

- Every cell has a unique name called a 'cell reference'. It is made up of its column heading and row number.

Example: The first cell in a spreadsheet is A1, since the column heading is 'A' and the row number is '1'

A1	:	X	✓	<i>fx</i>	
	A	B	C	D	
1					
2					
3					
4					
5					
6
