

Data Analysis with Excel

Mission: The Birthday Party Project

Budget:
Rs. 2000

Mission Brief: The Mission: Help Rohan Plan a Party

Goal: Plan the ultimate birthday bash.

Problem: Prices from 3 vendors (Mahesh, Rajesh, Sagar).

Constraint: Strict budget of Rs. 2000.

Challenge: Find the best deal using Excel!

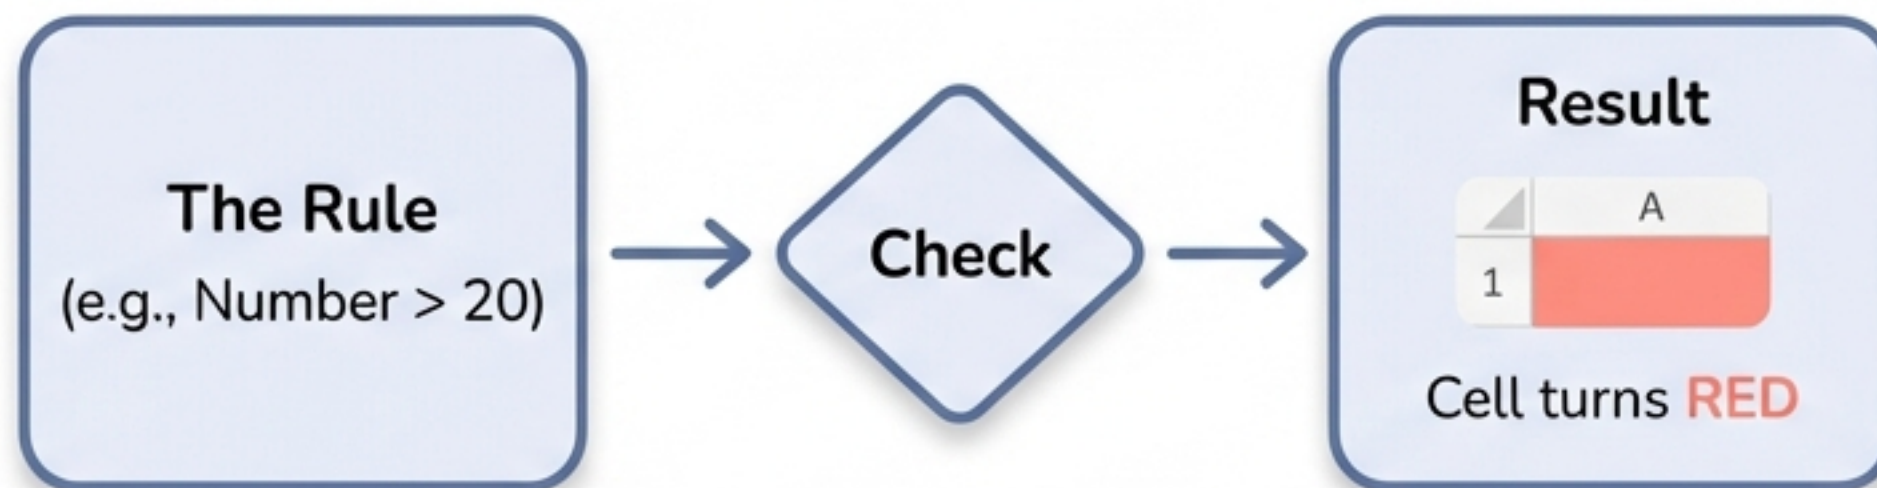

Setting Up the Spreadsheet

	B	C	D	E	F
1	Birthday Party Budget				
2					
4	Sr. No.	Party Supplies	Mahesh	Rajesh	Sugar
5					
6	1	Pizza (20 Slices)	1200	1000	900
7	2	Cake	350	300	400
8	3	Balloons	120	100	100
9	4	Ribbons	100	110	120
10	5	Chocolate Shake	500	400	550

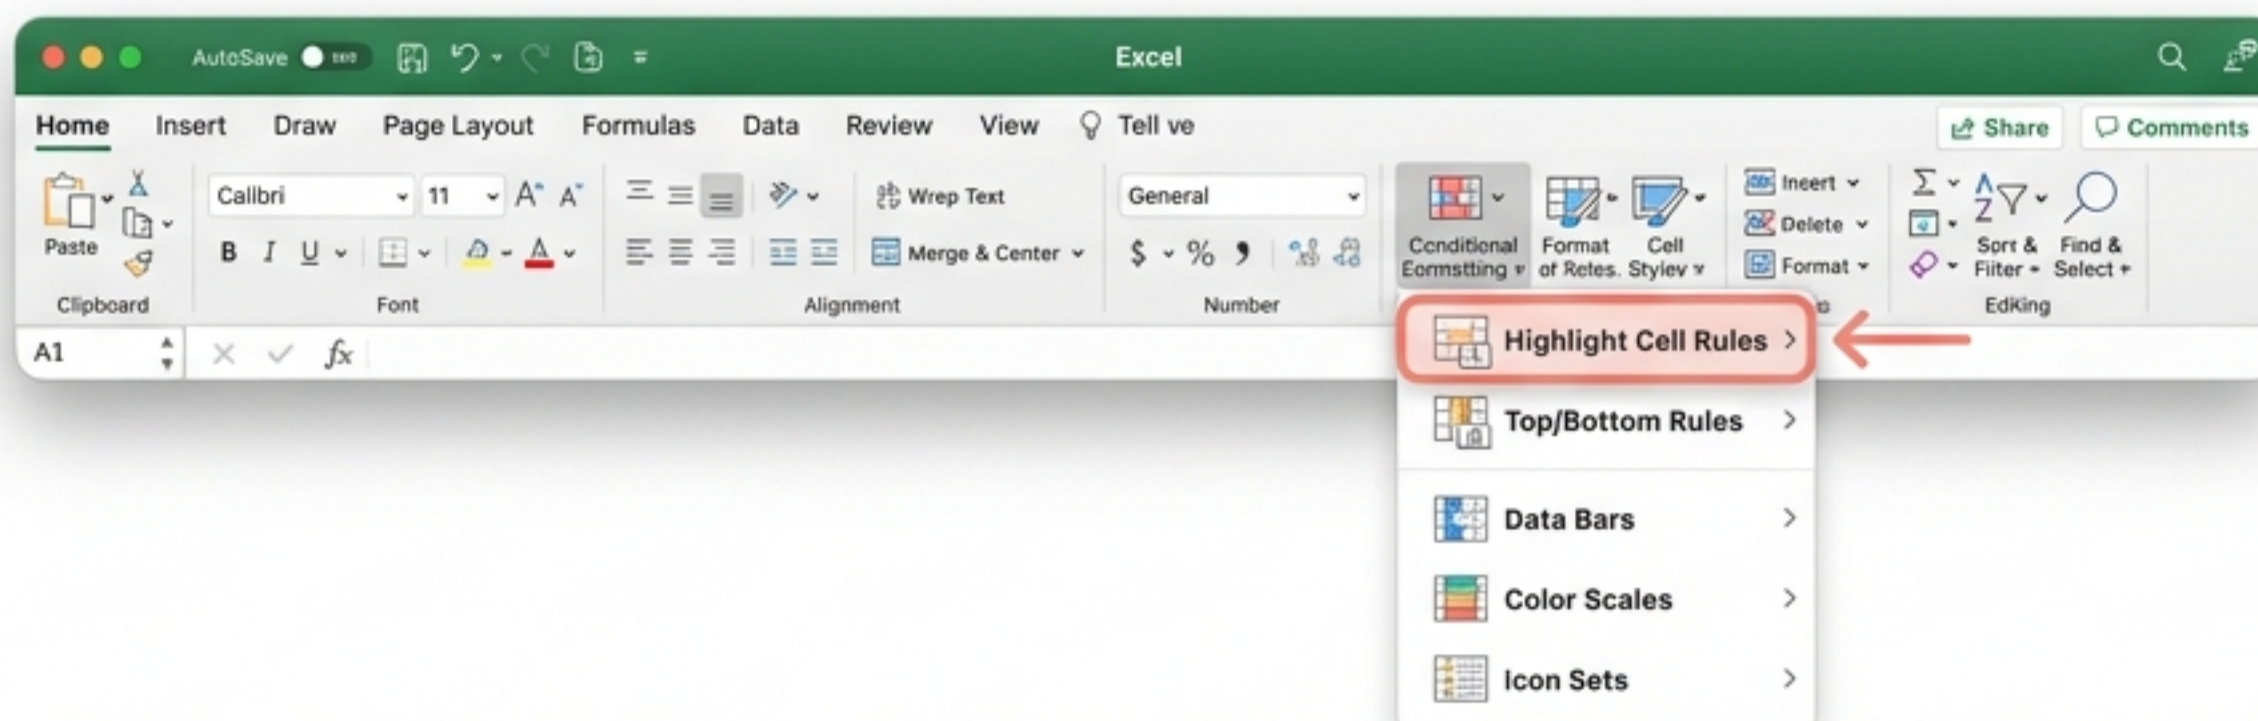

Column: Categories
(Vendors)

Row:
Entries
(Items)

Super Tool #1: Conditional Formatting

Definition: Changing the look of a cell IF it meets a certain rule.

Visualizing Prices with Color Scales

Maximum Value
(Most Expensive)

Medium Value

Minimum Value (Cheapest!)

Color Scales

More Scales...

We use this to instantly spot the high and low prices without doing math!

Let's Look at the Data!

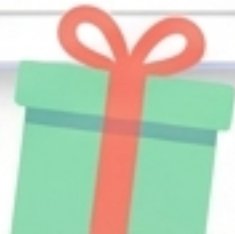

Birthday Party Budget				
Sr. No.	Party Supplies	Mahesh	Rajesh	Sagar
1	Pizza (20 Slices)	1200	1000	900
2	Cake	350	300	400
3	Balloons	120	130	100
4	Ribbons	100	110	120
5	Chocolate Shake	550	400	500
	Total Cost (Rs.)	2320	1940	2020

Detective Note

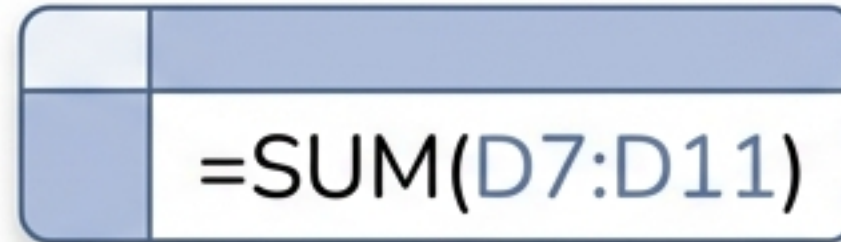

Look at Mahesh!
He has a lot of
RED. That means
he might be
expensive.

Are We Within Budget?

Step 1: Calculate Total

Total Cost
2320

Step 2: The Rules

Over Budget

Greater Than 2000

Safe

Less Than 2000

The Budget Verdict

Excel

	A	B	C	D
1		Mahesh	Rajesh	Sagar
2	Total Cost (Rs.)	2320	1940	2020
3				

Total Cost (Rs.)

2320

1940

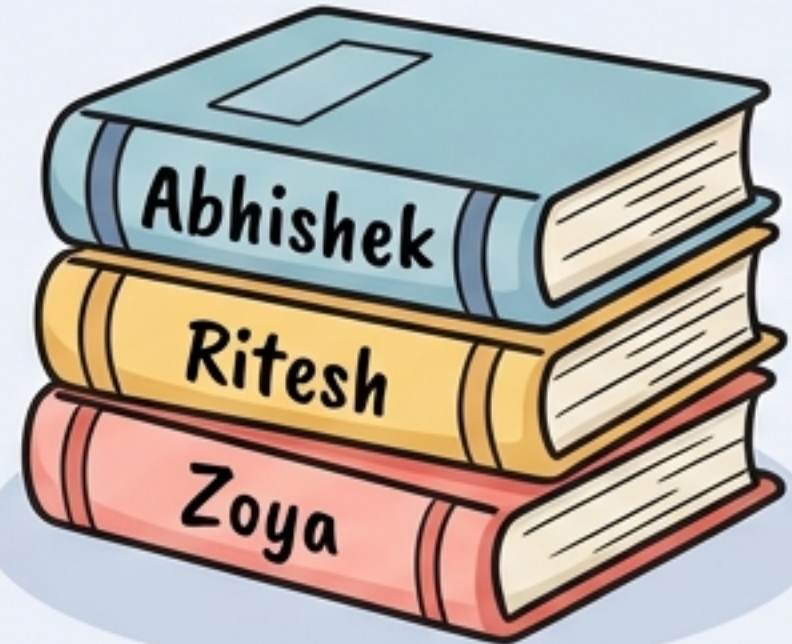

2020

Winner!
Under Rs. 2000

Super Tool #2: Sort

Before Sorting

After Sorting (A-Z)

Use **Sort** to arrange lists like Guest Names or Roll Numbers.

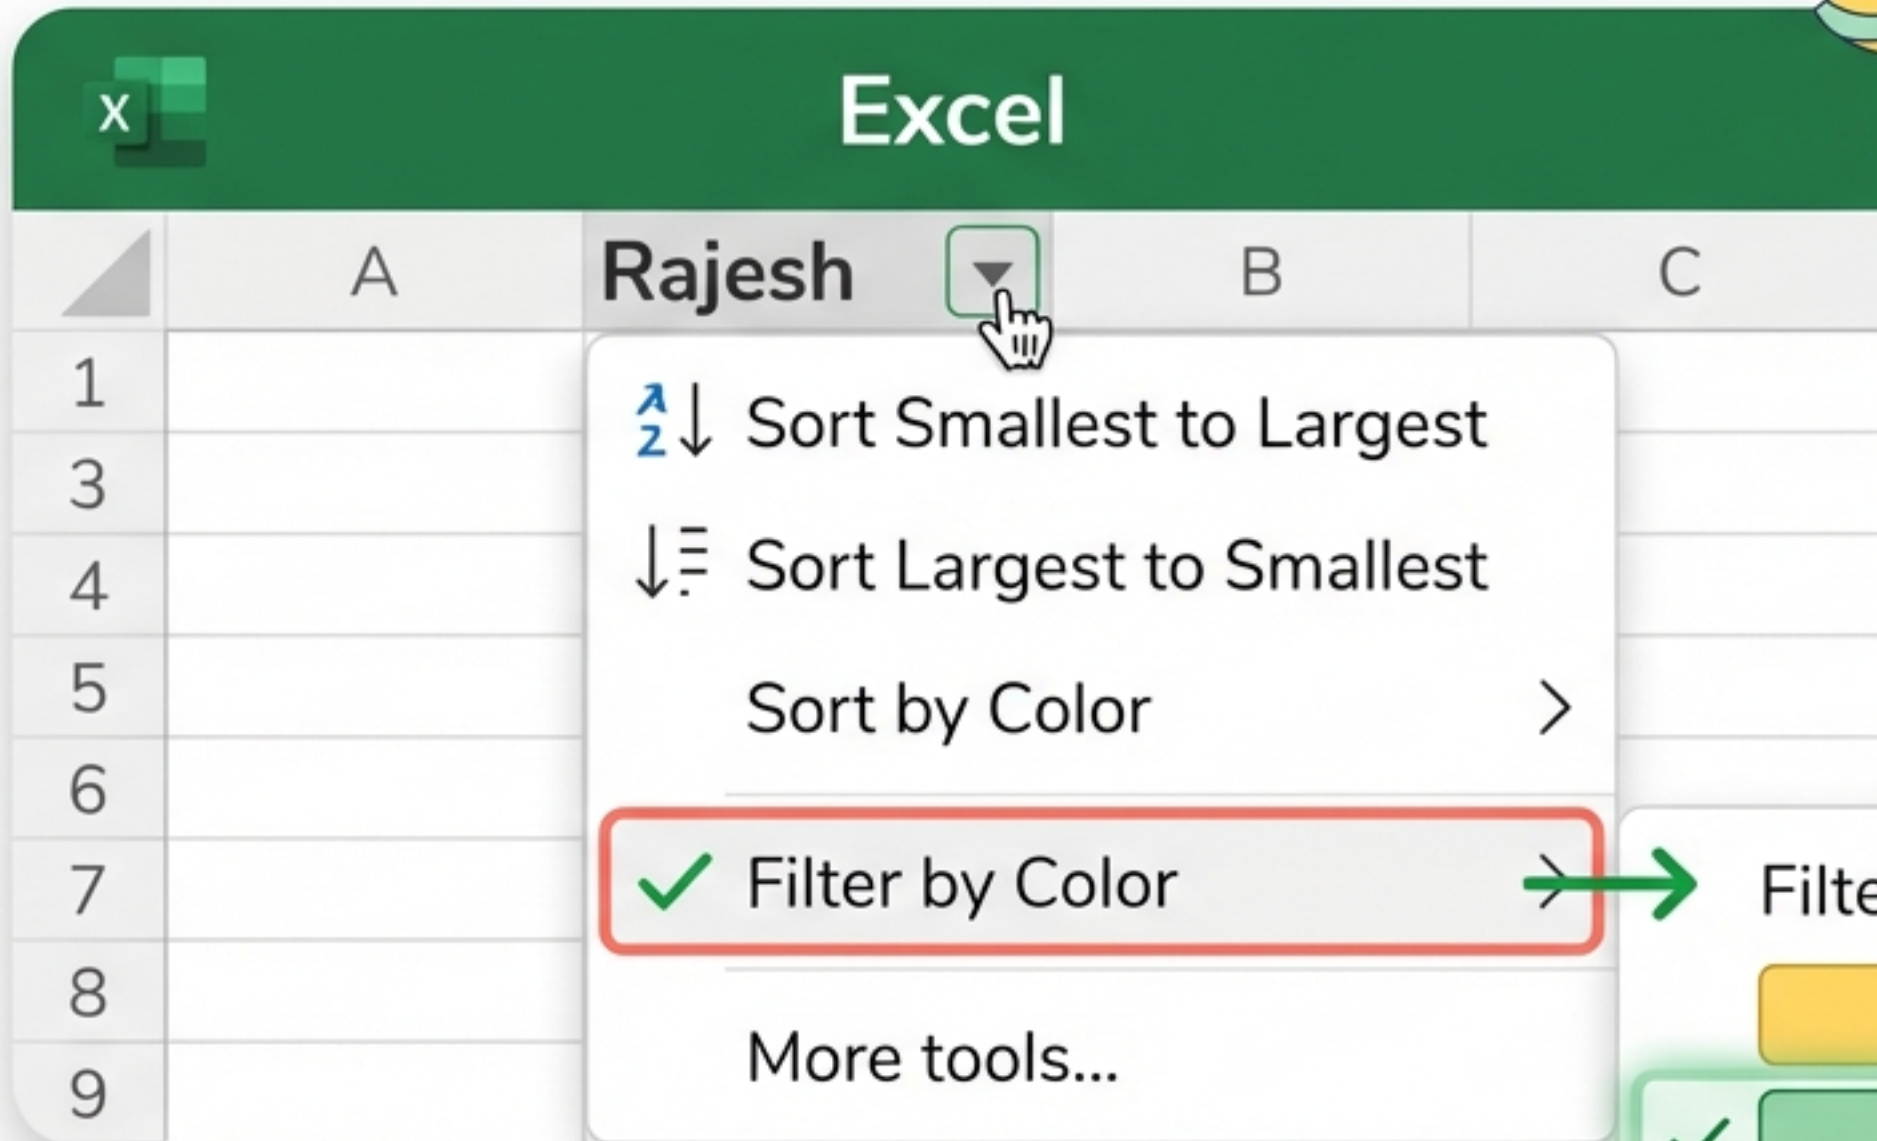

Super Tool #3: Filter

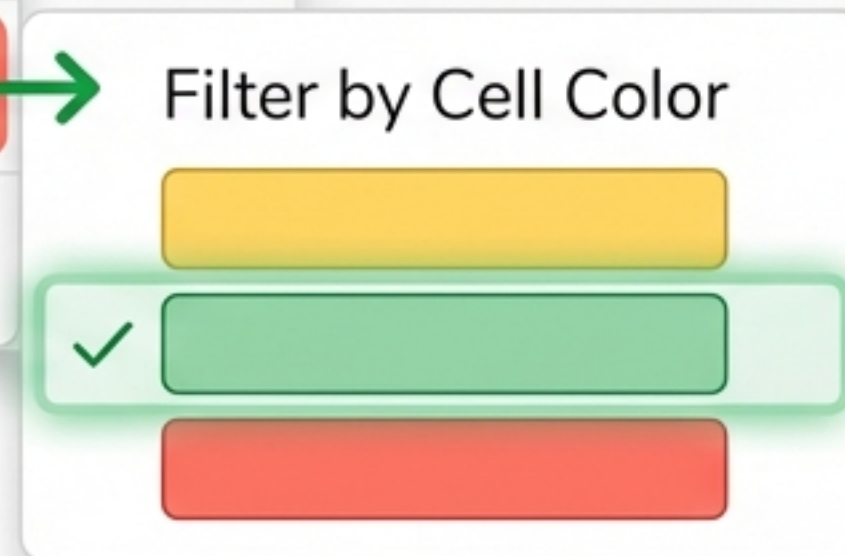

Filter hides what you don't need and shows only what you want. It does NOT delete data!

Name		Pet	

Filtering for the Best Value

We know Rajesh is under budget. Now, let's see how many cheap (**Green**) items he has!

Counting the Deals

	A	B	C	D
1	Sr. No.	Party Supplies	Rajesh	
2	2	Cake	300	
3	5	Chocolate Shake	400	
4				
5				

Count: 2

Rajesh has the lowest price on 2 items AND is under budget!

Final Decision: We Choose Rajesh!

Birthday Party Budget				
Sr. No.	Party Supplies	Mahesh	Rajesh	Sagar
1	Pizza (20 Slices)	1200	1000	900
2	Cake	350	300	400
3	Balloons	120	130	100
4	Ribbons	100	110	120
5	Chocolate Shake	550	400	500
	Total Cost (Rs.)	2320	1940	2020

Mahesh: Too Expensive (Rs. 2320)

Sagar: Over Budget (Rs. 2020)

Rajesh: Perfect! (Rs. 1940)

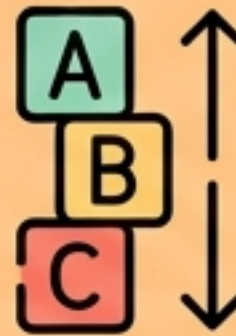

Don't forget to save your file as 'Birthday Party Budget'!

Tech Flash: Words to Remember

Conditional Formatting

Nunito Regular
Changing color
based on a rule.

Sort

Nunito Regular
Arranging data in
order (A-Z or 1-10).

Filter

Nunito Regular
Hiding data you
don't need.

Test Your Knowledge!

1. Sort is used to apply colors automatically.

False

2. Filter does not delete data; it only hides it.

True

3. Spreadsheets help us organize data.

True

Great Job, Data Detective!
