What is Data?

Data is a collection of information. It is everywhere!

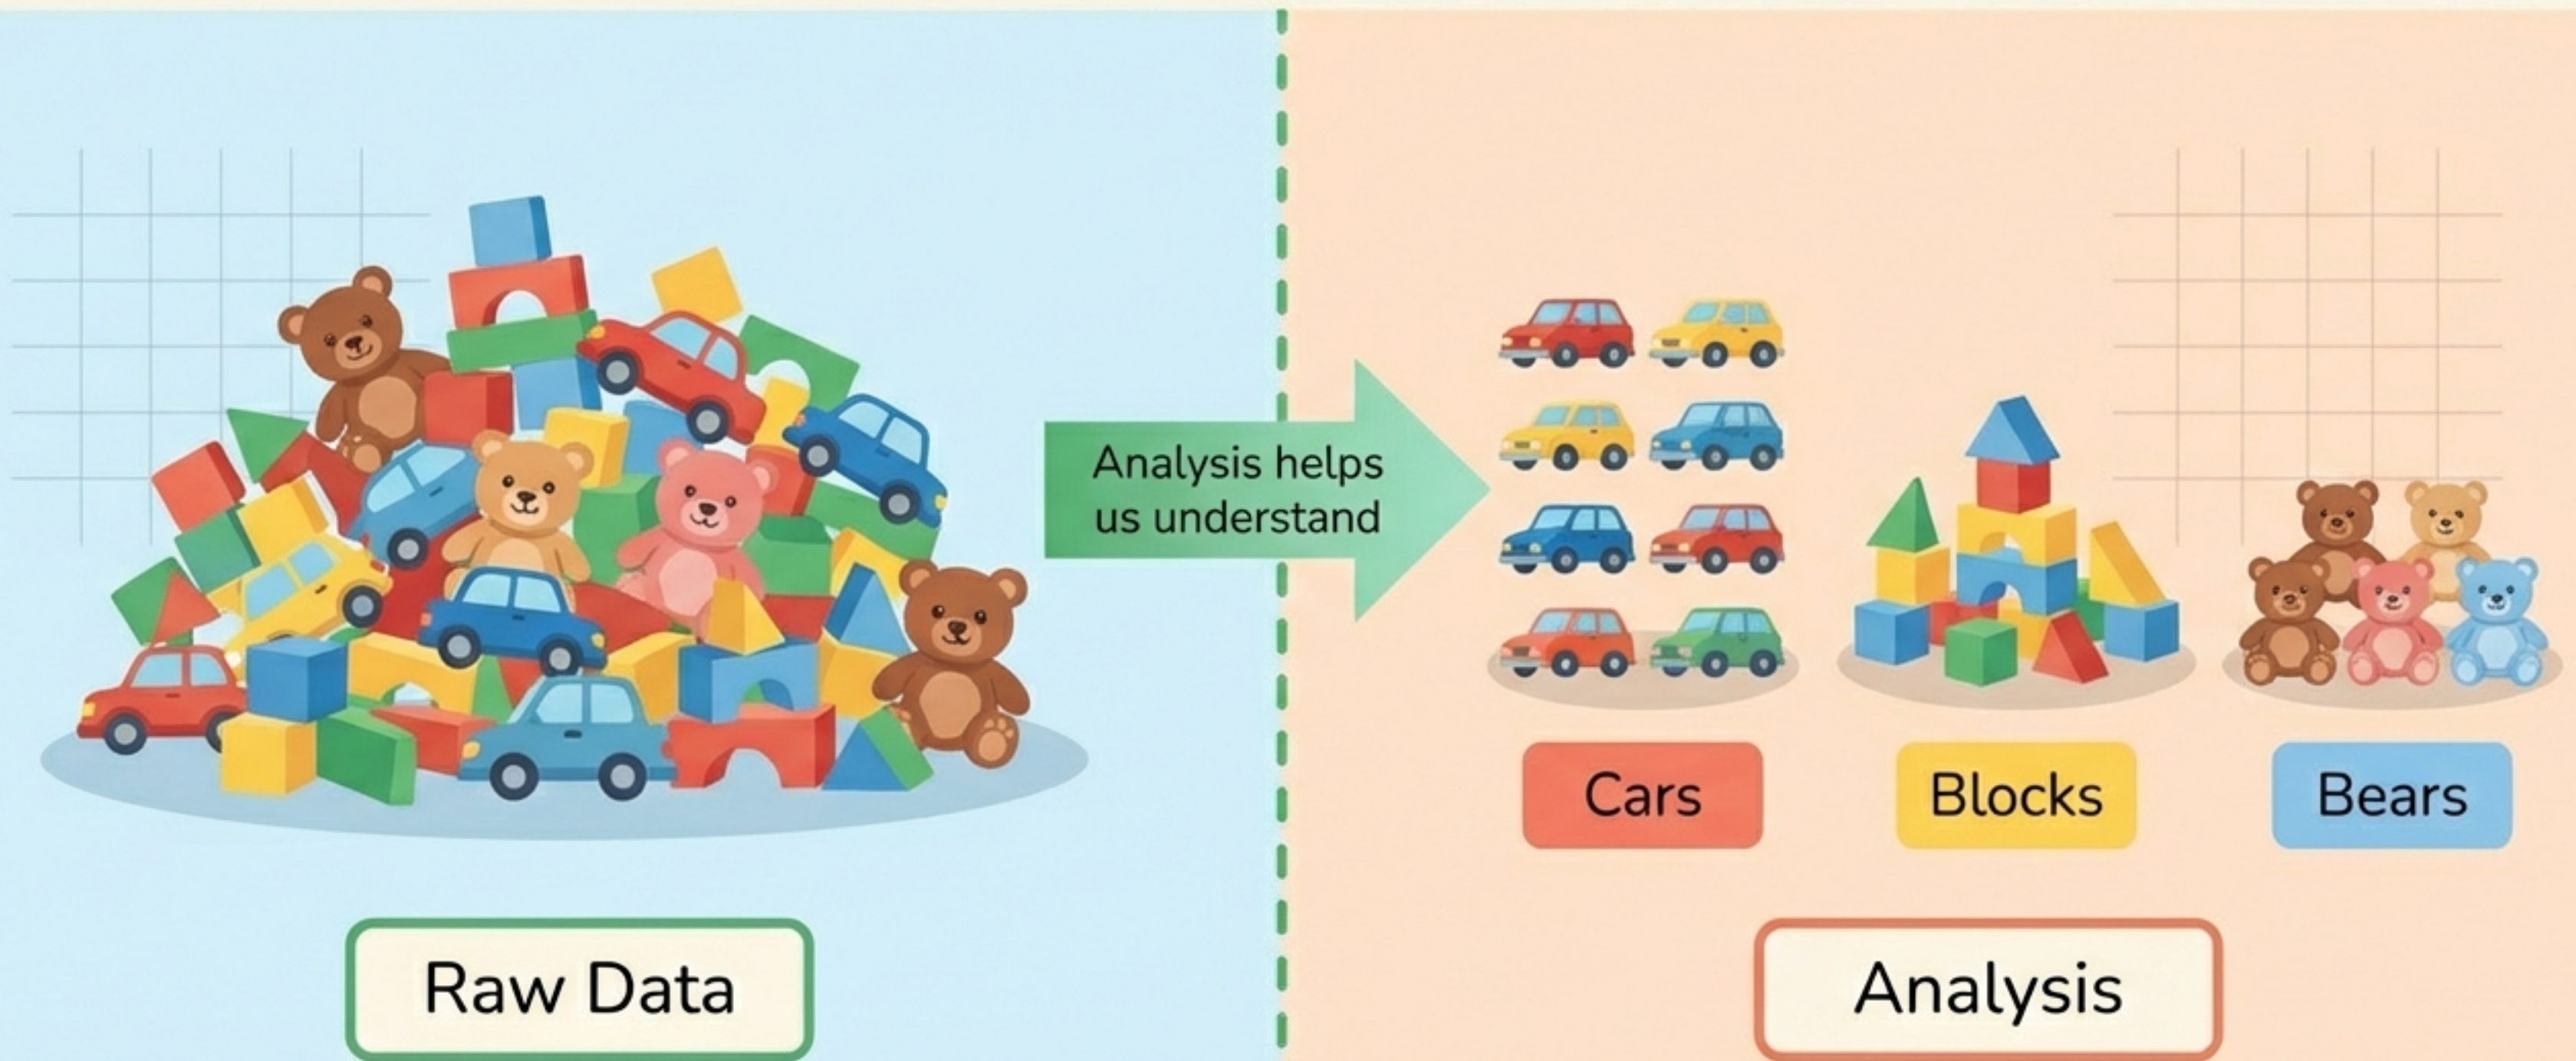

Data (Text)

Data (Numbers)

The Puzzle of Analysis

Analysis is the process of breaking data down into smaller parts to understand it better.

Tech Flash: Do You Remember?

Future Tech: Machine Learning

- Computers can learn!
- They analyze data (like our spreadsheets) to make decisions.
 - They get smarter the more data they read.

Mission Accomplished!

Spreadsheets help us arrange and understand the world.
