

# Answer Key

## Lesson: 1

- 1 local server      2 bundler      3 package.json
- 4 npm                5 vite                6 Field of View
- 7 False               8 False               9 True
- 10 False              11 True

## Lesson: 3

- 1 App.js      2 Public      3 Export      4 True
- 5 True      6 False
- 7 Components are the core building blocks of React applications that facilitate the development of user interfaces.
- 8 JSX stands for JavaScript XML, and it allows writing HTML within JavaScript easily and conveniently.

## Lesson: 5

- 1 Foreign Keys      2 Joins      3 Inner Join
- 4 a. REFERENCES      5 False      6 True

## Lesson: 2

- 1 True      2 True      3 False      4 True      5 y-axis
- 6  $2 * \text{Math.PI}$       7 OrbitControls      8 Tween
- 9 The AxesHelper is useful for visually representing the orientation of the 3D world thus ensuring proper object positioning and alignment within the scene.
- 10 To create an animation using the tween library, first specify the object and target value, then define the transition duration, and finally start the animation.

## Lesson: 4

- 1 False      2 True      3 LineChart or <LineChart>
- 4 CartesianGrid or <CartesianGrid />      5 Stroke
- 6 A Charting Library is a library that allow developers to create charts and graphs in their applications.

## Lesson: 6

- 1 True      2 False      3 `createVector()`
- 4 Direction      5 `add()`
- 6 The garbage collector automatically clears objects and variables without references from memory, freeing up space for new data.
- 7 The ``splice()'` method is used to modify an array by removing or replacing elements.

## Lesson: 7

- 1 True      2 True      3 False      4 a. `noise()`
- 5 b. `map()`      6 c. `push()`
- 7 Perlin noise helps to smooth particle movements, making effects like flames appear more realistic by creating natural variations and flow.
- 8 Simulations are digital models that replicate real-world systems and processes, enabling analysis and insight into their behavior under various conditions.

## Lesson: 8

- 1 patterns, decisions
- 2 artificial intelligence, recommendations
- 3 Data, building      4 True      5 False      6 True

## Lesson: 9

- 1 nodes, neurons      2 input, output
- 3 TensorFlow      4 True      5 False      6 True
