Grade 4 ICT

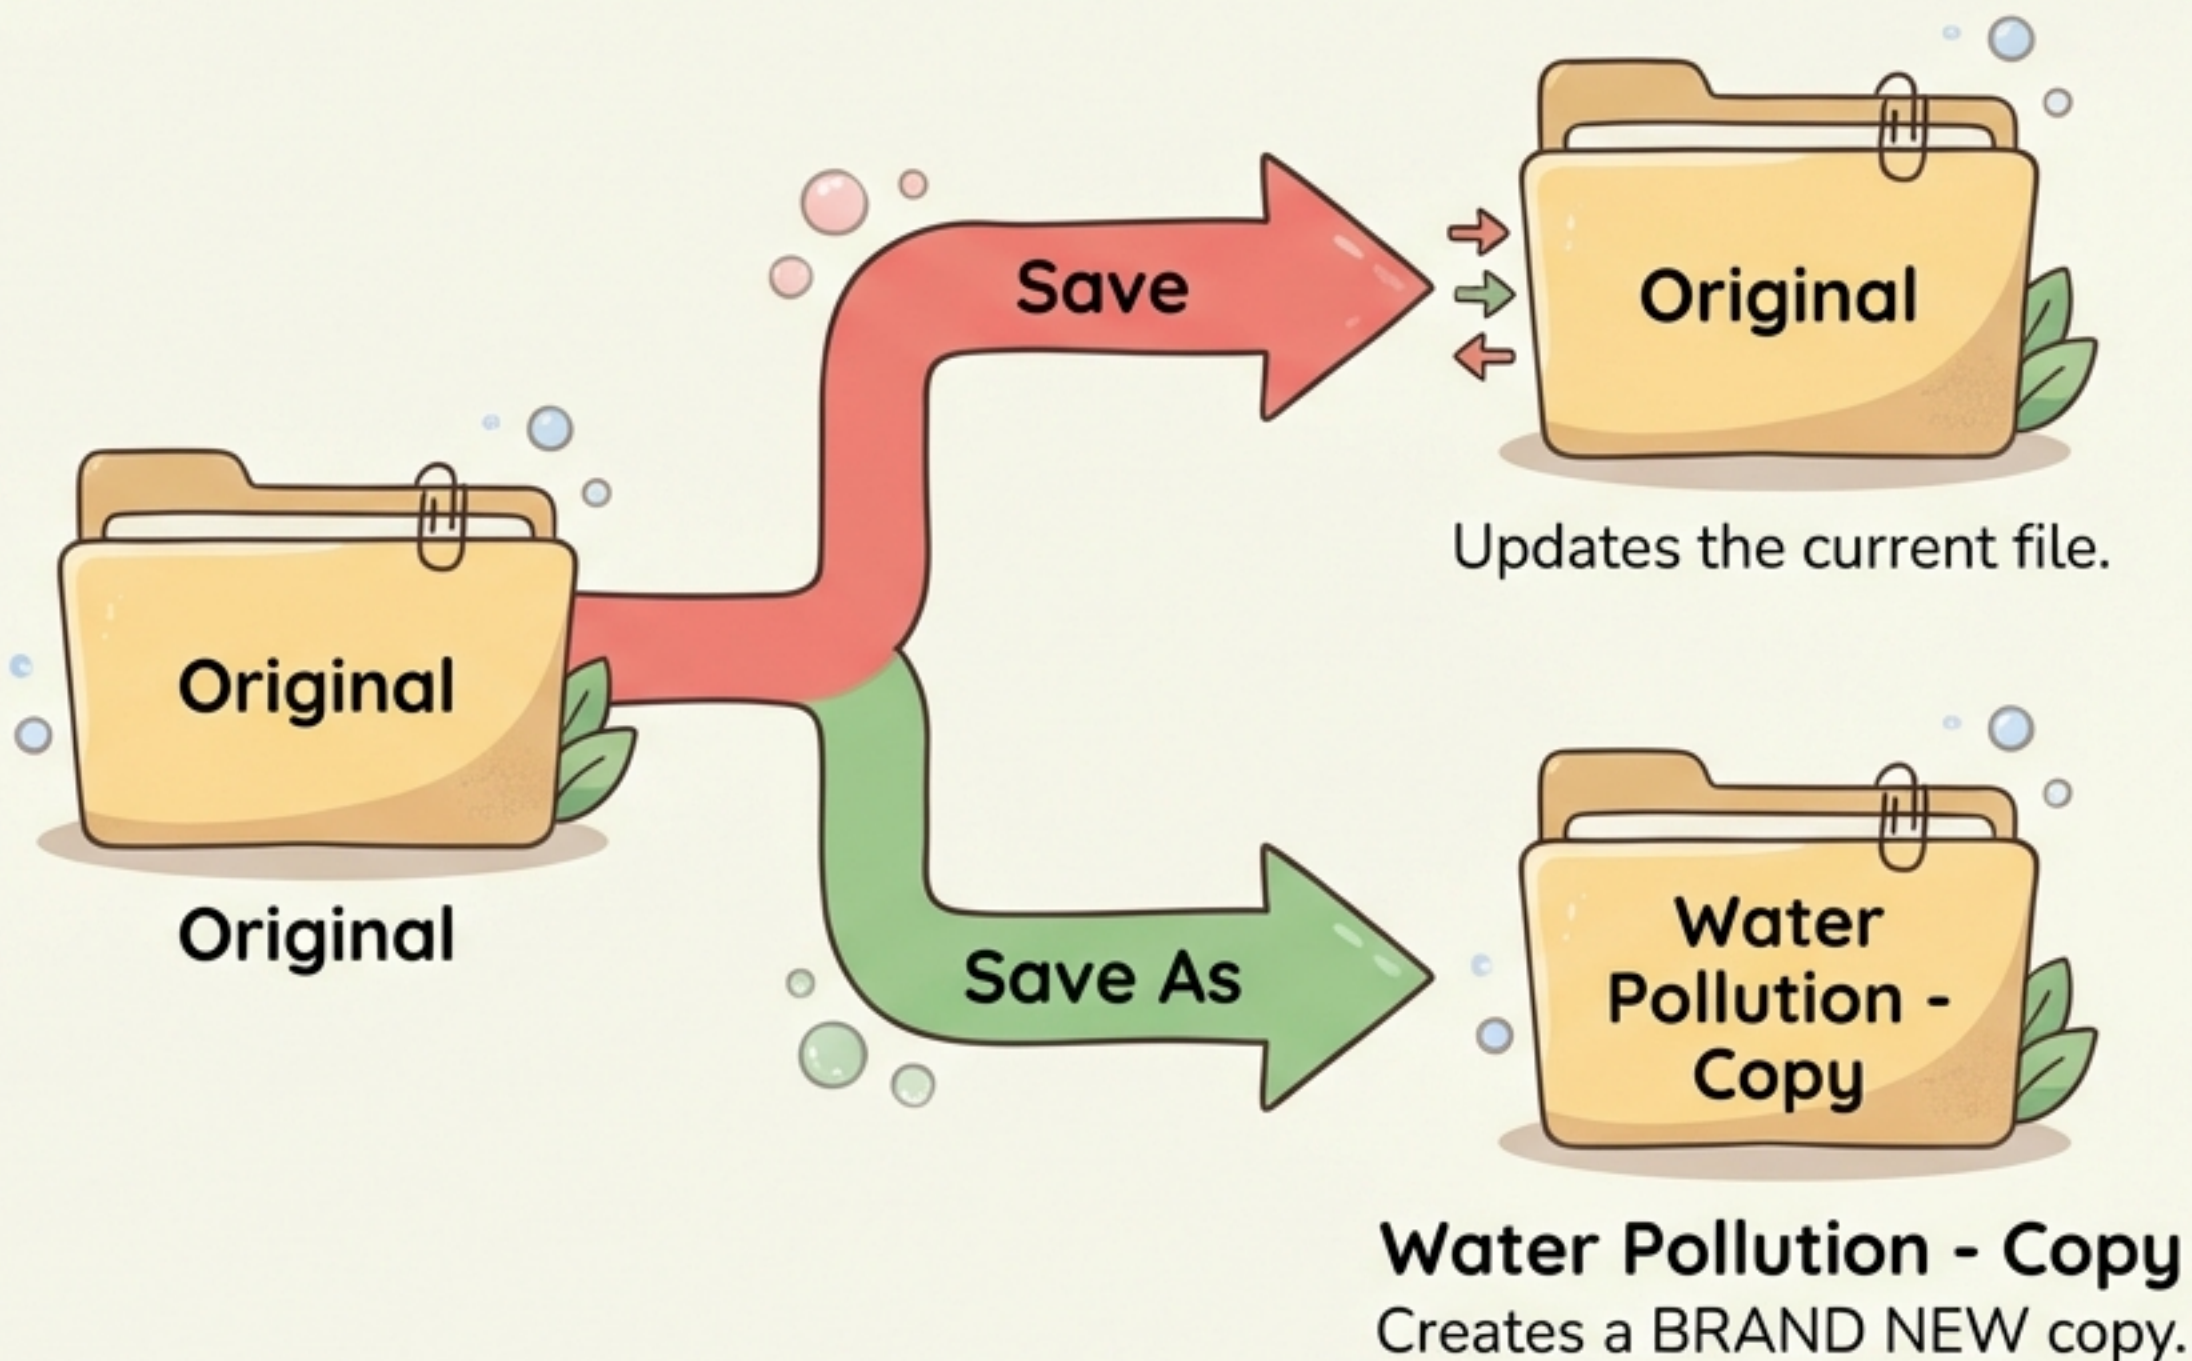

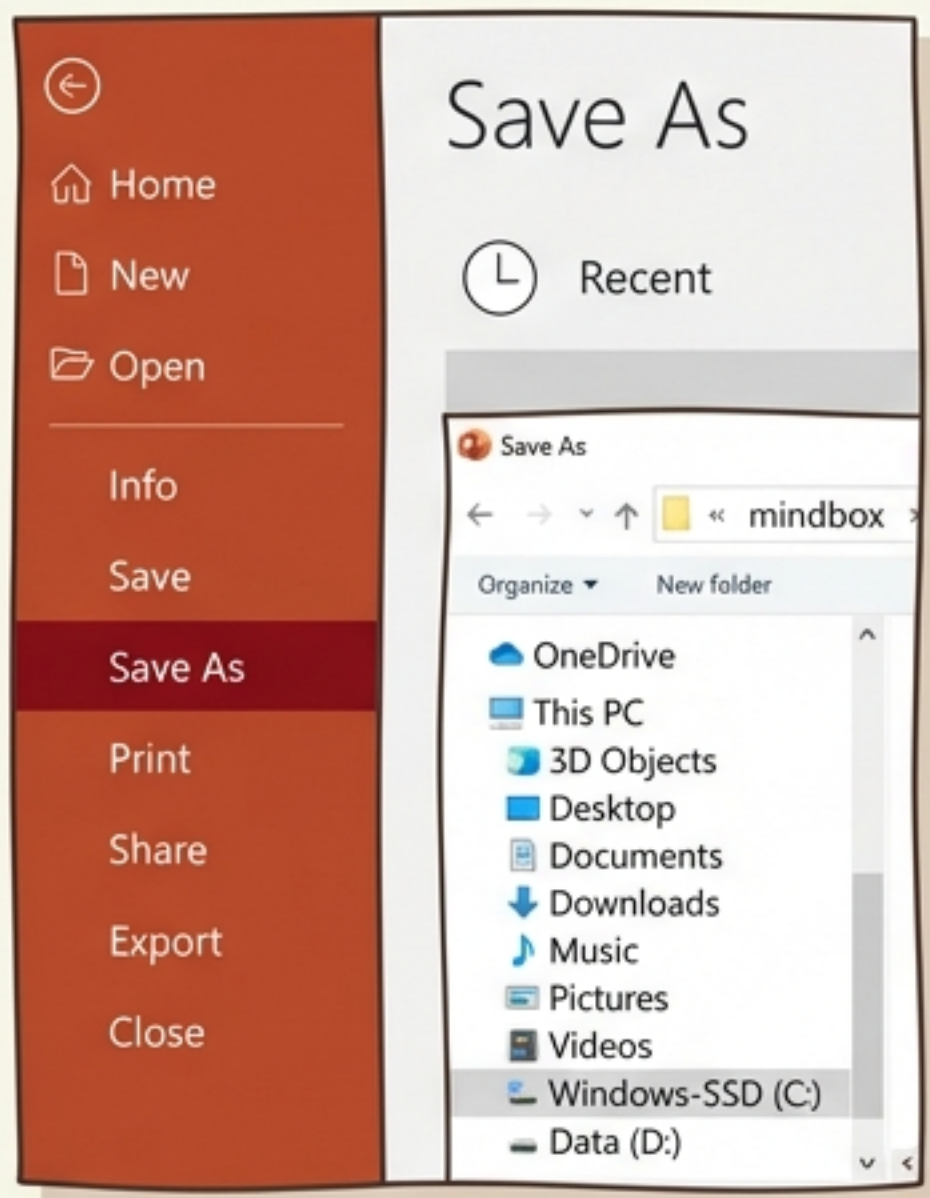

The Mission: Keya's Project

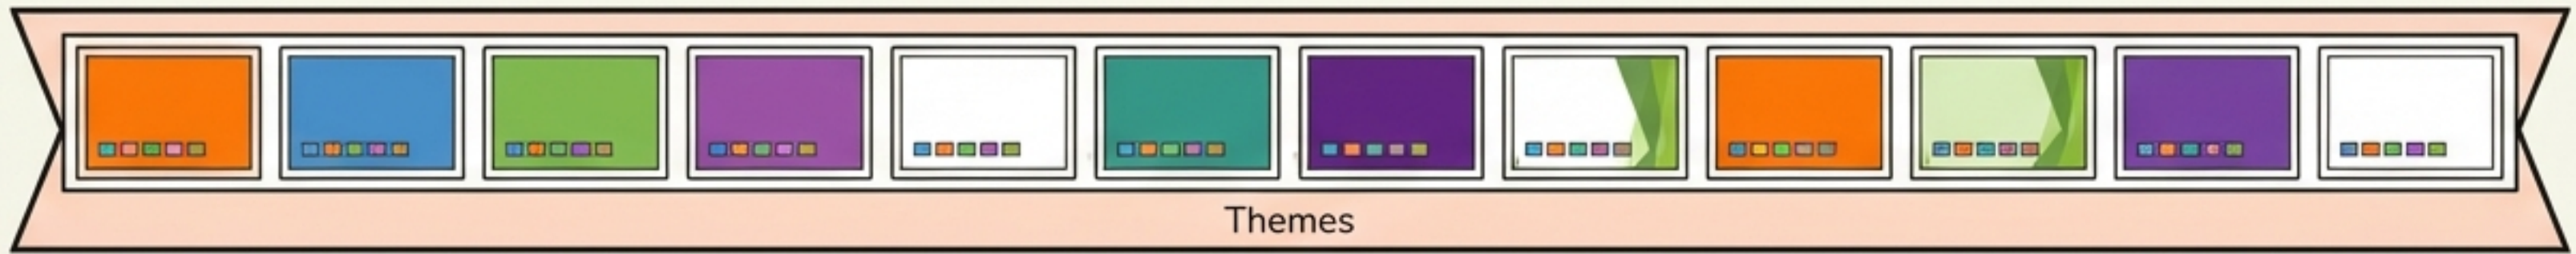

Keya has created a presentation on Water Pollution. It has text and photos, but it **sits still**. She wants it to be awesome—just like her teacher's presentation where images popped and text moved!

Let's help her use Themes, Transitions, and Animations to bring her project to life.

Step 1: Safety First!

Before we change things, we make a copy so the original stays safe.

Step 2: Setting the Theme

A Theme is a set of colors, fonts, and effects. Go to the **Design Tab** and **pick one to change** the look of **ALL** your slides instantly!

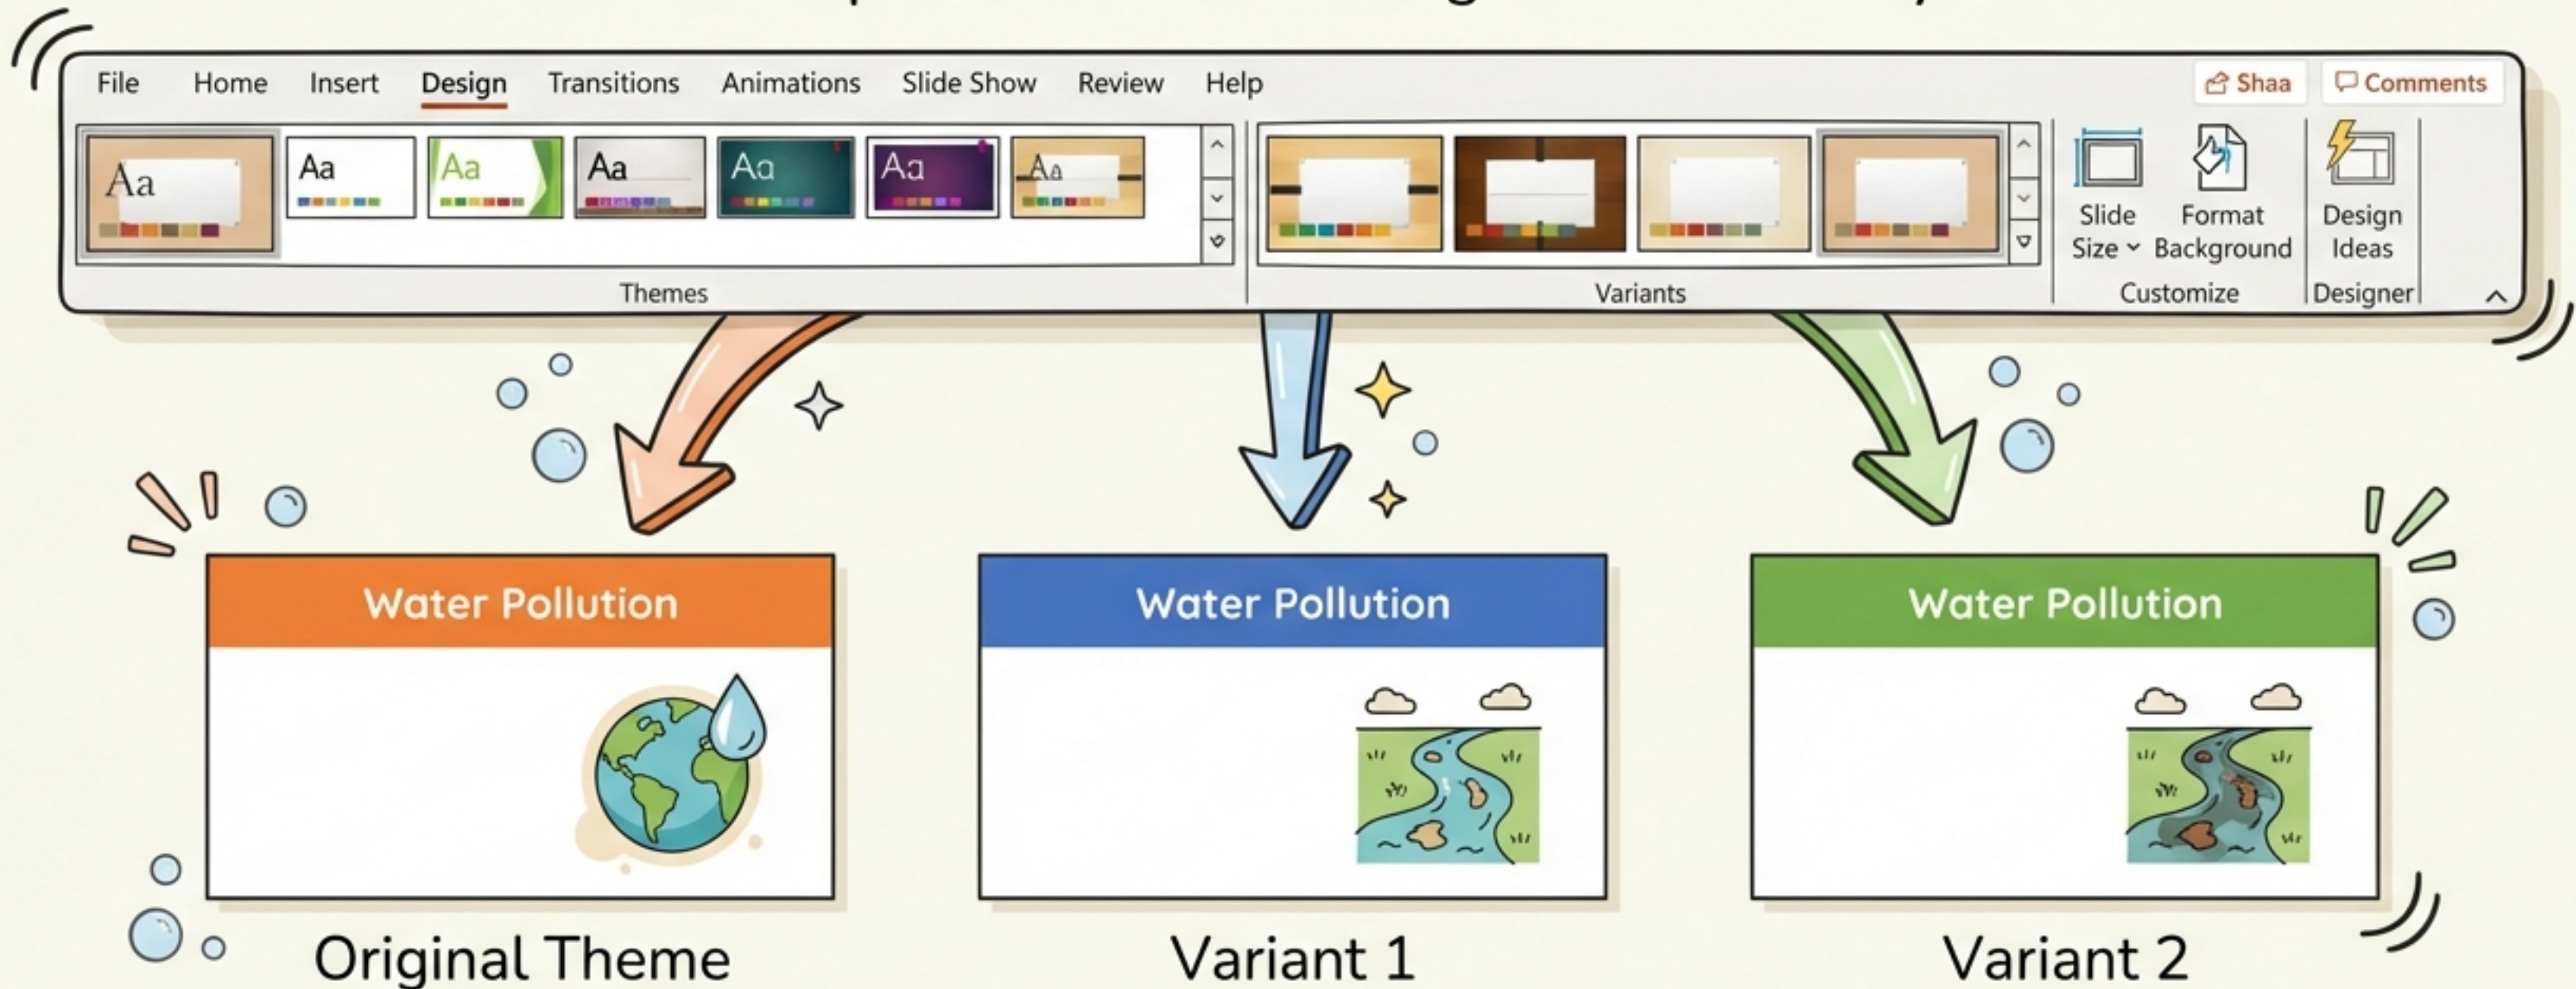

Before

After

Tweaking the Style with Variants

Like the layout but want different colors? Use **Variants**! They change the color palette without losing the theme's style.

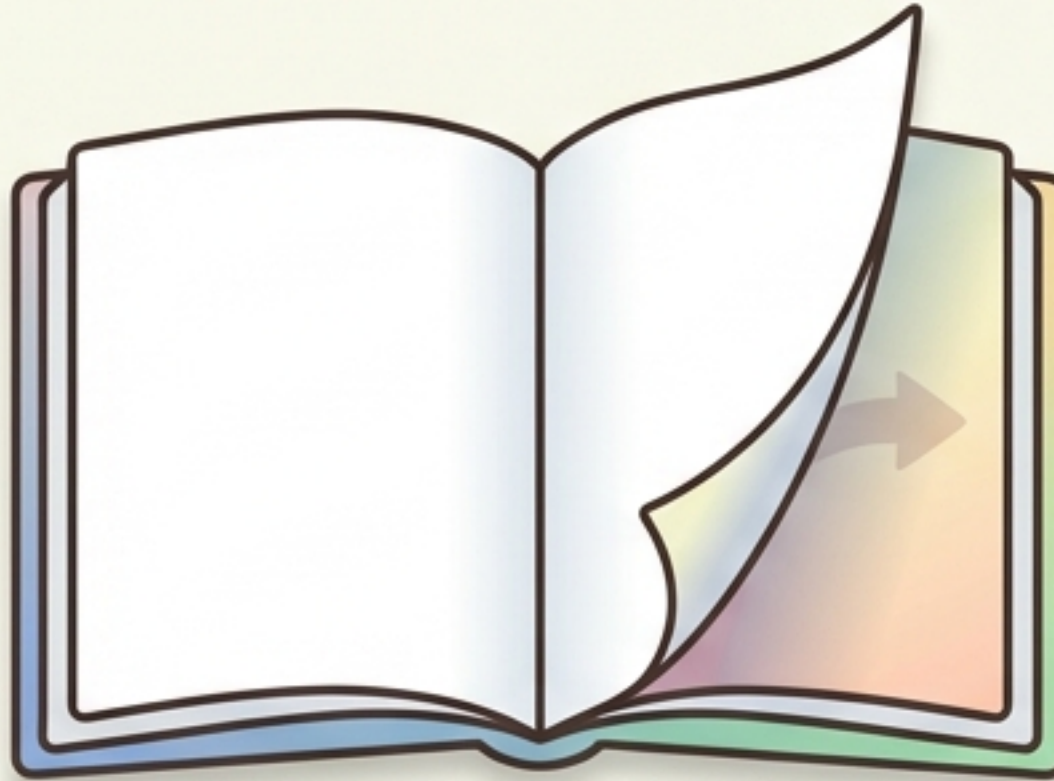

Transitions

A Transition is the effect you see when turning the page from one slide to the next.

Subtle

Simple and smooth effects like Fade or Cut.

Exciting

Flashy and engaging effects like Origami or Vortex.

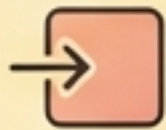

Dynamic

For placeholders and structure like Split or Gallery.

Fade

Push

Wipe

Morph

Split

Reveal

etc.

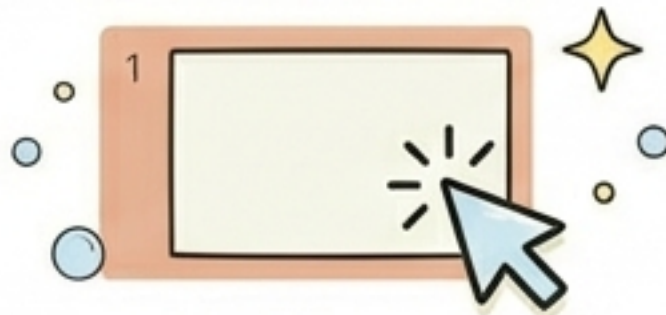

Nar

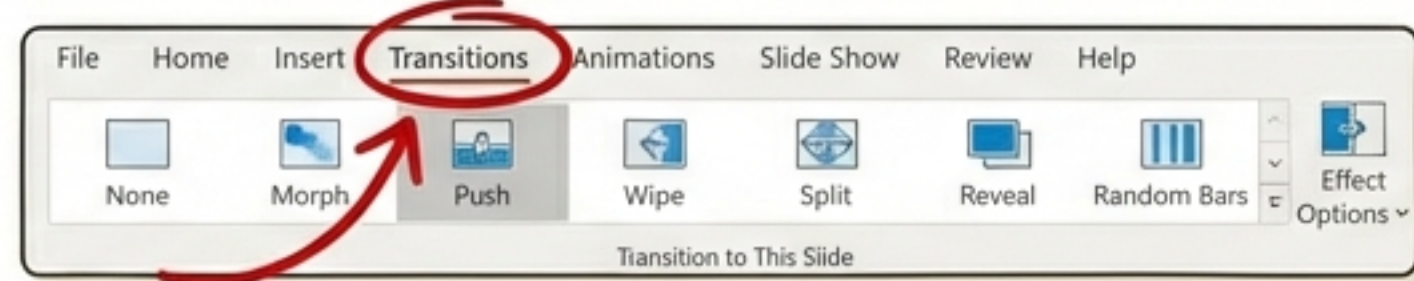

How to Add Transitions

How-To

1. Select the **Slide**.

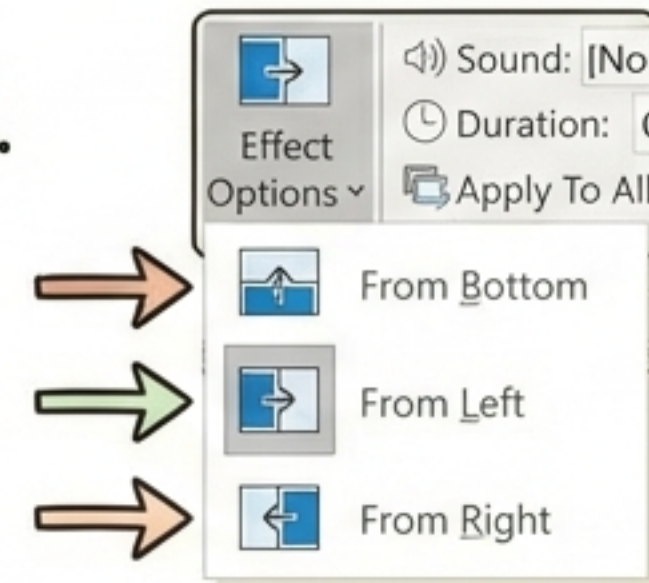

2. Click the **Transitions** Tab.

3. Pick a **Style**.

4. **Effect Options.**

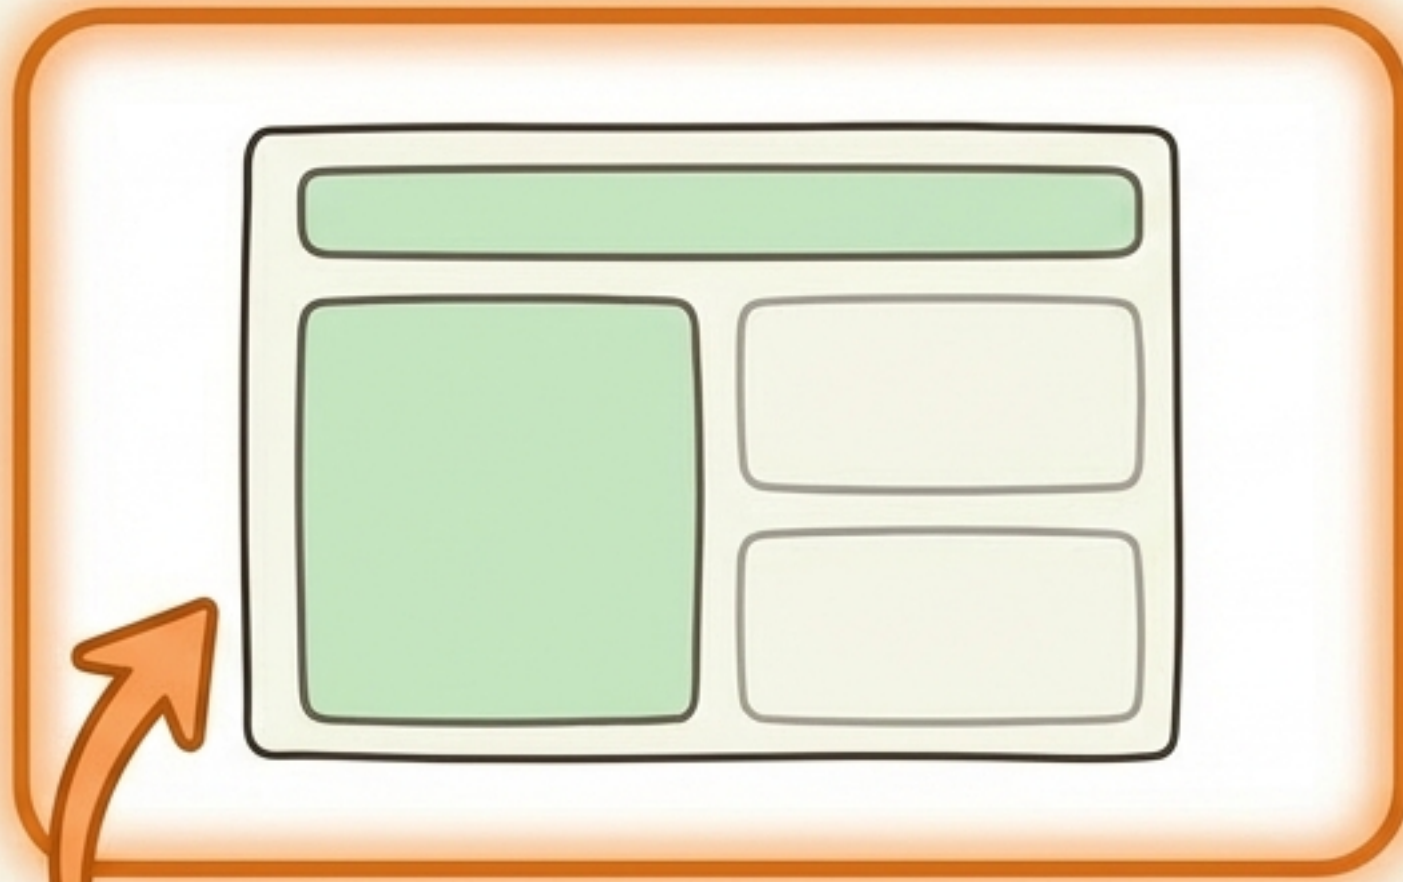

Pro Tip:

Use Effect Options to choose which direction the slide moves!

Step 4: Making Objects Move (Animation)

Transitions move the slide. Animations move the pictures and text inside the slide!
Go to the Animations Tab to start.

Transition = Whole Slide

Animation = Objects Inside

Animation Types: Entrance & Emphasis

Entrance

How an object comes onto the screen.
(e.g., Fly In, Float In).

Appear

Fade

Fly In

Float In

Split

Wipe

Shape

Wheel

Random Bars

Grow & Turn

Zoom

Zoom

Swivel

Bounce

Emphasis

The object is already there, but it wiggles, spins, or pulses to grab attention.

Pulse

Color Pulse

Teeter

Spin

Grow/Shrink

Desaturate

Lighten

Transparency

Wave

Animation Types: Exit & Motion Paths

Exit

How an object leaves the screen.
(e.g., Disappear, Zoom Out).

Disappear

Fade

Fly Out

Float Out

Split

Zoom

Swivel

Bounce

Motion Paths

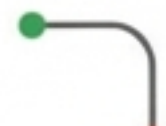

The object moves along a
line or shape you draw.

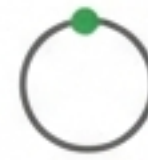

Lines

Arcs

Turns

Shapes

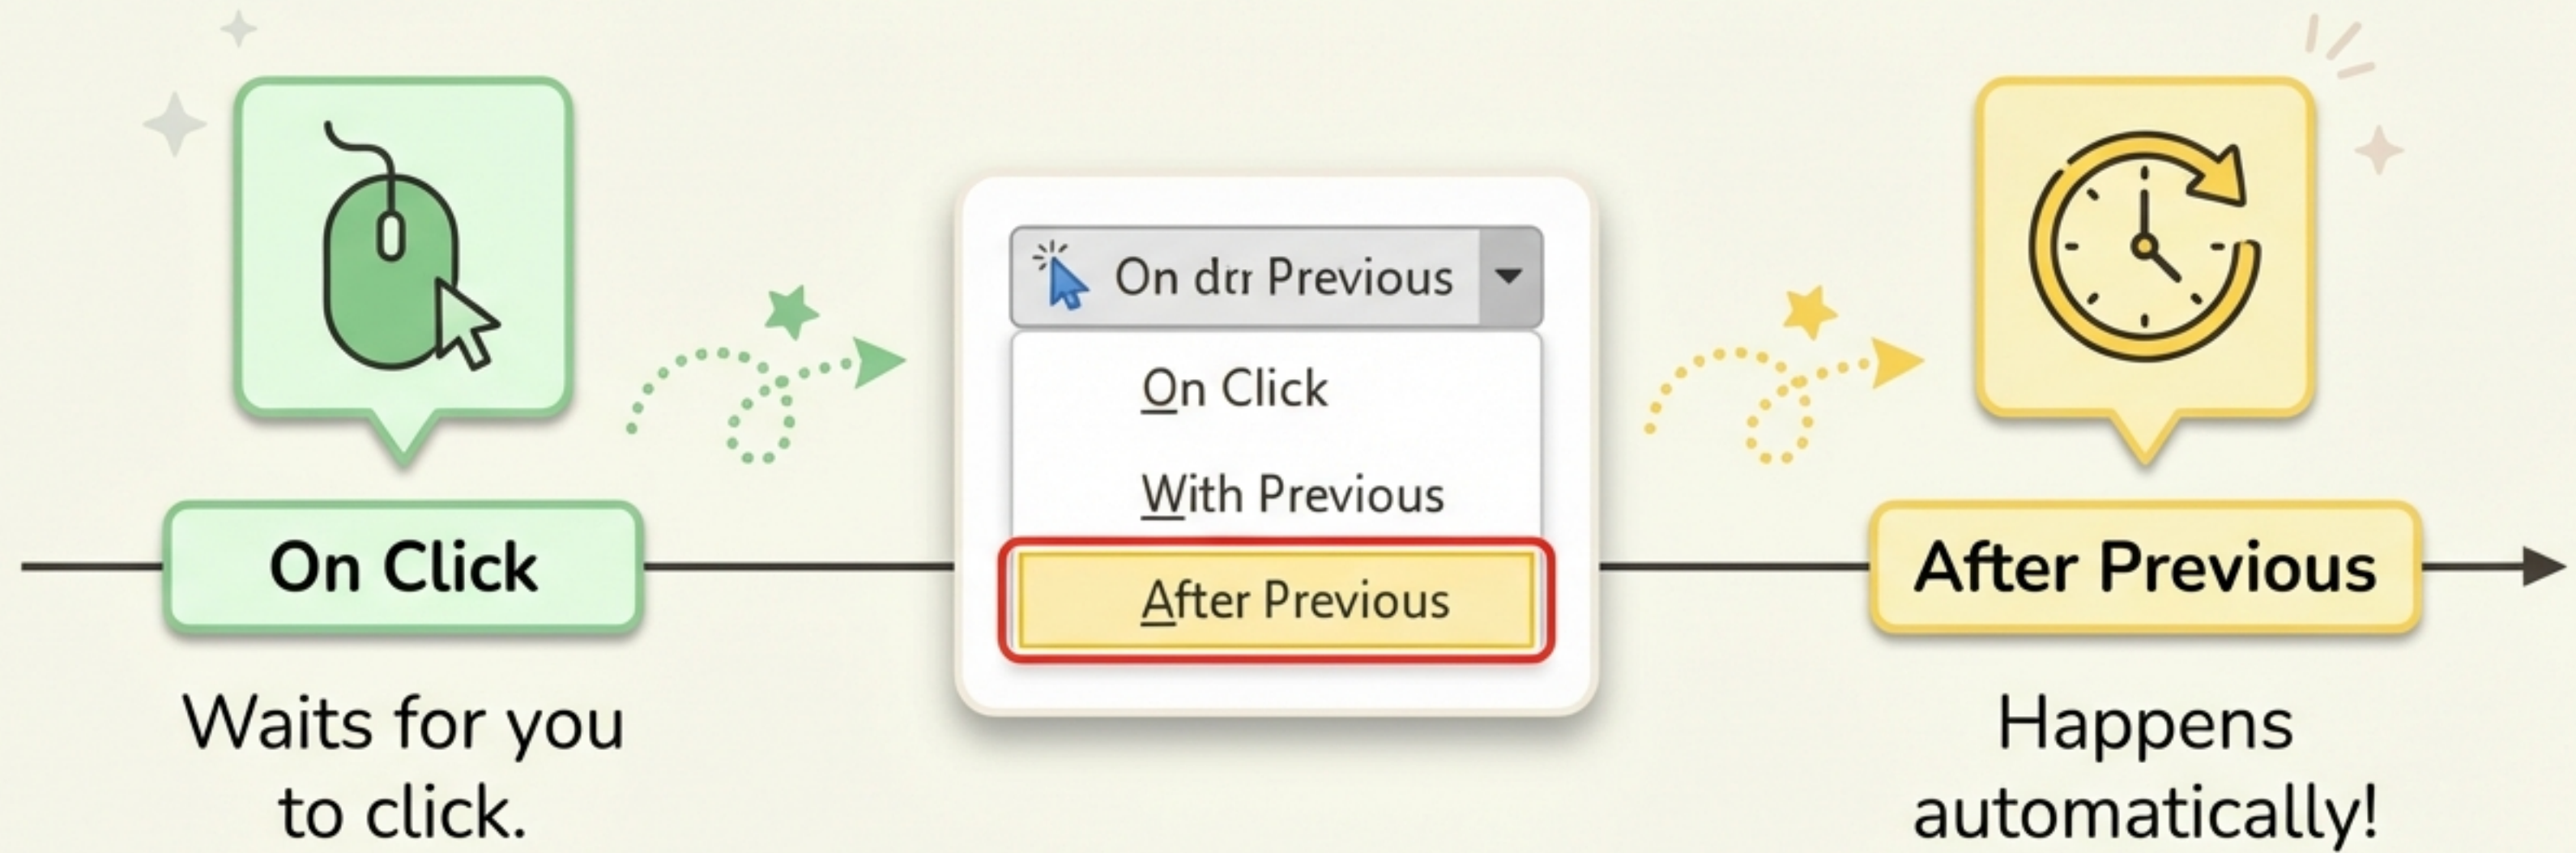

Loops

Custom Path

Controlling Time

When does the **magic happen**? You can control if **animations** start with a click or on their own.

Expert Advice: Don't Overdo It!

The **Golden Rule**: Use one subtle transition per slide. If everything is flying and spinning, nobody will read your message about **Water Pollution**!

Simple & Elegant

Simple & Elegant

Too Distracting!

Tech Flash: Vocabulary Recap

Theme

Colors & Fonts.

Variant

Color changes
for themes.

Transition

Slide movement.

Animation

Object
movement.

Quiz Time! What did you learn?

Question 1:
Which option
creates a
duplicate file?

Save

Save As

Highlight "Save As"
in green.

Question 2:
Which tab
contains
Themes?

Insert

Design

Highlight "Design"
in green.

Question 3:
True or False:
Animation is for
whole slides.

False!

You Are Ready!

Keya's presentation is now informative AND exciting.
Now it's your turn to **experiment!**

Keep Practicing! ☆
