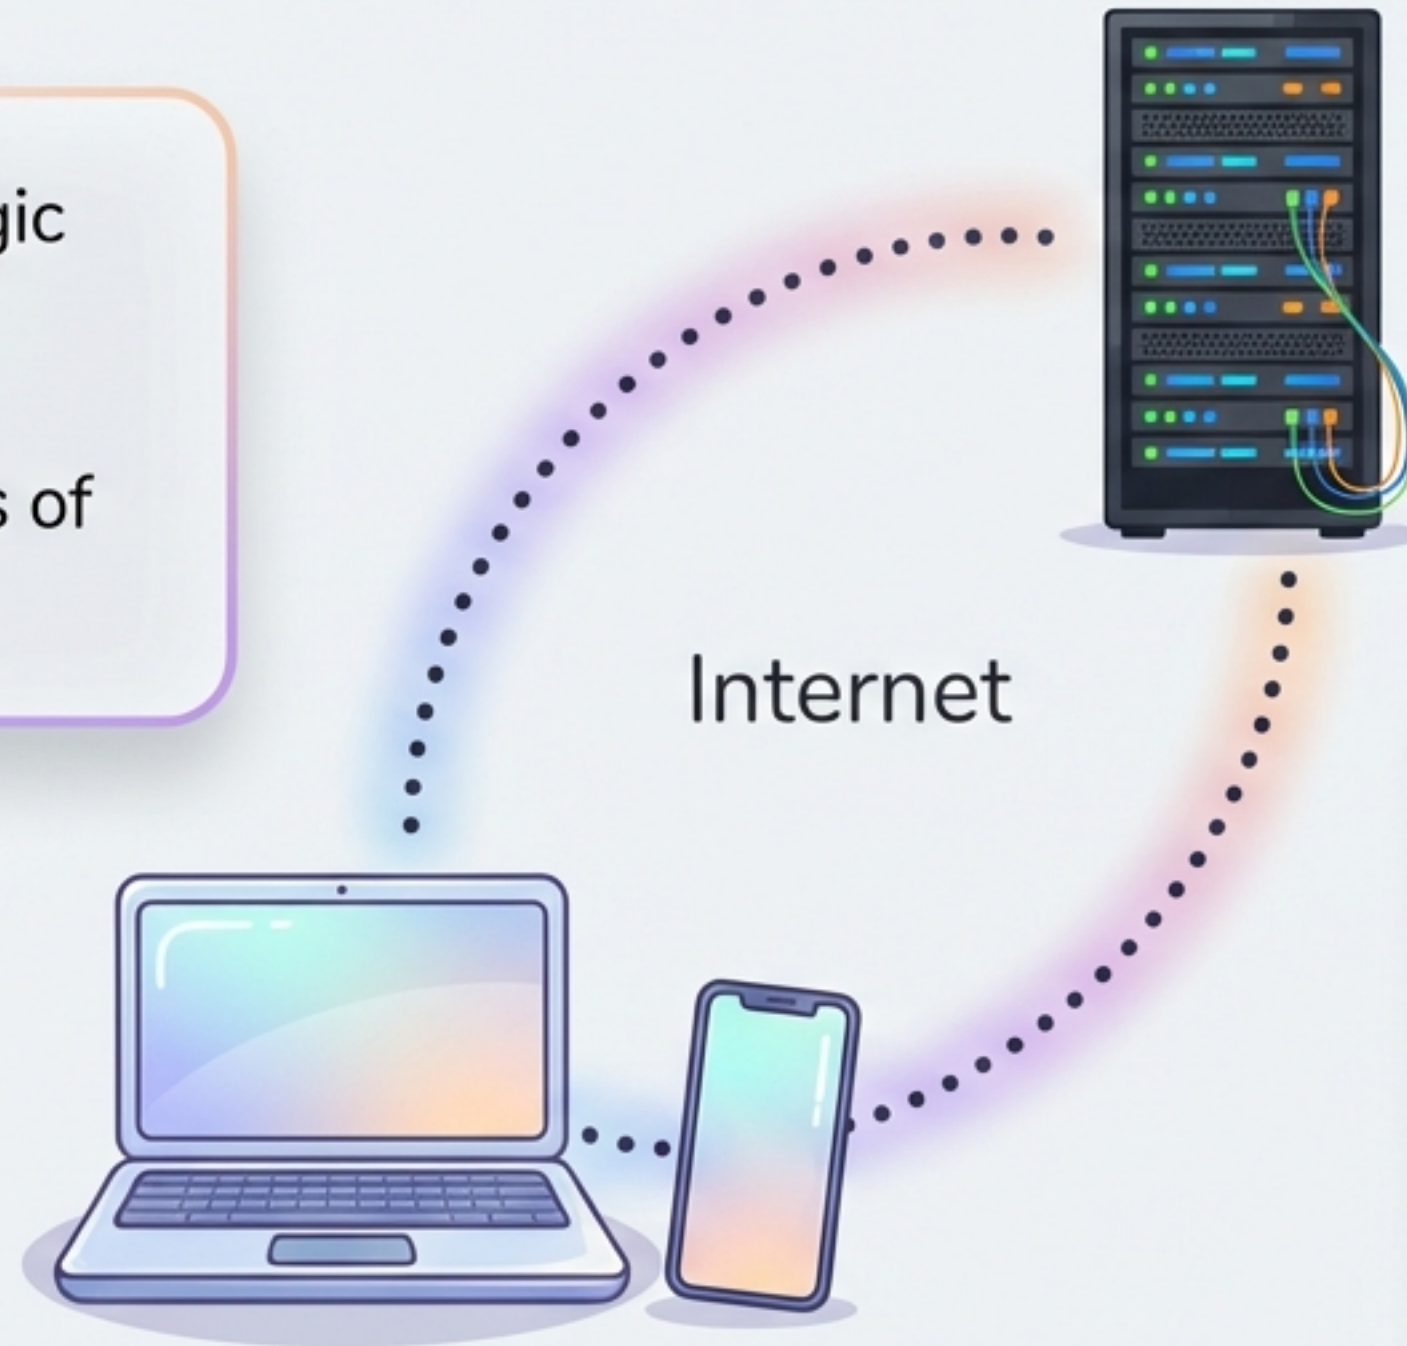

The Problem: Running Out of Space

- Meet Nikki. She loves collecting songs, poems, and games.
- The Issue: Her computer's hard drive is completely full.
- The Old Way: Buying expensive external drives that get lost or broken.

Is there a better way?

What is the Cloud?

The Cloud is not magic air. It is a network of physical SERVERS where large amounts of data are stored.

- Servers can be located anywhere in the world.
- You access them via the Internet.
- Accessible from any device (Laptop, Phone, Tablet).

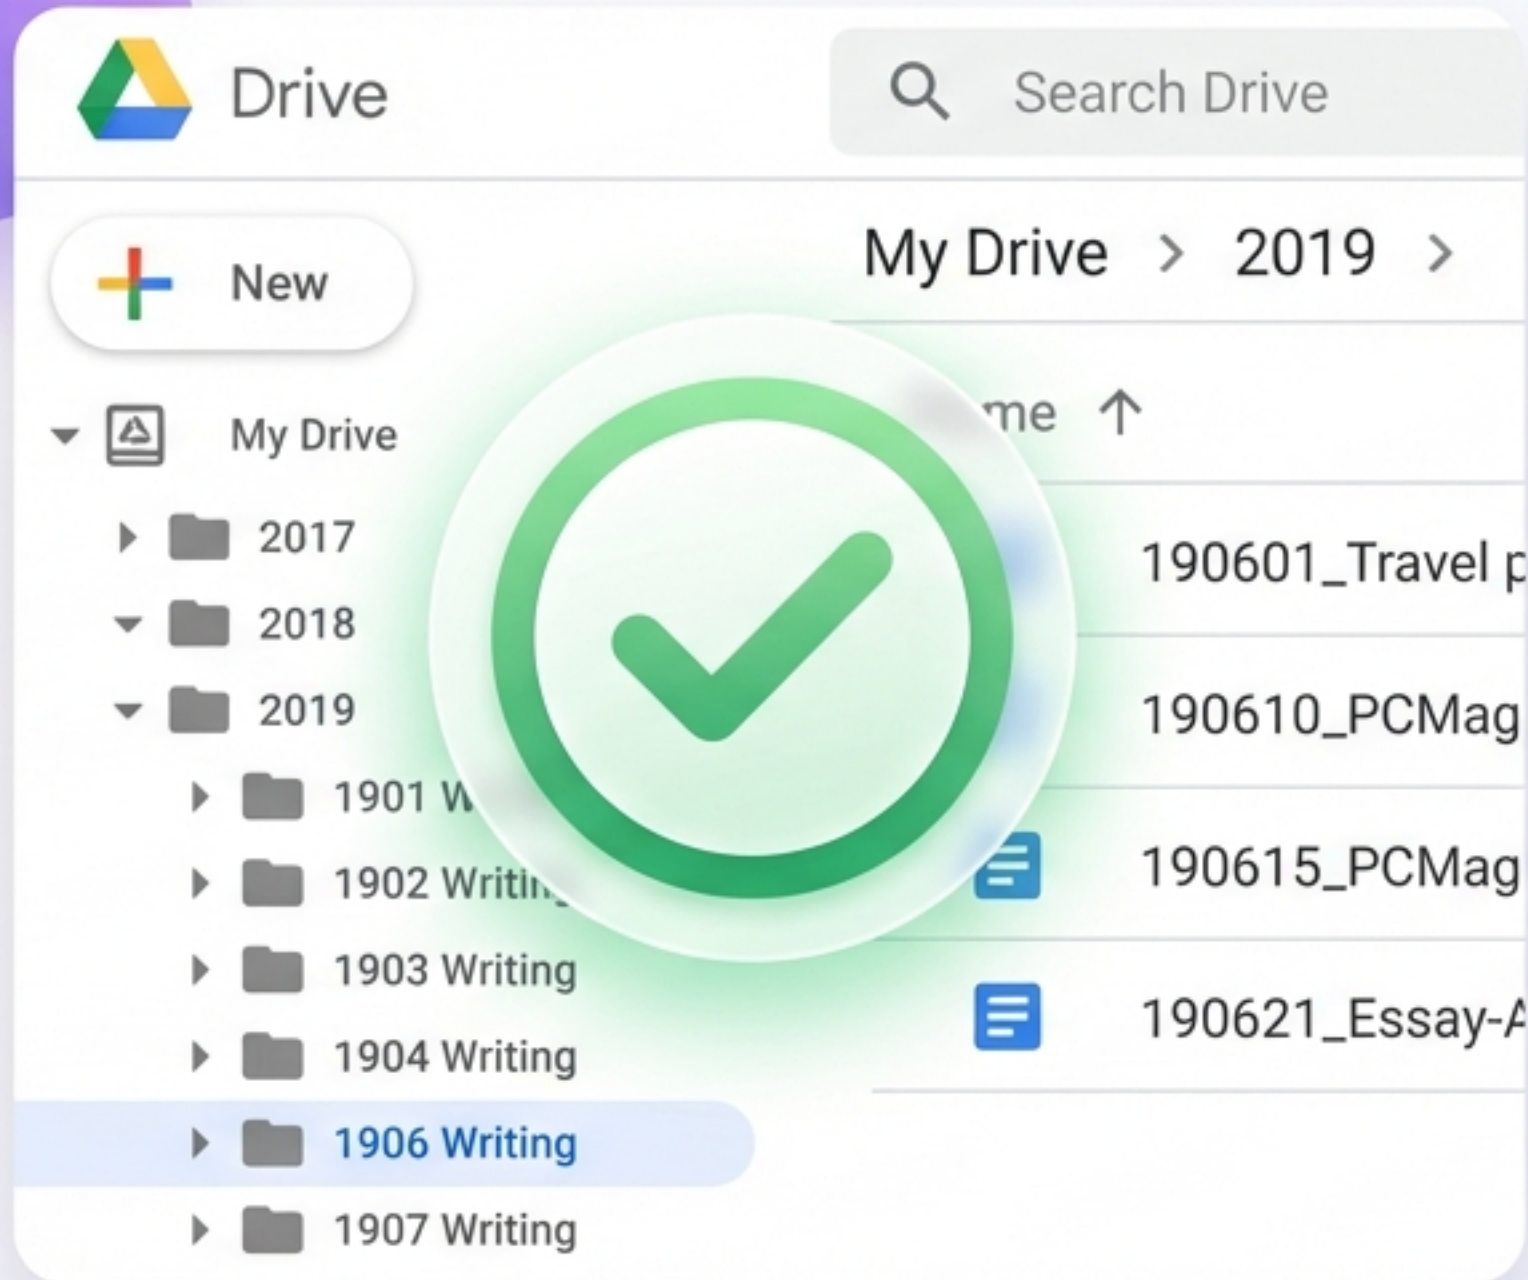

How It Works: The Client-Server System

Security Tip

To keep your data safe, you need a Username and Password.

Feature 1: Cloud Storage

Nikki's Solution: Google Drive

- Nikki created a cloud account and saved all her files there.
- No more 'Disk Full' warnings!
- She can now create folders, share files, and invite friends to work together.

Feature 2: Cloud Services

No installation needed. These apps run in your browser.

Word Processing

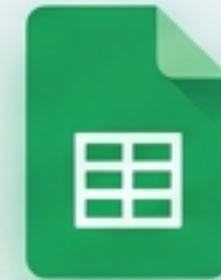

Microsoft Word

Google Docs

Spreadsheets

Microsoft Excel

Google Sheets

Presentations

PowerPoint

Google Slides

More Than Just School Work

Why We Love the Cloud

Global Access

Get your data from anywhere in the world.

Any Device

Switch from phone to computer instantly.

Cost Effective

Cheaper than buying lots of hard drives.

Safety

Protected by your unique login.

Activity: Match the App!

Draw a line mentally to match the Desktop Software to the Cloud Service.

Old Desktop Way

Microsoft Word

Microsoft Excel

PowerPoint

New Cloud Way

Google Slides

Google Docs

Google Sheets

Key Terms to Remember

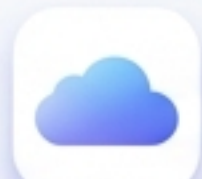

SERVER: A computer that provides data or services to other computers.

CLIENT: The computer or device (like your phone) requesting information.

INTERNET: A global network of computers connected to each other.

CLOUD COMPUTING: Storing and accessing data over the internet instead of your computer's hard drive.
