

Let's Make a Presentation!

ICT Grade 4 – Chapter 12

Making a presentation is fun and interesting. Today, we will learn how to communicate our ideas using digital slides.

What is a Presentation?

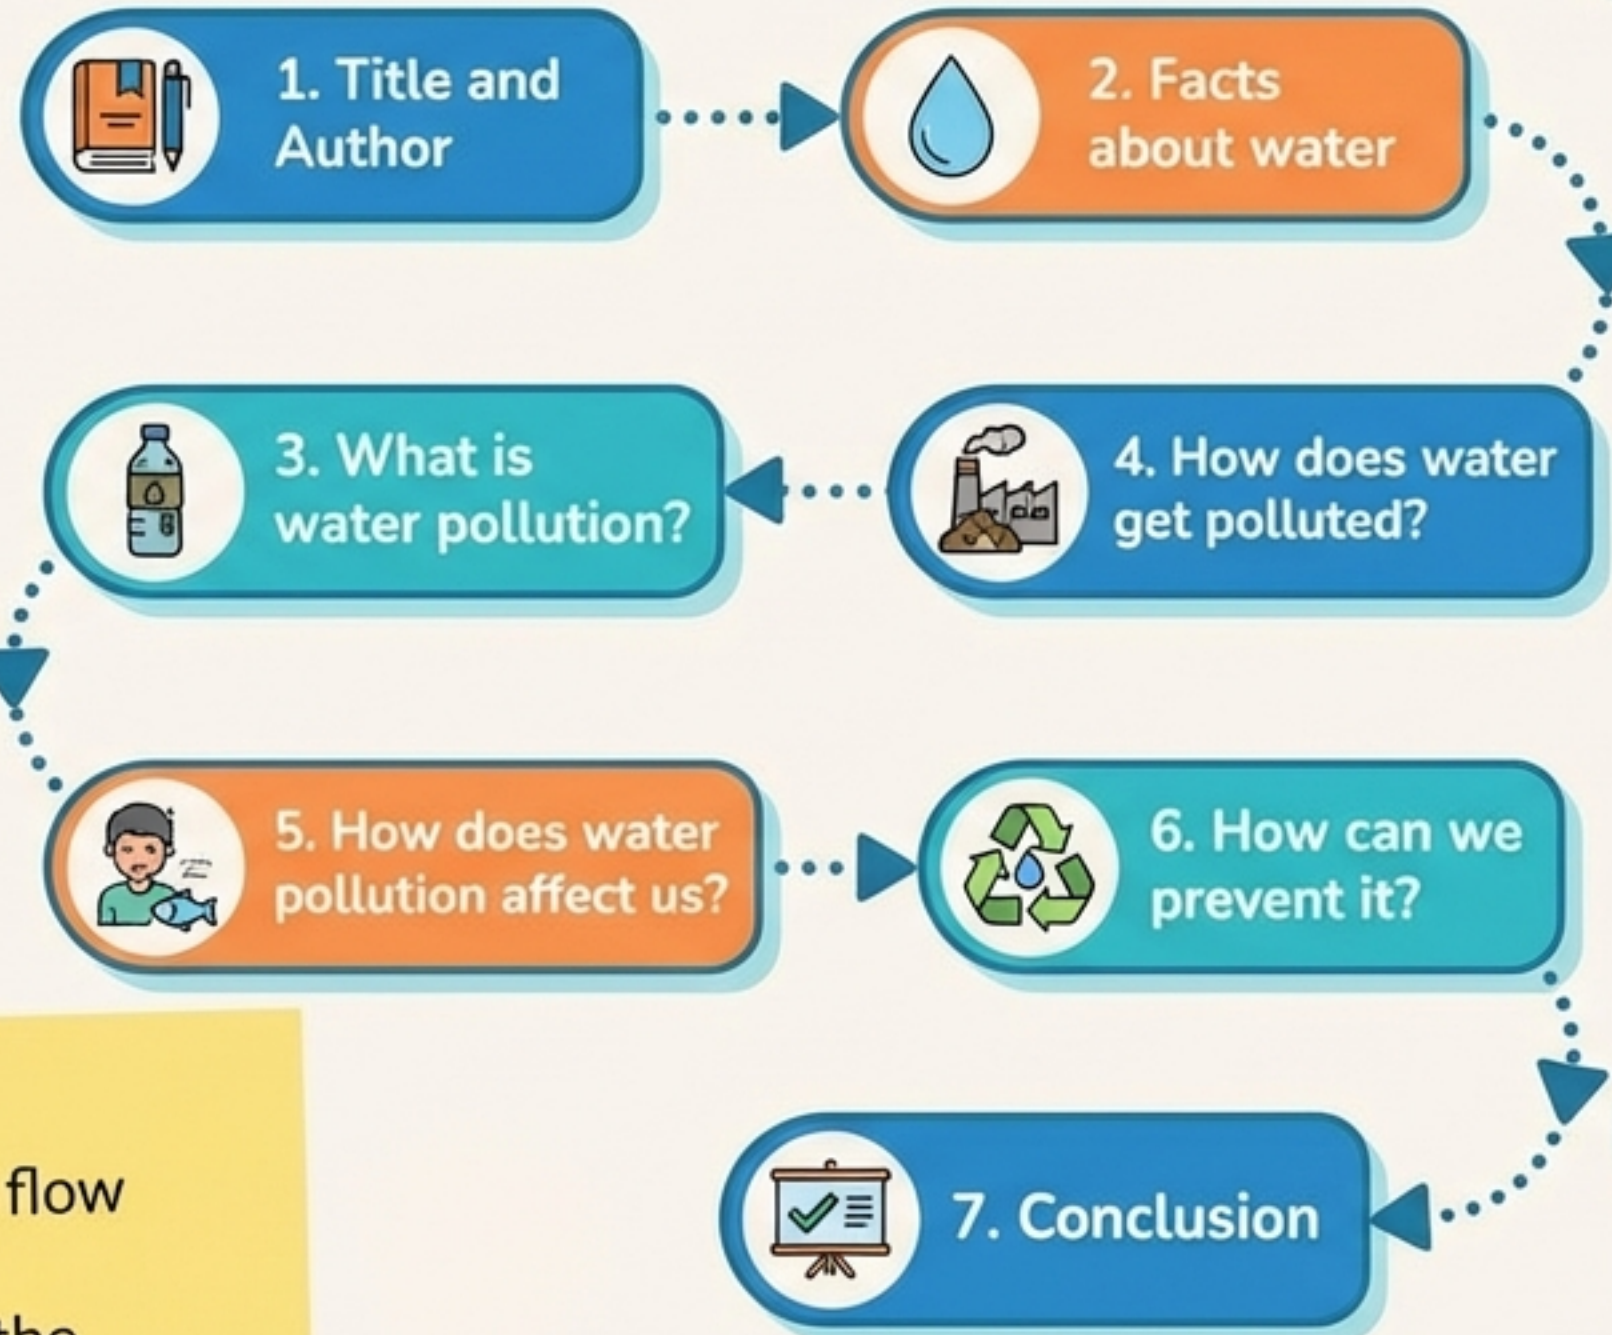

A presentation is a way to communicate a message to an audience. It uses visual aids (images, text, video) to help communicate thoughts effectively.

In this lesson, we will use Microsoft PowerPoint.

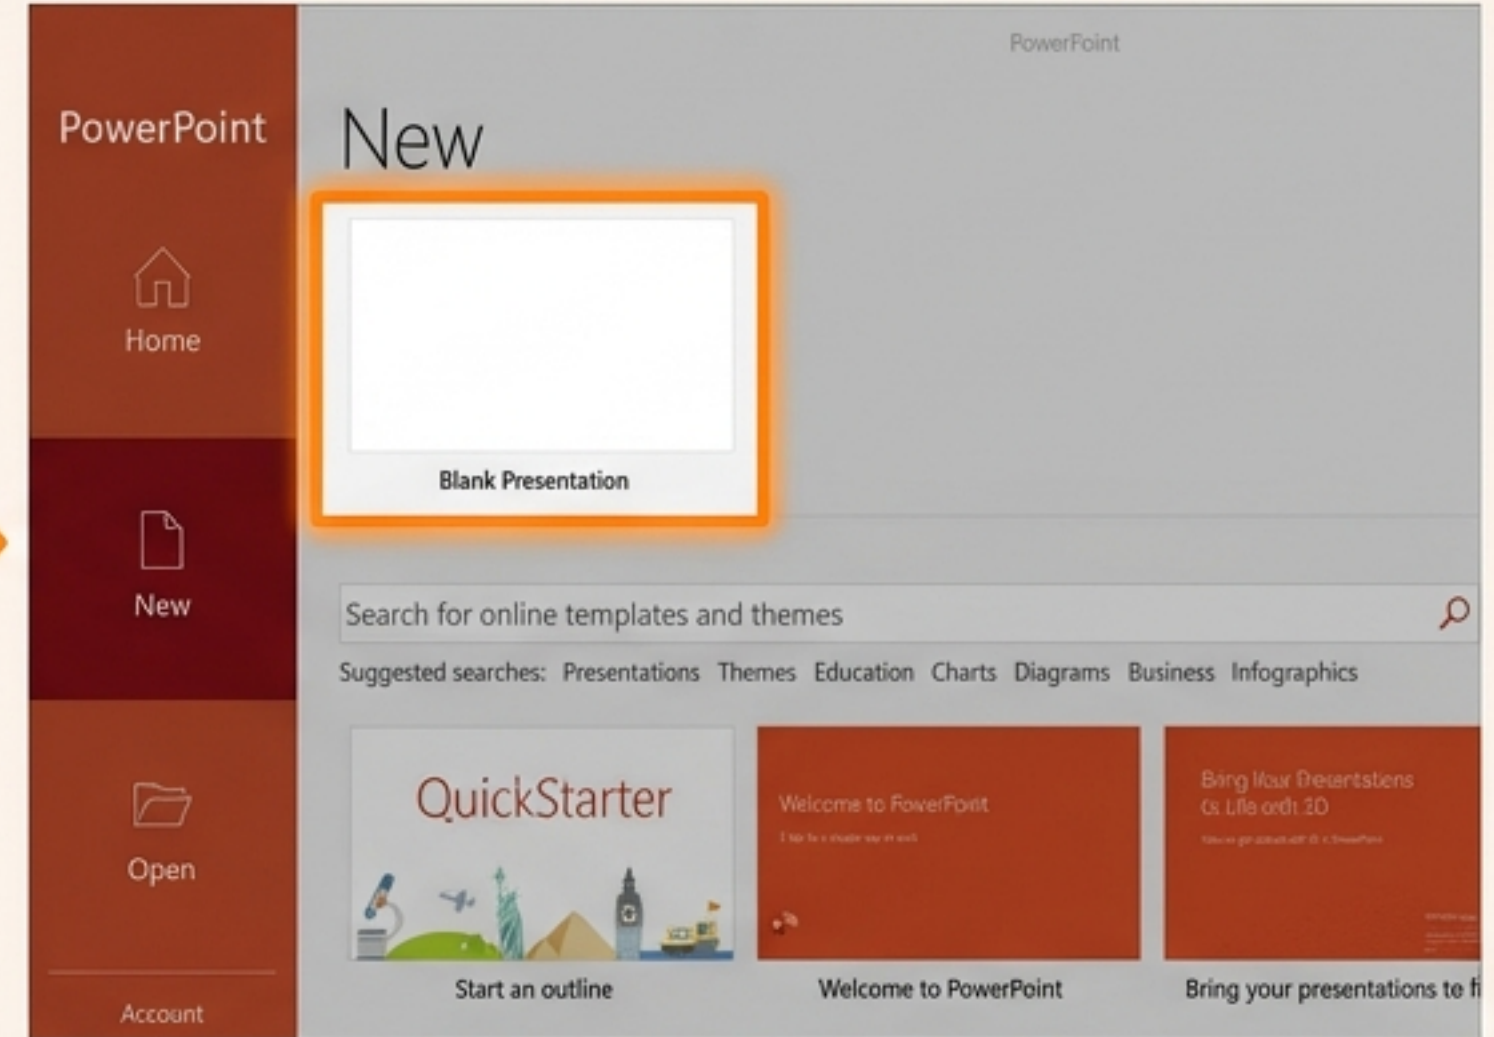

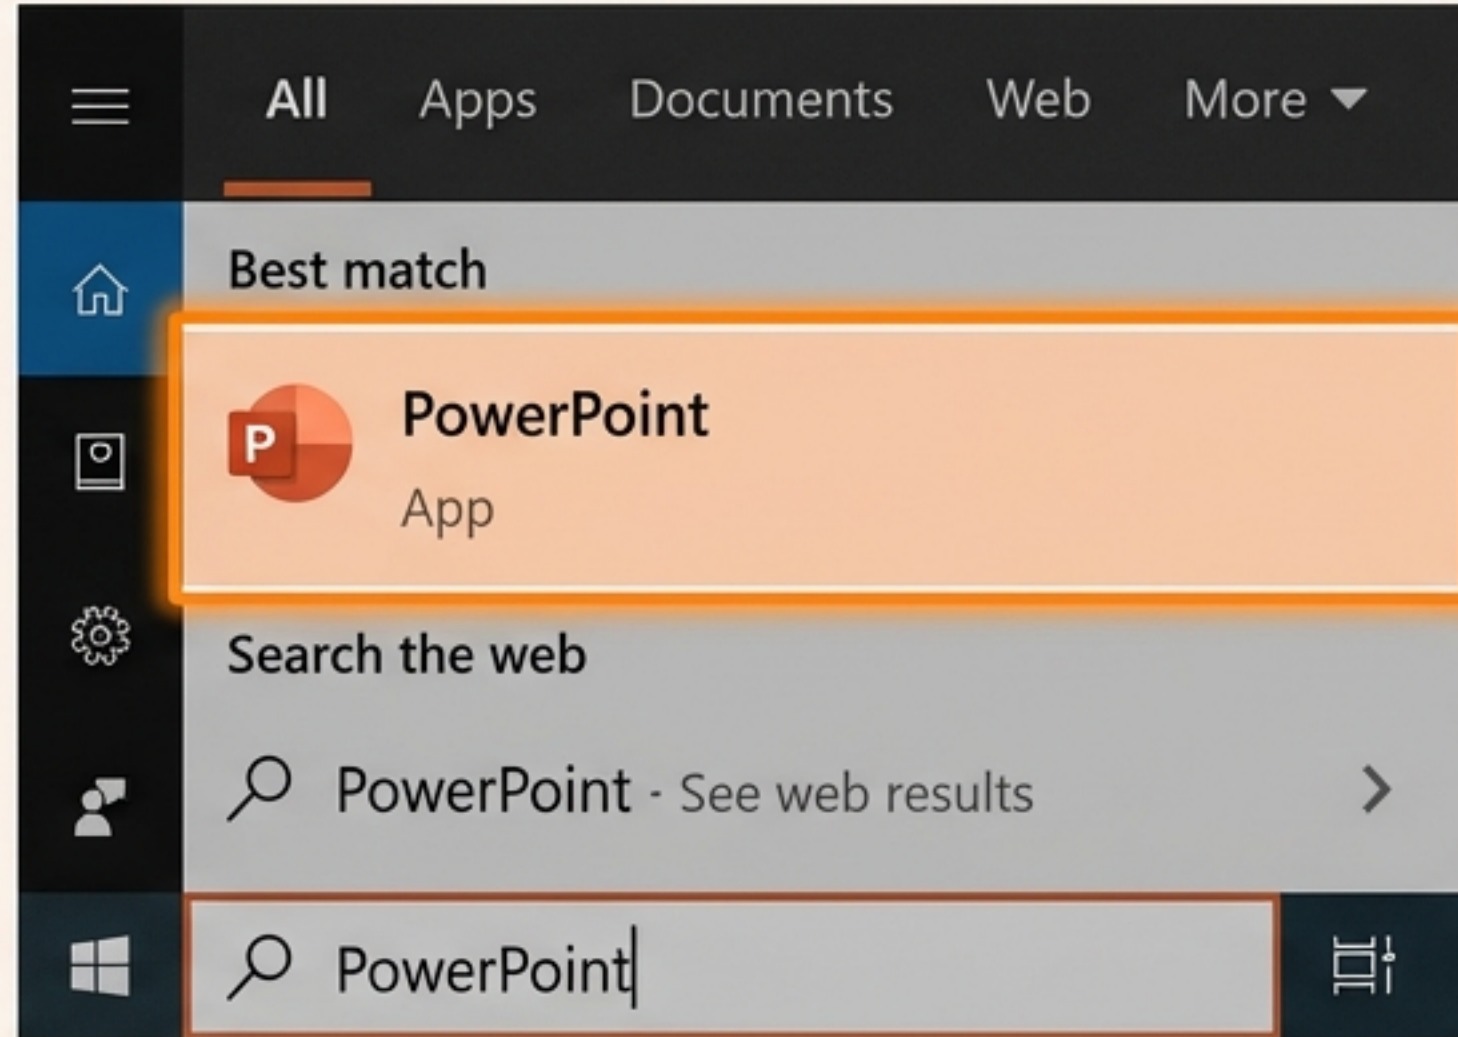

The Mission: Help Keya!

Keya needs to make a presentation for her class on "Water Pollution" based on the story "A River's Tale." Let's help her build it.

Pro Tip: Planning the flow first helps organise information to make the presentation effective.

Step 1: Launching PowerPoint

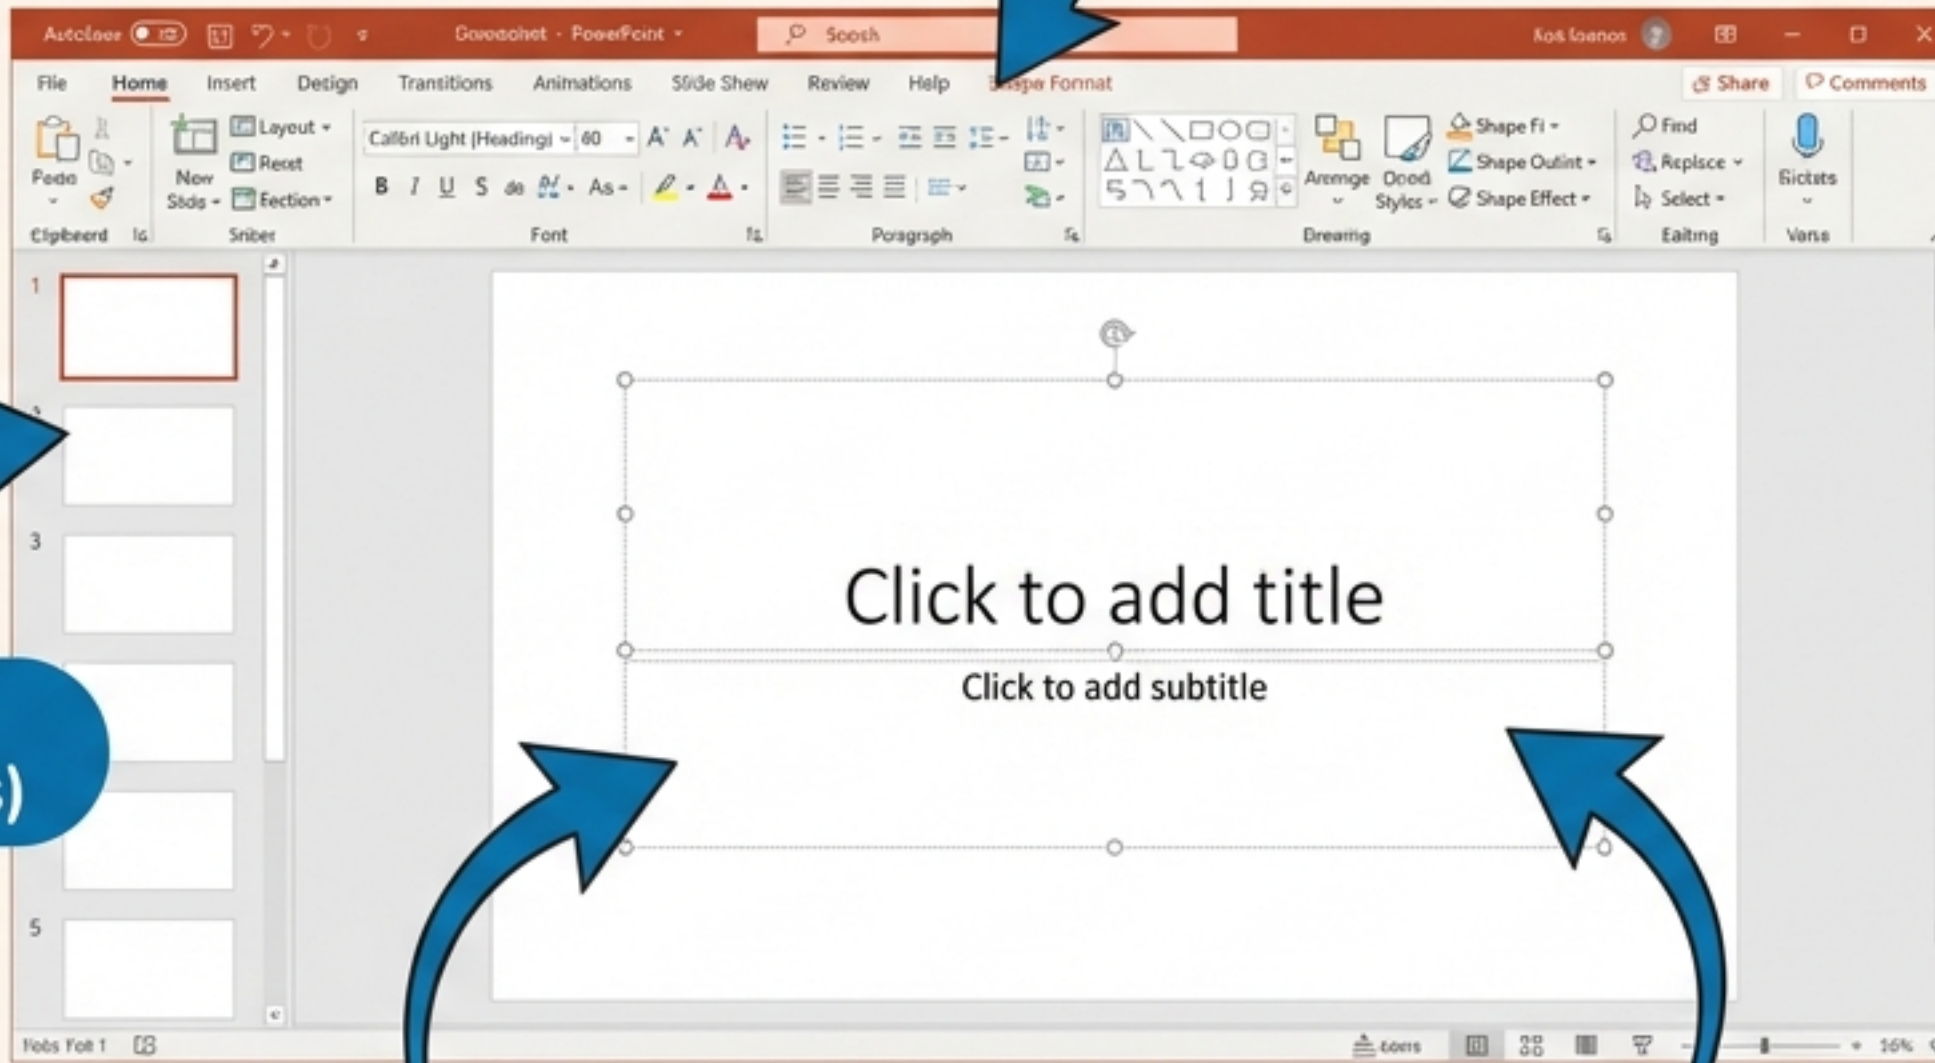

Vocabulary

Why Blank? This lets us customise the presentation the way we want it to look, rather than using a pre-made template.

Tour of the Screen

Ribbon Menu
(Commands)

Slides Tab
(Thumbnails)

Slide Pane
(Your Workspace)

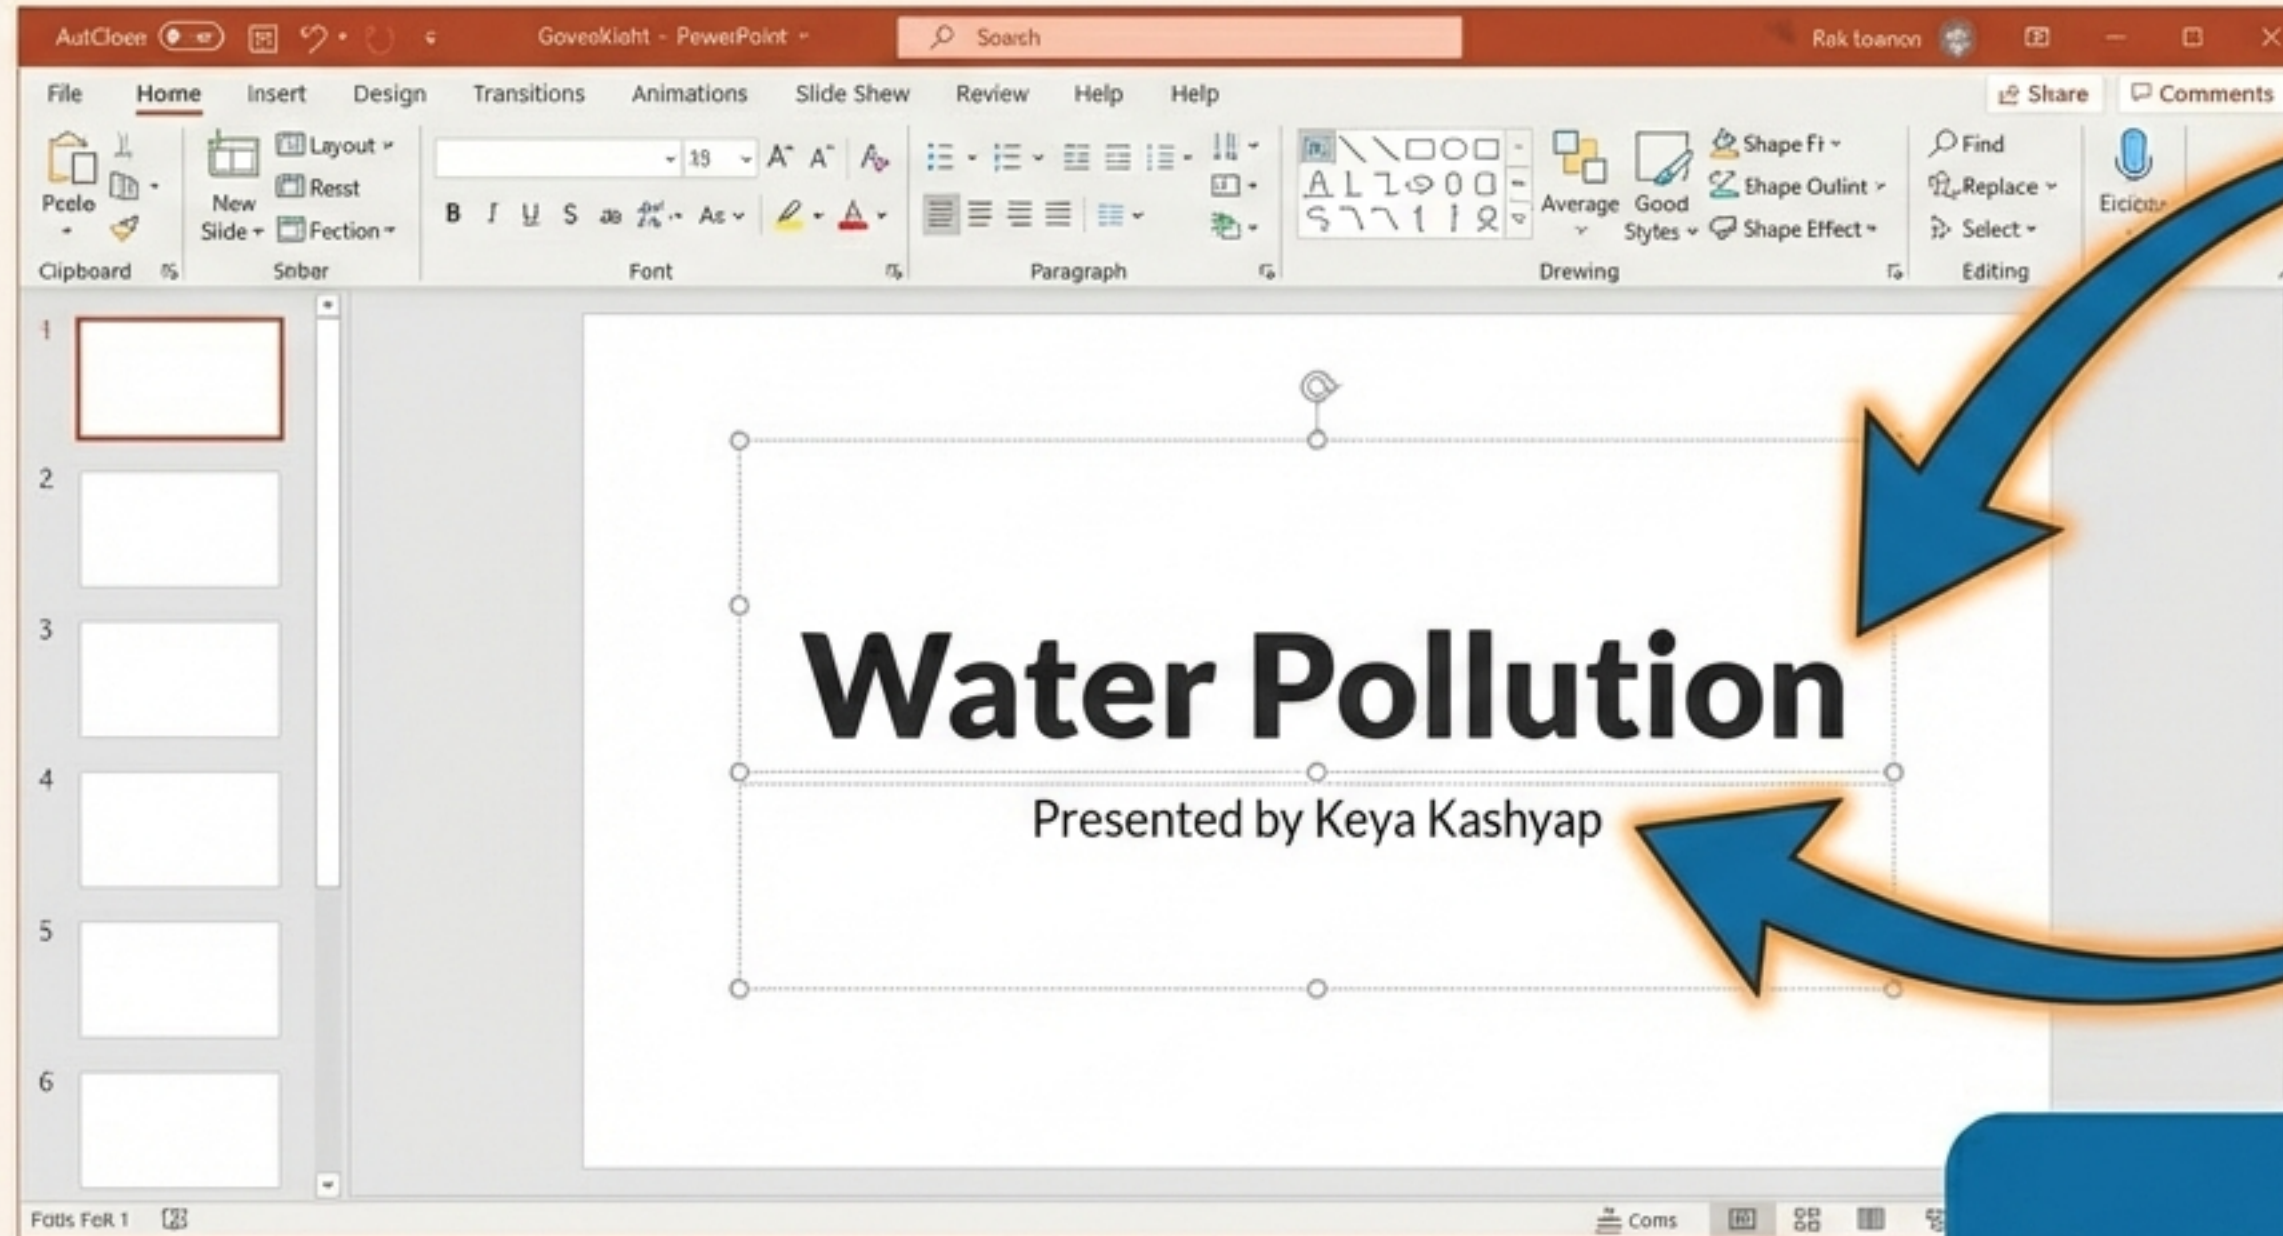

Placeholders

Vocabulary

Slide: A page in a presentation.

Placeholder: The dotted boxes where we add text, images, or videos.

Step 2: The Title Slide

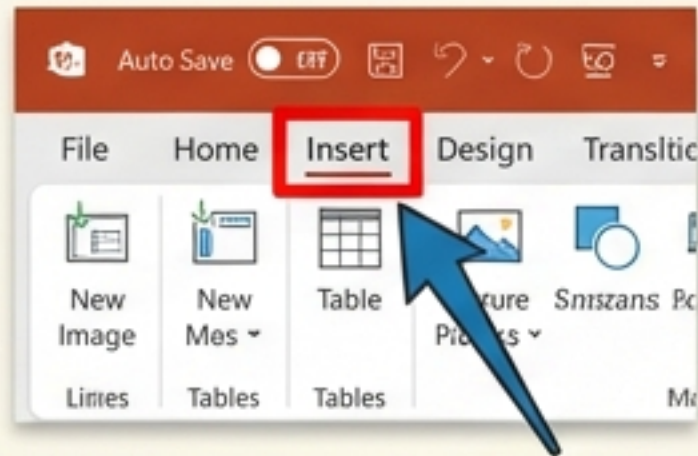

Title:
Big Font Size

Author:
Small Font Size

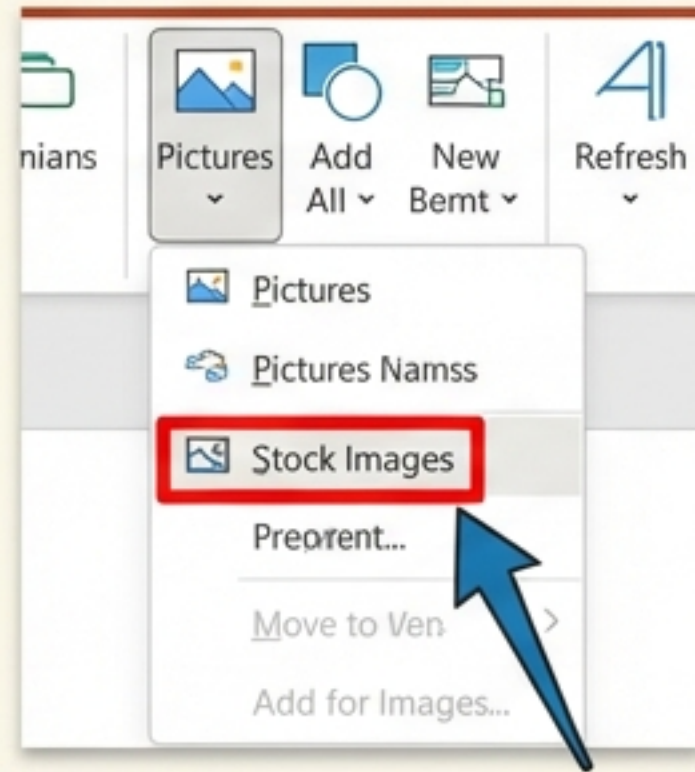

Vocabulary

Hierarchy: Arranging text and elements to show their importance. The most important information, like the title, is the biggest.

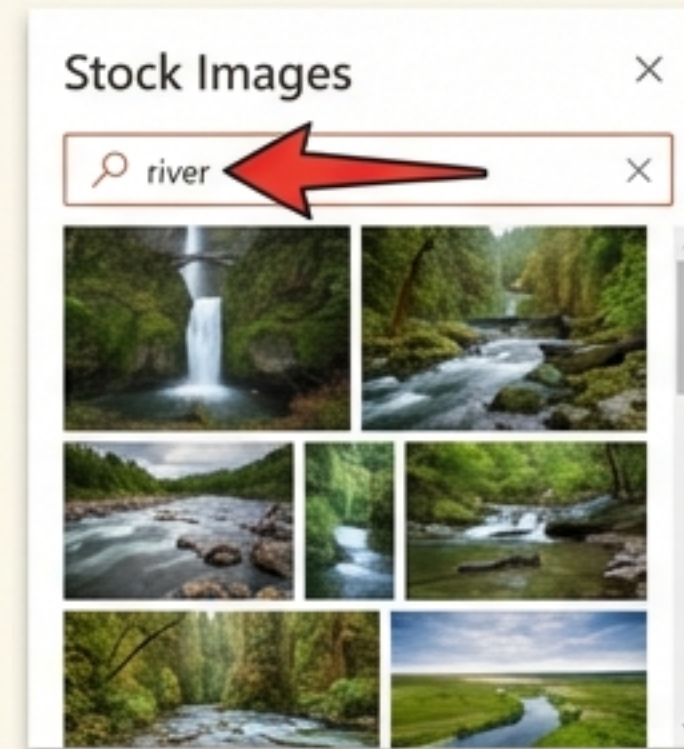

Step 3: Adding Images

1. Click the 'Insert' tab

2. Select 'Pictures' > 'Stock Images'

3. Search for an image, e.g., 'River'

Images make a presentation look better and more effective.

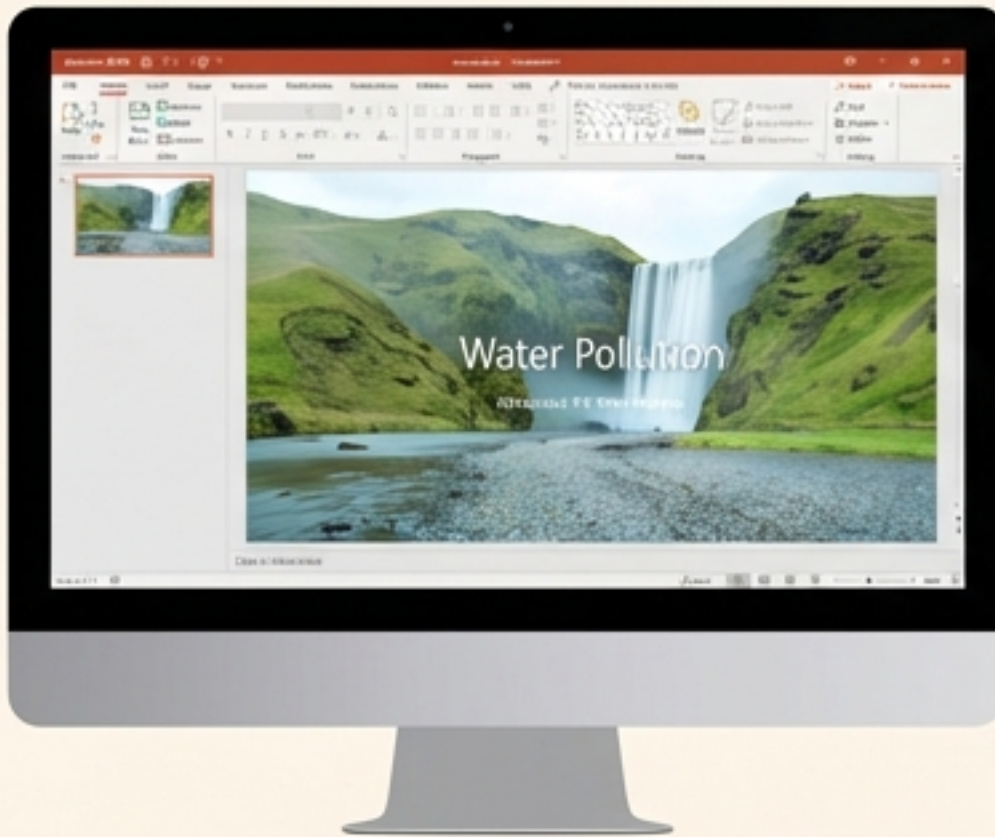

Vocabulary

Hierarchy:

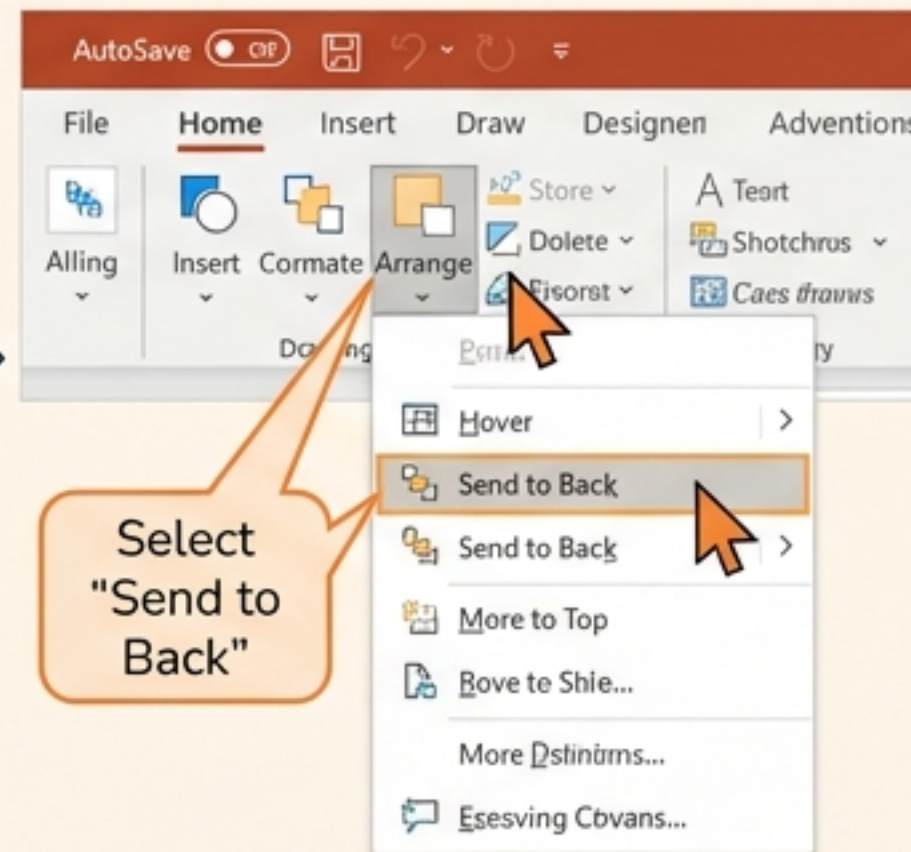

Arranging text and elements to show their importance. The most important information, like the title, is the biggest.

Step 4: Arranging Layers

Problem

Solution

Result

Vocabulary:

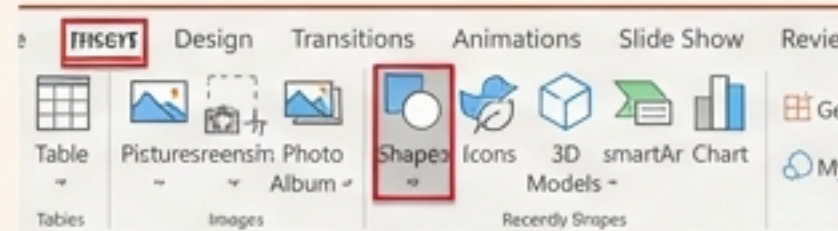

Layering: Managing the order of objects on a slide. You can send items backward or bring them forward to show or hide them.

Step 5: Making Text Readable

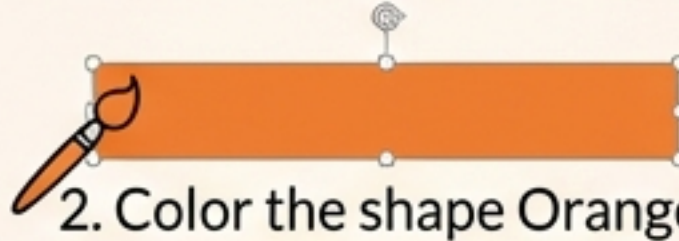

Problem

Solution

1. Insert a rectangular Shape.

2. Color the shape Orange.

3. Place the orange box behind the text but in front of the picture.

Result

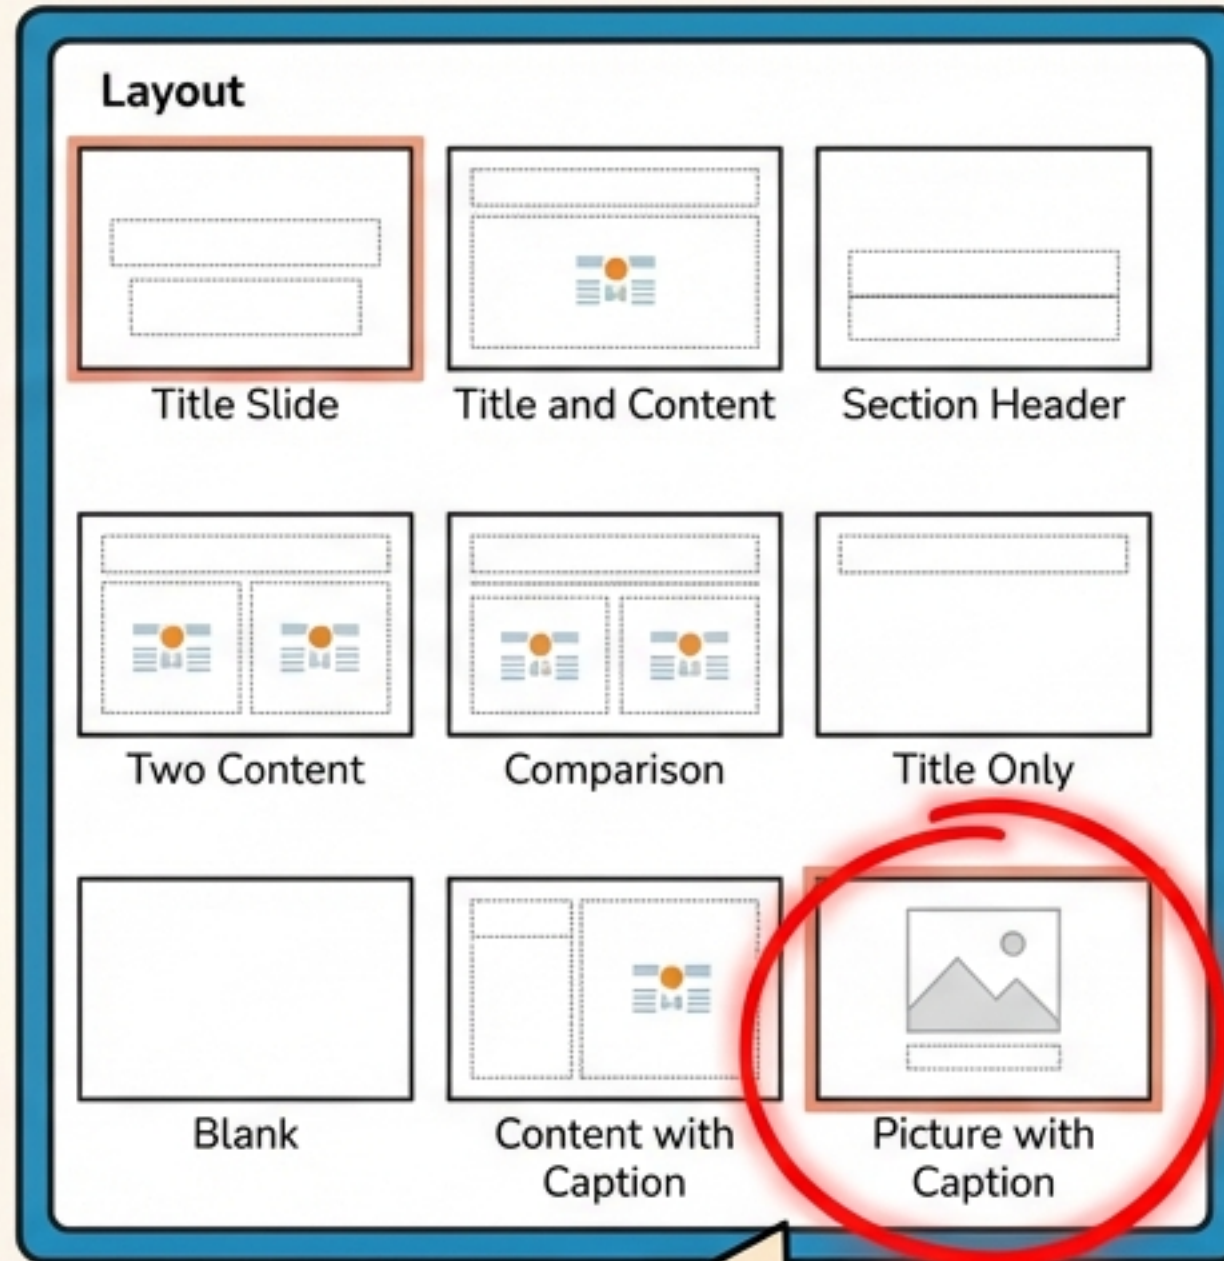

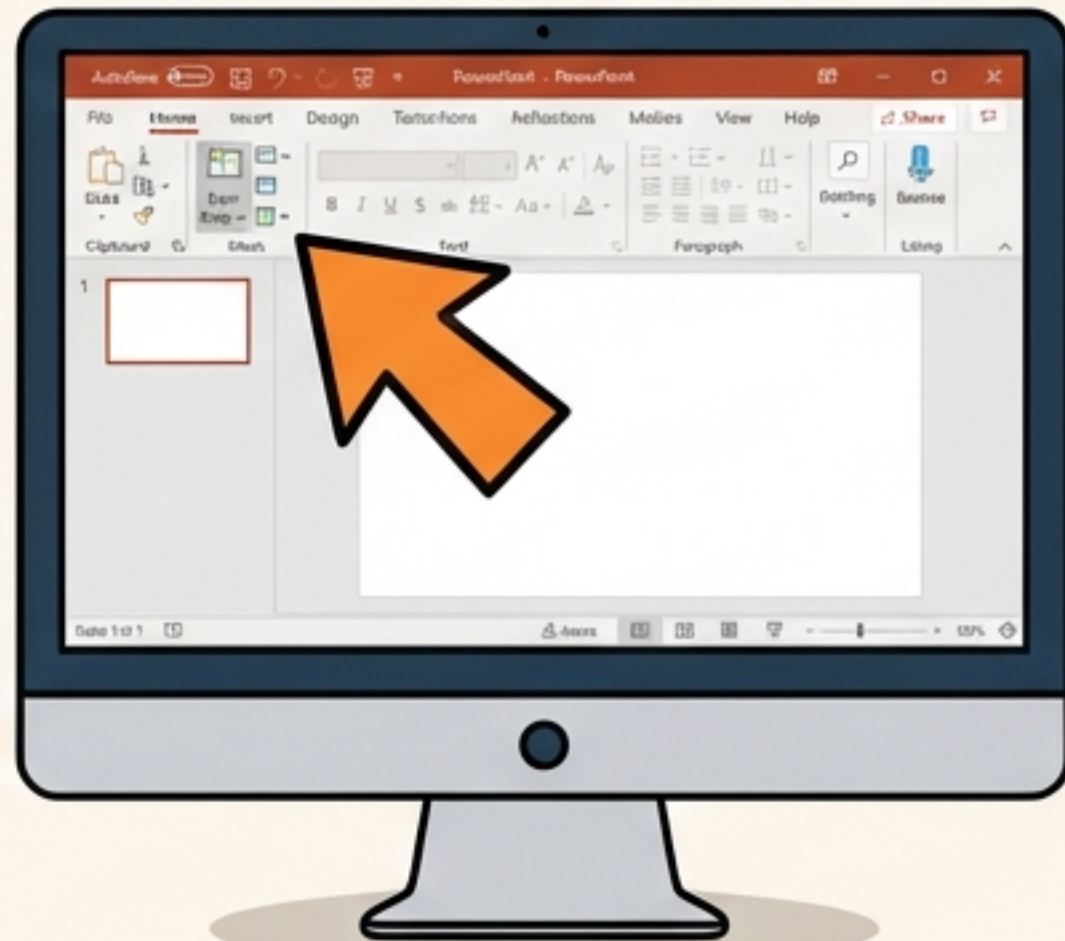

Design Tip:

Add a shape behind text to make it pop! Use contrasting colours.

Step 6: Adding New Slides & Layouts

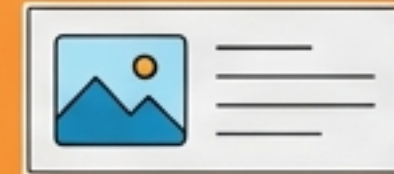

Click “New Slide”!

Choose a layout!

“

Layout: The arrangement of placeholders on a slide. For our “Facts about Water” slide, we need space for both a picture and a caption.

”

Working with Content

Water

- Water is one of the prized Natural resources
- 97% of earth is made up of water but only 0.01% of water is fresh water
- Fresh water is an important natural resource necessary for the survival of all ecosystems.

Use short sentences and bullet points.

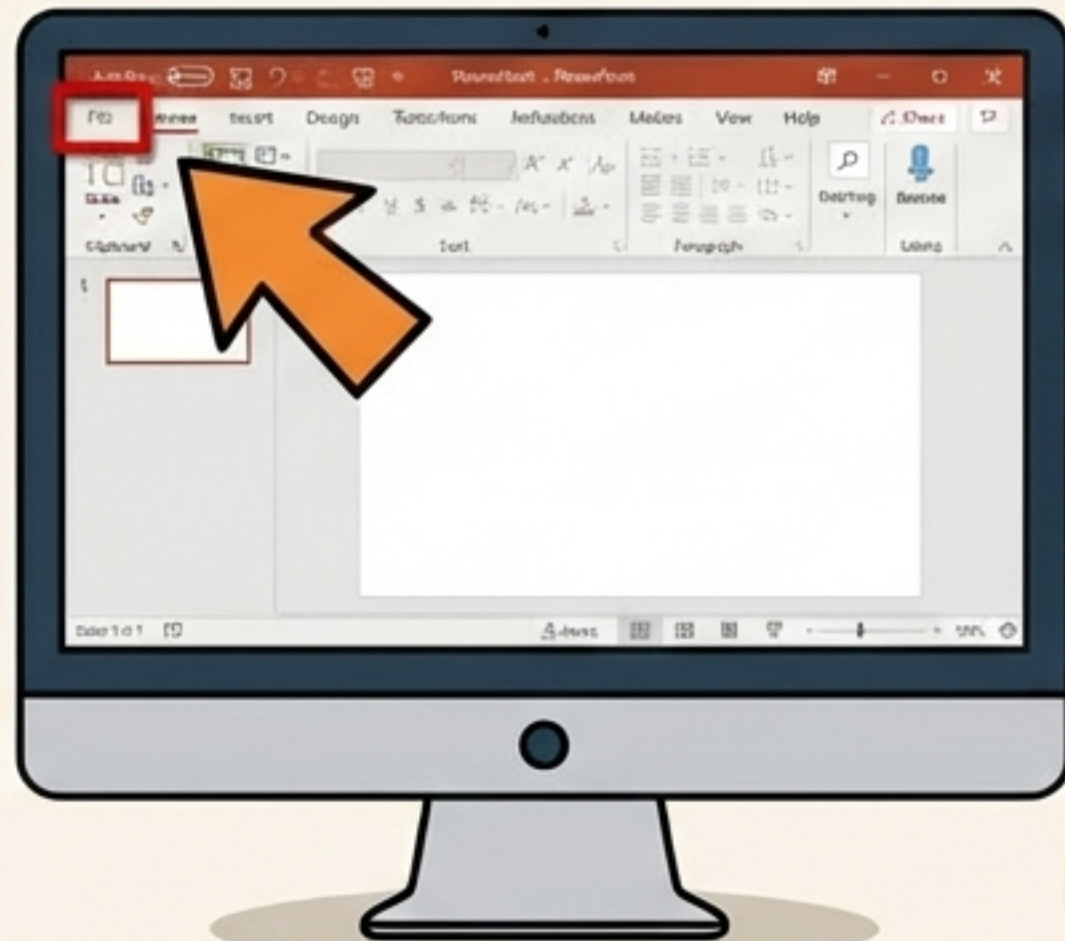

Avoid long paragraphs.

“
Pro Tip: Hold Shift +
Drag the corner handle
to resize images evenly!
”

Step 7: Saving Your Work

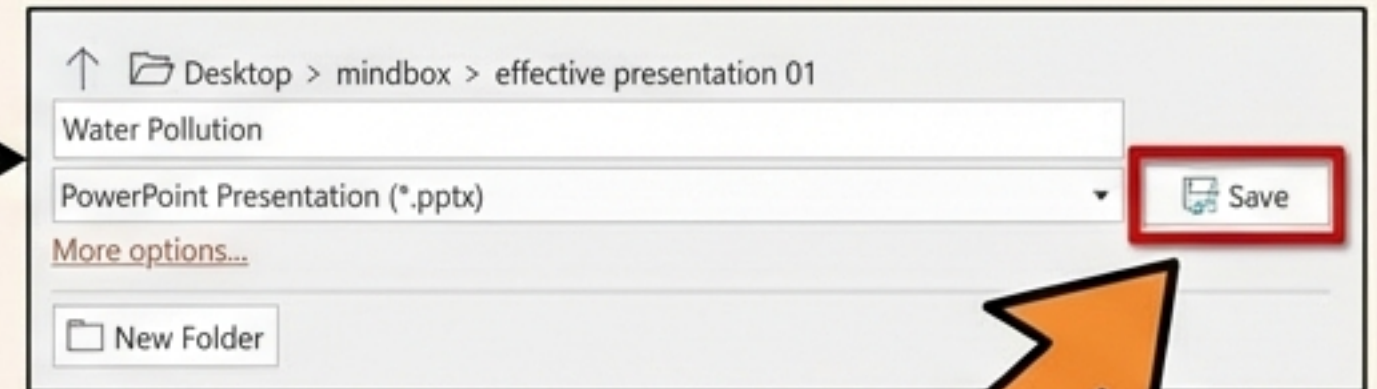

1. Click "File"
in Lato

2. Select "Save As"
in Lato 3

3. Click "Save"
in Nunlito

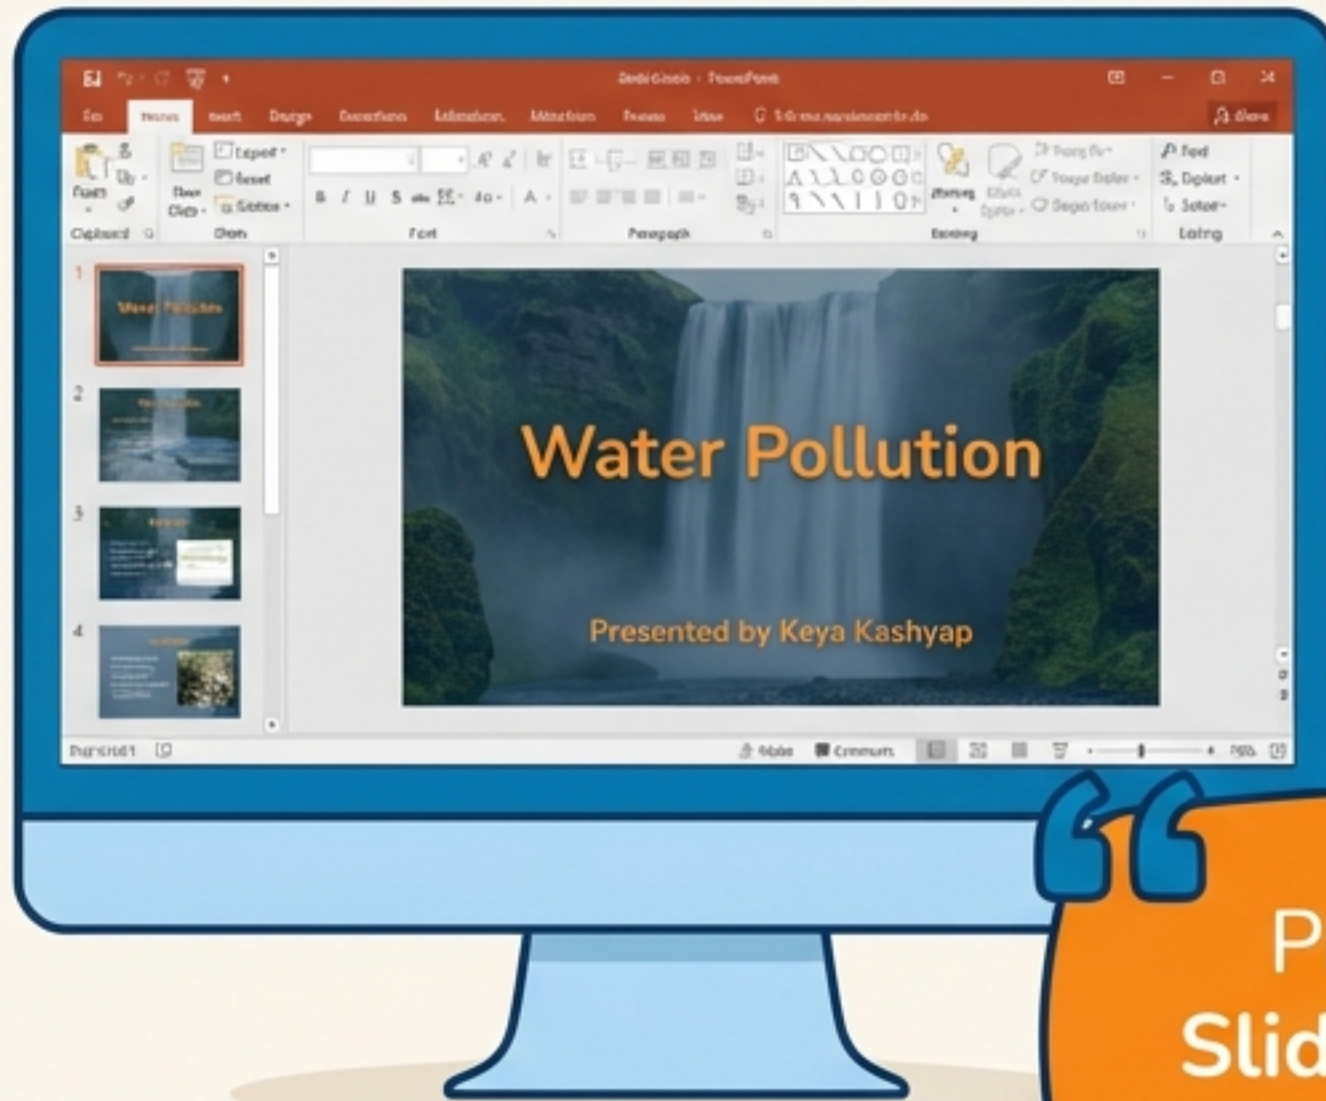

“PowerPoint files are saved
with the extension **.pptx**”

Step 8: Showtime! (Slide Show)

Normal View

SlideShow View

Press F5 or click the
Slide Show icon to start.
Use Arrow Keys to move.

Tech Flash: Vocabulary Recap

TECH FLASH: VOCABULARY RECAP

Presentation

A systematic display of information.

Slide

A single page in a presentation.

Placeholder

A dotted box that holds content.

Layout

The arrangement of placeholders.

Slide Show

Displaying the series of slides in full screen.

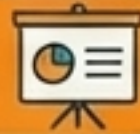

Class Quiz

Question 1

What is a page in the presentation called?

☐ Title

☒ Slide

Question 2

Where do we find Pictures?

☐ Home

☒ Insert

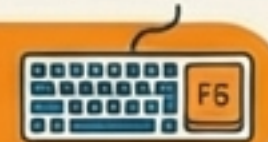

Question 3

Which key starts a Slide Show?

☐ F1

☒ F5

Great job! Now you are ready to make your own projects.
