

1. 3D Architecture

- 1 Inset
- 2 Extrude
- 3 Viewpoint
- 4 Bevel
- 5 Wireframe
- 6 a
- 7 a
- 8 Proportional Editing is a technique that enables the manipulation of chosen elements while also affecting adjacent elements.
- 9 A Boolean modifier is a powerful tool that enables us to execute Boolean operations in our 3D geometry.

2. 3D Animation

- 1 Keyframes
- 2 clock
- 3 transport control
- 4 frame rate

3. Social Networks

- 1 b
- 2 a
- 3 d
- 4 b
- 5 a

4. Functional Coding in Web

- 1 var
- 2 function
- 3 alert()
- 4 getElementById()

5. Dynamic Web Elements

- 1 auto
- 2 strong
- 3 alt
- 4 array
- 5 0
- 6 ` `
- 7 innerHTML
- 8 overflow

6. Code to Animate

- 1 d
- 2 c
- 3 d
- 4 True
- 5 False
- 6 True
- 7

```
if(loc_x > width)
  loc_x =0;
```
- 8

```
if(loc_x <0 )
  loc_x =width;
```
- 9

```
if(loc_y <0 )
  loc_y =height;
```

7. Algorithms

- 1 b
- 2 d
- 3 c
- 4 False
- 5 True
- 6 True
- 7 The command to display time elapsed in milliseconds after the code executes is `millis()`.
- 8 The difference between `currentTime` and `previousTime` variables be greater than or equal to 1000
- 9 `text(text value, x position, y position);`

8. Bubble Sort

- 1 There are five elements in the array.
- 2 Value of `myFruits[3]` is orange
- 3 mango is at 0th index hence that can be accessed using `myFruits[0]`.
- 4 True
- 5 True
- 6 The value of 'i' is increasing by 2 hence the loop will repeat 5 times
- 7 After each iteration value of 'i' will be 0, 2, 4, 6, 8.
- 8 d
- 9 b
- 10 b

9. Modular Programming

- 1 a
- 2 d
- 3 True
- 4 False
- 5 True
- 6 False
- 7 Program control flow is the order in which code lines are executed when a program runs.
- 8 a-b-c-e-d
- 9 The code has no error, and the output is 14

10. Game Design Process

- 1 Design, Develop, Build and Test
- 2 Flowchart
- 3 Game Design Document (GDD)
- 4 Game engine
- 5 Three-dimensional (3D) and Two-dimensional (2D)

11. Movement in 3D Environment

- 1 Toolbar
- 2 Hierarchy window
- 3 Game View
- 4 Components
- 5 Transform
- 6 Behavioural/ Behavioral

12. Animate Game Objects

- 1 Unity system allows you to create, configure, and store a GameObject complete with all its components, property values, and child GameObjects as a reusable Asset. Such reusable assets are termed Prefabs.
- 2 Unity uses the concept of parent-child hierarchies, or parenting, to group GameObjects. An object can contain other GameObjects that inherit its properties.
- 3 The white line in the Animation Timeline is called the Playhead and it indicates where a keyframe will be added.

13. Data Analysis

- | | |
|---------|---------|
| 1 c | 4 False |
| 2 d | 5 True |
| 3 False | |

14. Control Flow

- | | |
|---------|------------------|
| 1 True | 4 == (equals to) |
| 2 False | 5 True |
| 3 True | 6 iteration |

15. Data Management

- | | |
|---|---------|
| 1 c | 4 True |
| 2 d | 5 False |
| 3 False | |
| 6 The syntax for sorting list in ascending order is <code>My_List_Name.sort()</code> | |
| 7 Opens a file for appending at the end of the file. Creates a new file if it does not exist. | |

16. Introduction to AI

- | | |
|--------------------|-----------------------------|
| 1 Machine Learning | 3 Machine Learning for Kids |
| 2 AI engine | |
