

Make Your Screen Awesome!

A Guide for Young Designers

Do you want your computer to look cool instead of plain? Let's learn how to change it!

Your Screen is Your Canvas

You can put *any* picture on your background. It could be your own drawing, a photo of a pet, or a cool place.

Step 1: The Magic Click

Find an empty spot on the blue screen.
Click the **Right Button** on your mouse.

Warning!

Make sure you
don't click on
any icons!

Step 2: The Secret Menu

**A menu pops up!
Look for the
paintbrush icon
that says
Personalize.**

- View >
- Sort by >
- Refresh

- Paste
- Paste shortcut
- Undo Move Ctrl+Z

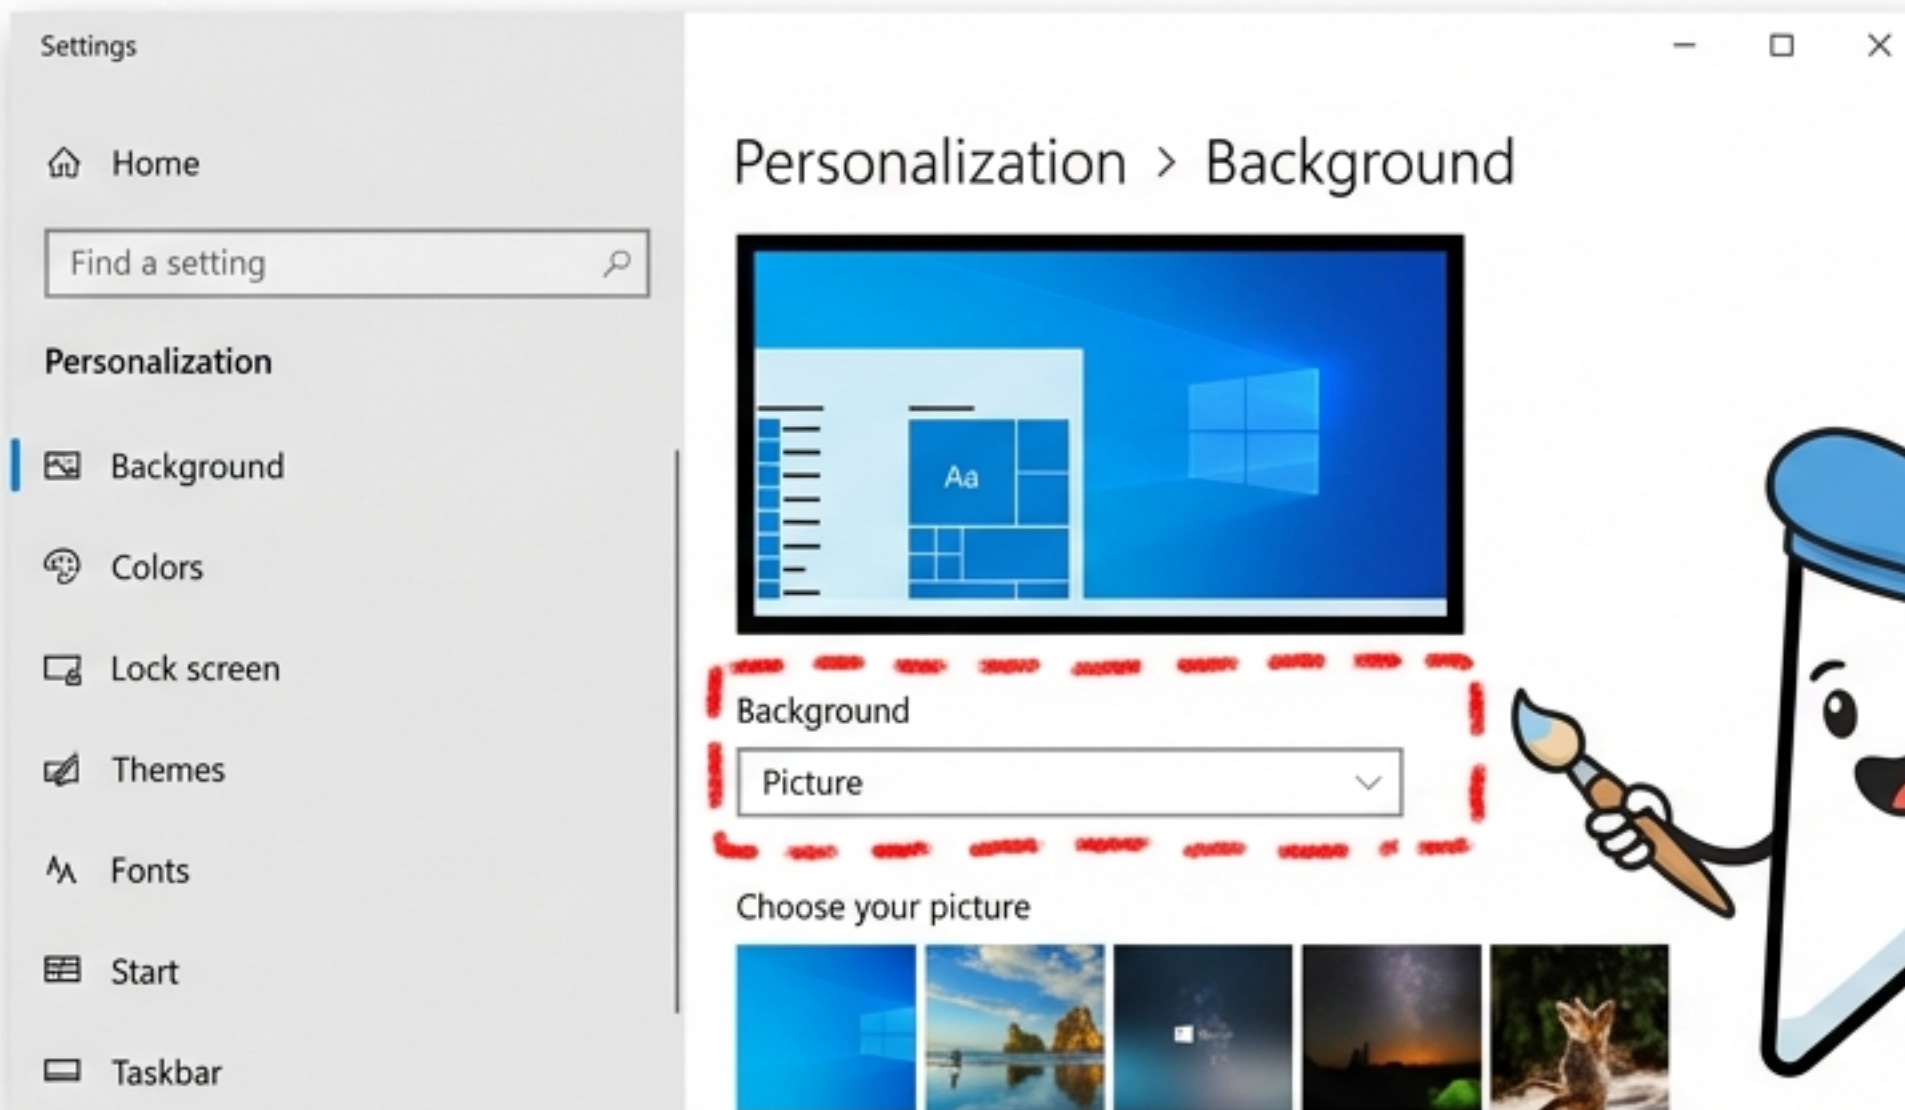

- New >

- Display settings
- Personalize**

**Personalize
is a big word
that means:
“Make it
Yours!”**

Step 3: The Design Studio

**Now we are inside the computer's settings.
Look for the box that says **Background**.**

- ✓ **Make sure the box says "Picture" inside it.**

Step 4: Pick a Picture!

**The computer has some cool pictures ready for you.
Click on one of the squares to test it out.**

Choose your picture

Browse

Step 5: Use Your Own Photo

**Do you have a
specific photo you
want to use?
Click the button that
says **Browse**.**

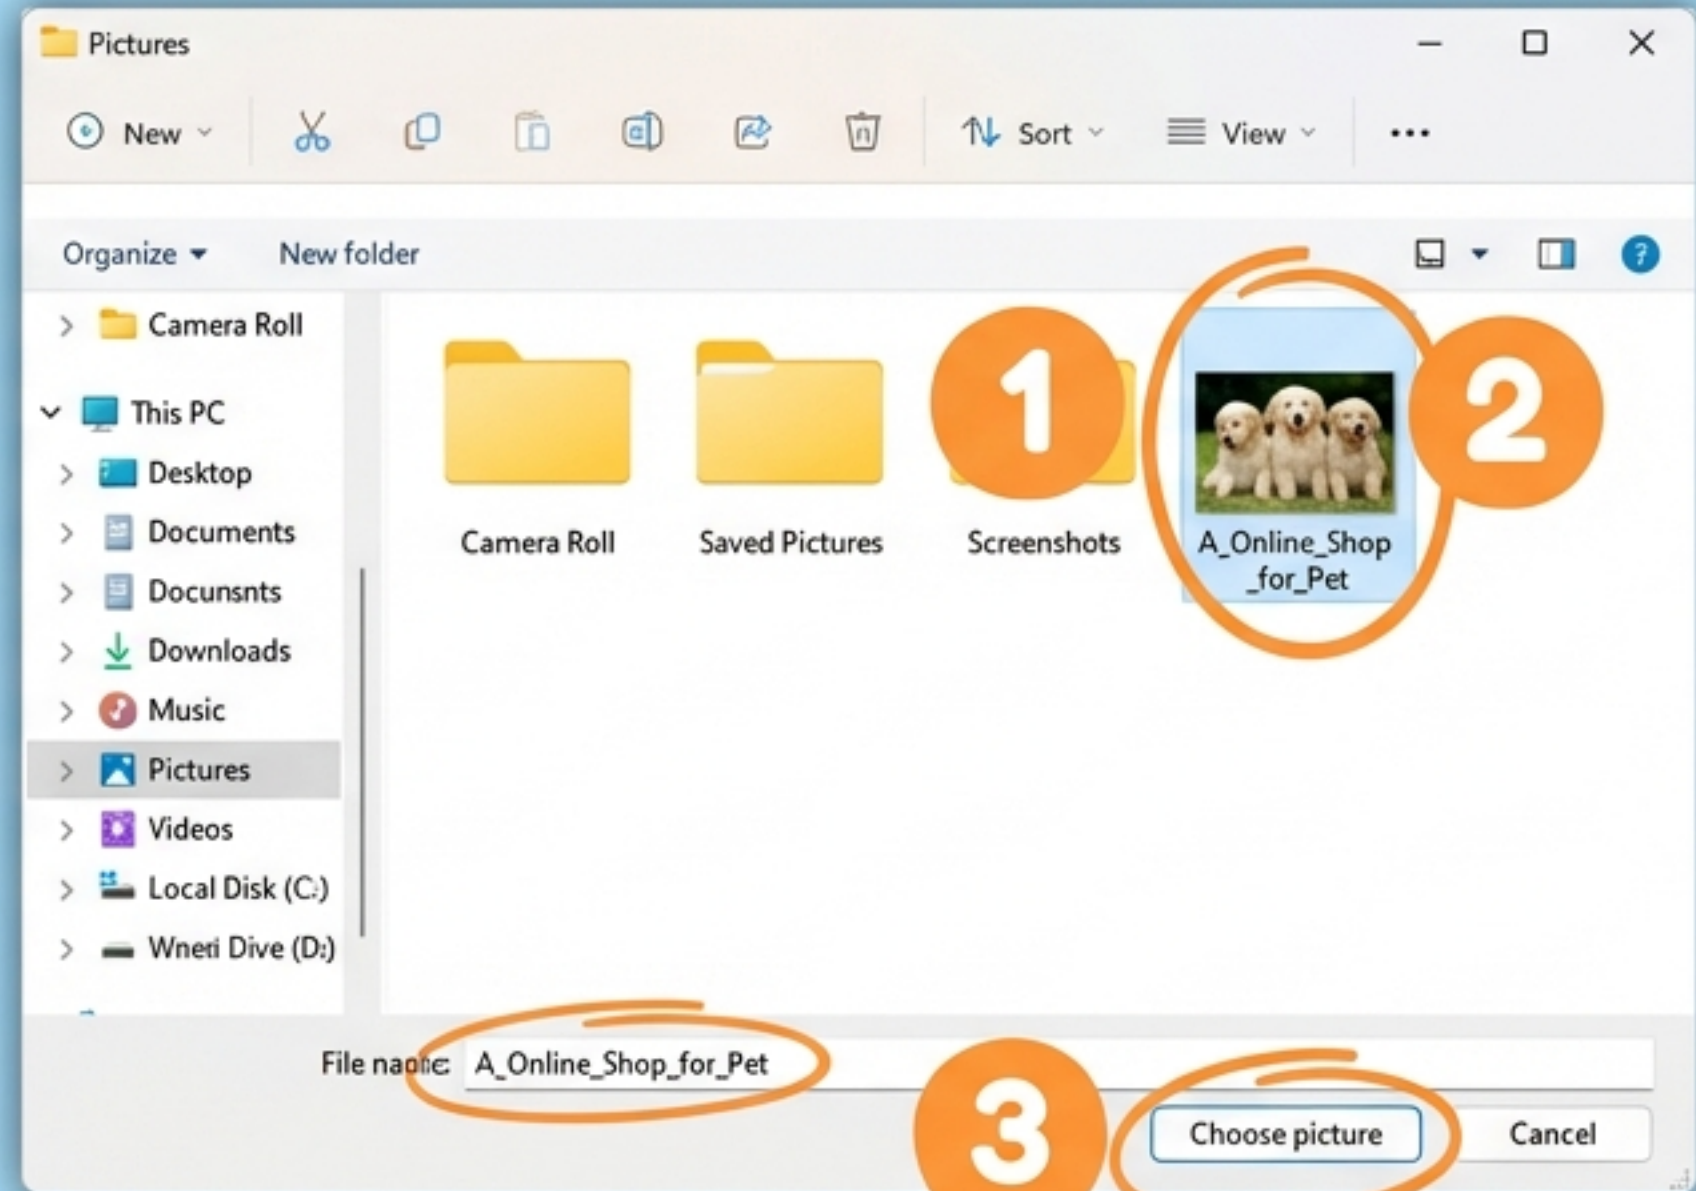

**Browse means:
“Let’s go look
for it!”**

Step 6: Find Your Treasure

1. Find your picture in the folder (Look at those cute puppies!).

2. Click the picture.

3. Click the button that says **Choose picture**.

WOW! Look at that!

Your screen has changed! It looks amazing.

Woah! Your computer screen looks amazing. How did you do that?

You Are Now a Pro!

Let's Remember:

1. Right Click

2. Personalize

3. Pick a Picture

Now go make your computer awesome!
