THE DEVELOPER'S ROADMAP

MISSION BRIEF: THE PLATFORMER

Quest Log

Definition: A game where a character jumps over obstacles to reach a goal.

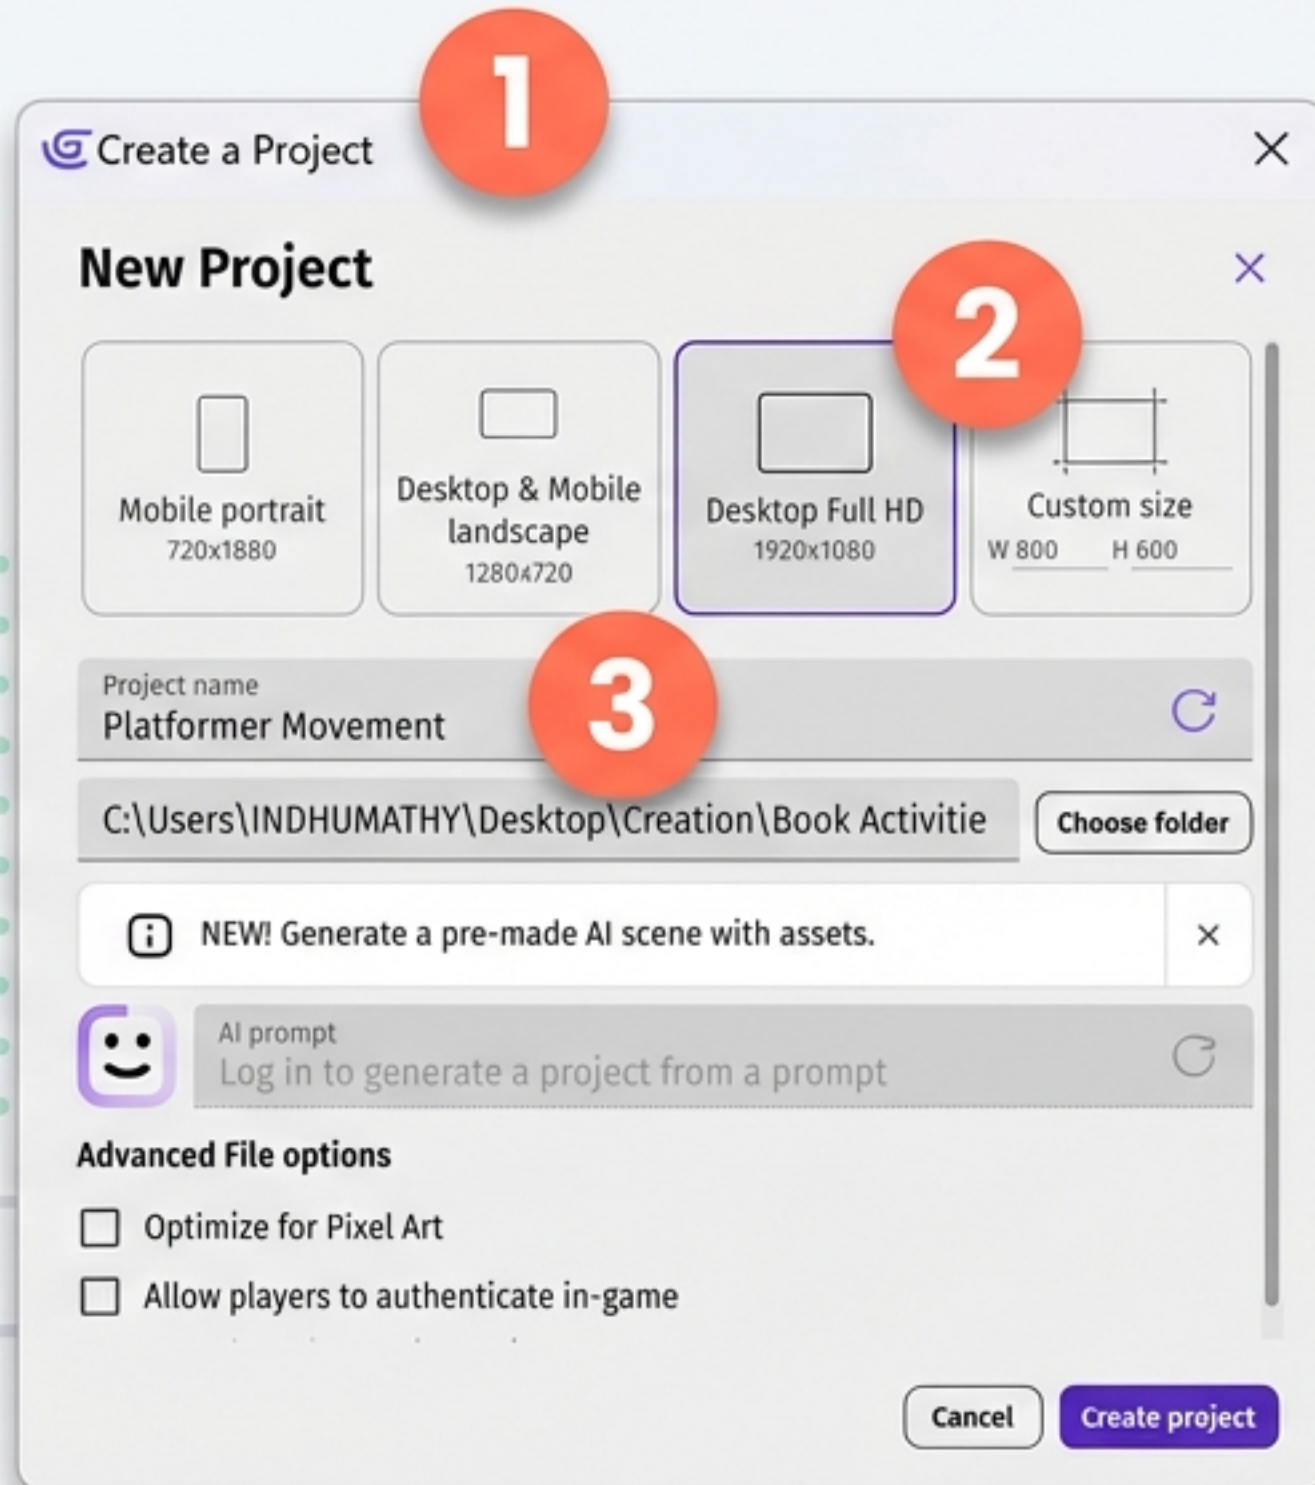

Core Mechanics: Gravity, Jumping, Avoiding falls.

Current Objective: Create player movement where the character can walk, jump, and stand on platforms.

SYSTEM LAUNCH

The screenshot shows the 'Create a Project' dialog box in GDevelop. It has a title bar 'Create a Project' with a close button. Below is a section 'New Project' with four options: 'Mobile portrait 720x1880', 'Desktop & Mobile landscape 1280x720', 'Desktop Full HD 1920x1080' (which is selected and highlighted with a red circle labeled '2'), and 'Custom size W 800 H 600'. Below these is a 'Project name' field containing 'Platformer Movement' (highlighted with a red circle labeled '3') and a 'Choose folder' button. There is also a text box with 'NEW! Generate a pre-made AI scene with assets.' and an 'AI prompt' section with a 'Log in to generate a project from a prompt' button. At the bottom are 'Advanced File options' with checkboxes for 'Optimize for Pixel Art' and 'Allow players to authenticate in-game', and 'Cancel' and 'Create project' buttons.

Log in to generate a project from a prompt

Advanced File options

☐ Optimize for Pixel Art

☐ Allow players to authenticate in-game

Cancel Create project

1 Open GDevelop & Click 'Create a Project'.

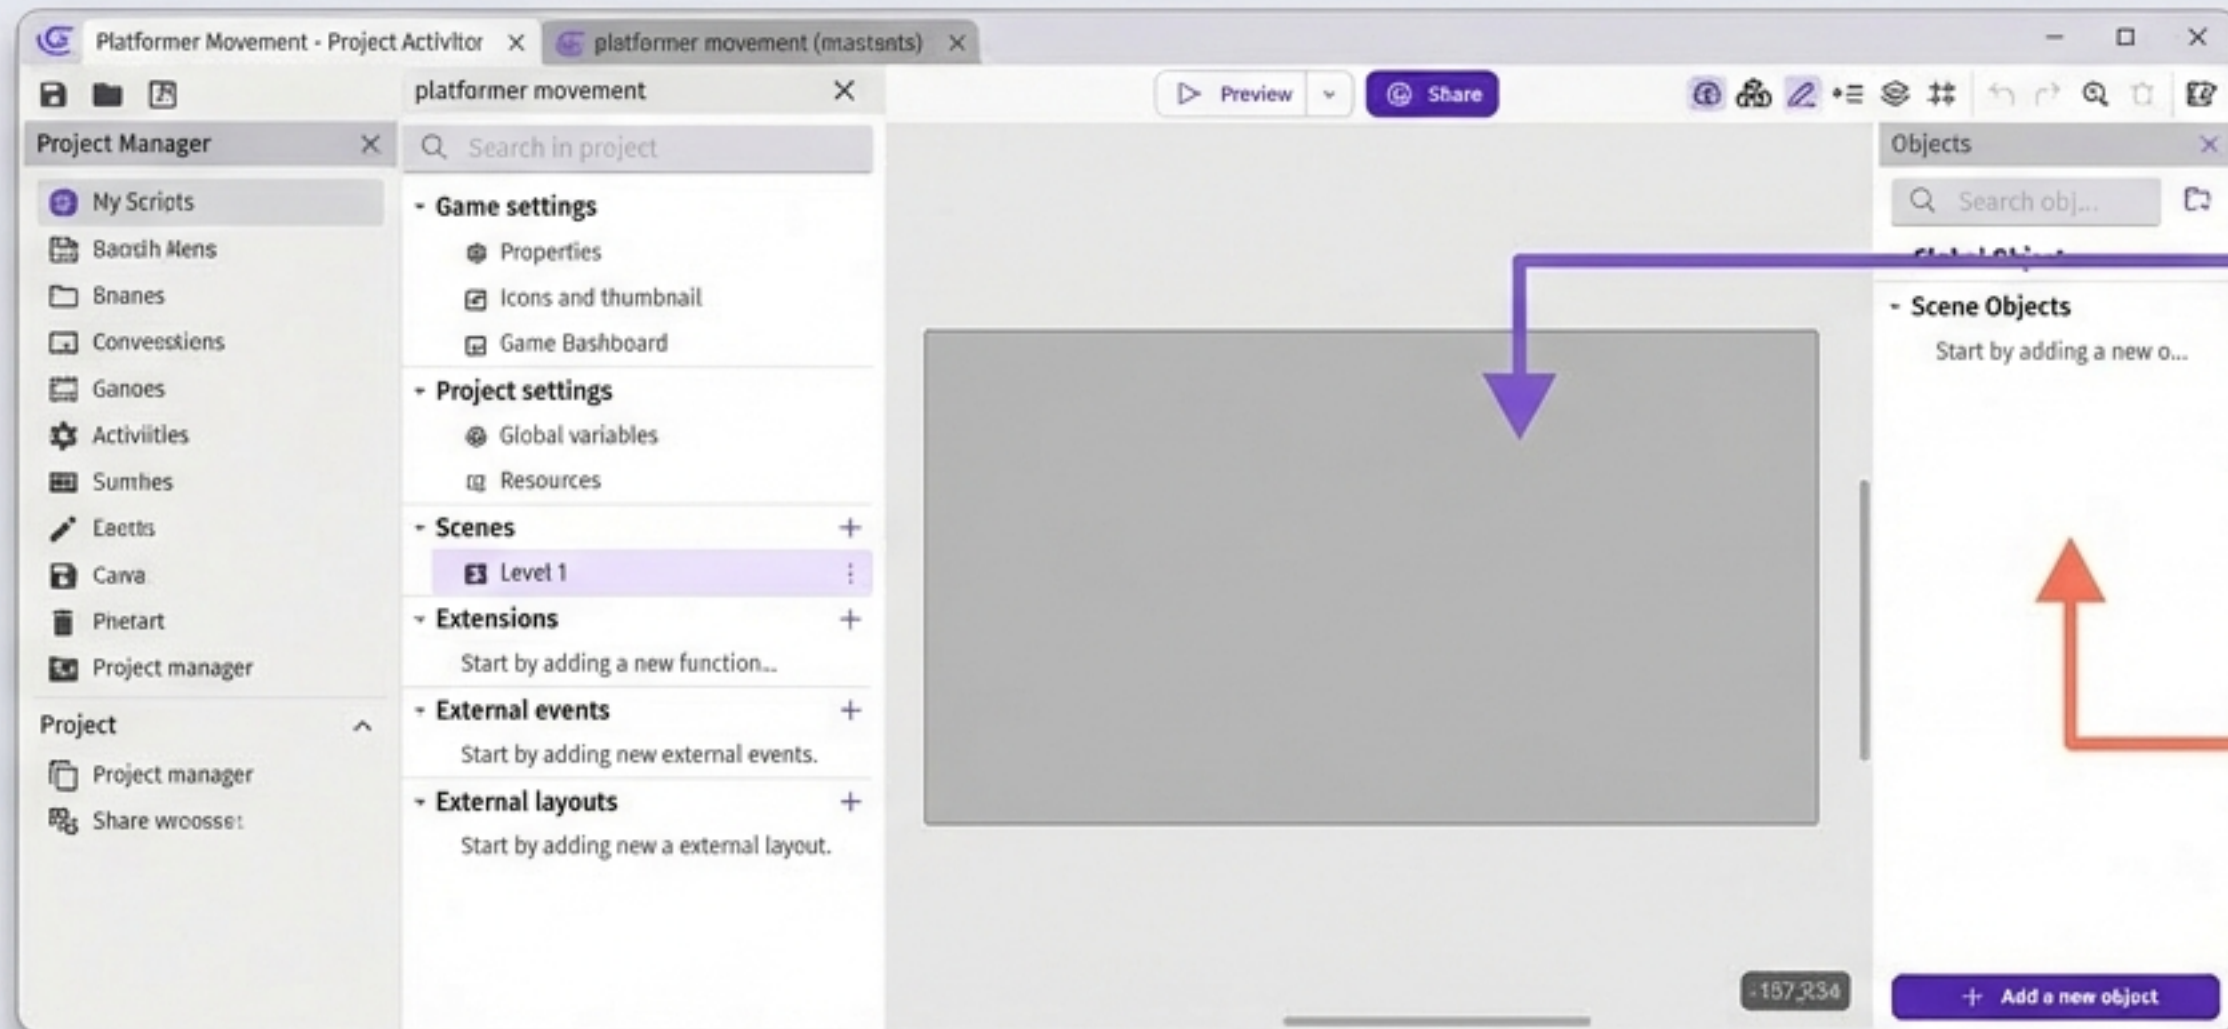

2 Select 'Desktop Full HD' (1920x1080).

3 Name Project: 'Platformer Movement'.

THE INTERFACE: COCKPIT

SCENE
(The Play Area
/ Level 1)

OBJECTS PANEL
(Where characters
& enemies live)

Action: Start by adding a new object.

SUMMON THE HERO

+ Add New Object

p1_stand

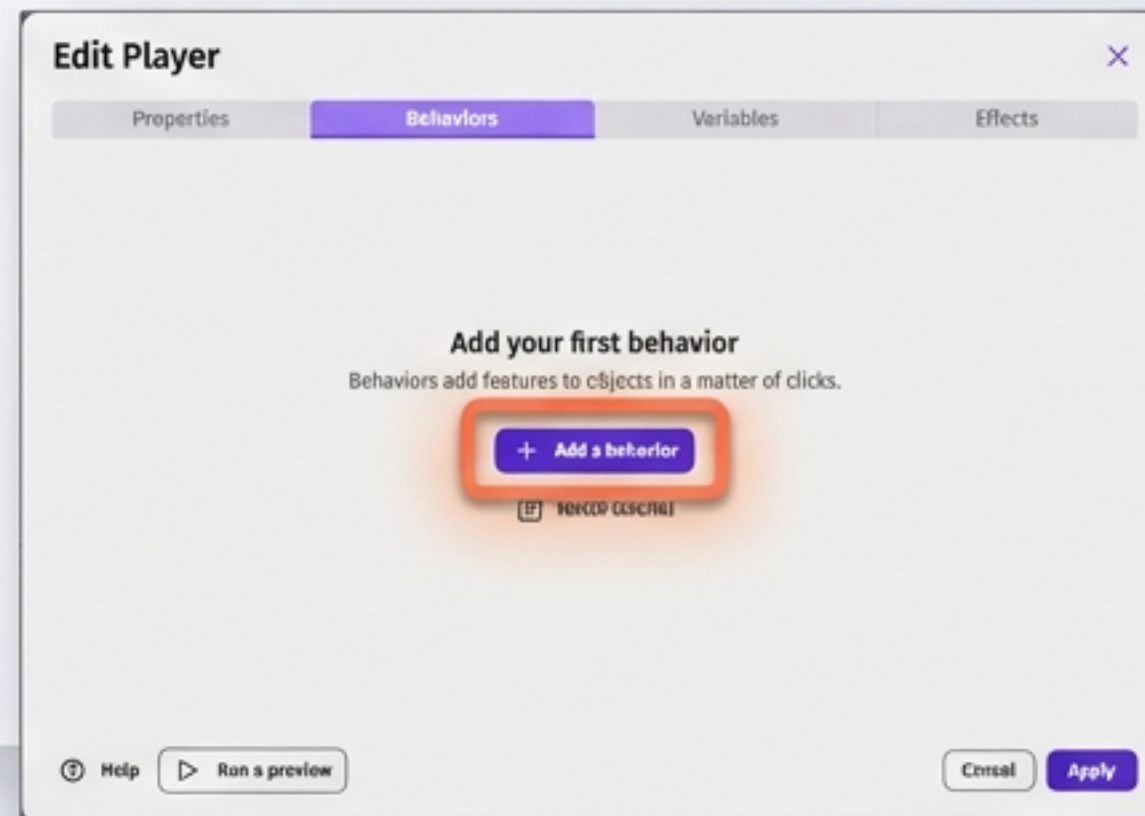

Sprite = A 2D image serving as the visual representation of an object.

Instruction: Name object '**Player**' and import image '**p1_stand**'.

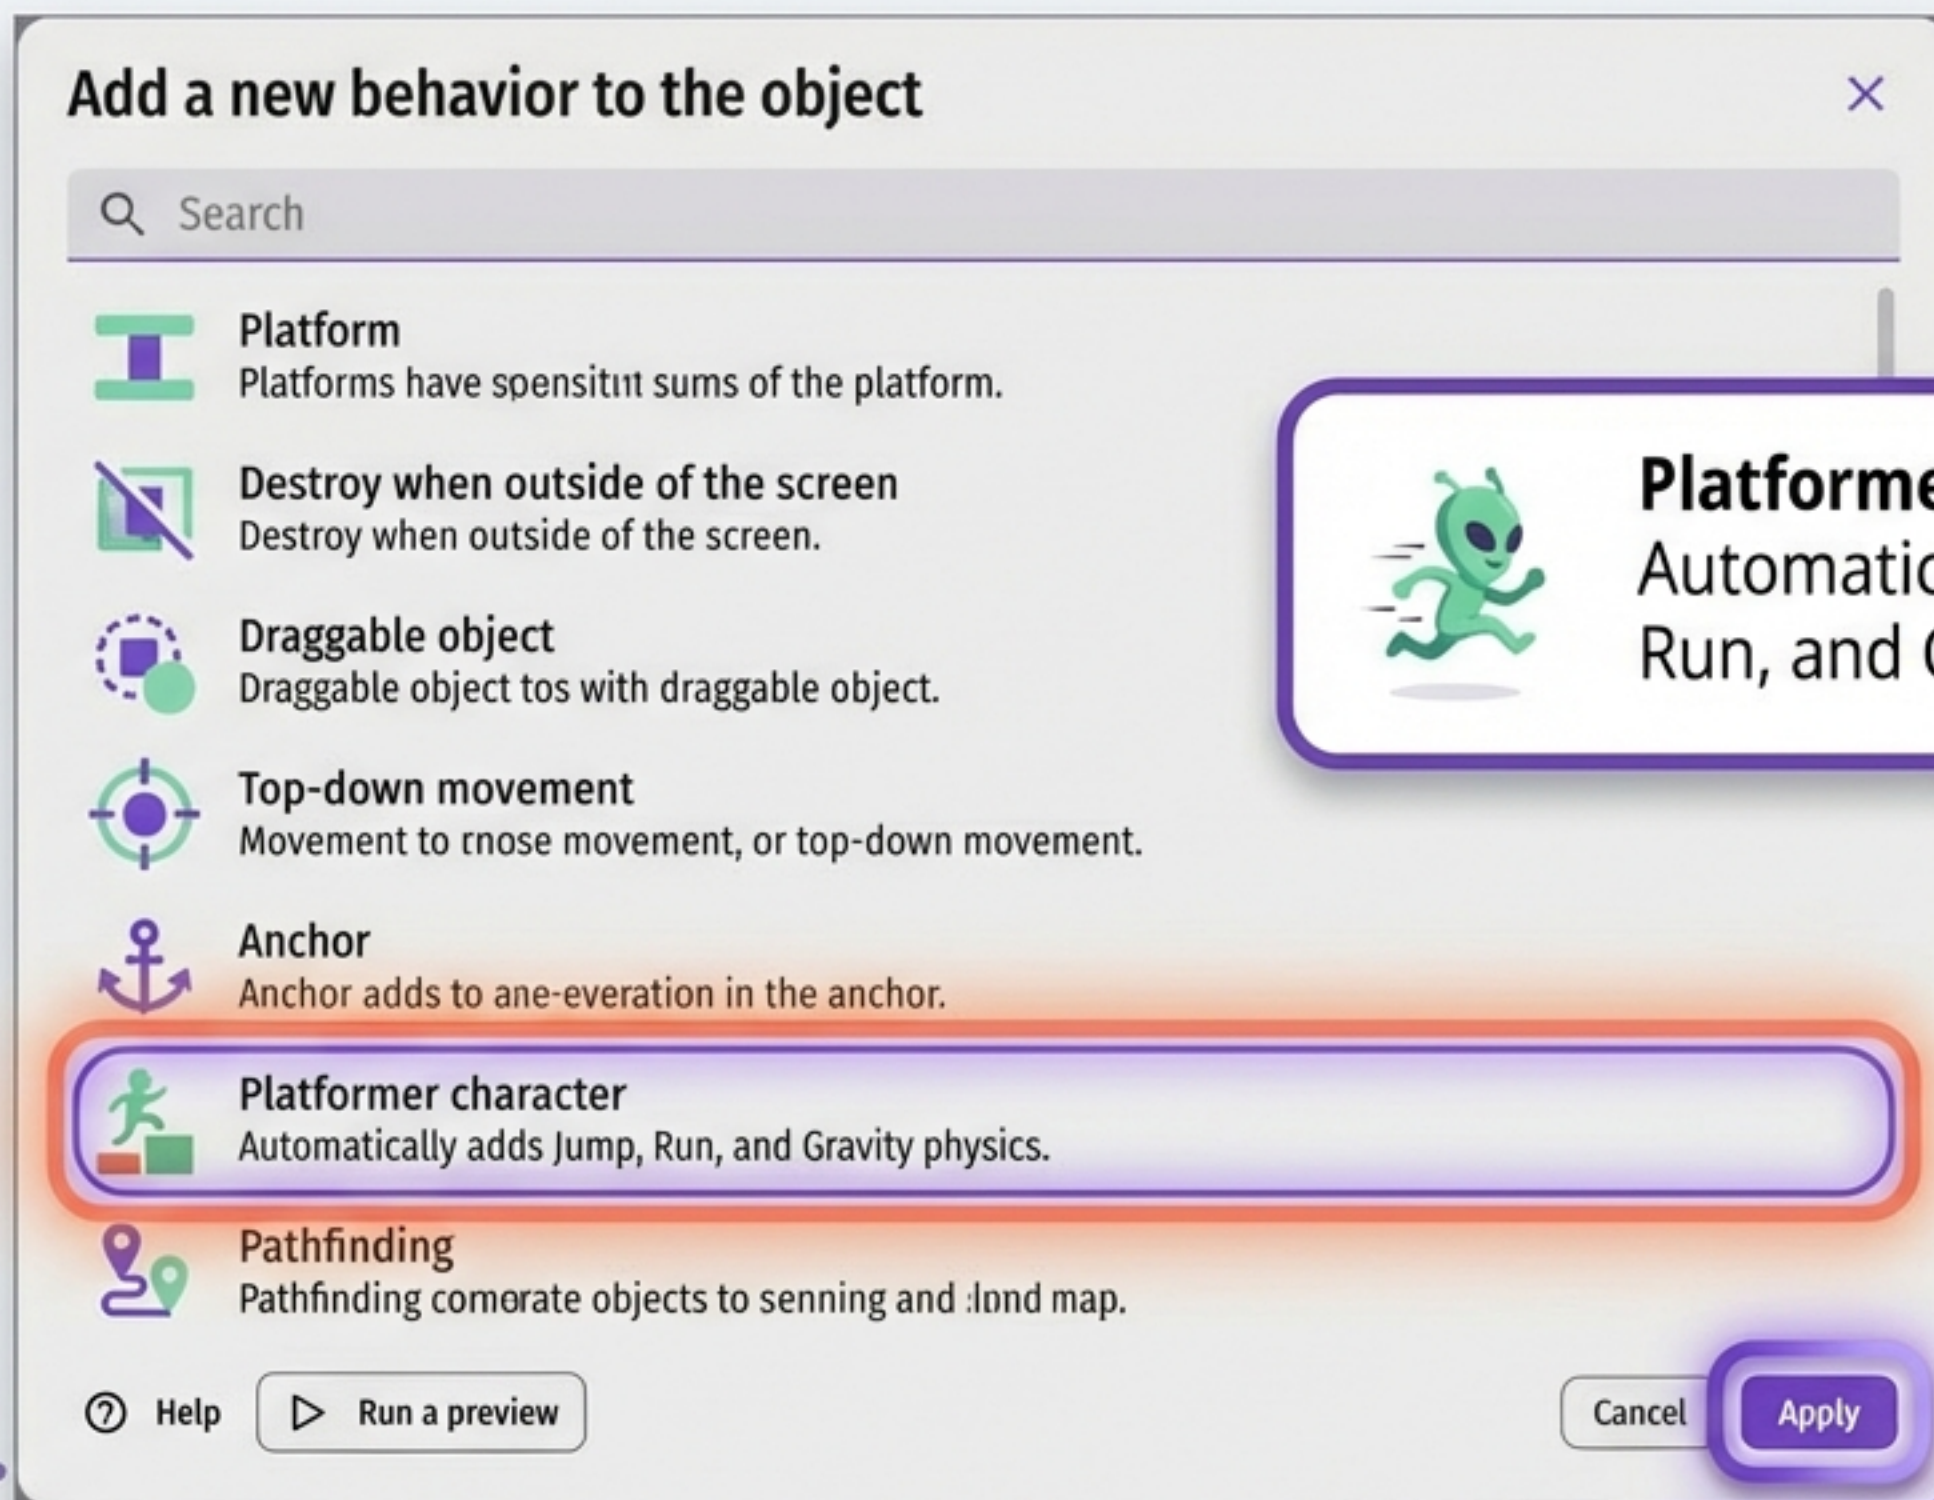

GRANTING ABILITIES

Behavior: A predefined set of actions that adds capabilities (The object's "Brain").

INSTALLING PHYSICS ENGINE

Platformer Character:
Automatically adds Jump, Run, and Gravity physics.

CONSTRUCTING THE WORLD

Problem: Gravity is on,
but there is no floor.
The hero falls forever.

Sprite

Tiled Sprite

New object

Asset Store

New object from scratch

GENERAL

Sprite

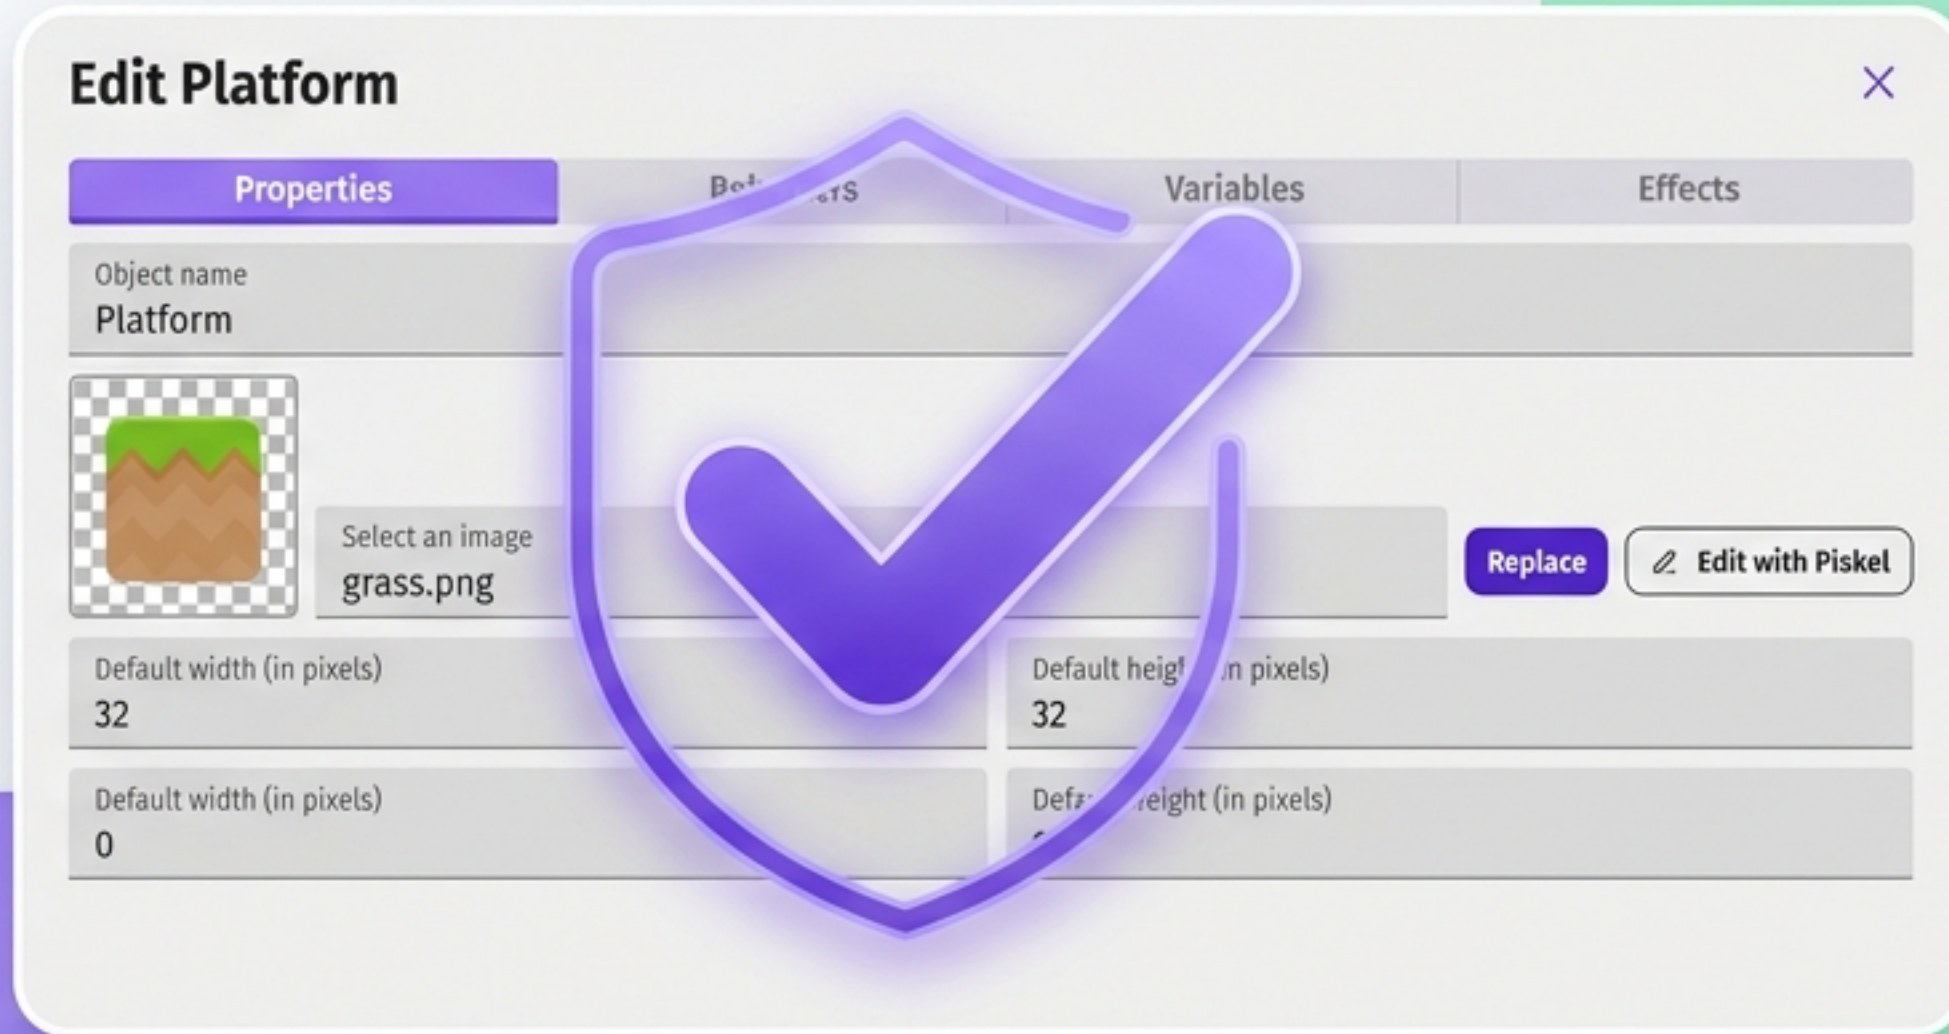

Animated object which can be used for most elements of a game.

Tiled Sprite

Displays an image repeated over an area.

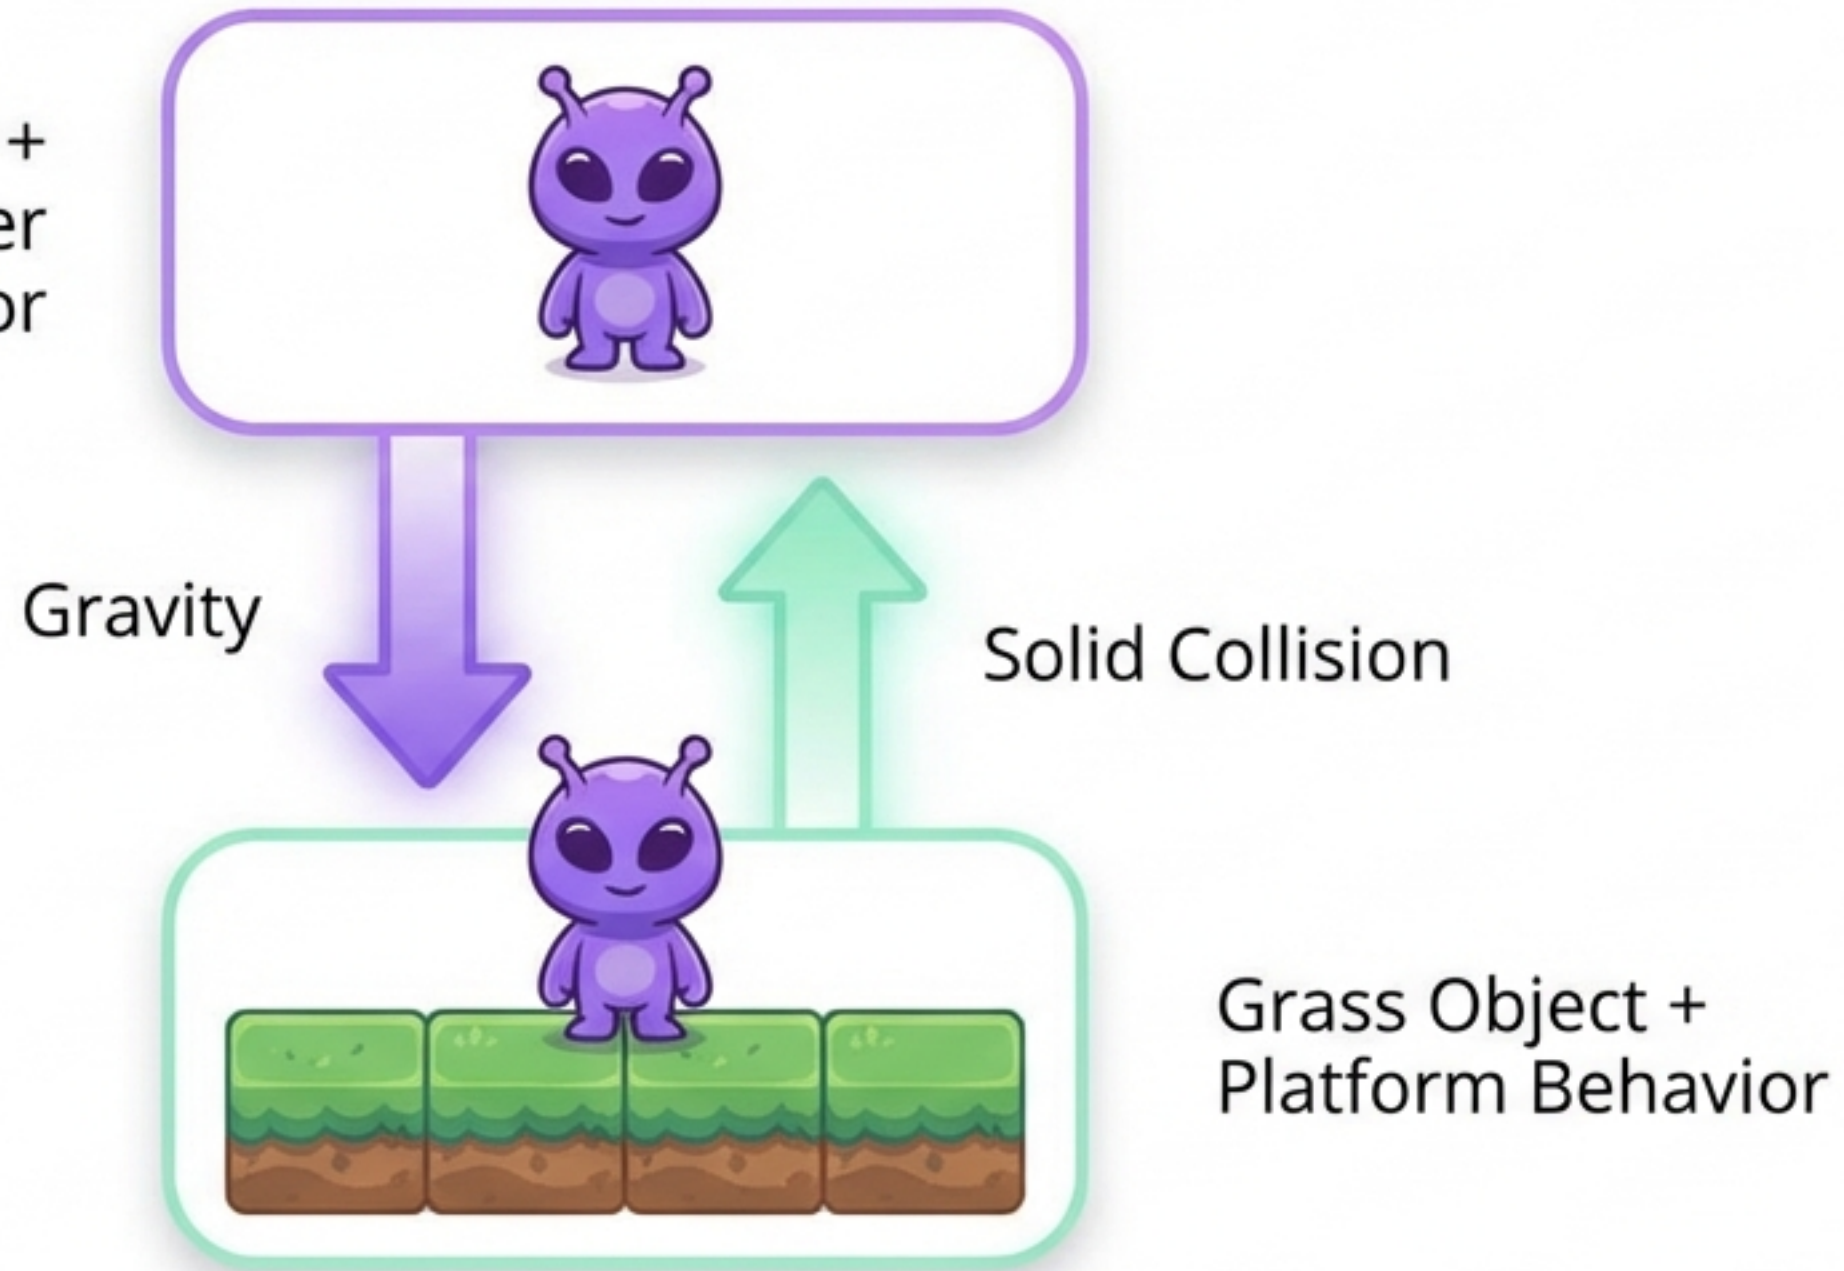

SOLIDIFYING THE GROUND

- 1 Drag the Grass object into the scene.
- 2 Add Behavior: Platform.
- 3 Effect: Flags object as a solid surface the character can collide with.

PRESS START: TESTING

Use **Arrow Keys** to Move.
Spacebar to Jump.

MISSION COMPLETE

INVENTORY (VOCABULARY)

Sprite (Visual)

An image that can be moved.

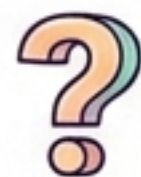

Tiled Sprite (Pattern)

A repeating texture.

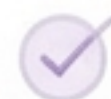

Behavior (Logic)

Instructions for how objects act.

XP CHALLENGE

1. What are the 4 stages of game design?
2. Which behavior makes the hero jump?
3. Which behavior makes the ground solid?
